What is the Flood Study?

- The **Flood Study** analyzes **coastal flood risk** and the effects of **sea level rise** to the San Francisco waterfront along the Port's 7.5-mile jurisdiction over the next 100 years.
- The **Draft Plan** will inform subsequent stages of funding and design in order to develop targeted construction projects.
- The proposed solutions are estimated to cost **\$13.5 billion plus interest** (high-level, preliminary cost estimate) and, if approved by Congress, the Federal government may pay **65% of the cost**.
- The Flood Study is led by the **U.S. Army Corps of Engineers** (USACE) in collaboration with the **City of San Francisco**.

Component	Description & Key Deliverables	Project Selection Process	3 rd Bond Sale Planned Uses
Emergency Firefighting Water Supply (EFWS)	Renovate, expand, and seismically upgrade the City's Emergency Firefighting Water System	Projects are selected in coordination with the multi-department Management Oversight Committee and include the Potable Emergency Firefighting Water System (PEFWS) and Fireboat Manifolds.	Continue planning and design efforts for the PEFWS and fireboat manifold projects.
Neighborhood Fire Stations & Support Facilities	Strengthen, improve, and rehabilitate Neighborhood Fire Stations and Support Facilities, including the replacement of the firefighter and paramedic training facility currently located on Treasure Island	The importance of the SFFD Division of Training (formerly "Fire Training Facility") is driven by the fact that SFFD must vacate its current location on Treasure Island for planned redevelopment. Due to the funding required for this project, insufficient funding remains for Fire Station 7.	Completion of design, pre-construction services, and partial construction efforts for the SFFD Division of Training facility.
District Police Stations & Support Facilities	At Ingleside Station, seismic strengthening of existing historic station & construction of a new seismically safe police building that will meet modern policing standards, improve emergency response and provide resiliency with renewable energy. At 1828 Egbert, provide Surge space that will convert to SFPD's Property Control Division. Voluntary structural improvements and shower restorations were completed at Mission Station.	Police Department projects are selected from among the list of stations and other facilities that are identified as in most need from operational and state of condition assessments. The projects selected pose a life-safety hazard as they are at-risk of partial or substantial collapse from the effect of a major earthquake.	Complete design, permitting, bidding and construction of Ingleside Phase 1 & 2.
Disaster Response Facilities (Kezar Pavilion)	Upgrade or replace critical City-owned Disaster Response Facilities to assure the City can deploy aid, provide shelter, and coordinate emergency response activities	Kezar Pavilion was selected as a facility with high seismic vulnerabilities and opportunities to serve multiple disaster-response functions. The project benefits a vulnerable asset while augmenting the City's emergency preparedness capabilities and expanding program opportunities for general public use.	N/A
911 Call Center	Expand the 9-1-1 Response Facilities to provide more dispatchers, new technologies and increased efficiencies	The City's Emergency Operations Center requires a major upgrade and expansion of its 9-1-1 Call Center to best align with the service needs of a growing San Francisco begins to respond to its functional mission.
