Land Use and Transportation Committee Clerk Erica Major,

As you are well aware, the San Francisco Board of Supervisors is about to vote on the adoption of our next housing element. This important plan will decide whether the next eight years in San Francisco continue the same trends of the last eight years—rising rents, worsening displacement, more homelessness—or whether we are able to move toward abundant and affordable housing for San Francisco.

But this issue doesn't end with your vote. The housing element is just a plan. It is up to you and your colleagues to actually implement it. I urge the Board of Supervisors to enact the policy changes in the housing element as legislation. The housing element process does not end when Governor Newsom's housing department writes a letter approving our plan. This process ends when our housing crisis ends. And I implore you to legislate to execute the plan and make real progress on that goal.

In particular, the Board of Supervisors should immediately enact the legislative reforms in the "Reducing Constraints on Housing Development, Maintenance, and Improvement" program. Many of the biggest issues with San Francisco's permitting process are embedded in city law. The Board of Supervisors has the power to fix those problems. If the Board fails to act now, the city will likely lose the pace necessary to meet its 2031 housing production goals. If San Francisco has fallen behind by 2027, the housing element includes program 8.1.5 which will require the city to enact greater changes that HCD gets to approve. Total failure to act means that the state will yank the certification of our housing element—and that would be a catastrophe for all the projects which rely on affordable housing and transit grants. A lot of heartburn can be avoided by taking action now.

- Ensure the completion of housing element action 1.1.1 to decide on a funding strategy for affordable housing necessary to meet the goal of 46,000 homes for low- and moderate-income households by 2031
- Enact all the legislative changes in Program 8, "Reducing Constraints on Housing Development, Maintenance, and Improvement", and exercise oversight over city departments responsible for implementing changes
- Expedite the study of a social housing program described in housing element action 1.1.11, so that we can have an affordable housing funding mechanism not dependent on the private market

Land Use and Transportation Committee Clerk Erica Major,

As you are well aware, the San Francisco Board of Supervisors is about to vote on the adoption of our next housing element. This important plan will decide whether the next eight years in San Francisco continue the same trends of the last eight years—rising rents, worsening displacement, more homelessness—or whether we are able to move toward abundant and affordable housing for San Francisco.

But this issue doesn't end with your vote. The housing element is just a plan. It is up to you and your colleagues to actually implement it. I urge the Board of Supervisors to enact the policy changes in the housing element as legislation. The housing element process does not end when Governor Newsom's housing department writes a letter approving our plan. This process ends when our housing crisis ends. And I implore you to legislate to execute the plan and make real progress on that goal.

In particular, the Board of Supervisors should immediately enact the legislative reforms in the "Reducing Constraints on Housing Development, Maintenance, and Improvement" program. Many of the biggest issues with San Francisco's permitting process are embedded in city law. The Board of Supervisors has the power to fix those problems. If the Board fails to act now, the city will likely lose the pace necessary to meet its 2031 housing production goals. If San Francisco has fallen behind by 2027, the housing element includes program 8.1.5 which will require the city to enact greater changes that HCD gets to approve. Total failure to act means that the state will yank the certification of our housing element—and that would be a catastrophe for all the projects which rely on affordable housing and transit grants. A lot of heartburn can be avoided by taking action now.

- Ensure the completion of housing element action 1.1.1 to decide on a funding strategy for affordable housing necessary to meet the goal of 46,000 homes for low- and moderate-income households by 2031
- Enact all the legislative changes in Program 8, "Reducing Constraints on Housing Development, Maintenance, and Improvement", and exercise oversight over city departments responsible for implementing changes
- Expedite the study of a social housing program described in housing element action 1.1.11, so that we can have an affordable housing funding mechanism not dependent on the private market
