

LEGISLATIVE DIGEST

[Electrical Code - Installation Requirements]

Ordinance amending the Electrical Code to require electrical and communications work installations be performed by contractors with specific certifications under the California Labor Code; and affirming the Planning Department's determination under the California Environmental Quality Act.

Existing Law

Article 89 of the San Francisco Electrical Code outlines the administrative requirements for building permits requiring electrical work.

Amendments to Current Law

The Proposed Legislation would require that electrical and communications work be performed by C-10 Electrical Contractors and/or C-7 Low Voltage Systems Contractors (for communications work). The licensing process to become certified contractors is governed by California Labor Code and the licenses are issued by the California State License Board.
