If any box is	s checked be	elow, an Environmental Evaluation Applic	cation is required.			
	Air Quality: Would the project add new sensitive receptors (specifically, schools, day care facilities,					
	hospitals, residential dwellings, and senior-care facilities) within an Air Pollution Exposure Zone?					
	Does the project have the potential to emit substantial pollutant concentrations (e.g., backup diesel					
	generators, heavy industry, diesel trucks)? <i>Exceptions: do not check box if the applicant presents</i>					
	documentation of enrollment in the San Francisco Department of Public Health (DPH) Article 38 program and					
	the project would not have the potential to emit substantial pollutant concentrations. (refer to EP _ArcMap > CEQA Catex Determination Layers > Air Pollutant Exposure Zone)					
				suspected of containing		
	<b>Hazardous Materials:</b> If the project site is located on the Maher map or is suspected of containing hazardous materials (based on a previous use such as gas station, auto repair, dry cleaners, or heavy					
	manufacturing, or a site with underground storage tanks): Would the project involve 50 cubic yards					
	or more of soil disturbance - or a change of use from industrial to residential? If yes, this box must be					
	checked and the project applicant must submit an Environmental Application with a Phase I					
	Environmental Site Assessment. Exceptions: do not check box if the applicant presents documentation of					
	enrollment in the San Francisco Department of Public Health (DPH) Maher program, a DPH waiver from the

	Maher program, or other documentation from Environmental Planning staff that hazardous material effects would be less than significant (refer to EP_ArcMap > Maher layer).			
	<b>Transportation:</b> Does the project create six (6) or more net new parking spaces or residential units? Does the project have the potential to adversely affect transit, pedestrian and/or bicycle safety (hazards) or the adequacy of nearby transit, pedestrian and/or bicycle facilities?			
	Archeological Resources: Would the project result in soil disturbance/modification greater than two (2) feet below grade in an archeological sensitive area or eight (8) feet in a non-archeological sensitive area? (refer to EP_ArcMap > CEQA Catex Determination Layers > Archeological Sensitive Area)			
	<b>Subdivision/Lot Line Adjustment:</b> Does the project site involve a subdivision or lot line adjustment on a lot with a slope average of 20% or more? (refer to EP_ArcMap > CEQA Catex Determination Layers > Topography)			
	<b>Slope = or &gt; 20%:</b> Does the project involve any of the following: (1) square footage expansion greater than 1,000 sq. ft. outside of the existing building footprint, (2) excavation of 50 cubic yards or more of soil, (3) new construction? (refer to EP_ArcMap > CEQA Catex Determination Layers > Topography) <b>If box is checked, a geotechnical report is required.</b>			
	<b>Seismic:</b> Landslide Zone: Does the project involve any of the following: (1) square footage expansion greater than 1,000 sq. ft. outside of the existing building footprint, (2) excavation of 50 cubic yards or more of soil, (3) new construction? (refer to EP_ArcMap > CEQA Catex Determination Layers > Seismic Hazard Zones) If box is checked, a geotechnical report is required.			
	<b>Seismic: Liquefaction Zone:</b> Does the project involve any of the following: (1) square footage expansion greater than 1,000 sq. ft. outside of the existing building footprint, (2) excavation of 50 cubic yards or more of soil, (3) new construction? (refer to EP_ArcMap > CEQA Catex Determination Layers > Seismic Hazard Zones) If box is checked, a geotechnical report will likely be required.			
	are checked above, GO TO STEP 3. <u>If one or more boxes are checked above, an Environmental Application is required, unless reviewed by an Environmental Planner.</u>
