ASSURANCES - NON-CONSTRUCTION PROGRAMS

P ublic reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0040), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant, I certify that the applicant:

1. Has the legal authority to apply for Federal assistance and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project cost) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States and, if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§4728-4763) relating to prescribed standards for merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).

6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C.§§1681- 1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U. S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee- 3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and, (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply, as applicable, with provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§276a to 276a-7), the Copeland Act (40 U.S.C. §276c and 18 U.S.C. §874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§327- 333), regarding labor standards for federally-assisted construction subagreements.

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.); (f) conformity of Federal actions to State (Clean Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93- 205).

12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. §470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. §§469a-1 et seq.).

14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. §§2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§4801 et seq.) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.

19. Will comply with the requirements of Section 106(g) of the Trafficking Victims Protection Act (TVPA) of 2000, as amended (22 U.S.C. 7104) which prohibits grant award recipients or a sub-recipient from (1) Engaging in severe forms of trafficking in persons during the period of time that the award is in effect (2) Procuring a commercial sex act during the period of time that the award is in effect or (3) Using forced labor in the performance of the award or subawards under the award.

Document Title:	Project Abstract

Abstract
In 2013 SF launched the "Getting to Zero SF" initiative with the goals of zero new HIV infections, zero HIV-related deaths, and zero HIV-related stigma and discrimination. SF has made substantial progress toward these goals and has improved each step along the HIV care continuum; however, surveillance data show that significant disparities in linkage, retention, and viral suppression among people living with HIV remain. African-Americans and Latinos, trans and cis-gender women, people who inject drugs, and people experiencing homelessness are less likely to be virally suppressed. In terms of new diagnoses, people of color make up an increasingly higher percentage of new diagnoses. SFDPH's Component A proposal expands on the Department of Public Health's (SFDPH's) commitment to fully integrate surveillance and prevention programs. It supports strategies that have contributed to the dramatically decreasing HIV incidence in recent years, and implements shifts needed to align with the current epidemiology, including a much stronger equity focus. SFDPH's Component B proposal describes *Project OPT-IN* ("Opt-in" to Outreach, Prevention and Treatment) – an innovative, broadly collaborative project serving those whose lives are deeply affected by the social determinants of health, such as people experiencing homelessness. We must do a better job with these groups if we hope to "get to zero," for all SF populations.

Document Title:	Indirect Cost Rate Agreement

DATE: February 12, 2018

TO: Grants Managers
Naveena Bobba
Jennifer Boffi

FROM: Drew Murrell
Finance Manager

RE: FY18-19 Overhead Costs

Effective immediately, the Indirect Cost rate for Population Health & Prevention-Public Health Division is 25.00% of salaries and benefits. This rate was based on FY 2015-16 costs and includes the COWCAP allocation (FY 17-18) based on the OMB Circular 2 CRF Part 200 Cost Allocation Plan. Public Health Division Grant Managers should use 25.00% indirect cost rate on all current grants and new or renewal grant applications, unless the grantor has specified a maximum rate lower than 25.00% .

Other Divisions in the Health Department should add the following costs to their divisions' internal indirect costs in order to reflect total indirect costs:

	Amount
Mental Health	5,216,680
Substance Abuse	1,157,921
Primary Care	4,580,287
Health at Home	615,957
Jail Health	1,363,697
Laguna Honda Hospital	15,076,704
ZSFG	38,842,994

ATTACHMENT H:
Certification of Compliance Statement

CERTIFICATION OF COMPLIANCE WITH THE NCHHSTP DATA SECURITY AND CONFIDENTIALITY STANDARDS AND DESIGNATION OF OVERALL RESPONSIBLE PARTY (ORP)

We certify our compliance with the National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention's (NCHHSTP) Data Security and Confidentiality Guidelines for HIV, Viral Hepatitis, Sexually Transmitted Disease, and Tuberculosis Programs (2011). We acknowledge that all standards included in the NCHHSTP Data Security and Confidentiality Guidelines have been implemented for the HIV surveillance and prevention program funded by FOA PS18-1802 unless otherwise justified in an attachment to this statement. We acknowledge that all standards included in the NCHHSTP Data Security and Confidentiality Guidelines have been implemented for programs with which we share data, including NCHHSTP programs unless otherwise justified in an attachment to this statement. We agree to apply the standards to all local/state staff and contractors funded through NCHHSTP that have access to and/or maintain confidential, personally identifiable public health data. We ensure all sites where applicable public health data are maintained are informed about the standards. Documentation of required local data policies and procedures is on file with the Overall Responsible Party(s) and available upon request.

Please check all that apply:

- ☑ In full compliance with the Data Security and Confidentiality Guidelines for HIV, Viral Hepatitis, Sexually Transmitted Disease, and Tuberculosis Programs (2011) for HIV surveillance, prevention, and other NCHHSTP funded programs; there are no attachments to this statement.

- ☐ In full compliance with the Data Security and Confidentiality Guidelines for HIV, Viral Hepatitis, Sexually Transmitted Disease, and Tuberculosis Programs (2011) for either HIV surveillance or HIV prevention only (not both) and a justification is provided in an attachment to this statement.

- ☐ Pursuing compliance with the Data Security and Confidentiality Guidelines for HIV, Viral Hepatitis, Sexually Transmitted Disease, and Tuberculosis Programs (2011) for HIV surveillance and prevention programs; and a justification is provided in an attachment to this statement.

- ☐ Pursuing compliance with the Data Security and Confidentiality Guidelines for HIV, Viral Hepatitis, Sexually Transmitted Disease, and Tuberculosis Programs (2011) for other NCHHSTP funded programs to facilitate sharing and use of surveillance data and a justification is provided in an attachment to this statement.

Document Title:	Project Narrative

PROJECT NARRATIVE

Directions: Please answer the following questions for your Annual Performance Report (APR). Attach in the "Miscellaneous Attachments" section and name document "Project Narrative." Attach the document as a PDF file.

The Annual Performance Report requires the recipient to report on progress made during the current reporting period, **January 1, 2019 – June 30, 2019** and to report on proposed programmatic activity for the new budget period (Year 3) **January 1, 2020 – December 31, 2020**. ***Unless otherwise noted, responses to the questions in this guidance should accurately reflect program activities conducted during the reporting period of January 1, 2019 – June 30, 2019.***

The following questions are core questions to be used for programmatic and data reporting for this reporting period.

SECTION I: COMPONENT A: Core Strategies and Activities for Integrated HIV Surveillance and Prevention

Please provide responses to the following questions for each of the required core strategies and activities under Component A.

Strategy 1. Systematic collection, analysis, interpretation, and dissemination of HIV data for surveillance and prevention program monitoring and evaluation

Activity 1.A. HIV surveillance
Collect HIV case data, including (but not limited to) data on CD4 cell count, HIV viral load, molecular laboratory test results, vital status, and geocoding.

- 1.1. Improved completeness, timeliness, and quality of HIV surveillance data
- 1.2. Improved monitoring of trends in HIV infection

1.5. Increased ability to describe the geographic distribution of HIV and understand the social determinants of health in relation to HIV and HIV-related health disparities

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   SFDPH continues to conduct ongoing HIV case surveillance activities including collecting CD4, viral load, molecular laboratory test results, vital status and geocoding. Data are reviewed and evaluated for completeness, timeliness and quality on an ongoing basis. Evaluation outcomes for 2017 diagnoses find that completeness of case reporting was 98% and 97% were reported within six months of diagnosis,100% of cases are entered without critical error or required fields missing, 97% have complete risk factor ascertainment, 83% have antiretroviral use history, 52% of cases have a lab-documented negative HIV test, and 98% of deaths occurred in 2016 have cause of death information.

   HIV surveillance data are analyzed and shared with HIV prevention programs to identify and monitor trends among populations at risk for HIV, persons living with both diagnosed and undiagnosed HIV, and disparities along the HIV Care Continuum. HIV surveillance data are shared with clinical and

community-based providers, San Francisco's integrated HIV prevention and care planning group (the HIV Community Planning Council(HCPC)), the San Francisco Health Commission and the San Francisco Getting to Zero Consortium among others. In addition, HIV surveillance data are widely disseminated in annual reports, published manuscripts, at scientific conferences and with colleagues both nationally and internationally. Using a data-driven approach, HIV prevention strategies are adjusted to align with the most current epidemiologic trends, develop policy, allocate resources and plan and implement services.

San Francisco cases are geocoded and data are used to describe the geographic distribution of HIV and understand the social determinants of health including housing status and poverty. In addition, San Francisco started using HIV-TRACE in January 2018 to monitor HIV transmission clusters. Since then, we have been monitoring transmission clusters and have created an algorithm to prioritize identified clusters for investigation and care navigation services based on geographic location of cases (including homeless encampments), recency of diagnosis, housing status, race, injection drug use and viral suppression. We are working closely with the SFDPH Linkage Integration Navigation, Comprehensive Services (LINCS) team to continually modify the algorithm to identify persons most in need of assistance linking or re-linking to care, establishing viral suppression or reaching out to their sexual or needle-sharing partners.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in approach, contracts, objectives, staffing/personnel, funding resources, etc.). None noted

Activity 1.B. HIV prevention program monitoring & evaluation
Collect data to monitor and evaluate HIV prevention programs

- 1.6. Improved completeness, timeliness, and quality of HIV prevention program data (Outcome)

Successes:
HIV testing is the only program activity funded under PS18-1802 and the funded sites, SFDPH City Clinic and Jail Health Services, are SFDPH clinical sites which collect truncated sets of data.

EvaluationWeb is being used as the repository of and reporting system for HIV testing data for both 18-1802 funded and non-18-1802 funded programs. Some non-funded agencies key in HIV testing data, others upload. SFDPH City Clinic enters data into its own system, ISCHTR, Jail Health

Services enters its data into the SFDPH electronic medical record. In both cases, these datasets are truncated and ARCHES uploads them into EvalWeb biannually. This system is solidly in place and functional over the life of PS12-1201 and will continue into PS18-1802.

For agencies and programs not funded by PS18-1802, EvalWeb is also used as the database for HIV testing, in some cases uploaded and keyed in in others. This includes current local questions on PrEP that are being evaluated for their compatibility with 18-1802 fields being used in 2019. Some agencies also use EvalWeb for non-HIV testing data or have their own data collection and reporting processes in place.

Challenges: None noted.

Anticipated Changes:
San Francisco is working with Luther Consulting on implementing the updated variable set for EvalWeb testing data and different options are being discussed. SFDPH does not anticipate any challenges and expects to be prepared for the January 1, 2019 EvalWeb rollout.

4. Complete Laboratory Reporting
   a. Has the jurisdiction implemented and maintained activities to support complete laboratory reporting of all HIV-related tests? × Yes ☐ No
   b. Was the volume of CD4 and viral load laboratory test results received between January-June 2019 similar (<= 5% change) to the volume received for the six months prior (July-December 2018)? ×Yes ☐ No
   c. Were all CD4 and viral load laboratory test results reported to the Health Department between January-June 2019 submitted to CDC each month? ×Yes ☐ No
   If you responded "No" to questions 4a, b or c above, please explain
5. Evaluation Performance Measurement Plan
   a. Please upload your updated Evaluation Performance Measurement Plan (EPMP) for Year 2 utilizing the new abbreviated template as a miscellaneous attachment with your APR to www.grantsolutions.gov by the due date, August 30, 2019. You may update your Year 1 EPMP or use the new abbreviated EPMP template for this submission.

Strategy 2. Identification of persons with HIV infection and uninfected persons at risk for HIV infection

Activity 2.A. Conduct HIV testing
- 2.1. Increased HIV testing among persons at risk for HIV infection (Output)
- 2.2. Increased number of persons living with HIV infection who are aware of their HIV status (Outcome)
- 2.3. Increased identification of HIV-negative persons at risk for HIV infection (Output)

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   SFDPH continues to support high-volume, targeted testing to high-prevalence populations (MSM,

PWID, and trans women) and casts a wide net to reach populations not yet reached with the current testing strategy. Testing is incorporated into holistic "Special Projects" for prioritized populations i.e. AAMSM, Latino MSM, transwomen as well as integrated into programs providing substance use treatment. We have added a foucus on those experiencing homelessness. We had four individuals in a short period of time who were experiencing homelessness.

Using the CDC provided SAS program, we estimate that 6% of persons living with HIV in San Francisco are unaware of their infection. RNA pooling and 4th generation rapid testing continue to enhance our testing strategy by making individuals aware of their acute HIV status, reducing risk to partners and linking to care faster. SFDPH has reinvigorated medically based opt-out HIV testing and work to find late testers earlier in their course of infection as well as the estimated 6% of PLWH who are unaware of their infection.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in venues, contracts, target populations, recruitment strategies, testing technologies or algorithms, objectives, staffing/personnel, funding resources, etc.). No changes anticipated.

Activity 2.B. Conduct HIV partner services

- 2.4. Increased participation in HIV partner services among persons with diagnosed HIV infection, identified through PS18-1802-funded testing (Outcome)
- 2.5. Increased participation in HIV partner services among persons with diagnosed HIV infection, identified throughout the jurisdiction (Outcome)
- 2.6. Increased partner elicitation through HIV partner services interviews of index patients with newly diagnosed HIV infection (Outcome)
- 2.7. Increased notification and HIV testing of partners identified through HIV partner services (Output)
- 2.8. Increased number of partners living with HIV infection who are aware of their HIV status (Outcome)
- 2.9. Improved laboratory reporting to HIV surveillance (Output)

Successes:

Partner services provided for persons diagnosed with HIV-infection are not stratified by funding sources and efforts to increase participation are the same for all clients. Partners services are offered to all clients newly diagnosed with HIV. Partner services are also offered to clients who are both not-in-care and working with a LINCS navigator. Efforts to increase participation in partner services include working closely with a partner CBO (SFAF) such that CBO staff counsel patients that they will be contacted by a LINCS DIS who will offer partner services, and encourage patients to participate in the process.

Challenges: None noted.

Anticipated Changes: No anticipated changes.

4. For HIV testing related activities associated with Strategy 2, your submitted National HIV Monitoring and Evaluation (NHM&E) data in EvaluationWeb will be used to assess the jurisdiction's progress for Q1 and Q2 during Year 2. Please include any additional comments and/or clarifications for the submitted NHM&E data and/or the PS18-1802 Data Tables within EvaluationWeb. Also, include any justification(s) for partial/late data submission. Information provided will be used for consideration during the review process.
   × No additional comments and/or clarifications needed.
   ☐ Additional comments and/or clarifications

Strategy 3. Development, maintenance, and implementation of plans to respond to HIV transmission clusters and outbreaks

Activity 3.A. Identify and investigate HIV transmission clusters and outbreaks
3.1. Improved early identification and investigation of HIV transmission clusters and outbreaks (Outcome)

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   SFDPH has implemented Secure HIV-TRACE to analyze HIV nucleotide sequences and identify molecular clusters at the local level. We also conduct time-space analyses to detect diagnoses clustered in time and space. We have been sharing information from HIV-TRACE and time-space analyses with LINCS for cluster investigation and will continue to utilize the services of the LINCS navigators to reach out to persons needing assistance re-linking to care and/or who are identified as being part of growing transmission cluster to interrupt further transmission.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in venues, contracts, target populations, testing technologies or algorithms, implementation strategies, objectives, staffing/personnel, funding resources, etc.). None anticipated

Activity 3.B. Rapidly respond to and intervene in HIV transmission clusters and outbreaks

- 3.2. Improved response to HIV transmission clusters and outbreaks (Outcome)

Successes:
SFDPH prioritizes and investigates transmission clusters that are concerning for recent and ongoing transmission. For newly identified HIV-positive cluster members, clients are prioritized for rapid intervention and partner services. PLWH in transmission clusters who are not virally suppressed are evaluated for assistance from the LINCS team for engagement in care services. In 2018, we conducted a pilot using HIV sequences and HIV PS data to prioritize 25 not in care (NIC) PLWH (4 clusters) for re-linkage. During the course of case investigation, we found that over half of the NIC PLWH in prioritized clusters had been previously referred for HIV navigation. Two PLWH were re-linked, both of whom were identified as named partners through HIV PS investigations. One named partner who was re-linked to care was found to be genetically linked to a cluster.

Challenges:
We have conducted rapid PDSA cycles to utilizes molecular surveillance data to enhance our existing re-linkage efforts. We have found that the majority of NIC patients identified in clusters have been previously referred to LINCS for re-linkage or are loosely engaged in case management. At the current time, molecular data over-selects for patients with a genotype from the past 5 years, and those patients are likely to have already been identified by LINCS through data-to-care efforts. LINCS does not have new interventions to offer patients that are loosely engaged in care but do not take their medication due to competing priorities.

Anticipated Changes: None anticipated.

Activity 3.C. Maintain outbreak identification and response plan

- 3.3. Improved plan and policies to respond to and contain HIV outbreaks (Outcome)

Successes:
If a large, rapidly growing transmission cluster is identified in San Francisco, we will utilize the plans for outbreak investigation from the SFDPH emergency preparedness team for disease outbreak investigation. SFPDH has an extensive infectious disease emergency response plan involving multiple branches within the SFDPH Population Health Division available to respond and assist the LINCS team (who would be the first responders in an HIV outbreak) if additional resources and/or staff are needed. As part of the response, we will confirm the cluster, identify and characterize risk networks involved with the cluster, and identify communities who are in need of targeted testing, prevention efforts, and linkage to care. SFDPH staff regularly discuss all-hazards response plans with other jurisdictions throughout the San Francisco Bay Area and the state. We will utilize existing health alert communication systems in order to communicate with other public health professionals as needed. As part of our ongoing public health emergency preparedness and response plans, we are assessing and evaluating jurisdictional capacity for cluster detection and response involving epidemiological investigations and surveillance on an ongoing basis.

Challenges: None anticipated.

Anticipated Changes:
We will modify the existing disease emergency response plan to specifically address an HIV transmission cluster investigation by August 2019.

4. Did your jurisdiction identify any molecular clusters that meet CDC's *national priority criteria?
   ☐ Yes ☒ No. If yes, please provide a brief summary
5. Did your jurisdiction identify any time-space clusters? ☒ Yes ☐ No
   If yes, please provide a brief summary

   SFDPH conducts time-space analyses on a monthly basis. We anlayze data for the entire county and by neighborhoods. During the reporting peiod, we have identified time-space clusters among persons experiencing homelessness. The LINCS team has attempted to reach these persons and offer navigation services.

   * National priority clusters are defined based on the burden of HIV in the jurisdiction. For lower burden jurisdictions (defined by membership in CDC's low-burden jurisdiction workgroup), priority clusters are defined as clusters at a 0.5% genetic distance threshold with at least 3 cases diagnosed within the most recent 12-month period. For all other jurisdictions, priority clusters are defined as those with at least 5 cases diagnosed within the most recent 12-month period.

   HIV Cluster and Outbreak Detection and Response Plan
6. Please upload your Foundational Activities Assessment Checklist (first component of the HIV Cluster and Outbreak Detection and Response Plan- **see Appendix F**) as a miscellaneous attachment with your APR to www.grantsolutions.gov by the due date, August 30, 2019.

Strategy 4. Comprehensive HIV-related prevention services for persons living with diagnosed HIV infection (PLWH)

Activity 4.A. Provide linkage to HIV medical care for persons with newly and previously diagnosed HIV infection identified through HIV testing and partner services
- Increased linkage to and retention in HIV medical care among PLWH (Outcome)

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   SFDPH has strengthened, streamlined, and addressed gaps in linkage and retention services for PLWH, with the goal of establishing a clear, patient-centered process from point of diagnosis through accessing and staying engaged in HIV care. The strategy includes Data to Care activities; centralized linkage and re-engagement activities through the LINCS program, and other key retention efforts, especially for populations with the greatest barriers to care.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in venues, contracts, target populations, recruitment strategies, testing technologies or algorithms, objectives, staffing/personnel, funding resources, etc.). No changes anticipated

Activity 4.B. Conduct data-to-care activities
• Identify persons with previously diagnosed HIV infection who are not in care through data-tocare activities
• Provide linkage to, re-engagement in, and retention in HIV medical care services for persons with previously diagnosed HIV infection who are not in care identified through data-to-care activities

Successes:
SFDPH HIV surveillance has provided surveillance-generated NIC lists of HIV-positive individuals potentially not in care or other prioritized groups, such as persons experiencing viral failure, those with early infection, and those in transmission clusters to the LINCS Team, In addition, HIV surveillance data are used to match clinic-generated NIC lists to eHARS to confirm out of care status of patients prior to assignment by LINCS.

Challenges: Many of the patients identified as NIC are unable to locate.

Anticipated Changes:
Through a continually quality improvement focus, we modify the NIC inclusion criteria to maximize the likelihood that patients living in San Francisco are identified for LINCS assignment and assistance.

Activity 4.C. Promote early ART initiation
Activity 4.D. Support medication adherence
- 4.4. Increased provision of ART medication adherence support for PLWH (Output)

Successes:
In March 2019, eight LINCS staff attended an HIV Health Coaching training organized by our AETC. Topics covered included adherence counseling, medication reconciliation and action planning. We are continually working to stregnthen navigator skills around motivational interviewing and problem-solving common challenges to daily medication adherence. As part of Component B, Project OPT-In, we are conducting qualitative work to better understand ways to improve ART access for PWID and people experiencing homelessness.

Challenges: None noted.

Anticipated Changes: None

Activity 4.E. Promote and monitor HIV viral suppression

Successes:
We actively use HIV surveillance data to monitor HIV viral suppression on the population level as well as by

specific demographic groups. Viral suppression is monitored both among persons newly diagnosed with HIV and among persons living with HIV. This information is shared with HIV prevention partners for resource allocation and prioritization. SFDPH also collaborates with Getting to Zero Metrics committees to monitor and address disparities in viral suppression.

Challenges:
As the number of new diagnoses declines, viral suppression at 12 months among people newly diagnosed with HIV has decreased. This is possibly due to a larger proportion of all new diagnoses in recent years among our more vulnerable populations including persons experiencing homelessness and PWID. We intend to further investigate this decline by conducting a data to care list of PLWH newly diagnosed with HIV in 2017 who did not virally suppress. Based on our findings, we will better understand barriers to viral suppression and possibly adapt current workflows to ensure that newly diagnosed PLWH are connected and engaged in care.

Anticipated Changes: None anticipated.

Activity 4.F. Monitor HIV drug resistance

Successes:
We routinely collect and process HIV nucleotide sequences reported by laboratories and use the CDC processed HIV sequence dataset and accompanying SAS programs to assess transmitted drug resistance among new HIV diagnoses. We monitor trends over time and results are presented in our HIV annual report for dissemination.

Challenges:
Stanford Clinical Virology laboratory which conducts HIV genotypic testing for SF Kaiser providers does not report to the SFDPH. Approximately 17% of our new cases were diagnosed at SF Kaiser meaning that our genotyping data are incomplete for San Francisco.

Anticipated Changes:
We are working with the California State Office of AIDS and Association of Public Health Laboratories to assist Stanford laboratory with laboratory reporting via California's Reportable Disease Information Exchange (CalREDIE) system. When in place, San Francisco will have access to the HIV sequences for cases diagnosed and tested at SF Kaiser.

Activity 4.G. Conduct risk-reduction interventions for PLWH
- 4.6. Increased provision of risk reduction interventions for PLWH
- 4.7. Increased active referral to HIV prevention services for PLWH (Output)

Successes:
The San Francisco Health Department conducts all of the strategy 4 requirements for PLWH, including linkage

to care, data to care, ART promotion, and monitoring of viral suppression and drug resistance.
Data to care and centralized linkage and re-engagement activities are provided through our LINCS program, and HIV surveillance monitors HIV viral suppression on the population level and by specific demographic groups.

With respect to the specific services referred to in https://effectiveinterventions.cdc.gov/, SFDPH has successfully worked with CDC in implementing a cluster response and is on track to have a documented plan per the CDC due date. SFDPH also has a mature and robust Partner Services program.
Other risk-reduction interventions for PLWH are provided by CBOs and supported by other funding.

Challenges: None noted**.**

Anticipated Changes: None anticipated.

Activity 4.H. Actively refer PLWH to essential support services, including screening and active referral for healthcare benefits, behavioral health services, and social services

- 4.9. Increased screening and active referral of PLWH to essential support services, including healthcare benefits, behavioral health services, and social services.

Successes:
18-1802 Funded and non-funded testing programs have referral systems in place with a focus on populations with the highest disparities in access to prevention, treatment and care.
SFDPH has worked with the San Francisco AIDS Foundation, the largest provider of community-based HIV testing who is also funded by 15-1502, to develop and adjust different models of referral to partner services, testing both active and passive referral mechanisms. All other agencies are required to report HIV positive clients to LINCS and the LINCS staff assess client need for referral.

Challenges: None noted.

Anticipated Changes: None anticipated.

4. Describe your jurisdiction's process for linking persons living with diagnosed HIV infection to care. Please describe your definition/criteria considered for "linked to care" for your jurisdiction.

Strategy 5. Comprehensive HIV-related prevention services for HIV-negative persons at risk for HIV infection

Activity 5.A. Provide periodic HIV testing and risk screening

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   San Francisco continued high volume HIV testing at SFDPH City Clinic as well as in Jail Health

Services with funding from 18-1802.

Using local funding, San Francisco continued high volume community-based testing for high prevalence populations (MSM, trans women, PWID) at San Francisco AIDS Foundation's Magnet clinic, UCSF Alliance Health Project, and as well as testing in agencies providing services to AAMSM (SFAF), Latino MSM (AGUILAS, IFR) trans women (SFCHC) and PWID (Glide, SFAF) and people in substance use treatment settings (Bayview Hunter's Point Foundation, Bay Area Addiction Research and Treatment (BAART), University of California Opiod Treatment Outpatient Program).

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in venues, contracts, target populations, recruitment strategies, testing technologies or algorithms, objectives, staffing/personnel, funding resources, etc.). None anticipated

Activity 5.B. Provide screening for PrEP eligibility
- 5.2. Increased screening of HIV-negative persons for PrEP eligibility (Output)

Activity 5.C. Provide linkage to and support for PrEP
- 5.3. Increased active referral of persons eligible for PrEP to PrEP providers (Outcome)

Successes:
San Francisco continues to support its PrEP demonstration project as a service at its STD Clinic. San Francisco has continued to support a continuum of PrEP services at five community-based agencies providing services to AAMSM (SFAF), Latino MSM (AGUILAS, IFR) trans women (SFCHC) and PWID (Glide, SFAF.) and Youth (LYRIC). Include PrEP as a component of all HIV test counselor trainings.

Challenges: None noted.

Anticipated Changes: None anticipated.

Activity 5.D. Provide risk reduction interventions for HIV-negative persons at risk for HIV infection

- 5.6. Increased provision of risk reduction interventions for HIV-negative persons at risk for HIV infection (Output)

Successes:
San Francisco continued its long standing support for Special Projects for prioritized populations, projects that include a full spectrum of services from outreach, engagement, testing, referral to PrEP or HIV/HCV/STI treatment as appropriate and medication maintenance for clients on PrEP or PLWH. This is a spectrum of prevention services, from low to high threshold at five agencies providing Special Project services to AAMSM,

Latino MSM, trans women, and MSM.

Challenges: None noted.

Anticipated Changes: None anticipated.

Activity 5.E. Actively refer HIV-negative persons at risk for HIV infection to essential support services, including screening and active referral for healthcare benefits, behavioral health services, and social services

- 5.8. Increased screening and active referral of HIV-negative persons at risk for HIV infection to essential support services, including healthcare benefits, behavioral health services, and social services.

Successes:
SFDPH continues to provide high volume HIV testing at SFDPH City Clinic, and high volume community-based testing for high prevalence populations (MSM, trans women, PWID) at San Francisco AIDS Foundation's Magnet clinic, UCSF Alliance Health Project, and as well as testing in agencies providing services through Special Projects for AAMSM (SFAF), Latino MSM (AGUILAS, IFR) trans women (SFCHC) and PWID (Glide, SFAF).
These testing programs have referral systems in place with a focus on populations with the highest disparities in access to prevention, treatment and care.

Challenges: None noted.

Anticipated Changes: None anticipated.

4. Briefly describe which populations and what activities you supported for high-risk HIV-negative individuals during the reporting period

   Priority populations in San Francisco are MSM with a focus on AAMSM and Latino MSM, PWUD, trans women and people experiencing homelessness.

Strategy 6. Perinatal HIV prevention and surveillance activities

1. Is your jurisdiction opt-out approved for:

   Perinatal HIV Exposure Reporting (PHER) ×Yes ☐ No

   Perinatal HIV Services Coordination (PHSC) × Yes ☐ No

   Fetal Infant Mortality Review (FIMR) ×Yes ☐ No

   If you are implementing <u>any</u> of the perinatal HIV prevention and surveillance activities please respond to the following questions (2-4):
2. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.
3. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges?

4. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in venues, contracts or partnerships, target populations, testing technologies or algorithms, objectives, staffing/personnel, funding resources, etc.).

   For more information on Perinatal HIV prevention and surveillance required activities for all and a subset of jurisdictions, please refer to https://www.cdc.gov/hiv/pdf/funding/announcements/ps18-1802/CDC-HIV-PS18-1802-Attachment-I.pdf

Strategy 7. Community-level HIV prevention activities
☐ Not applicable if opt-out approved

Activity 7.A. Conduct condom distribution programs

- 7.1. Increased availability of condoms among persons living with or at risk for HIV infection

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   Partially Funded: Continue citywide condom distribution program (agencies/businesses can request free condoms from SFDPH). Distribute condoms and safer sex supplies at community venues such as bars and events and health fairs, such as Carnival, Pride, and Folsom Street Fair. Continue to provide condom distribution at SFDPH clinics and SFDPH- funded HIV prevention programs

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in venues, contracts, target populations, recruitment strategies, objectives, staffing/personnel, funding resources, etc. None anticipated

Activity 7.B. Coordinate and collaborate with syringe services programs

Successes:
No syringe syringe services in San Francisco are supported by 18-1802.

SFDPH supports the San Francisco AIDS Foundation and its community-based subcontractors to provide syringe access and disposal programs throughout the City. The Syringe Access Collaborative of syringe providers, in partnership with SFDPH engage with communities and neighborhoods regarding importance of syringe services and in particular syringe disposal.

- Expansion of disposal options include large kiosks and wall-mounted disposal boxes placed in "hot spots".
- Expansion of DPH Community Health Response Team to address overdose and syringe disposal issues.
- Continue to engage people who use drugs about the importance of proper syringe disposal and gather input on placement of kiosks and boxes.

- Continue to engage with communities and neighborhoods regarding importance of syringe services.
- Continue to provide syringe access and disposal services at homeless encampments and health events for people experiencing homelessness and/or who use drugs.

Challenges: None noted.

Anticipated Changes: None anticipated.

Activity 7.C. Conduct social marketing campaigns

Successes:
Not funded: Continued two existing campaigns funded by GTZ and PriDE funding that focus on reducing anti HIV stigma (U=U) and decreasing barriers to PrEP particularly among AAMSM and other communities of color (PrEP Supports).

Challenges: None noted.

Anticipated Changes:
Both social media campaigns will expand and use different placement strategies through 2018.

Activity 7.D. Implement social media strategies

Successes:
San Francisco has included social media strategies such as including ads for Social Marketing campaigns on gay “hook-up” apps such as Grnder, or more mainstream media channels such as FaceBook and YouTube as appropriate to the stated needs of constituents.

Challenges: None noted.

Anticipated Changes:
Both social media campaigns will expand and use different placement strategies through 2018.

Activity 7.E. Support community mobilization

Successes:
We contunined to work with community partners to update an integrated HIV/HCV/STD plan. The upcoming RFP will provide an opportunity to increase our emphasis on mobilizing communities not traditionally reached.

Challenges: None noted.

Anticipated Changes: None anticipated.

Social Marketing Campaigns

4. Did you promote and/or support any CDC social marketing campaign during the reporting period?
   ☐ Yes ☒ No. If yes, *check all that apply*.
   ☐ Doing It

☐ HIV Screening. Standard Care.
☐ HIV Treatment Works
☐ Let's Stop HIV Together
☐ Prescribe HIV Prevention
☐ Prevention IS Care
☐ Start Talking. Stop HIV.
☐ Transforming Health
☐ Other (specify: ______________________________)
☐ Don't Know/Not sure

5. During the reporting period, what kinds of activities did you conduct as part of your social marketing efforts? *(Please check all that apply).*
   ☐ Blogs
   ☐ Materials Distribution
   ☐ Events
   ☐ Internet/Digital Advertising
   ☐ Traditional Advertising (e.g., print, TV, radio, billboards)
   ☐ Social Media (e.g., Facebook, Instagram, Twitter)
   ☐ Email Blasts
   ☐ Other
   ☐ None. We did not conduct any social marketing activities.
6. Were other social marketing campaigns utilized? ☐ Yes ☒ No
   If yes, please describe

Condom Distribution

Provide the total number of condoms distributed overall during the reporting period.
491,592

Syringe Services Programs (SSP)

7. For Syringe Services Programs, please provide the following information:
   a. Has the jurisdiction received concurrence from CDC for a submitted determination of need (DON) for Syringe Services Programs (SSP) since the last reporting period?
      × Yes ☐ No ☐ Not Applicable

San Francisco is covered under a DON submitted by the State Office of AIDS on behalf of the entire state of California.

   b. Describe SSP and harm reduction activities conducted during the reporting period for high-risk or vulnerable populations

      SFDPH Community Health Equity & Promotion (CHEP) Branch funds a collaborative of community-based organizations that provide client-centered harm reduction Syringe Access & Disposal services to people who inject drugs. There are 13 sites that operate throughout the City, providing coverage. Each site provides an opportunity for disposal. Each site offers harm

reduction supplies, overdose prevention education, narcan trainings, and resources and referrals to HIV/Hep C testing, and other community services.

c. Provide the number of SSPs funded within the jurisdiction, location of services, and the number of clients served, if available (regardless of funding source).
d. Provide the amount of PS18-1802 funding for SSP and harm reduction activities.
e. If PS18-1802 funding is not being used for SSPs and harm reduction services, provide the other funding sources.

Strategy 8. Partnerships for integrated HIV prevention and care planning

Activity 8.A. Maintain HIV planning group

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   San Francisco continues to maintain partnership with the HCPC and build Council members' capacity to participate in integrated planning. The councils are clearly merged. The HCPC as been critical in our planning for 18-1802 and to Ending the Epidemic. The HCPC is highly involved setting guiding principles and has also taken on the task of addressing both HIV Prevention and Care. In collaboration with SFDPH, the planning group writes, submits, disseminates and monitors an updated SF EMA Integrated HIV Prevention and Care Plan, which incorporates HCPC recommendations.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes to the Plan, updates to the planning groups, uses of the Plan document, local funding resources, etc.). None anticipated

Activity 8.B. Develop HIV prevention and care networks

Successes:
SFDPH continues to have a productive working relationship with the HCPC and its subcommittees, including Membership, Community Engagement, Community Affairs and People Living with HIV.
In addition, we continue to maintain and support GTZ initiatives and subcommittees using the goals and strategies of the initiative as a lens for prioritizing services, and during this reporting period we were able to hire a full-time GTZ Programs Coordinator to ensure that GTZ programs are coordinated with each other and with the larger system of care.

Challenges: None noted.

Anticipated Changes: None anticipated.

4. Did you make any changes to your Integrated HIV Prevention and Care Plan and/or planning group process during the reporting period? ×Yes ☐ No

   Yes, we are in early stages of planning to further integrate Hep C elimination and STD reduction efforts into the plan that will be reflected in the RFP released in 2019 and in future Plan updates.

Strategy 9. Implementation of structural strategies to support and facilitate HIV surveillance and prevention

Activity 9.A. Ensure data security, confidentiality, and sharing

- Outcome 9.1. Increased data security, confidentiality, and sharing

1. Describe successes experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

SFDPH staff and funded contractors are trained in the local SFDPH data and confidentiality standards (which comply with NCHHSTP standards), the CDC security and confidentiality standards and the State Office of AIDS standards at the time of hire and yearly thereafter. SFDPH HIV surveillance maintains secure procedures for data sharing, including data-to-care activities and use of surveillance data across HIV programs including prevention programs and LINCS within the context of existing laws.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in venues, contracts, partnerships, target populations, existing policies and procedures, use of advance technology, objectives, staffing/personnel, funding resources, etc.). None anticipated

Activity 9.B. Strengthen laws, regulations, and policies

Successes:
The State of California has laws in place which govern how HIV surveillance data are collected and shared. These laws allow the SFDPH HIV surveillance program to successful ensure data security, confidentiality and data sharing as needed.

Challenges: None noted.

Anticipated Changes: None anticipated.

Activity 9.C. Strengthen health information systems infrastructure

Successes:
SFDPH is in the process of implementing a new electronic health record (EHR) system for DPH. The Go Live date for the first phase of implementation was August 3, 2019. The two main hospitals (ZSFG and Laguna Honda Hospital), Ambulatory Care clinics, the Population Health Division clinics, the Public Health Laboratory, and Jail Health Services, and Behavioral Health clinics are undergoing adoption of the new EHR. Representatives from HIV surveillance and HIV prevention have been meeting regularly with the EHR implementation team to assess how the new EHR will enhance public health surveillance, analysis and reporting. We are identifying changes in work flows and resource needs that will support the new EHR while taking a critical look at improving our work flows and how to bemore efficient in our work. We are discussing metrics and reporting of standardized data definitions and processes.

Challenges: Since the new EHR has just recently been implemented, there is likely to be a period of time when changes and adjustments are needed.

Anticipated Changes:
We plan to automatic some of our current processes using functionality in the new EHR including, for example, replacing manual review of medical records for case updates with electronic transfers from the new EHR.

Activity 9.D. Promote expansion of technological advances

Successes:
We implemented DocuSign for passive case reporting at a large community testing site and conducted a user experience survey in 2018. The survey highlighted a very positive user experience. DocuSign improves the security and efficiency of data transmission and processing. During 1/1/2019 and 6/30/2019, we expanded the DocuSign case reporting to include the Alliance Health Project and Plushcare. We conducted trainings on using DocuSign PowerForm and followed up with these providers to answer questions and help with issues they encountered.

Challenges: None anticipated.

Anticipated Changes:
We will continue to implement DocuSign case reporting at these sites and our experience will be used to identify reporting issues and inform protocol revisions and decisions for roll-out to other passive reporting sites.

4. Describe the procedures you are using or intend to use to ensure data are secured when stateno/cityno information is shared and stored. In your description, include a statement if you are not sharing stateno/cityno and do not intend to share this information.

Note: *Programs sharing data between eHARS and EvaluationWeb (e.g. stateno/cityno) are required to take necessary steps to ensure that data are maintained in a secure environment consistent with CDC NCHHSTP*

Data Security and Confidentiality Guidelines
https://www.cdc.gov/nchhstp/programintegration/docs/PCSIDataSecurityGuidelines.pdf.

In 2019, we started to share stateno/cityno information between eHARS and EvaluationWeb. EvaluationWeb data are managed by a HIV surveillance data manager and we have procedures and protocols in place to protect data security and confidentiality consistent with CDC NCHHSTP Data Security and Confidentiality Guidelines. Data linkage of EvaluationWeb and eHARS is conducted in the HIV surveillance secure area and datasets containing personal identifiers including stateno/cityno are stored on a encrypted flash drive and locked in the case registry room when not in use. All staff that have access to confidential case information receive the SFDPH privacy and data security training, SFDPH HIV surveillance program security and confidentiality training, and the State Office of AIDS security and confidentiality training on an annual basis.

5. The **FY 2020 SAS Licensing Request/Memorandum of Acceptance** (**MOA**) and **2019 List of Assigned SAS Users** are due with the 2019 APR. For instructions on completing the SAS MOA and requesting additional SAS workstations/server licenses see **Appendix D-E** and **SECTION IV: BUDGET.**

Security and Confidentiality Notice: *PS18-1802 recipients should comply with the National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention's (NCHHSTP) Data Security and Confidentiality Guidelines for HIV, Viral Hepatitis, Sexually Transmitted Disease, and Tuberculosis Programs (2011). All standards included in the NCHHSTP Data Security and Confidentiality Guidelines should be implemented for funding recipients funded by PS18-1802, unless otherwise justified. Security and Confidentiality successes, challenges, and anticipated changes for surveillance and prevention recipients should be described in the narrative. A "Certification of Compliance" (see example Certification of Compliance Statement, https://www.cdc.gov/hiv/pdf/funding/announcements/ps18-1802/CDC-HIV-PS18-1802-AttahchmentH-Offcial-Reponsible-Party-ORP-Certification-Sample-Template.pdf must be signed by an overall responsible party or parties (ORP) and submitted annually at the same time the APR is submitted for the reporting period of 1/1/2019 – 6/30/2019 to www.GrantSolutions.gov.*

For information on the data security and confidentiality guidelines and Sample Certification Statement, please refer to https://www.cdc.gov/nchhstp/programintegration/docs/PCSIDataSecurityGuidelines.pdf .

Strategy 10. Data-driven planning, monitoring, and evaluation to continuously improve HIV surveillance, prevention, and care activities

Activity 10.A. Conduct data-driven planning for HIV surveillance, prevention, and care activities

- 10.1. Increased use of data to plan, monitor, evaluate, and improve HIV surveillance and prevention programs and monitor the impact of local HIV prevention efforts (Output)

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

This year SFDPH surveillance and prevention collaborated to produce the first Results Scorecard for PrEP uptake and adherence. It includes population-level indicators as well as program performance measures from community agencies funded to provide PrEP, so that all stakeholders can see the data in one place and assess whether our efforts are on track or need to shift. The scorecard is shared with CBO PrEP providers at their quarterly meeting, at which they review and interpret the data, share best practices, and identify areas for quality improvement. The Results Scorecard is also shared with the GTZ PrEP Committee. Additional results from data analyses to inform HIV prevention and care activities are included in the HIV Epidemiology Annual Report and are widely disseminated to prevention partners both within and outside the SFDPH.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in data sharing, venues, method of service delivery, contracts, target populations, partnerships, implementation strategies,, objectives, staffing/personnel, funding resources, etc.). None anticipated

Activity 10.B. Conduct data-driven monitoring and evaluation and use findings to continuously improve HIV surveillance and prevention activities

Successes:
Program-level, strategy-level, and collective impact scorecards have begun to illuminate successes as well as disparities and gaps that need to be addressed. HIV surveillance data are being actively shared with GTZ subcommittees focusing on specific vulnerable populations including the homeless and people who inject drugs and with community prevention partners.

Challenges: None anticipated.

Anticipated Changes: None anticipated.

4. Describe how surveillance data was disseminated to inform prevention activities.
5. Describe how the program disseminated its program monitoring and evaluation data and provided feedback to healthcare and non-healthcare providers and other community partners to inform and/or improve HIV prevention efforts.

Program monitoring and evaluation data are disseminated through multiple channels, including Program Liaison site visits with providers, prevention provider network meetings, the HCPC, and GTZ. We use these opportunities to share data and discuss what is working well and whether there are any gaps that

need to be addressed. In addition to presentations, another primary tool for data sharing is the Results Scorecard.

HIV surveillance data are disseminated through semi-annual reports, the annual report and presentations to community and prevention partners including the SFDPH health commission, the GTZ consortium, the HCC and community-based agencies. Updated surveillance information is collected through routine lab reporting of all CD4 and viral load test results, prospective chart review, other health departments, or data matches with other databases or disease registries. Additionally, analyses using HIV surveillance data are published in peer-reviewed journals.

6. **RESOURCE ALLOCATION (for HIV prevention funding only)**
   Please identify each city/MSA with at least 30% of the HIV burden within the jurisdiction. For directly-funded cities, please report areas (or zip codes) within the MSA with at least 30% of the HIV burden within the jurisdiction. If no area represents at least 30% of the HIV epidemic, then identify the top three MSA/MDs, cities, or areas within the jurisdiction that have the greatest burden of disease. **See Appendix A: Resource Allocation.**

Strategy 11. Capacity building activities for HIV programs, epidemiologic science, and geocoding

Activity 11.A. Assess capacity-building assistance needs
Activity 11.B. Develop and implement capacity- building assistance plans, including technical assistance
Tracey/Susan P.

1. Describe **successes** experienced with implementing this strategy and associated activities funded under Component A during the reporting period.

   As the new prevention strategies and activities are being developed, SFDPH will continue its communication with its community partners and HCPC and develop trainings to ensure providers are successful in their new ventures.

2. Describe **challenges** experienced with implementing this strategy and associated activities funded under Component A during the reporting period. What plans or actions have been taken to address the challenges? None noted

3. Describe **anticipated changes** to the approach to this strategy and associated activities funded under Component A for Year 3 (including proposed changes in provision of capacity building assistance (CBA), types of CBA offered, contracts, partnerships, objectives, staffing/personnel, funding resources, etc.).

2018 will be an intensive planning year for SFDPH as it embarks on formative work for an RFP being released in 2019. SFDPH will work closely with CBOs to plan for shifts in HIV prevention strategies and activities. CBA needs will be assessed and CBA plans developed annually thereafter.

Activity 11.C. Enhance epidemiologic and analytic capacity (e.g., data to care, cluster detection and investigation) and other prevention activities

Successes:
SFDPH has been conducting Data to Care activities as a joint activity between HIV surveillance and the LINCS program since 2012 and Data to Care activities have increased with supplemental funding (CDC PrIDE and Component B.) Drawing on past experience, we continue to refine and improve our Data to Care efforts and apply lessons learned in Data to Care to local Data to PrEP efforts. In addition, we will have implemented HIV-TRACE to identify recent and growing transmission clusters and are currently conducting a series of pilot tests to determine if HIV-TRACE is also an effective tool to identify persons who are not virally suppressed and could benefit from LINCS navigation services.

Challenges: None anticipated.

Anticipated Changes: None anticipated.

Activity 11.D. Enhance geocoding and data linkage capacity

Successes:
SFDPH surveillance collects complete address at time of diagnosis and current address is updated through routine laboratory reporting with patient's addresses or follow-up chart abstraction. This information is geocoded to the census tract level and maps showing, for example, the geographic distribution of all PLWH, newly diagnosed cases, and viral suppression rates and linkage to care rates by neighborhood are produced and shared in our annual epidemiology report. In PS 18-1802 we will work with California State Office of AIDS under one Memorandum of Agreement for geocoding and data linkage to clean, standardize, and prepare geocoded data to submit to CDC.

Challenges: None anticipated.

Anticipated Changes: None anticipated.

4. Did you access CBA/technical assistance (TA) services during the reporting period? ☒ Yes ☐ No
   Note: CBA accessed and provided via CDC-funded providers will be pulled via the CBA Tracking System (CTS).
   a. However, please explain (be specific) if any of the CBA/TA provided did not meet your needs/expectations.

SFDPH's CBA/TA needs/expectations were met during this reporting period.

5. Please provide the type of CBA/TA received and the name(s) of CBA/TA provider(s) for any non-CDC provided CBA to include training provided by your internal training unit (if applicable).

   There are some CHEP staff members that provide training to both internal SFDPH employees as well as our local partners/community-based organizations (CBOs). Specifically, a five day California State Certified HIV/HCV/STD Skills CertificationTest Counselor Training is given by CHEP staff members to our funded providers six times a year which also includes modules on PrEP and Harm Reduction. These staff follow up and provide additional individual TA if requested to do so by a provider/agency. Also, as needed several staff members provide training/TA in a variety of content-specific topics such as an HIV 101 course, syringe access and disposal, PrEP and HCV.

6. Please include CBA/TA needs for Year 3.

   SFDPH does not anticipate any CBA/TA needs at this time. If something arises that may require additional CBA/TA, SFDPH will access CTS.

<u>Note:</u> *Quantitative information for HIV testing and Partner Services for Component A will be reviewed via the PS18-1802 Data Tables that will be auto-populated with NHM&E data submitted via EvaluationWeb®. Please review these tables (template) for reference.*
Quantitative information for HIV surveillance, molecular HIV surveillance, perinatal HIV surveillance, and surveillance-based Data-to-Care will be captured in eHARS and reported in the end of calendar year Standards Evaluation Report (SER).

SECTION II: COMPONENT B: Demonstration Projects for Integrated HIV Surveillance and Prevention

☐ Not applicable

Please select your Demonstration Project Focus Area:

☐ Data to Care
☐ Data Sharing
☐ Data Use
☐ HIV Testing Models
☐ Outbreak Planning - PWID/HCV
☐ Partner Services Model
☐ PrEP
☒ Structural Interventions

Please provide responses to the following questions for your demonstration project under Component B.

1. Provide an update on the project planning and implementation activities for your demonstration project.

   Project OPT-In seeks to reduce new infections and increase viral suppression **among people experiencing homelessness and people who inject drugs (PWID).** This is the first-time DPH is directly funded to implement innovative public health approaches to improve HIV/HCV/STD outcomes in these groups. OPT-In is designed to build off of existing efforts to improve health outcomes. We seek to scale-up the intentional coordination of services in order to remove system barriers, improve seamless care transitions and meet the health needs of people experiencing homelessness. We have identified three primary goals of OPT-In: 1) Establish low threshold HIV/PrEP/HCV and sexual health services in community and clinical sites, 2) Build a seamless system of care to reduce patient churn through intentional care coordinations and 2) Train and retain a trauma-informed HIV/HCV/sexual health workforce.

2. Describe any **technical assistance** and/or resources needed for your demonstration project during the reporting period. None

3. Describe **successes** experienced with your demonstration project during the reporting period.

   OPT-In is fully staffed as of July 2019. OPT-In currently funds 7 LINCS navigator positions, 2 OPT-In program coordinators, 1 community health response team health worker, 1 nurse practioner who provides training, and a half-time public health nurse who works with SFDPH street medicine. We have completed our program plan and are in the process of finalizing population and program-level metrics. OPT-In staff meet weekly to discuss ongoing data challenges and needs. Our planning group meets monthly to provide updates and address challenges with leadership.

4. Describe **challenges** experienced with your demonstration project during the reporting period. What plans or actions have been taken to address the challenges? None
5. Describe **anticipated changes** to your demonstration project for Year 3. None
6. Are all key staff for the Component B project in place? ☐ XYes ☐ No

<u>SECTION III:</u> STAFFING AND MANAGEMENT

1. Were there any organizational and/or key staffing changes (i.e., health department staff responsible for implementing interventions and services for PS18-1802) that occurred during the reporting period? ☐ Yes ☒ No. If yes, please describe.
2. Please indicate any vacant staff positions and provide a detailed plan with timeline for hiring/filling vacancies.
3. Were there any delays in executing contracts during the reporting period? ☐ Yes ☒ No. If yes, please explain and include any program implications.
4. If there have been any updates to contracts for indirectly funded service delivery entities (e.g., local health departments, Community Based Organizations [CBOs], etc.), please provide updates in **<u>Appendix B: Contract Information for Indirectly Funded Service Delivery Entities.</u>**

SECTION IV: BUDGET

1. Did you submit a 424A form? *See Budget Information and Justification under the instructions section.*
2. Are you requesting new Direct Assistance (DA) in lieu of a portion of Financial Assistance (FA) for Year 3? If yes, please outline DA staffing needs. Recipients may request federal personnel, equipment, or supplies, including SAS licenses, as DA to support HIV surveillance and prevention activities. DHAP will continue to provide the number of SAS workstations and server licenses received in 2019 at no cost to your program. Recipients requesting SAS workstation and server licenses in excess of the number capped in 2019 will reimburse the Working Capital Fund by converting Financial Assistance to Direct Assistance (DA) at an approximated cost of $1,172.44 per unit. Recipients should clearly indicate the additional SAS workstations and server licenses in excess of the number capped in 2019 as Direct Assistance in the APR budget. The FY 2020 **SAS Licensing Request/Memorandum of Acceptance (MOA)** and **2019 List of Assigned SAS Users** are due with the APR, see **appendix D - E.** To address staffing and/or program expertise deficits, recipient may utilize DA to recruit staff with the requisite training, experience, expertise (e.g., Public Health Associate Program [PHAP]). Recipients are responsible for supporting DA expenses and should include all DA related expense (Travel, etc.) in the APR budget. For information on DA for assigning CDC staff to State, Tribal, Local, and Territorial Health agencies, refer to: **https://www.cdc.gov/stltpublichealth/GrantsFunding/direct_assistance.html**
3. Jurisdictions with eligible state and local (city or county) health departments must discuss: (1) the proposed program approach being implemented by the local health department and (2) how the state and local area will collaborate during the project period to ensure appropriate provision of services within the metropolitan area and document any agreements reached in a letter of agreement/letter of concurrence (LOA/LOC). Please submit current LOA with this submission. The current LOA will remain in place for the new budget period (Year 3: January 1, 2020 – December 31, 2020).
4. For resources and funding allocated in support of health information systems, please clearly indicate in the budget the specific system (i.e., eHARS) and amount.

Note: Please submit one line item budget for the core program that clearly delineates funding for HIV surveillance and HIV prevention within the budget narrative. Please provide one 424A that includes HIV surveillance on one column and HIV prevention on another column, and the total amount in the total column (one 424A with separate grant program functions). If funded under Component B demonstration project, please include a separate budget narrative and 424A form. A second option is to include all components on one 424A: Place Component A- Prevention in one column, Component A-Surveillance in another column, Component B in the third column, and the total (cumulative) in the column to the far right.

SECTION V: ASSURANCES OF COMPLIANCE

Instructions: Submit the completed forms for all materials used or proposed for use during the reporting period of **January 1, 2019 – December 31, 2019.** Attach the following Assurance of Compliance Forms to the application through the "Mandatory Documents" section of the "Submit Application Page" on Grants.gov. Select "Other Documents Form" and attach as a PDF file (**See Appendix C**).

- "Assurance of Compliance with the Program Guidance on the Review of HIV-Related Educational and Informational Materials for CDC Assistance Programs" (CDC 0.1113). Please see https://www.cdc.gov/hiv/pdf/funding/announcements/ps12-1201/cdc-hiv-ps12-1201-content-review-guidance.pdf to access the guidance document.

- "Assurances and Certifications: Download and complete all applicable Assurances and Certifications from http://wwwn.cdc.gov/grantassurances/Homepage.aspx. Upload these signed documents into the Assurances website identified in the instructions."

SECTION VI: ADDITIONAL INFORMATION

1. Additional Information

Please provide any explanatory information or data that would be important for CDC to receive (e.g., additional coordination and collaborations to support PS18-1802, local processes or procedures impacting program implementation).

APPENDICES

Appendix A: Resource Allocation

Identify each city/MSA with at least 30% of the HIV burden within the jurisdiction. For directly-funded cities, please report areas (or zip codes) within the MSA with at least 30% of the HIV epidemic within the jurisdiction. If no area represents at least 30% of the HIV burden, then identify the top three MSA/MDs, cities, or areas within the jurisdiction that have the greatest burden of disease.

Reporting of MSAs/Cities/Areas with ≥ 30% of the HIV Epidemic within the Jurisdiction			
MSA/CITY/AREA	**Percentage of HIV Burden within the Jurisdiction**	**Percentage of PS18-1802 Funds Allocated**	**Strategies and Activities Funded**
San Francisco	100	100	San Francisco received a waiver for strategy 6, but otherwise all required strategies and activities are being implemented.

Appendix B: Contract Information for Indirectly Funded Service Delivery Entities

Please provide contract updates for indirectly funded Service Delivery Entities (e.g., local health departments, Community Based Organizations [CBOs], etc.), contract amount and the activities the contractor is funded to provide.

San Francisco only uses CDC funds to support Health Department activities, no CDC funds are used to support services provided by Community-Based Organizations, other than planning and oversight.

Name of Indirectly Funded Service Delivery Entities	**Entity Type (e.g., LHDs, CBO, Clinic, Hospitals, etc.)**	**Contract Amount $**	**Contract Activities Funded (e.g., HIV Testing, Linkage to Care, Care and Treatment, Essential Support Services, PrEP, etc.)**

Appendix C: Assurance of Compliance

ASSURANCE OF COMPLIANCEASSURANCE OF COMPLIANCE

with the

“PROGRAM GUIDANCE ON THE REVIEW OF HIV-RELATED EDUCATIONAL AND INFORMATIONAL MATERIALS FOR CDC ASSISTANCE PROGRAMS”

By signing and submitting this form, we agree to comply with the specifications set forth in the “Program Guidance on the Review of HIV-Related Educational and Informational Materials for CDC Assistance Programs,” revised as of June 2016.

We agree that all written materials, audio visual materials, and pictorials, including social marketing and advertising materials, educational materials, social media communications (e.g., Facebook, twitter) and other electronic communications, such as internet/webpages will be submitted to a Program Review Panel. The Panel shall be composed of no less than five persons representing a reasonable cross-section of the general population; but which is not drawn predominantly from the intended audience. See additional requirements in the referenced program guidance, especially section 2 (c-d) (1-5) regarding composition of Panel.

The Program Review Panel, guided by the CDC Basic Principles, set forth in 1(a-g), will review and approve all applicable materials before their distribution and use in any activities funded in any part with CDC assistance funds.

Following are the names, occupations, and organizational affiliations of the proposed panel members: (If panel has more members than can be shown here, please indicate additional members on the reverse side.)

CDC 0.1113 (E), Rev. 6/2016, CDC Adobe Acrobat DC Electronic Version, 6/2016

NAME	OCCUPATION	AFFILIATION
		(Health Department Representative)

Applicant/Recipient Name:	**Grant Number (If Known):**
Signature: Project Director	**Signature: Authorized Business Official**
Date:	**Date:**

Appendix D: SAS Licensing Request and Memoranda of Acceptance			
1. Date:	08/15/2019		
2. Recipient Award Number:	**U62PS004536- 01**		
3. Recipient Award Title:	PS18-1802: Integrated HIV Surveillance and Prevention Programs for Health Departments		
4. Recipient Award Period:	January 1, 2020 through December 31, 2020		
5. Recipient Institution (Legal Name):	San Francisco Department of Public Health		
6. Jurisdiction Name:	San Francisco, CA		
7. Principal Contact:	Ling Hsu		
8. Principal Contact email:	ling.ch.hsu@sfdph.org	**Telephone:**	415-437-6246
9. Principal Contact's Mailing Address:	25 Van Ness Avenue, Suite 500 San Francisco, CA 94102		

10. Is this a new Grant: ☐ **First Year** ☒ **Continuation (Years 2-5)**

11. Media Type: Choose an item.

Funding Mechanism: (CDC Working Capital Fund or Direct Assistance [DA])	Number of Workstations Requested (a)	Workstation(s) Type (b)	Workstation(s) SAS Product Version Requested (c)
12. CDC Working Capital Fund	**16**	**32-Bit**	**Base SAS 9.4**
12. CDC Working Capital Fund	1	**64-bit**	**Base SAS 9.4**
13. Direct Assistance (DA)		**Choose an item.**	**Base SAS 9.4**
Funding Mechanism: (CDC Working Capital Fund or Direct Assistance [DA])	**Number of Servers Requested (a)**	**Server(s) Type (b)**	**Server(s) SAS Product Version Requested (c)**
14. CDC Working Capital Fund		**Choose an item.**	**Base SAS 9.4**
15. Direct Assistance (DA)	**1**	**64-Bit**	**Base SAS 9.4**

16. Describe the "bona fide" need for SAS, and if requesting more than 3 licenses justification is required:
CDC requires all PS 18-1802 recipient surveillance data be reported via their eHARS system. This system uses SAS software to develop, manage, and analyze all datasets. Additionally, all required performance evaluation programs are SAS based. The total number of workstations indicates the number of persons who spend 50% of their time processing, analyzing, and interpreting HIV case data.

17. CDC Program Official Responsible for Processing this Request (Print):

Program Consultant's Name: __Benjamin Laffoon/Magan Pearson____________________

Memorandum of Acceptance of Responsibility for the Use of SAS Institute Products Provided by CDC

To: <Insert PS18 1802 Program Consultant name>
Centers for Disease Control and Prevention
1600 Clifton Rd NE (MS-E47)
Atlanta, GA 30329

Section I. CDC Partner Acceptance of Responsibility

Name: ___________Ling Hsu_________________
Organization: ____San Francisco Department of Public Health_________________________________

I am an official of my organization, which has been awarded the CDC Grant or Cooperative Agreement designated:
Recipient Award Number: _U62PS004536- 01___________________
Title: PS18-1802 Integrated HIV Surveillance and Prevention Programs for HDs
Current License Expiration Date: December 31, 2019
My role within the Grant or Cooperative Agreement is: ___ Director of HIV Core Surveillance __________.

CDC has provided my organization access to certain SAS software products as described in the Enterprise License Agreement between DHHS and parties representing SAS Institute. I understand that the products must be used strictly in accordance with specific limitations set forth in the licensing terms. Specifically:

1. I agree to actively monitor the distribution and use the SAS products to assure that they are used to perform only CDC funded program activities as specified in the applicable Grant or Cooperative Agreement between CDC and the CDC Recipient.
2. **I agree to respond to CDC Surveys, and provide an annual detailed listing of software requirements for workstations and servers, the number of users and location information prior to CDC SAS product distribution.**
3. I will assure that my organization restricts access to the products to legitimate users and will avoid providing any opportunity for inappropriate distribution of the software to other parties.
4. In the event that my organization completes or ends the funded program activity prior to the expiration of the license I assure my organization will promptly destroy or return all the licensed materials to CDC.
5. I understand that failure of my organization to abide by these requirements will obligate CDC to request the return of the SAS products to CDC and the termination of their use by my organization.
6. I agree to report to CDC any violations of these terms whether intentional or unintentional.
7. I understand that at the termination of the DHHS license for the SAS products, within which my organization's use of the products is allowed CDC may be required to request the return of some or all of the provided SAS products.
8. I acknowledge that no ownership rights to the provided SAS products accrue to my organization by virtue of the use of the provided products.
9. I agree to assure that all organization or location personnel will be informed of the obligations and responsibilities acknowledged by this agreement.
10. I understand that the license does not obligate SAS Institute to provide user support for any of the SAS products provided to my organization.

Special Note: Please print, sign, scan, and return this document to your assigned Program Consultant via e-mail.

For CDC Use Only***:			
Jurisdiction Name:		Award Number:	
Funding Mechanism	Total Number of Licenses Approved Workstation/Server	Unit License Cost	Total Costs
1. CDC Working Capital Fund		None	None
2. Direct Assistance		$	$
Combined Totals			$

2020 Listing of Assigned SAS Users

Instructions: *For each work station license* (WCF and DA) requested provide the name and email address of the user. This person/work station must spend 50% of their time utilizing/analyzing HIV or HIV related data. If proposed positions are vacant, you must still list the workstation and supply the e-mail address after the position is filled. If you are to receive 21 workstation licenses then you must provide information for 21 workstations on this list. If you need to add rows to accommodate the number of workstations for your program, you can easily do so by highlighting all four cells in row 15, clicking on layout and selecting "insert below."

Note: The information in 1-3 below is an example for instructional purposes. Please delete these examples and replace them with user information specific to your program.

Agency Name: San Francisco Department of Public Health		**Submitted By: Ling Hsu**	
Project Area	**Last Name**	**First Name**	**E-Mail Address**
1. HIV Surveillance	Hsu	Ling	Ling.Ch.Hsu@sfdph.org
2. HIV Surveillance	Chin	Jennie	Jennie.cs.chin@sfdph.org
3. HIV Surveillance	Pipkin	Sharon	Sharon.pipkin@sfdph.org
4. HIV Surveillance 18-1802 Component B	Vacant	Vacant	
5. HIV Surveillance	Hirozawa	Anne	Anne.hirozawa@sfdph.org
6. HIV Surveillance	Mara	Elise	Elise.Mara@sfdph.org
7. HIV Surveillance	Vu	Annie	Annie.vu@sfdph.org
8. HIV Surveillance	Hughes	Alison	Alison.hughes@sfdph.org
9. HIV Surveillance	Chen	Mia	Mia.chen@sfdph.org
10. HIV Surveillance	Liu	Yan Yuan	Yanyuan.liu@sfdph.org

16. HIV Surveillance 18-1802 Component B	Toomey	Chris	chris.toomey@sfdph.org
17. Viral Hepatitis Surveillance and community health	Xu	Jason	Jason.xu@sfdph.org

Appendix E: SAS Licensing Request and Memoranda of Acceptance Instructions

Tip #1: Please contact your Assigned Program Consultant with any questions

Tip #2: PS18-1802 recipients submit one joint request addressing total programmatic need.

Box Number:

1. Enter the date this form is completed.
2. Enter the jurisdiction's PS18-1802 Award number.
3. *Question 3 is a pre-populated field, no action required.*
4. *Question 4 is a pre-populated field, no action required.*
5. Enter the legal name of Recipient Institution.
6. Enter your jurisdiction name (i.e. San Francisco, Maine, Puerto Rico).
7. Enter the name of the Principal Contact who will be notified when general communications regarding collective licenses are required.
8. Enter the email address and telephone number of the Principal Contact.
9. Enter the mailing address of the Principal Contact.
10. Select the appropriate box - First Year Award or Continuation Award (Years 2-5).
11. Media Type – Enter the media required by selecting the appropriate box.

12. Working Capital Fund (WCF) Workstation License – Enter the information in the appropriate columns:
    a. The number of SAS workstation licenses requested. This number is limited to the number of WCF workstation licenses received (at no cost to your program) in 2019.
    b. Enter the type workstation licenses required 32-bit or 64-bit. If you require a combination of these two license types, please identify the number and type requested.
    c. Product Version - *Pre-populated field. No action required*.
13. Direct Assistance (DA) Workstation License – If you are requesting to purchase additional SAS workstation licenses (above the capped WCF licenses noted in line 12); you are agreeing to reimburse CDC's Working Capital Fund for acquiring the licenses on your behalf at an approximated per unit cost of $1,172.44. This acquisition mechanism is called Direct Assistance (DA). This mechanism requires that you annually submit a budget request seeking to convert the appropriate amount (for example, 5 additional licenses would cost $5,862.00) from your PS 18-1802 Cooperative Agreement's Financial Assistance (FA) to Direct Assistance (DA). This action to convert is described in your Notice of Award as a "Prior Approval Request" This action can be submitted for approval by two methods:
    a. As part of your proposed annual Continuation Budget Request. This requires your program submit a cover (on letterhead) with the signatures of two officials requesting to convert the appropriate amount from FA to DA. Additionally, a special note must be placed in the budget

narrative's "Other" line item reducing the award by the appropriate amount. Finally, a separate 424-A form for the DA must be submitted. Remember this action must be executed each budget year with your continuation submission (for PS 18-1802 this usually occurs in the fourth quarter).

    b. As a budget revision/redirection request that must be submitted via GMM (Grant Solutions) as an amendment. This method requires the same actions as in section "a" above and should be submitted by the recipient by December 31 of the current budget year. After the initial request using this method, the requests must be executed each budget year with the APR continuation submission.

14. Working Capital Fund Server License (WCF) – Enter the following information in the appropriate columns:
    a. The number of SAS server licenses requested. This number is limited to two WCF server licenses per recipient (These are the server licenses you received at no cost to your program in 2019).
    b. Enter the type server licenses you require 32-bit or 64-bit. If you require a combination these two license types, please specify how many of each type you are requesting.
    c. Product Version - *Pre-populated field. No action required*.
15. Direct Assistance Server License - same as #13 above
16. Describe the "Bona Fide" need for SAS Licenses – *Pre-populated field. No action required*.
17. CDC Program Official Responsible for Processing this Request – Enter the name of your assigned CDC Program Consultant. If you unsure who this is, please contact a member of your PS 18-1802 Joint Monitoring Team.
18. *Memoranda of Acceptance for the Use of SAS Institute's Products Provided by CDC* – On the appropriate lines enter:
    a. **Name** - Enter the Name of the Principal Contact on Line #7.
    b. **Organization** - Enter the Recipient Institution's Legal Name on #5.
    c. **Recipient Award Number** - Enter the Award Number on Line #3.
    d. **My Role within the Grant or Cooperative Agreement is** – List the position or role of the Principal Contact.
19. Recipient's Signature – Have the Principal Contact sign and date in the appropriate space.
20. Listing of Assigned SAS Users - *For each workstation license* (WCF and DA) requested provide the name and email address of the user. This person/workstation must spend 50% of their time utilizing/analyzing HIV or HIV related data. If proposed positions are vacant, you must still list the workstation and supply the e-mail address after the position is filled. You are to provide information for workstations for which you receive licenses. If you need to add rows to accommodate the number of workstations for your program, you can easily do so by highlighting all four cells in row 15, clicking on layout and selecting "insert below".

    Final Reminder: *Although the FY 2019 SAS licenses expire on December 31, 2019, an automatic 90 day grace period (March 30, 2020) exists to allow that allows for final distribution of licenses. So we are asking your patience with the process. However, it is imperative you reach out to your assigned Program Consultant if your licenses are not received by March 20th to avoid a potential interruption in service.*

Appendix F: Foundational Activities Assessment Checklist

Foundational activities related to ensuring responsible implementation

Engaging community, including people with HIV, providers, and community-based organizations (CBOs)

Initial community engagement on cluster detection and response should be completed no later than December 2019

- ***Community engagement should be ongoing after that time***

Completion status	Element
☒ Completed ☐ In progress ☐ Not yet begun	• Identify key partners and stakeholders to engage in cluster detection and response efforts. • Include partners that represent a variety of backgrounds and perspectives, including people with HIV and groups that represent populations at higher risk of HIV infection. • Include health care providers, including Ryan White facility leadership. • Include community-based organizations. • Include other groups as appropriate, such as correctional or military facilities, tribal organizations, and behavioral providers,
☒ Completed ☐ In progress ☐ Not yet begun	• Communicate with key partners and stakeholders about health department activities surrounding cluster detection and response. This can occur through existing forums, separate meetings, or a combination of both. • Develop community presentations. CDC has prepared several resources that health departments can build on for this purpose. • Community engagement should include informing the community of the program, engaging stakeholders, hearing community priorities and ideas, acknowledging and responding to concerns, adapting programs to address those concerns when possible, and identifying additional roles for community partners in cluster and outbreak response situations. • Consider new ways to engage community and stakeholders about balancing risks, benefits, and competing priorities. • Use people-first, non-stigmatizing language (i.e., 'people with HIV', 'people who inject drugs', 'people at risk of HIV'). • Use language that can be easily understood by your audience (i.e., 'HIV data' instead of 'surveillance data', 'increase in diagnoses' or 'group of related infections' instead of 'cluster of HIV', 'outbreak', or 'molecular cluster').
☒ Completed ☐ In progress ☐ Not yet begun	• Establish mechanisms to ensure that community engagement is an ongoing process that responds to community needs and concerns. • Develop a plan and timeline for regular community stakeholder meetings. • Reach out to community partners to determine when, where, and how often such meetings should take place.

Please discuss each element for which you indicated that the completion status is either 'In progress' or 'Not yet begun'. Do you anticipate that these activities will be completed by December 2019? We have identified key partners (e.g. HCPC members, Health Commission members, LINCS, etc) and have begun to communicate about best practices and the use of molecular surveillance data. We have received feedback and have incorporated that into our plans and presentations. We believe that the community engagement process will be ongoing and will vary based on the populations identified in an cluster. For example, if we have an outbreak among persons experiencing homelessness, we will partner with agencies and stakeholders working directly with this population; if however, the outbreak was among housed MSM, we would work with different the agencies and stakeholders who address this particular population.

<u>Assessing data protections and enhancing related policies and procedures when necessary</u>

- ***Assessment of data protections should be completed no later than December 2019***

Completion status	Element
☒ Completed ☐ In progress ☐ Not yet begun	• Convene key staff, including surveillance and prevention leadership, the overall responsible party (ORP) for security and confidentiality, health department legal counsel, and any other relevant staff, to: ▪ Review your state's legal and regulatory context to determine existing protections and limitations on PII data release for public health and non-public health purposes. Identify measures that can be taken to strengthen these protections if needed. Include the following questions in your review: What are circumstances and process under which PII data may be released? ▪ Under what circumstances might PII data release to law enforcement/judiciary be required in our jurisdiction? Under a subpoena or a court order (which is more difficult to obtain)? Are there limitations on the type of data released? How often does the HD get requests for release of data for non-public health purposes? ▪ What is the process of reviewing those requests? How are determinations made? ▪ Have data been released to law enforcement? Under what circumstances? • Identify examples of effective health department response to such requests for PII data and update laws as needed.
☒ Completed ☐ In progress ☐ Not yet begun	• Review the CDC Data Security and Confidentiality Guidelines, and review staff training related to data sharing, security, and privacy. • Develop or update guidelines and staff training related to data sharing, security, and privacy.
☒ Completed ☐ In progress ☐ Not yet begun	• Develop a process and protocol to securely store data related to cluster analysis, investigation, and response and maintain patient privacy and confidentiality.
☒ Completed ☐ In progress	• Develop a process and protocol for sharing data related to cluster investigation and response between: • Local and state health departments within your jurisdiction

☐ Not yet begun	• Across multiple departments (e.g., HIV surveillance, HIV prevention, STD, DIS) within state and local health departments in your jurisdiction • With other states and separately funded surveillance jurisdictions involved, Develop data sharing agreements, or build on existing data sharing agreements, as needed.
☒ Completed ☐ In progress ☐ Not yet begun	• Assess potential benefits and risks of sharing data with external organizations that could be involved in cluster detection and response, including type of information that could be shared. ▪ What are standards for minimum necessary access?
☒ Completed ☐ In progress ☐ Not yet begun	• Develop and implement data sharing and security/confidentiality procedures for external organizations involved in cluster detection, and response (e.g., academic institutions, healthcare providers, CBOs). • What are staff roles and responsibilities for safeguarding data privacy and confidentiality?
☒ Completed ☐ In progress ☐ Not yet begun	• Conduct ongoing assessments of data security and data sharing and release policies and procedures as needed. • Determine the frequency with which ongoing assessments will be conducted.
Please discuss each element for which you indicated that the completion status is either 'In progress' or 'Not yet begun'. Do you anticipate that these activities will be completed by December 2019? We have a process for sharing data with the State Office of AIDS and within our Department of Public Health. However, data sharing agreements with other states will need to be developed as needed. We will build however on existing data sharing agreements and follow the protocols and procedures required by the SFDPH. With other states and separately funded surveillance jurisdictions involved, Develop data sharing agreements, or build on existing data sharing agreements, as needed. We will assess the potential benefites and risks of sharing data with each external organization as they are needed and identified. We will follow or standards for minimum necessary access.	

<u>Assessing implications of criminal exposure laws:</u>

Assessment of criminal exposure laws should be completed no later than December 2019

Completion status	Element
☒ Completed ☐ In progress ☐ Not yet begun	• Understand your state laws, the legal and cultural context, and work closely with legal counsel to understand legal requirements in your jurisdiction for using HIV data for non-public health purposes.
☒ Completed ☐ In progress ☐ Not yet begun	• Assess whether HIV criminalization statutes are currently present in your jurisdiction. If so, are these being enforced? The following questions should guide your assessment: • Does your state have HIV criminalization statutes? If so, what is their frequency of use? If not, are there other statutes under which PWH have been prosecuted? • Do you have evidence of these statutes' effect on HIV prevention efforts?

	• Are there opportunities to modernize or remove them? • If HIV criminalization statutes are in place in your jurisdiction, re-examine state laws, assess the laws' alignment with current evidence regarding HIV transmission risk, and consider whether the laws are the best vehicle by which to achieve their intended purpose.
Please discuss each element for which you indicated that the completion status is either 'In progress' or 'Not yet begun'. Do you anticipate that these activities will be completed by December 2019?	

Foundational activities necessary for effectively detecting and responding to transmission clusters

Developing internal and external health department collaborations

Development of processes health department collaborations should be completed no later than December 2019

Completion status	Element
☒ Completed ☐ In progress ☐ Not yet begun	• Develop a process for including key health department staff in collaborations related to cluster detection and response activities. Key staff include HIV surveillance leadership or staff, HIV prevention leadership or staff, partner services or STD leadership or staff, and HIV care or Ryan White leadership or staff. • Depending on your local circumstances, other health department staff that you should also consider including are: viral hepatitis leadership or staff, the state epidemiologist, infectious or communicable disease staff, communications or media staff, and legal counsel. • Additionally, states that have local health departments should consider including them in collaborations. • Establish collaborations early, and involve staff from relevant areas in the following: ▪ Developing cluster and outbreak detection and response plan ▪ Assessing prevention portfolio ▪ Community engagement, and incorporating input from community ▪ Reviewing results of cluster analysis and prioritizing clusters ▪ Implementing cluster response • Determine the format for engaging key staff (e.g., case conferences, joint meetings) and how frequently discussions will take place. • Develop process for routine review and prioritization of clusters to determine what response activities are needed, ensuring that key staff from relevant areas are involved in the review and decision-making process.
☒ Completed ☐ In progress ☐ Not yet begun	• Determine the circumstances for involving local health departments in decision-making and discussions regarding cluster detection and response activities, as appropriate. (For example, systematic communication and collaboration with county or regional health authorities when a new cluster is detected within their jurisdictions).

☒ Completed ☐ In progress ☐ Not yet begun	• Identify any policies or state or local laws in place that may hinder cluster investigation and response (for example, limitations to re-engaging with persons after the initial partner services interview is complete), and opportunities that may be available to revise policies or laws.
Please discuss each element for which you indicated that the completion status is either 'In progress' or 'Not yet begun'. Do you anticipate that these activities will be completed by December 2019? Determining the circumstances for involving local health departments will also be ongoing as new jurisdictions that need to be involved are identified. We have begun to have conversations with State Office of AIDS on multi-jurisdictional clusters and will collaborating with State Office of AIDS and other health departments on cluster detection and response activities, as needed. We anticipate this activity will be completed by December 2019.	

<u>Developing capacity for cluster detection</u>

Health departments should begin both time-space cluster detection no later than June 2019, and molecular cluster detection no later than December of 2019.

Completion status	Element
☒ Completed ☐ In progress ☐ Not yet begun	• Develop a protocol for systematically using the CDC-provided SAS program and/or other locally-developed methods to identify time-space clusters.
☒ Completed ☐ In progress ☐ Not yet begun	• Consider the geographic areas (i.e., counties, MSAs, regions) that will be examined using these methods and how often time-space cluster analysis will be conducted. Once begun, time-space cluster detection should occur at least monthly.
☒ Completed ☐ In progress ☐ Not yet begun	• Develop a process for routine collection of HIV nucleotide sequences via ELR. • Assign a staff member(s) to assess completeness and timeliness of the data and address data quality issues as they arise.
☒ Completed ☐ In progress ☐ Not yet begun	• Develop training procedures and requirements for onboarding new staff involved in cluster detection, investigation, and response, including security and confidentiality.

☒ Completed
☐ In progress
☐ Not yet begun
	• Develop a protocol for analyzing nucleotide sequence data using Secure HIV-TRACE or another CDC-approved method to detect clusters and monitor the growth of previously identified clusters.
	  • Assign a staff member(s) to conduct analysis, and determine a timeframe for the frequency with which analysis will be conducted. Once begun, molecular cluster detection should occur at least monthly.
	  • Developing analytic capacity may require training or hiring staff to ensure adequate skills.

☒ Completed ☐ In progress ☐ Not yet begun	• Develop procedures to routinely identify clusters detected through partner services.

☒ Completed ☐ In progress ☐ Not yet begun	• Develop a forum for routine discussion of all clusters detected within the jurisdiction by any method
Please discuss each element for which you indicated that the completion status is either 'In progress' or 'Not yet begun'. For molecular cluster detection activities, do you anticipate that these activities will be completed by December 2019?	

Assessing the prevention portfolio and fiscal mechanisms needed for response

Health departments should complete assessment of prevention portfolio no later than December 2019 and continue re-assessing in an ongoing manner after that time.

Completion status	Element
☒ Completed ☐ In progress ☐ Not yet begun	• Identify organizations with expertise in particular prevention activities (e.g., testing, partner services, PrEP), specific subpopulations (e.g., gay and bisexual men, people who inject drugs, transgender persons, heterosexuals, immigrants), and different geographic areas (e.g., different regions, urban vs. suburban vs. rural areas).
☒ Completed ☐ In progress ☐ Not yet begun	• Determine what existing mechanisms are used for conducting public health activities, and what level of flexibility is needed to respond to clusters. Include in your assessment in-house staff, contracts, cooperative agreements, and grants.
☒ Completed ☐ In progress ☐ Not yet begun	• Assess whether existing mechanisms for conducting public health activities (e.g., contracts, grants) provide sufficient ability to adapt for cluster and outbreak response. • Work to build flexibility into funding mechanisms and agreements. • Proactively address issues such as secure data sharing
☒ Completed ☐ In progress ☐ Not yet begun	• Identify which community partners can be mobilized to assist with cluster interventions if needed. Include community providers that can provide HIV testing, prevention, and treatment services in case of an escalated response.
☒ Completed ☐ In progress ☐ Not yet begun	• Assess whether existing intramural and extramural funding mechanisms for conducting public health activities (e.g., testing, PrEP, linkage and reengagement, SSP, medication-assisted treatment) are flexible enough to allow for an unexpected cluster and outbreak response.
Please discuss each element for which you indicated that the completion status is either 'In progress' or 'Not yet begun'. Do you anticipate that these activities will be completed by December 2019?

ASSURANCE OF COMPLIANCE
with the
"PROGRAM GUIDANCE ON THE REVIEW OF HIV-RELATED EDUCATIONAL AND INFORMATIONAL MATERIALS FOR CDC ASSISTANCE PROGRAMS"

By signing and submitting this form, we agree to comply with the specifications set forth in the "Program Guidance on the Review of HIV-Related Educational and Informational Materials for CDC Assistance Programs," revised as of June 2016.

We agree that all written materials, audio visual materials, and pictorials, including social marketing and advertising materials, educational materials, social media communications (e.g., Facebook, twitter) and other electronic communications, such as internet/webpages will be submitted to a Program Review Panel. The Panel shall be composed of no less than five persons representing a reasonable cross-section of the general population; but which is not drawn predominantly from the intended audience. See additional requirements in the referenced program guidance, especially section 2 (c-d) (1-5) regarding composition of Panel.

The Program Review Panel, guided by the CDC Basic Principles, set forth in 1(a-g), will review and approve all applicable materials before their distribution and use in any activities funded in any part with CDC assistance funds.

Following are the names, occupations, and organizational affiliations of the proposed panel members: (If panel has more members than can be shown here, please indicate additional members on the reverse side.)

CDC 0.1113 (E), Rev. 6/2016, CDC Adobe Acrobat DC Electronic Version, 6/2016

Version/Document Date: 9/16/2019

Table of Contents

Section 1: Detailed Program Activities 2
Section 2: Timeline 6
Section 3: Collection and Quality Assurance of CDC-Required Data 10
Section 4: Updates to Other Sections of the Year 1 EPMP 11

Section 1: Detailed Program Activities

In the tables below, please update, concisely, what will be done in Year 2 and Years 3-5 under each CDC-required primary HIV prevention activity (e.g., conduct HIV testing), surveillance activity (e.g., collect HIV case data), CDC-required sub-activity (e.g., implement and/or coordinate opt-out HIV testing of patients in healthcare settings; CIDR, risk factor ascertainment, data quality), and locally defined activity that will be implemented to address the PS18-1802 goals/priorities and strategies. Activities from Year 1 that have not be started or are in progress should remain in the table, completed activities should be removed. Add lines as needed.

Note: The primary activities and sub-activities should be the same as those identified in your PS18-1802 program logic model available in your Year 1 EPMP.

Goal/Priority 1:	**Cross-cutting Core Surveillance and Program Monitoring & Evaluation Activities**	
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
Strategy 1: Systematically collect, analyze, interpret, and disseminate HIV data to characterize trends in HIV infection, detect active HIV transmission, implement public health interventions, and evaluate public health response		
Activity 1.A: HIV surveillance: Collect HIV case data, including (but not limited to) data on CD4 cell count, HIV viral load, molecular laboratory test results, vital status, and geocoding	SFDPH will conduct ongoing HIV case surveillance activities and HIV prevention program evaluation to identify specific populations at risk for HIV and living with undiagnosed HIV and to assess trends and disparities along the HIV Care Continuum. Data collected will be continually evaluated for completeness, timeliness and accuracy. The data will be shared with clinical and community-based providers and San Francisco's integrated HIV prevention and care planning group, the HIV Community Planning Council (HCPC) HIV prevention strategies will be rapidly adjusted to align with the most current trends.	No anticipated changes.
Activity 1.B: HIV prevention program monitoring & evaluation: Collect data to monitor and evaluate HIV prevention programs	EvaluationWeb will be used as the repository of and reporting system for HIV testing data for both 18-1802 funded and non-18-1802 funded programs. In some cases, data is keyed in but all other 18-1802 data is uploaded from agencies' own systems.	EvaluationWeb variables will change as of 01/01/2019; San Francisco has been working with Luther Consulting and developing internal strategies to implement these changes and pass this off to our providers.

Goal/Priority 2:	**Increase individual knowledge of HIV status**	
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
Strategy 2: Identify persons with HIV infection and uninfected persons at risk for HIV infection		
Activity 2.A: Conduct HIV testing	SFDPH will continue to support high-volume, targeted testing to high prevalence populations (MSM, PWID, and trans women) as well as casting a wider net to reach populations not yet reached with the current testing strategy. RNA pooling and 4th generation rapid testing continue to enhance our testing strategy by making individuals aware of their acute HIV status, reducing risk to partners and linking to care faster. SFDPH will also reinvigorate medically based opt-out HIV testing and	SFDPH is currently conducting a "Roadmap" process that will inform a change in strategies and approaches to HIV prevention and care activities. The resulting changes in systems and program requirements will be described in an RFP expected to be released in early 2019, for services beginning in July or September. We will continue to provide updates to our Project Officers on this process and our discussions during our regular scheduled teleconferences.

Goal/Priority 2:	**Increase individual knowledge of HIV status**	
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
	work to find late testers earlier in their course of infection as well as the estimated 6% of PLWH who are unaware of their infection. Although not supported by 18-1802, San Francisco will continue to report on testing performed in medical settings.	
Activity 2.B: Conduct HIV partner services (for new and previously diagnosed persons)	Partner services will be offered to all clients newly diagnosed with HIV. Partner services will also be offered to not-in-care clients enrolled in navigation who are IDU, women, diagnosed with an STD or identified to be part of a transmission cluster.	No anticipated changes.

Goal/Priority 3:	**Rapidly detect and interrupt HIV transmission**	
Strategy 3: Develop, maintain, and implement a plan to respond to HIV transmission clusters and outbreaks		
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
Activity 3.A: Identify and investigate HIV transmission clusters and outbreaks	SFDPH, as a previous Molecular Surveillance funded jurisdiction, is experienced and well- equipped to develop a Cluster/Outbreak Response Plan and investigate clusters (via the Linkage Integration Navigation, Comprehensive Services [LINCS] team). We will implement Secure HIV-TRACE to analyze HIV nucleotide sequences and identify molecular clusters at the local level. We will work with Project Inform, a community think tank, to engage the community, building knowledge and support for these activities.	No anticipated changes.
Activity 3.B: Rapidly respond to and intervene in HIV transmission clusters and outbreaks	SFDPH will prioritize and investigate transmission clusters that are concerning for recent and ongoing transmission. For newly identified HIV- positive cluster members, prioritize for rapid intervention and partner services. PLWH in transmission clusters who are not virally suppressed will be prioritized for engagement in HIV care services.	No anticipated changes, but will consistently monitor for any changes in demographics or other trends.
Activity 3.C: Maintain outbreak identification and response plan	SFDPH has an extensive infectious disease emergency response plan involving multiple branches within the SFDPH Population Health Division. We will modify this plan to specifically address a potential HIV outbreak or rapidly growing transmission cluster. As part of the response, we will confirm the cluster, identify and characterize risk networks involved with the cluster, and identify communities who are in need of targeted testing, prevention efforts, and linkage to care. SFDPH staff regularly discuss all-hazards response plans with other jurisdictions throughout the San Francisco Bay Area and the state. We will utilize existing health alert communication systems in order to communicate with other public health professionals as needed. As part of our ongoing public health emergency preparedness and response plans, we are assessing and evaluating jurisdictional capacity for cluster detection and response	No anticipated changes.

Goal/Priority 3:	Rapidly detect and interrupt HIV transmission	
	involving epidemiological investigations and surveillance on an ongoing basis.	

Goal/Priority 4:	Reduce transmission from persons living with HIV infection	
Strategy 4: Provide comprehensive HIV-related prevention services for people living with diagnosed HIV infection		
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
Activity 4.A: Provide linkage to HIV medical care for persons with newly and previously diagnosed HIV infection identified through HIV testing and partner services	SFDPH will strengthen, streamline, and address gaps in linkage and retention services for PLWH, with the goal of establishing a clear, patient-centered process from point of diagnosis through accessing and staying engaged in HIV care. The strategy will include Data to Care activities; centralized linkage and re-engagement activities through the LINCS program, and other key retention efforts, especially for populations with the greatest barriers to care.	No anticipated changes. We plan to work to work with San Francisco Health Network and Ryan White case managers to improve retention of PLWH who are loosely engaged in care.
Activity 4.B: Conduct data-to-care activities • Identify persons with previously diagnosed HIV infection who are not in care through data-to-care activities • Provide linkage to, re-engagement in, and retention in HIV medical care services for persons with previously diagnosed HIV infection who are not in care identified through data-to-care activities	HIV surveillance will continue to support the LINCS team in DTC activities by providing lists of PLWH who are not virally suppressed or linked to HIV care, those with early infection or other prioritized groups. In addition, HIV surveillance will match clinic generated NIC lists to eHARS to identify persons to prioritize for investigation and navigation. Persons identified in transmission clusters who are not linked to care or virally suppressed will also be included in NIC lists provided to LINCS.	No anticipated changes.
Activity 4.C: Promote early ART initiation	Rapid initiation of treatment for those testing HIV positive is a pillar of San Francisco's Getting to Zero efforts and is a priority for all linkage to care efforts. Through component B funding, SFDPH has implemented public health detailing to educate medical providers and frontline workers about RAPID as well as LINCS and PrEP.	No anticipated changes.
Activity 4.D: Support medication adherence	Programs funded to serve HIV positive clients have two primary goals, to link to care and to maintain HIV treatment in order to reduce HIV viral load to undetectable and agencies must report on their efforts. Through component B funding, SFDPH is exploring opportunities to improve medication safe storage, particularly for patients who are homeless or unstably housed. For programs providing PrEP, navigation services are available to ensure maintenance out to six months of initiation.	No anticipated changes.
Activity 4.E: Promote and monitor HIV viral suppression	Viral suppression at the population level is monitoring by analyses of HIV surveillance data for persons newly diagnosed with HIV as well as viral suppression among all PLWH. SFDPH is working with quality improvement efforts and EMR team in the San Francisco Health Networks to routinely identify PLWH who are presenting for services but are not engaged in primary care.	The San Francisco Health Network will migrate to EPIC EMR in Fall 2019. We will assist in the development of new workflow to ensure routine HIV panel management and improved understanding of care coordination team in the EMR record.

Goal/Priority 4:	Reduce transmission from persons living with HIV infection	
Activity 4.F: Monitor HIV drug resistance	SFDPH collects, process, and import HIV nucleotide sequences to eHARS routinely. We monitor transmitted drug resistance over time using CDC processed HIV sequence dataset and accompanying SAS programs. The results are presented in SFDPH HIV annual report for dissemination.	No changes. We will work with State Office of AIDS and Association of Public Health Laboratories to assist Stanford Laboratory with reporting to improve the completeness of HIV nucleotide sequence data.
Activity 4.G: Conduct risk-reduction interventions for PLWH	All SFDPH programs serving prioritized populations have goals of linking to appropriate HIV/HCV/STI testing and treatment as well as referral to PEP and PrEP. These services have been integrated into holistic programs or "Special Projects" to meet the needs of prioritized populations, i.e. MSM and AAMSM (SFAF), Latino MSM (AGUILAS & IFR) and trans women (SFCHC). All activities within these Special Projects for PLWH have the objective of linkage to care, retention in treatment and medication adherence.	No anticipated changes.
Activity 4.H: Actively refer PLWH to essential support services, including screening and active referral for healthcare benefits, behavioral health services, and social services	18-1802 Funded and non-funded testing programs have referral systems in place with a focus on populations with the highest disparities in access to prevention, treatment and care.	No anticipated changes.

Goal/Priority 5:	Prevent new infections among HIV negative persons	
Strategy 5: Provide comprehensive HIV-related prevention services for HIV-negative persons at risk for HIV infection		
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
Activity 5.A: Provide periodic HIV testing and risk screening	Continue high volume HIV/STI testing at SFDPH City Clinic. This activity is funded by 18-1802. Continue HIV/STI/HCV testing in Jail Health Services which is partially funded by 18-1802. • Continue high volume community- based HIV/HCV/STI testing for high prevalence populations (MSM, trans women, PWID) at San Francisco AIDS Foundation's Magnet clinic, UCSF Alliance Health Project, and as well as testing in agencies providing services to AAMSM (SFAF), Latino MSM (AGUILAS, IFR) trans women (SFCHC) and PWID (Glide, SFAF) in "Special Projects. • Continue HIV/HCV testing in substance use treatment settings (Westside, Bayview Hunter's Point Foundation) • We are dropping rapid HIV rapid testing from PrEP f/u visits at Magnet, (highest volume site) and that we are considering doing the same at SFCC, and that once the rapid HIV test is dropped, we will continue to test patients for HIV using a pooled HIV RNA. So no longer testing them twice. If clients reports not being adherent to PrEP rapid test will run. be run. This should free up fund to allow for expanded	No anticipated changes.
Activity 5.B: Provide screening for PrEP eligibility	• Continue continuum of PrEP services in community-based settings at five agencies providing services to MSM (AHP)	No anticipated changes.

Goal/Priority 5:	Prevent new infections among HIV negative persons	
	AAMSM (SFAF), Latino MSM (AGUILAS, IFR) trans women (SFCHC) and Youth (LYRIC). • Continue continuum of PrEP services in clinical settings at San Francisco City Clinic, SFDPH Primary Care clinics and Mission Wellness Pharmacy.	
Activity 5.C: Provide linkage to and support for PrEP	Provide services as in 5B above and include PrEP as a component of all HIV test counselor trainings.	No anticipated changes.
Activity 5.D: Provide risk reduction interventions for HIV-negative persons at risk for HIV infection	Continue spectrum of prevention services, from low to high threshold at five agencies providing services to AAMSM, Latino MSM, trans women, and MSM through Special Projects as described above.	No anticipated changes.
Activity 5.E: Actively refer HIV-negative persons at risk for HIV infection to essential support services, including screening and active referral for healthcare benefits, behavioral health services, and social services	• Funded: Continue high volume HIV testing at SFDPH CityClinic. • Non-funded: Continue high volume community- based testing for high prevalence populations (MSM, trans women, PWID) at San Francisco AIDS Foundation's Magnet clinic, UCSF Alliance Health Project, and as well as testing in agencies providing services to AAMSM (SFAF), Latino MSM (AGUILAS, IFR) trans women (SFCHC) and PWID (Glide, SFAF). These testing programs have referral systems in place with a focus on populations with the highest disparities in access to prevention, treatment and care.	No anticipated changes.
Strategy 6: Conduct perinatal HIV prevention and surveillance activities (or indicate if opt-out has been approved by CDC)		
Activity 6.A: Promote universal prenatal HIV testing	San Francisco was granted a waiver for Strategy 6 given 12 years of 0 perinatal transmissions.	
Activity 6.B: Provide perinatal HIV service coordination		
Activity 6.C: Conduct case surveillance for women with diagnosed HIV infection and their infants		
Activity 6.D: Conduct perinatal HIV exposure reporting		
Activity 6.E: Conduct fetal and infant mortality reviews		

Goal/Priority 6:	Cross-cutting Program Core Strategy	
Strategy 7: Conduct community-level HIV prevention activities (or indicate if opt-out has been approved by CDC)		
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
Activity 7.A: Conduct condom distribution programs	• Continue citywide condom distribution program (agencies/businesses can request free condoms from SFDPH).	No anticipated changes.

Goal/Priority 6:	Cross-cutting Program Core Strategy	
	• Distribute condoms and safer sex supplies at community venues such as bars and events and health fairs, such as Carnival, Pride, and Folsom Street Fair. • Continue to provide condom distribution at SFDPH clinics and SFDPH- funded HIV prevention programs	
Activity 7.B: Coordinate and collaborate with syringe services programs	• Not funded: Continue to support San Francisco AIDS Foundation and its community-based subcontractors to provide syringe access and disposal programs throughout SF. • Continue to expand disposal options, including large kiosks and wall-mounted disposal boxes placed in "hot spots". • Continue to engage people who use drugs about the importance of proper syringe disposal and gather input on placement of kiosks and boxes. • Continue to engage with communities and neighborhoods regarding importance of syringe services. • Continue to develop DPH Community Health Response Team to address syringe disposal issues. • Continue to provide syringe access and disposal services at homeless encampments and health fairs for people experiencing homelessness and/or who use drugs.	No anticipated changes.
Activity 7.C: Conduct social marketing campaigns	Continue two existing campaigns funded by GTZ and PriDE that focus on reducing anti HIV stigma and decreasing barriers to PrEP particularly among AAMSM and other communities of color.	No anticipated changes.
Activity 7.D: Implement social media strategies	Ensure that current and upcoming social marketing campaigns continue to incorporate social media strategies in their efforts when appropriate for the audience.	No anticipated changes.
Activity 7.E: Support community mobilization	Work with the HCPC and other community partners to develop innovative strategies for reaching and mobilizing communities of color.	No anticipated changes.

Goal/Priority 7:	Reduce HIV-related Health Inequalities (cross-cutting)	
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
G/P.7 Address Stigma as a driver of health disparities.	Reducing HIV related stigma to zero in San Francisco is one of GTZ's 3 goals and also one of the initiative's 4 strategies. DPH will continue to support the GTZ Stigma Committee and consider recommendations on how to address stigma among people at risk for and living with HIV, particularly among people of color. A campaign to promote U=U is in development.	No anticipated changes.

Goal/Priority 8:	Cross-cutting Operational and Foundational Strategies
Strategy 8: Develop partnerships to conduct integrated HIV prevention and care planning	

Goal/Priority 8:	Cross-cutting Operational and Foundational Strategies	
Activities & Sub-activities	**What will be done**	
	Year 2	**Years 3-5**
Activity 8.A: Maintain HIV planning group	• Continue to maintain partnership with the HCPC and build Council members' capacity to participate in integrated planning. • Write, submit, and disseminate an updated SF EMA Integrated HIV Prevention and Care Plan, incorporate HCPC recommendations. • Monitor the SF EMA Integrated HIV Prevention and Care Plan.	No anticipated changes
Activity 8.B: Develop HIV prevention and care networks	• Co-develop an integrated prevention and care "roadmap" with the HCPC to guide future funding and services. • Conduct extensive community engagement with care and prevention provider networks to give input on the roadmap. • Continue to maintain and support GTZ initiatives and subcommittees using the goals and strategies of the initiative as a lens for prioritizing services. • SFDPH will continue to engage the HCPC in data-driven planning through annual and as-needed presentations and discussions focusing on trends in the HIV Care Continuum by demographic groups. Population-based surveillance data as well as community and program-level data will inform this process.	Continue to maintain networks during roadmap implementation, to get feedback on what is working and what needs to be changed.
Strategy 9: Implement structural strategies to support and facilitate HIV surveillance and prevention		
Activity 9.A: Ensure data security, confidentiality, and sharing	SFDPH staff and funded contractors are trained in the local SFDPH data and confidentiality standards (which comply with NCHHSTP standards), the CDC security and confidentiality standards and the State Office of AIDS standards at the time of hire and yearly thereafter. SFDPH HIV surveillance maintains secure procedures for data sharing, including D2C activities and use of surveillance data across HIV programs including prevention programs and LINCS within the context of existing laws.	No anticipated changes
Activity 9.B: Strengthen laws, regulations, and policies	The State of California has laws governing how HIV surveillance data is collected and shared in place that have allowed SFDPH HIV surveillance to successful ensure data security, confidentiality and sharing.	No anticipated changes
Activity 9.C: Strengthen health information systems infrastructure	SFDPH is in the process of implementing a new electronic health record (EHR) system for DPH (Go Live is August 3, 2019). The two main hospitals (ZSFG and Laguna Honda Hospital), Ambulatory Care clinics, the Population Health Division clinics, the Public Health Laboratory, and Jail Health Services, and Behavioral Health clinics are undergoing adoption of the new EHR and we are currently in the adoption phase of the build. Representatives from HIV surveillance and HIV prevention have been meeting regularly with this EHR team to assess how the new EHR will enhance public health surveillance, analysis and reporting. We are identifying changes in work flows and resource needs that will support	No anticipated changes

Goal/Priority 8:	Cross-cutting Operational and Foundational Strategies	
	the new EHR when we are live with the new system while taking a critical look at improving our work flows and becoming more efficient in the work that we do. We are discussing metrics and reporting of standardized data definitions and processes.	
Activity 9.D: Promote expansion of technological advances	SFDPH staff is working with a large community testing site to pilot test a more efficient and secure mechanism using DocuSign for passive HIV case reporting. The pilot will be used to identify reporting issues and inform protocol revisions and roll-out to other passive reporting sites.	After this pilot test, lessons learned will be applied and additional testing sites will be invited to participate in case reporting using DocuSign.
Strategy 10: Conduct data-driven planning, monitoring, and evaluation to continuously improve HIV surveillance, prevention, and care activities		
Activity 10.A: Conduct data-driven planning for HIV surveillance, prevention, and care activities	SFDPH, in collaboration with the Getting to Zero Consortium, is developing a formalized system for data driven planning, monitoring, and evaluation using "scorecards" developed using the Results-Based Accountability framework (Friedman). The scorecards will be used to monitor data at community-based organizations as well as at the population level. In addition, HIV surveillance data will be continued to be analyzed and shared to monitor the impact of local HIV prevention efforts on the population level and to provide a data-driven basis for changes in policies or strategies.	No anticipated changes
Activity 10.B: Conduct data-driven monitoring and evaluation and use findings to continuously improve HIV surveillance and prevention activities	Program-level, strategy-level, and collective impact scorecards have begun to illuminate successes as well as disparities and gaps that need to be addressed. HIV surveillance data is being actively shared with GTZ subcommittees focusing on specific vulnerable populations including the homeless and people who inject drugs and with community prevention partners.	No anticipated changes
Strategy 11: Build capacity for conducting effective HIV program activities, epidemiologic science, and geocoding		
Activity 11.A: Assess capacity-building assistance needs	2018 will be an intensive planning year for SFDPH as it embarks on formative work for an RFP being released in 2019. SFDPH will work closely with CBOs to plan for shifts in HIV prevention strategies and activities. CBA needs will be assessed and CBA plans developed annually thereafter.	No anticipated changes
Activity 11.B: Develop and implement capacity-building assistance plans, including technical assistance	As the new prevention strategies and activities are being developed, SFDPH will continue its communication with its community partners and HCPC and develop trainings to ensure providers are successful in their new ventures.	No anticipated changes
Activity 11.C: Enhance epidemiologic and analytic capacity (e.g., data to care, cluster detection and investigation) and other prevention activities	SFDPH has been conducting Data to Care (DTC) activities as a joint activity between HIV surveillance and the LINCS program since 2012 and DTC activities have increased with CDC PrIDE funding in recent years. Drawing on past experience, we continue to refine and improve our DTC efforts and apply lessons learned in DTC to local Data to PrEP efforts for prevention of HIV. In addition, we will implement HIV-TRACE as a new tool to identify persons of concern who are not virally suppressed and/or who are part of a recent transmission cluster and continually evaluate the utility of this new tool as a prevention activity.	No changes.

Goal/Priority 8:	Cross-cutting Operational and Foundational Strategies	
Activity 11.D: Enhance geocoding and data linkage capacity	SFDPH surveillance collects complete address at time of diagnosis and current address is updated through routine follow-up chart abstraction. This information is geocoded to the census tract level and maps showing, for example, the geographic distribution of all PLWH, newly diagnosed cases, and their viral suppression and linkage to care rates as well as testing rates by neighborhood and zip code are produced and shared in our annual epidemiology report.	No anticipated changes

Section 2: Timeline for Evaluation Tasks

Use the timeline below to list the project tasks and responsible parties associated with evaluating your program. Place an "X" in the appropriate date box to indicate task timeframes. If your project officer has exempt your program from performing specific activities, please note the exemption by entering "NA" or "exempt" on the Evaluation Task line. Project tasks should support the activities described in Section 1.

Evaluation Task	Responsible Party	Timeframe for Conducting Task				
		TASK COMPLETED	MONTHLY	QUARTERLY	SEMI-ANNUALLY	ANNUALLY
Strategy 1: Systematically collect, analyze, interpret, and disseminate HIV data to characterize trends in HIV infection, detect active HIV transmission, implement public health interventions, and evaluate public health response						
Activity: 1.A **HIV surveillance: Collect HIV case data, including (but not limited to) data on CD4 cell count, HIV viral load, molecular laboratory test results, vital status, and geocoding**						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 1.B HIV prevention program monitoring & evaluation: Collect data to monitor and evaluate HIV prevention programs						
All tasks are on-going and continued from 2018	Susan Scheer					
Strategy 2: Identify persons with HIV infection and uninfected persons at risk for HIV infection						
Activity 2.A Conduct HIV testing						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 2.B Conduct HIV partner services (for new and previously diagnosed persons)						
All tasks are on-going and continued from 2018	Susan Scheer					
Strategy 3: Develop, maintain, and implement a plan to respond to HIV transmission clusters and outbreaks						
Activity 3.A Identify and investigate HIV transmission clusters and outbreaks						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 3.B Rapidly respond to and intervene in HIV transmission clusters and outbreaks						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 3.C Maintain outbreak identification and response plan						
SFDPH will develop, maintain and submit the outbreak identification plan per the August 29, 2019 deadline.	Susan Scheer					
Strategy 4: Provide comprehensive HIV-related prevention services for people living with diagnosed HIV infection						
Activity 4.A Provide linkage to HIV medical care for persons with newly and previously diagnosed HIV infection identified through HIV testing and partner services						
All tasks are on-going and continued from 2018	Susan Scheer					

Evaluation Task	Responsible Party	Timeframe for Conducting Task				
		TASK COMPLETED	MONTHLY	QUARTERLY	SEMI-ANNUALLY	ANNUALLY
Activity 4.B: Conduct data-to-care activities						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 4.C: Promote early ART initiation						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 4.D Support medication adherence						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 4.E Promote and monitor HIV viral suppression						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 4.F Monitor HIV drug resistance						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 4.G Conduct risk-reduction interventions for PLWH						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 4.H Actively refer PLWH to essential support services, including screening and active referral for healthcare benefits, behavioral health services, and social services						
All tasks are on-going and continued from 2018						
Strategy 5: Provide comprehensive HIV-related prevention services for HIV-negative persons at risk for HIV infection						
Activity 5.A Provide periodic HIV testing and risk screening						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 5.B Provide screening for PrEP eligibility						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 5.C Provide linkage to and support for PrEP						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 5.D Provide risk reduction interventions for HIV-negative persons at risk for HIV infection						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 5.E Actively refer HIV-negative persons at risk for HIV infection to essential support services, including screening and active referral for healthcare benefits, behavioral health services, and social services						
All tasks are on-going and continued from 2018	Susan Scheer					
Strategy 6: Conduct perinatal HIV prevention and surveillance activities (or indicate if opt-out has been approved by CDC)						
Activity 6.A Promote universal prenatal HIV testing						
San Francisco has been approved to opt-out of this strategy.	Susan Scheer					
Activity 6.B Provide perinatal HIV service coordination						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 6.C Conduct case surveillance for women with diagnosed HIV infection and their infants						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 6.D Conduct perinatal HIV exposure reporting						
All tasks are on-going and continued from 2018	Susan Scheer					

Evaluation Task		Responsible Party	Timeframe for Conducting Task				
			TASK COMPLETED	MONTHLY	QUARTERLY	SEMI-ANNUALLY	ANNUALLY
Activity 6.E	Conduct fetal and infant mortality reviews						
All tasks are on-going and continued from 2018		Susan Scheer					
Strategy 7: Conduct community-level HIV prevention activities (or indicate if opt-out has been approved by CDC)							
Activity 7.A	Conduct condom distribution programs						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 7.B	Coordinate and collaborate with syringe services programs						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 7.C	Conduct social marketing campaigns						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 7.D	Implement social media strategies						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 7.E	Support community mobilization						
All tasks are on-going and continued from 2018		Susan Scheer					
Strategy 8: Develop partnerships to conduct integrated HIV prevention and care planning							
Activity 8.A	Maintain HIV planning group						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 8.B	Develop HIV prevention and care networks						
All tasks are on-going and continued from 2018		Susan Scheer					
Strategy 9: Implement structural strategies to support and facilitate HIV surveillance and prevention							
Activity 9.A	Ensure data security, confidentiality, and sharing						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 9.B	Strengthen laws, regulations, and policies						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 9.C	Strengthen health information systems infrastructure						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 9.D	Promote expansion of technological advances						
All tasks are on-going and continued from 2018		Susan Scheer					
Strategy 10: Conduct data-driven planning, monitoring, and evaluation to continuously improve HIV surveillance, prevention, and care activities							
Activity 10.A	Conduct data-driven planning for HIV surveillance, prevention, and care activities						
All tasks are on-going and continued from 2018		Susan Scheer					
Activity 10.B	Conduct data-driven monitoring and evaluation and use findings to continuously improve HIV surveillance and prevention activities						
All tasks are on-going and continued from 2018		Susan Scheer					
Strategy 11: Build capacity for conducting effective HIV program activities, epidemiologic science, and geocoding							
Activity 11.A	Assess capacity-building assistance needs						
All tasks are on-going and continued from 2018		Susan Scheer					

Evaluation Task	Responsible Party	Timeframe for Conducting Task				
		TASK COMPLETED	MONTHLY	QUARTERLY	SEMI-ANNUALLY	ANNUALLY
Activity 11.B Develop and implement capacity-building assistance plans, including technical assistance						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 11.C Enhance epidemiologic and analytic capacity (e.g., data to care, cluster detection and investigation) and other prevention activities						
All tasks are on-going and continued from 2018	Susan Scheer					
Activity 11.D Enhance geocoding and data linkage capacity						
All tasks are on-going and continued from 2018	Susan Scheer					

Section 3: Collection and Quality Assurance of CDC-Required Data

In the table below, please list any experienced or anticipated delays in collecting required data, the reason for the delay, the resolution, and any capacity-building assistance you will need to help resolve the delays. At a minimum, you should consider **NHM&E** and **Surveillance** data. If you do not have any data collection delays or capacity building/TA needs, please enter “NA” in the “Delayed Activities” column.

Data Collection Delays (refer to Year 1 EPMP Table 8)		
Delayed Activities	**Reason for Data Collection Delay and Anticipated Resolution**	**TA and Capacity Building Needs**
N/A		

Section 4: Updates to Other Sections of the Year 1 EPMP (if any)

In the table below, please describe any other updates to the Year 1 EPMP. If there are no changes to the sections listed, indicate “No Updates”.

Updates to Other Sections of the Year 1 EPMP (if any)			
EPMP Component	**EPMP Table**	**No Updates**	**Briefly Describe Update (if any)**
Logic Model	NA	☒	
Priority/Target Populations	2	☒	
Stakeholder Engagement	3	☒	
Primary Users of Evaluation	4	☒	
Local Monitoring and Evaluation Measures	6	☒	

Updates to Other Sections of the Year 1 EPMP (if any)			
EPMP Component	**EPMP Table**	**No Updates**	**Briefly Describe Update (if any)**
Data Collection and CDC Transmission	7	☒	
Data Management Plan	9	☐	The newly required variables, eHARS state and city numbers, are managed by the HIV Surveillance Unit and meet CDC standards for physical and digital security. Testing events with eHARS data are analyzed in an area with restricted access and PGP-shredded off local computer at the end of the day. When not in use, the data is stored on an encrypted flash drive and stored in the HIV registry, a room with an alarm within the restricted space. Updates to positive tests are made by an HIV surveillance epidemiologist directly into Evaluation Web.
Evaluation Reports	10	☒	
Data Monitoring Reviews and Use	11	☒	
Sharing of Evaluation Findings and Lessons Learned	12	☒	
Contract Support for Program or Evaluation Related Activities	13	☒	
MOU, MOA, or Data Sharing Agreements	14	☒	
Key CDC Indicators	15	☒	
Local Objectives	16	☒

Job Description: Director, Population Health Division and PS 18-1802 Principal Investigator (T. Aragon) This position is in-kind. Dr. Aragón is the San Francisco Health Officer and the Director of the Population Health Division (PHD) of SFDPH. Dr. Tomas Aragón provides overall leadership of the project. Dr. Aragón is responsible for overall planning, implementation, monitoring, and reporting of the program. Dr. Aragon also provides oversight for the Continuous Quality Improvement (CQI) and evaluation activities.

Job Description: Deputy Director, Population Health Division (C. Siador) Ms. Siador is the Business Official for this cooperative agreement. This position is in-kind. She has overall budget/grant oversight authority, and works closely with Finance, Budget and Contracts departments to oversee that grant deliverables are met by established deadlines. As one of the project sponsors, she will provide guidance and input as needed.

Job Description: Director, Disease Control and Prevention Branch and Project Co-Director (S. Philip) – This position is in-kind. Dr. Philip is a Project Co-Director for both Component A and Component B, the OPT-IN Demonstration Project, and is responsible for overseeing the disease control and prevention arm of both components. Dr. Philip works closely with other co-directors and project leads to monitor all short-term outcomes and maintain smooth implementation of all project strategies. This position shares the lead role in the CQI activities and is responsible for tracking and reporting all activities to CDC annually.

Job Description: Manager II – (T. Packer)
This position is the Director of the Community Health Equity and Promotion Branch (CHEP) which houses San Francisco's community-based HIV programs that are funded to end new HIV infections and ensure that HIV-infected persons are linked to care and treatment, in collaboration with the branch's STD and HCV prevention programs. In collaboration with Susan Scheer, Susan Philip, and the CHEP staff, and under the direction of Dr. Tomas Aragon, Principal Investigator, the Director is responsible for ensuring the SFDPH outcomes for Component A (and Component B if funded) are achieved. The Director ensures collaboration across the HIV prevention and care

network in San Francisco and supports programs to work collaboratively to ensure effective, sustainable, high impact, cost-efficient programs that decrease HIV incidence and improve health equity. The Director oversees multiple HIV, STD, and HCV prevention interventions throughout SF funded with CDC funds, City General Funds, and a California State funds. The Director oversees the work of CHEP to inform policies, laws, and other structural factors that influence HIV prevention and treatment, emphasizing the need to address an individual's overall health as part of HIV prevention efforts. The Director also oversees a team of staff members that serve as the primary contact for community-based providers. The Director works closely with the HIV Community Planning Council (HCPC) and sits on the steering committee for the Getting to Zero Initiative, is a member of UCHAPS and NASTAD, and works closely with the California State Office of AIDS.

<u>Job Description</u>: Health Program Coordinator III – (J. Melichar)
This position acts as the Community-Based HIV Prevention Services Coordinator. Oversees all community-based program liaison activities for the CHEP branch. He manages staff that work directly with community-based organizations and other providers to support the implementation and evaluation of programs to meet the goals and objectives of the HIV prevention strategy. The position manages staff that provide technical assistance and training to contractors to build capacity and ensure deliverables are met in HIV testing, prevention with negatives and positives, condom distribution, and policy initiatives. Oversees budget management for community-based organizations. Primary liaison to the Contract Development and Technical Assistance Section, the Business Office of Contract Compliance, the Contracts Unit and all fiscal offices. Acts as primary liaison to the data management branch, ARCHES. EvalWeb, and CDC liaison.

<u>Job Description</u>: Senior Health Educator – (Vacant)
This position acts as the Quality Improvement and Evaluation Coordinator for CHEP and oversees HIV, HCV, and STD program integration within San Francisco's system of HIV prevention. Using the results based accountability approach, this position works with SFDPH staff and partners, including community-based organizations, to determine expected outcomes and specific program performance measures. This approach will be used for both Component A and Component B if funded. The Senior Health Educator uses Results Scorecard for the Getting to Zero Initiative. RSC tracks the performance of program and measures the impact of funding and achievement of outcomes. This position oversees the SFDPH team that works with CBOs and monitors outcomes.

<u>Job Description</u>: Health Program Coordinator III – (J. McCright)
This position serves as one of the Deputy Directors of the CHEP branch and oversees HIV and STD prevention staff and integration of HIV, STD, and HCV prevention activities in community-based testing for gay men and other MSM. The Deputy Director supervises staff that perform HIV testing and outreach in the community as well as staff that

implement environmental prevention in sex clubs, massage parlors, and other commercial sites where sex among men may occur.

Job Description: Health Educator – (N. Underwood)
This position serves on the quality improvement team for CHEP and is responsible for developing and monitoring performance measures for HIV prevention programs funded through CHEP. The position ensures that the goals and objectives of HIV-related grants within SFDPH grants are being met. In addition, this position is a liaison to the HCPC. This position will ensure that the new testing strategy is implemented through providing training to HIV test counselors and technical assistance to HIV test providers.

Job Description: Health Program Coordinator II – (T. Knoble)
The Program Coordinator II provides individual training, technical assistance, and quality assurance oversight to HIV testing sites and other prevention programs, meeting with them regularly as well as providing group California State Certification training. He develops implements and evaluates the training for HIV test counselor certification. Works with the State Office of AIDS to ensure testing training meets State standards. Ensures that most recent testing technologies are implemented with approval from the State and CDC.

Job Description: Health Program Coordinator I – (Vacant)
This position acts as government co-chair to the HCPC and supports development and implementation of HIV testing strategies in community-based settings and substance use treatment sites. Trains HIV test counselors to ensure the SF HIV strategy is implemented. The position provides direction to substance use organizations on implementation of HIV testing programs and participates in the drug user health initiative an internal planning body to SFDPH.

Job Description: Health Program Coordinator I – (T. Ick)
This position supports development and implementation of HIV testing strategies in community-based settings. Trains HIV test counselors to ensure the SF HIV strategy is implemented. Provides technical assistance on CLIA procedures. The position provides direction to substance use organizations on implementation of HIV testing programs.

Job Description: Health Worker II (TBD)
The position is a community liaison who ensures that works with community members and bodies to meet the goals and objectives of HIV-related grants within SFDPH. This position oversees community engagement programs with focus populations, especially communities with HIV health disparities.

Job Description: Health Worker II (TBD)
The position is a community liaison who ensures that works with community members and bodies to meet the goals and objectives of HIV-related grants within SFDPH. This

position oversees community engagement programs with focus populations, especially communities with HIV health disparities

Job Description: Health Worker II (Rachael Cabugo)
The position is a community engagement/outreach worker who ensures that work with community meets the goals and objectives of HIV-related grants within SFDPH. This position collaborates with other DPH programs such as LINCS and Street medicine to respond to the health of drug users and people experiencing homelessness.

Job Description: Management Assistant – (B. Chan Lew)
This position supports the HCPC and staff through the development and implementation of communication systems for coordination of HCPC activities. This position manages the condom distribution program that ensures condoms are accessible throughout the City and County through venues accessible to high prevalence populations. Condoms are provided to venues such as commercial venues, community-based organizations, and convenience stores.

Job Description: Health Program Coordinator II – (T. Touhey)
This position is responsible for implementation of community-based HIV, STD, and HCV testing in community settings such as gyms, clubs, and other venues where gay men and other MSM gather. He oversees training, operations, and evaluation of the program. He provides support to initiatives for high prevalence populations, especially those programs reaching African American gay men and other MSM.

Job Description: Health Educator – (H. Hjord)
This position is responsible for integrating behavioral health interventions into HIV prevention and care programs throughout the system of care. Works closely with community- based HIV prevention programs, clinical prevention, and policy areas to integrate with behavioral health. She oversees the intersection of alcohol programs and HIV prevention programs and oversees the SFDPH strategic plan for addressing alcohol. If SF is funded for Component B, this position will project manage the entire Project OPT. She will convene the leadership, the staff, and all partners working on the project to monitor performance measures and achieve outcomes.

Job Description: Disease Control Investigator – (G. Calero)
The position is a Linkage to Care/Partner Services Specialist. This position ensures that new HIV cases and early syphilis cases that are co-infected with HIV reported to Disease Prevention and Control receive partner services and linkage to care; performs assessments and dispatches cases to Health Workers, verifies completion of field investigation and other follow up for HIV positive clients who do not return for their test results or who are infected with an STD and need treatment.

Job Description: Epidemiologist II – (J. Chin)
The Epidemiologist ensures that HIV testing and Risk Reduction Activities data are collected and submitted by internal and external programs, cleaned, stored and prepared for reports on a timely basis. The Epidemiologist manages Evaluation Web data and reports and is responsible for providing technical assistance for community-based staff collecting and entering testing data. The position interfaces with CDC and contractors to submit data and trouble shoots data problems.

Job Description: Health Program Coordinator III/ Coordinator of Community Programs for Drug Users (E. Loughran) The Coordinator works with the Project Co-Directors and leadership team to manage the *OPT-IN* project components related to community service delivery, and supervises the PSOT Coordinator. Represents the project for the department with community partners and stakeholders and other city departments. The HPCIII will work within the health department and across other city departments to develop plans and implement drug user health. The role includes community engagement and response to the health of drug users and people experiencing homelessness.

Job Description: Health Educator – (Michael Paquette)
This position works as part of the planning team to ensure the HIV Community Planning Council (HCPC) meets the grant requirements and local planning needs. He also coordinates data and qualitative reporting to meet grantor requirements and provides administrative and coordinating support for HIV/HCV testing counseling training efforts.

Job Description: Principal Administrative Analyst II (TBD)
This position oversees the system for grant management for the division and will be responsible for quality management of contract documents. This position will also coordinate the contract development process, study, recommend, and implement system changes and provide technical assistance process. This position will train new program managers and program liaisons on issues related to contract work.

A. Salaries: $194,400

Position Title and Name	Annual	Time	Months	Amount Requested
Senior Microbiologist - McQuaid	$114,110	100%	12 months	$114,110
Microbiologist - Tam	$90,800	25%	12 months	$22,700
Laboratory Technician II - Lew	$57,590	100%	12 months	$57,590

Job Description: Senior Microbiologist – McQuaid
The Sr. Microbiologist is responsible for overall supervision of the HIV testing section. The responsibilities include training of technical personnel, review of quality control records, and review of all results prior to reporting, preparing protocols, monitoring performance of the tests and assignment of responsibilities. Moreover, the Senior Microbiologist assembles, organizes and provides all data regarding HIV testing for the HPS at SFDPH.

Job Description: Microbiologist – O. Tam
The Microbiologist conducts HIV antibody test, including screening and confirmation tests. The responsibilities include performing screening (EIA and CMMIA) and supplemental testing IFA and WB) on blood-based and oral fluid specimens, validating and reporting test results and performing quality control procedures. The Microbiologist also performs RNA testing on pooled specimens and tests individual specimens for RNA when required.

Job Description: Laboratory Technician II – A. Lew
The Laboratory Technician processes and prepares specimens for HIV-1 antibody testing for the HIV Testing program. The Lab Technician also prepares the pooled specimens

tested or HIV RNA. The principal duties include logging-in and labeling specimens, validating specimens requisition/report forms, separation of serum by centrifugation of pipetting oral fluids and preparation of worksheets and reagents. This position also daily monitors laboratory equipment such as refrigerators and centrifuges for quality assurance purposes.

B. Fringe Benefits @ 46% $89,424
C. Consultant Expenses $0
D. Equipment: $0
E. Materials and Supplies: $139,176

Item Requested	Type	Number Needed	Unit Cost	Amount Requested
Test Kits (HIV and RNA)	HIV Tests	7032	$7.10/ test x 7,032 HIV tests	$49,928
	RNA Tests	1810	$46.00 x 1,810 RNA tests	$83,260
Specimen Database Maintenance	n/a		$499/month x 12 months	$5,988
Total				$139,176

Test Kits – funds for the purchasing of HIV EIA, CMMIA, IFA test kits.
Monthly contract maintenance for MLAB, the laboratory's Information Management System (LIS) and other preventive maintenance service for instruments in the Public Health Laboratory.

Specimen Database Maintenance – Funds will be used to cover regular maintenance of specimen database.

F. Travel $0
G. Other Expenses $25,000

Item	Description	Cost
Rental of Equipment	$1,666.67/month x 12 months	$20,000
Message/Courier Services	Approx. $416.67/month x 12 months	$5,000
Total		$25,000

Rental Equipment – Rental costs for MLAB, the laboratory information management system (LIS) and other preventive maintenance service for instruments in the Public Health laboratory.

Shipping/Delivery – Funds for message services for daily delivery of blood specimens to the Public Health Laboratory.

Job Description: Director, Population Health Division and PS 18-1802 Principal Investigator (T. Aragon) This position is in-kind. Dr. Aragón is the San Francisco Health Officer and the Director of the Population Health Division (PHD) of SFDPH. Dr. Tomas Aragón provides overall leadership of the project. Dr. Aragón is responsible for overall planning, implementation, monitoring, and reporting of the program. Dr. Aragon also provides oversight for the Continuous Quality Improvement (CQI) and evaluation activities.

Job Description: Deputy Director, Population Health Division (C. Siador) Ms. Siador is the Business Official for this cooperative agreement. This position is in-kind. She has overall budget/grant oversight authority, and works closely with Finance, Budget and Contracts departments to oversee that grant deliverables are met by established deadlines. As one of the project sponsors, she will provide guidance and input as needed.

Job Description: Director, Disease Control and Prevention Branch and Project Co-Director (S. Philip) – This position is in-kind. Dr. Philip is a Project Co-Director for both Component A and Component B, the OPT-IN Demonstration Project, and is responsible for overseeing the disease control and prevention arm of both components. Dr. Philip works closely with other co-directors and project leads to monitor all short-term outcomes and maintain smooth implementation of all project strategies. This position shares the lead role in the CQI activities and is responsible for tracking and reporting all activities to CDC annually.

Job Description: Wayne Enanoria, PhD, MPH is the ARCHES Branch Director, Associate Chief Health Informatics Officer for Population Health Division, Assistant Adjunct Professor of Epidemiology in the Division of Infectious Disease Epidemiology, and a faculty affiliate of Global Health Sciences at UCSF. His previous work experience includes applied public health as a communicable disease epidemiologist (all levels) for local and state health departments in the areas of HIV, vaccine-preventable diseases, public health preparedness & emergency response, as well as academic work at UC Berkeley and UCSF. For this cooperative agreement, he brings his research and professional experiences in population health, the control and prevention of communicable diseases, public health informatics, infectious disease epidemiology, and systems science. He will provide in-kind support to the HIV surveillance and prevention activities.

Job Description: As the Director of the HIV Epidemiology Section for the Applied Research, Community Health Epidemiology and Surveillance Branch (S.Scheer), principal duties include planning, developing, coordinating, directing and evaluating all scientific aspects of HIV/AIDS surveillance and epidemiological studies. She is responsible for overseeing data collection and analysis, interpreting, writing and disseminating findings. She will serve as the Co-Director of the CDC PS18-1802 NOFO and will be responsible for assuring that surveillance activities and data are fully integrated with program goals and activities and are used to evaluate programs and identify areas for improvement. She will serve as the primary representative for SFDPH on HIV surveillance activities and attend all CDC program meetings as the SFDPH surveillance representative. She will supervise four senior epidemiologists.

Job Description: Director of HIV Case Surveillance (L. Hsu) Principal duties include directing and coordinating HIV/AIDS surveillance and reporting activities, conducting epidemiological studies and statistical analyses related to the HIV and AIDS registry. She oversees data collection, management, analysis, and use of the data for HIV/AIDS surveillance. She is responsible for developing methods for conducting retrospective and prospective medical chart reviews, developing methods and logistics to evaluate HIV/AIDS surveillance and reporting activities, analyzing, evaluating, and interpreting statistical data in preparing HIV/AIDS reports, responding to surveillance data requests and disseminating HIV/AIDS epidemiological data

through presentations and publications, preparing annual progress reports, and developing grant proposals. She supervises the performance of one Health Program Coordinator II, three Epidemiologist II and one Epidemiologist I. She is the primary contact person with the CDC and the State regarding HIV/AIDS surveillance/reporting issues.

Job Description: Epidemiologist II (S. Pipkin) Principal duties include assisting the State Office of AIDS in the development of standards and protocols for eHARS data transfer, quality assurance, case merging, duplicate management, and out of jurisdiction and out of state HIV/AIDS cases. She will serve as the key contact person to the State Office of AIDS for eHARS. She is responsible for analyzing HIV/AIDS surveillance data, preparing technical and scientific reports, responding to surveillance data requests, developing computer programs and procedures for conducting matches with other databases or registries, processing electronic laboratory reports, and developing methods to evaluate the HIV/AIDS surveillance system. She has direct supervision of four staff members: two epidemiologists, and two data entry IS operators.

Job Description: Health Program Coordinator II (V. Delgado) Principal duties include coordinating surveillance activities, establishing and maintaining active HIV/AIDS surveillance at local medical facilities, performing field staff data collection quality assurance including review of completed case report forms and prospective and retrospective chart review forms, and conducting validity evaluation by re-abstracting case information on 10% of previously reported cases. She coordinates data sharing activities with SFDPH's partner services and linkage to care program. She conducts RIDR, resolves duplicated case reports with other jurisdictions and obtains updated information for our cases. She is responsible for ensuring that protocols for conducting surveillance field activities as well as security and confidentiality procedures are adhered to. She supervises one Health Program Coordinator I and indirectly supervises four field staff.

Job Description: Epidemiologist II (E. Mara) Funds will be used to support an Epidemiologist to conduct and coordinate activities related to enhancing laboratory reporting. Tasks include evaluating current laboratory reporting system and practice, contacting laboratories and working with the State Office of AIDS for electronic reporting and data standardization and quality issues, developing computer programs and standard operating procedures for laboratory data processing and management, coordinating development of laboratory data management system, and conducting
analyses using CD4 and viral load data.

Job Description: IT Operations Support (R. San Juan)
Principal duties include entering new HIV and AIDS case data, out-of-jurisdiction cases, updates and corrections into eHARS and other relational databases, entering hard copy reports for electronic data processing, scanning hard copies of case records to image files, and entering prospective and retrospective chart review data for HIV and AIDS cases into eHARS and other databases used in the surveillance program. She is responsible for assisting with computer software update and other information system technical support.

Job Description: IT Operations Support (B. Van)
Principal duties include entering new HIV and AIDS case data, out-of-jurisdiction cases, updates and corrections into eHARS and other relational databases, entering hard copy reports for electronic data processing, scanning hard copies of case records to image files, and entering prospective and retrospective chart review data for HIV and AIDS cases into eHARS and other databases used in the surveillance program. She is responsible for assisting with computer software update and other information system technical support.

B. MANDATORY FRINGE @ 42% $153,094
C. CONSULTANT COSTS $0
D. EQUPMENT $0
E. MATERIALS AND SUPPLIES $6,000

Item Requested	Unit Cost	Amount Requested
Program Supplies	$500/month x 12 months	$6,000

Program supplies: Funds will cover the cost of basic supplies for staff including but not limited to computers, software, pens, paper, folders, binders, presentation materials and other items used on a daily basis.

F. TRAVEL $8,460

Travel		Rate	Quantity	Cost
Local Travel	Muni Pass	$81/mo./staff	x 12 mo. x 5 staff	$4,860
CDC Annual Meeting	Airfare	$500/traveler	x 3 travelers = $1500	$3,600
	Lodging	$200 per night x 3 nights	x 3 travelers = $1800	
	Transportation	$100 per trip	X 3 travelers = $300	

Local Travel: To purchase bus passes to travel to sites to conduct surveillance activities and field investigations for Surveillance staff.

CDC Meetings: Funds to cover costs of domestic travel to Atlanta, GA for CDC meetings for 3 staff.

G. OTHER $30,697

Item	Rate	Cost

Office Rent	$1.93/sq.ft./month x 250 sq. ft. x 12 months X 3.25 FTE	$18,818
Printing	Flat Rate	$11,879

Office Rent: Funds to cover expenses of space rentals and maintenance for the Surveillance staff and security for HIV/AIDS registry for compliance with CDC requirements and mandates.

Printing: Funds cover cost of developing, printing and disseminating annual report.

H. CONTRACTUAL $156,278

1. Name of contractor: Public Health Foundation Enterprises, Inc. (PHFE)

   Method of Selection: Request for Qualifications (RFQ) RFQ36-2017

   Period of performance: 1/1/2020 – 12/31/2020

   Method of accountability: The contractor will follow the CDC and SFDPH procedures; will follow strict performance timelines; contractor's performance will be monitored and evaluated by the senior epidemiologist; payment to contractor will be based on fee for service.

   Description of activities: PHFE will provide the staffing for the development of databases, data management and analysis, maintenance and technical services for computer equipment, and for conducting surveillance field activities including reviewing medical records and collecting case report information. They have demonstrated expertise in this area and have an established relationship with the SFDPH.

   Itemized budget with narrative justification:

   a. Salaries $77,580

Position Title and Name	Annual	Time	Months	Amount Requested
Research Associates Jackson, Kornbluh, Nasser	$57,866	65%	12	$37,613

Job Description: Director, Population Health Division and PS 18-1802 Principal Investigator (T. Aragon) This position is in-kind. Dr. Aragón is the San Francisco Health Officer and the Director of the Population Health Division (PHD) of SFDPH. Dr. Tomas Aragón provides overall leadership of the project. Dr. Aragón is responsible for overall planning, implementation, monitoring, and reporting of the program. Dr. Aragon also provides oversight for the Continuous Quality Improvement (CQI) and evaluation activities.

Job Description: Deputy Director, Population Health Division (C. Siador) Ms. Siador is the Business Official for this cooperative agreement. This position is in-kind. She has overall budget/grant oversight authority, and works closely with Finance, Budget and Contracts departments to oversee that grant deliverables are met by established deadlines. As one of the project sponsors, she will provide guidance and input as needed.

Job Description: Director, Community Health Equity and Promotion Branch and Project Co-Director (T. Packer) — This position is in-kind. Ms. Packer is a Project Co-Director for both Component A and Component B, the *OPT-IN* Demonstration Project, and is responsible for overseeing the community-based HIV prevention efforts including community planning, training capacity building, and the Prevention Services Outreach Team. As part of the leadership team she participates in all CQI activities.

Job Description: Director, Disease Control and Prevention Branch and Project Co-Director (S. Philip) – This position is in-kind. Dr. Philip is a Project Co-Director for both Component A and Component B, the *OPT-IN* Demonstration Project, and is responsible for overseeing the disease control and prevention arm of both components. Dr. Philip works closely with other co-directors and project leads to monitor all short-term outcomes and maintain smooth implementation of all project strategies. This position shares the lead role in the CQI activities and is responsible for tracking and reporting all activities to CDC annually.

Job Description: PS 18-1802 Project Co-Director, and Director of HIV Surveillance (S. Scheer) - This position is in-kind. Dr. Susan Scheer is a Project Co-Director for both Component A and Component B, the *OPT-IN* Demonstration Project and is responsible for management and oversight of HIV surveillance data, creating and maintaining protocols to ensure coordination between the HIV surveillance and the LINCS team and managing the epidemiologists working on the PrEP surveillance and data to care activities. As part of the leadership team, Dr. Scheer plays a role in the CQI activities as well as oversees staff leading the evaluation activities.

Job Description: Director of LINCS Program, (D. Sachdev). Dr. Sachdev provides overall medical supervision and oversight to the LINCS team (Linkage, Integration, Navigation and Comprehensive Services). This position is in-kind. She oversees the SFDPH linkage and partner services for newly-diagnosed clients, and navigation and retention efforts for clients who have fallen out of care. Dr. Sachdev and staff work closely with ARCHES to use the most recent and best quality data to link and monitor clients and implement CQI of the LINCS program.

Job Description: Director of Clinical Prevention, Medical Director, San Francisco City Clinic (S. Cohen) This position is in-kind. Dr. Cohen is the Medical Director of City Clinic (the municipal STD clinic) and Co-Principal Investigator of the NIAID-funded US PrEP Demonstration Project. Dr. Cohen provides overall supervision and oversight to the clinic, to the embedded PrEP and PEP programs and other testing services provided. She assists with activities related to provider capacity building, development and dissemination of protocols for PrEP delivery, and development and implementation of tools to support PrEP uptake and adherence.

Job Description: Health Educator I/Project Manager (H. Hjord) This position is in-kind. The Project Manager is the main point of contact for all communication and evaluation activities for this project, and closely tracks progress on performance measurement activities with the support of the *OPT-IN* Project Co-Directors. This position also plays an active role in all CQI activities, coordinates meetings and activities, and serves as a liaison between the multiple partners that make this project possible.

Job Description: Health Program Coordinator II /Prevention Services Outreach Team Coordinator- (TBD). This position is in-kind. The Health Program Coordinator will provide oversight to the Prevention Services Outreach Team and implement activities of the Homeless Engagement Specialist and the Community Health Response Team. The Health Program Coordinator will act as liaison between the collaborating partners such as Disease Prevention and Control LINCS Navigators, Street Medicine, and outreach teams at community based organizations. This position is responsible for the day-to-day community Prevention and Services Outreach Team activities. The Coordinator develops the protocols, policies, and procedures for the outreach and encampment activities of the project, and supervises the Prevention and Services Outreach Team. This position will work with the Clinical Services Coordinator to coordinate encampment fairs and outreach sessions and will bring Prevention Services Outreach Team services to other organizations serving homeless individuals, as well

as coordinate and provide the training for partners. This position supervises the Homeless Engagement Specialist and is responsible for overseeing the work of the community-based organizations providing services in partnership with Prevention and Services Outreach Team.

Job Description: Health Program Coordinator III/ Coordinator of Community Programs for Drug Users (E. Loughran) The Coordinator works with the Project Co-Directors and leadership team to manage the *OPT-IN* project components related to community service delivery, and supervises the PSOT Coordinator. Represents the project for the department with community partners and stakeholders and other city departments. The HPCIII will work within the health department and across other city departments to develop plans and implement drug user health. The role includes community engagement and response to the health of drug users and people experiencing homelessness.

Job Description: Health Program Coordinator II/Homeless Outreach Coordinator (Jason Albertson) This position provides clinical supervision to 4-6 LINCS outreach navigators and supports the development of professional and clinical effectiveness in the provision of services to people experiencing homelessness, substance use, and mental health challenges who are PWLHIV or at risk. Additionally this position is responsible for building out opportunity networks between providers and different departments serving the population, developing and routinizing communication pathways and processes for clinical and non-clinical information exchanges. Finally, the position supports the growth and development of multiple, population focused competencies among the GTZ/OPT-IN non-profit providers and partners.

Job Description: Health Worker II/ Homeless Engagement Specialist (Rachael Cabugo) This position is primarily an outreach position that gathers input and feedback from the priority populations and *OPT-IN* clients as well. This person plays a key role in establishing a relationship with the populations *Project OPT-IN* is trying to reach. The person is the “friendly face” of the OPT-IN team, getting to know the communities being served and continually asking them about their needs and ways to meet them, conducting risk assessments, and providing referrals to community agencies on the OPT-IN team or street medicine staff as appropriate. The Health Worker II will work with collaborating partners such as Disease Prevention and Control LINCS Navigators, Street Medicine, and outreach teams at community based organizations. The health worker will support the work of the Street Medicine team and Care Coordinator/Navigators through engaging with people who use drugs and people who are homeless.

Job Description: Health Worker III / Care Coordinator (Lampkins, Waktins, Allen -- 3 positions) works closely with the medical and intensive case management teams to ensure *OPT-IN* clients remain engaged in clinical care after re-linkage to care. The Care Coordinator conducts panel management for *OPT-IN* clients to ensure care transitions occur successfully and patients stay retained. For re-linked patients, the Care Coordinator provides appointment reminders and follows up on missed visits with direct outreach. They also conduct reassessment with *OPT-IN* patients every 90-120 days for up to 12 months during enrollment. They coordinate with formal/informal supports and work with partners to develop an integrated Comprehensive Care

Plan. Finally, they oversee the implementation of the care plan with the support of the ICM and OPT-IN team as appropriate.

Job Description: Public Health Nurse (A. Strough) The Public Health Nurse will work as part of the OPT-IN team to provide care coordination, write prescriptions for buprenorphine, and provide directly-observed therapy for HIV, HCV and potentially PrEP medications and will make warm hand-offs for more complex patients with psychiatric issues.

Job Description: Nurse Practitioner (NP)/Academic Detailer (A. Decker) – This position is the front-line academic detailer reaching out to providers to explain HIV-related topics, including how to make referrals to *Project OPT-IN* services, to their peers within 15- 20 minutes. The NP provides information, links providers to additional technical support for providing HIV-related services and reducing barriers.

Job Description: Epidemiologist I/Data to Care & PrEP Surveillance Specialist (C. Toomey) – This position is responsible for using STD surveillance and HIV testing data to identify those with greatest need for PrEP, so that a PrEP navigator can reach out to them and offer support for linkage to PrEP services. In addition, the Specialist will prepare NIC lists for the priority populations (homeless, PWID, women, etc.) for OPT-IN navigators.

Job Description: Junior Management Assistant (TBD) - The Junior Management Assistant performs the general administrative and/or management functions for ARCHES. The essential functions of the job primarily include support OPT-IN to reduce HIV-related disparities across the spectrum of prevention, care, and treatment for homeless populations living with and at risk for HIV. These functions include: performing administrative and management functions pertaining to project operations, grant development, and support services. Will assist in the preparation of project reports and presentations; coordinating clerical and technical support activities; preparing meeting materials; attending project, branch, and division meetings; gathering, compiling, and analyzing project-based performance data.

B. FRINGE BENEFITS (42% of total salaries) $296,057

C. CONSULTANT COSTS $0

D. EQUIPMENT $0

E. MATERIALS/SUPPLIES $7,164

Item	Rate	Cost
Program Supplies	$597/month x 12 months	$7,164

Program Supplies: Funds will cover the cost of basic office supplies for staff and for outreach including but not limited to pens, paper, folders, binders, presentation materials, condoms, outreach items and handouts as well as any other items used on a daily basis.

F. TRAVEL **$7,458**

Travel		Rate	Quantity	Cost
CDC Annual Meeting and conferences	Airfare	$945.50/ traveler	x 4 travelers	$7,458
	Lodging	$152 per night x 3 nights	x 4 travelers	
	Per Diem	$66 per day x 4 days	X 4 travelers	
	Transportation	$200/traveler	x 4 travelers	

CDC Meetings: Four program staff will travel to Atlanta for the annual CDC meeting and/or HIV National Conference. GSA rates will be used.

G. OTHER **$50,768**

Item	Rate	Quantity	Cost
Office Rent	$1.93 sq ft x 250 sq ft x 8.25 FTE	x 12 months	$47,768
Training	Professional development and training approximately $1000/training	x 3 trainings	$3,000

Office Rent: Office rent covers expenses of office space rental and maintenance for all FTE included in the budget. Calculations are based on the number of FTE from the City and County of San Francisco (SFDPH) as well as the FTE from fiscal sponsor contract with Public Health Foundations Enterprises (PHFE). Rent is included for fiscal sponsor staff because they sit in SFDPH space and use SFDPH facilities; this cost is not accounted for in either the fiscal intermediary indirect rate or the SFDPH indirect rate.

Training: Funds will cover registration costs for training and development for new staff including but not limited to, supervisor training, project management training, leadership training, racial humility training, as well as continuing education on investigation and navigation skill building.

H. CONTRACTUAL **$689,152**

Contractor Name (see below for details)	Total Funding
Public Health Foundation Enterprises, Inc.	$244,152
San Francisco AIDS Foundation	$245,000
Glide Foundation	$200,000

1. Name of Contractor: **Public Health Foundation Enterprises, Inc.**

Method of Selection: Request for Qualifications (RFQ) RFQ 27-2015

Period of Performance: 01/01/2020 - 12/31/2020

Scope of Work: Public Health Foundation Enterprises, Inc. (PHFE) is a licensed California Non-profit that has served the not-profit education and research communities for over 45 years. PHFE currently provides fiscal intermediary services to over 200 active contracts and grants, representing approximately $100 million and 1100 employees, and serves a variety of community based organizations as well as city, state, and federal government entities. PHFE is the contractor whose role will be solely to administer the funds that pay for staff members, travel, and consultants that support the goals and objectives of the project. They support all programmatic activities, including but not limited to navigation, project management, coordination, administrative support. San Francisco Department of Public Health is the prime recipient of the funds and is completely responsible for ensuring that grant deliverables are met. The fiscal intermediary agency will be monitored by San Francisco Department of Public Health to ensure they are meeting requirements and objectives. By using a fiscal intermediary, SFDPH saves significant administrative costs and time, and allows for more efficient work with consultants. PHFE will also provide fiscal management and assurance, establish vendor agreements, and provide fiscal related technical assistance to vendors.

Method of Accountability: Annual program and fiscal and compliance monitoring.

Itemized budget and justification: $244,152

a) Salaries and Wages $148,452

Position Title and Name	Annual	FTE	Months	Amount Requested
Patient Navigator (E. Arias)	$60,330	50%	12	$30,165

Job Description: Patient Navigator (E. Arias) – The Navigators are part of the LINCS team and provide short-term navigation for people living with HIV, with the goal of re-linking people to care. Once they receive information from a medical provider about an HIV-positive patient who appears to have fallen out of care, or if the person is identified as not-in-care based on surveillance data, the Navigator finds the patient using various sources. Once a client is found and confirmed to have fallen out of care, the Navigators work with that person to assess barriers to care and help them connect back to care. The navigators also facilitate clients keeping appointment through reminders, and provision of medical transportation, etc. as needed. The Navigators also provide linkage to HCV treatment and PrEP.

Job Description: HIV Care Navigator (T. Hervey and E. Esparza) – The Navigators are part of the LINCS team and provide short-term navigation for people living with HIV, with the goal of re-linking people to care. Once they receive information from a medical provider about an HIV-positive patient who appears to have fallen out of care, or if the person is identified as not-in-care based on surveillance data, the Navigator finds the patient using various sources. Once a client is found and confirmed to have fallen out of care, the Navigators work with that person to assess barriers to care and help them connect back to care. The navigators also facilitate clients keeping appointment through reminders, and provision of medical transportation, etc. as needed. The Navigators also provide linkage to HCV treatment and PrEP.

Job Description: Linkage Specialist (P.Kinley)- The Navigators are part of the LINCS team and provide short-term navigation for people living with HIV, with the goal of re-linking people to care. Once they receive information from a medical provider about an HIV-positive patient who appears to have fallen out of care, or if the person is identified as not-in-care based on surveillance data, the Navigator finds the patient using various sources. Once a client is found and confirmed to have fallen out of care, the Navigators work with that person to assess barriers to care and help them connect back to care. The navigators also facilitate clients keeping appointment through reminders, and provision of medical transportation, etc. as needed. The Navigators also provide linkage to HCV treatment and PrEP.

Job Description: Contact Specialist (W. Anderson) – The contact specialist is part of the LINCS team and takes referrals and locates them for navigation, with the goal of re-linking people to care. Once they receive information from a medical provider about an HIV-positive patient who appears to have fallen out of care, or if the person is identified as not-in-care based on surveillance data, the contact specialist finds the patient using various sources. Once a client is found and confirmed to have fallen out of care, the contact specialist hands the patient off to a navigator work with that person to assess barriers to care and help them connect back to care. The navigators also facilitate clients keeping appointment through reminders, and provision of medical transportation, etc. as needed. The navigators also provide linkage to HCV treatment and PrEP.

Job Description: Program Administrator (TBD) – The program administrator processing and purchasing items for the project. She/he will reconcile budgets and spreadsheets, purchase items and provide other needed assistance to facilitate project activities.

Job Description: Finance and Operations Manager (A. Sogal) - The Finance and Operations Manager is responsible for the fiscal management, policy development, and financial reporting of projects related to the PHD and PHFE. She develops budgets, monitors grants, and establishes contracts, sub-contracts, and cooperative agreements in addition to managing FTEs, benefits, budget estimates, and monthly reports to assist with the execution of activities. The Finance and Operations Manager collaborates with PHFE and SFDPH (Accounts Payable, Payroll, Human Resources, and Fiscal) on a regular basis to facilitate project activities
