Be it ordained by the People of the City and County of San Francisco:

Section 1. General Background and Findings.

(a) As of May 2025, the Healthy Streets Operations Center (HSOC) identified 501 large vehicles across San Francisco, of which 437 are being used for habitation.

1 (b) The 2024 San Francisco Point-in-Time (PIT) Count estimated that 1,444
2 households are living in vehicles in San Francisco, representing a 37% increase from
3 the 2022 PIT Count.

4 (c) Large vehicles parked on city streets can present a variety of public safety and
5 public health problems, including impaired sight lines for road users, blocked sidewalks, fires,
6 localized air pollution, and illegal dumping of garbage and human waste on sidewalks, streets,
7 and drains. In some districts, limited availability of on-street parking is diminished further due
8 to large vehicles being stored on streets. Some occupants of large vehicles may access water
9 from fire hydrants and electricity from nearby infrastructure, which can create safety concerns
10 and potential damage to City systems and infrastructure.

11 (d) On April 11, 2025, the Department of Homelessness and Supportive Housing
12 (HSH) closed the Bayview Vehicle Triage Center program at Candlestick Point State
13 Recreation Area. The program, which accommodated 35 large vehicles at an annual
14 operating cost of \$2.9 million, did not achieve the intended outcomes of transitioning
15 participants to stable housing or significantly improving street conditions in the surrounding
16 area.

17 (e) On June 17, 2025 in SFMTA Board Resolution No. 250617-062, the SFMTA
18 Board of Directors adopted companion legislation creating a Large Vehicle Refuge Permit
19 program that would allow occupants of large vehicles present in San Francisco as of May 31,
20 2025, to temporarily park large vehicles on City streets if certain conditions are met. These
21 conditions include agreement to engage in case management services, accept offers of non-
22 congregate interim or permanent housing, adhere to good neighbor policies, and follow all
23 other parking regulations. The SFMTA companion legislation is contingent on Board of
24 Supervisors passage of this ordinance.

1 (f) The MTA intends to install 400 signs within the City to effectuate removal of
2 large vehicles parked in violation of Transportation Code Section 7.2.54. 100 of these signs
3 shall be placed at entrances into the City, with the remaining 300 signs installed strategically
4 citywide.

5 (g) The intent of this ordinance is to modify parking restrictions for large vehicles so
6 that the MTA can operationalize the Large Vehicle Refuge Permit program. The purpose of
7 the entire legislative package is to create a process for the City to safely move inhabitants of
8 large vehicles on City streets into stable housing, improving the health and safety of those
9 individuals and street conditions for the community at large.

10 Section 2. Environmental Findings.

11 The Planning Department has determined that the actions contemplated in this
12 ordinance comply with the California Environmental Quality Act (California Public Resources
13 Code Sections 21000 et seq.). Said determination is on file with the Clerk of the Board of
14 Supervisors in File No. 250655 and is incorporated herein by reference. The Board affirms
15 this determination.

16
