To the Committee Members:

Thank you for accepting my application materials for Seat 1 (UC Cooperative Extension/Educational Institution) of the Urban Forestry Council. I would be pleased to serve as a member. Listed below, in rough chronological order, are qualifications and experiences I think are relevant to my application.

- Undergraduate and teaching credential from U.C. Davis in Agricultural Education. Coursework included Environmental Horticulture 133—Arboriculture, taught by Richard Harris. Additional graduate work in Environmental Horticulture and Ag. Education.
- Teaching experience at the high school level for six years (Santa Rosa High School) including courses in Forestry and Environmental Conservation.
- Vocational training of adults for three years through the San Mateo County Regional Occupation Program. Taught courses in Landscape Operations and Parks Maintenance/Management.
- Instructor of Environmental Horticulture at City College of San Francisco for over 16 years. Courses taught include Soils, Pest Management, Plant Identification, Irrigation, Nursery Operations, Landscape Construction and Tree Care.
- Ongoing partner with Friends of the Urban Forest in providing internship experience for City College horticulture students.
- Former participant in the Bay Area Landscape Supervisors Forum, sponsored by the U.C. Cooperative Extension and coordinated by Larry Costello.
- Former member, Residential Users Appeals Board, with the PUC. Reviewed appeals regarding flow-factor for residential water/sewer customers.
- Employment experience (seasonal) with local employers including Lafayette Tree and Landscape, Ted Kipping Tree Shaper, and Rock and Rose Landscape.
- Licensed landscape contractor (C-27 541147) for about 20 years. Ongoing part-time work in landscape design and installation, irrigation, arboriculture and consulting. Licensed San Francisco business: Hillan Horticultural Landscape Services.
- Certified Arborist, ISA # WE-7586A.
- San Francisco resident, responsible for two street trees. Active in the establishment and maintenance of many trees on my block (Day between Noe and Castro).
- Active on the Green Schoolyard Committee of my son's school (Alvarado Elementary).

Thank you for your consideration.

RECREATION AND PARK COMMISSION
City and County of San Francisco
Resolution No. 1101-011

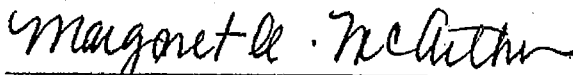

PARKWIDE BIKE RENTAL CONTRACT

RESOLVED, That this Commission does recommend that the Board of Supervisors approve a lease with ParkWide Activities LLC for the operation of a master bike rental concession in city parks with the following amendment: 1) If after nine months of operating at Union Square, or any point thereafter, the Commission determines at its sole discretion that the bike rental operation at Union Square presents a significant safety hazard to ParkWide customers or members of the general public, the Commission shall be permitted to revoke ParkWide's ability to operate at Union Square.

Adopted by the following vote:

Ayes	7
Noes	0
Absent	0

I hereby certify that the foregoing resolution was adopted at the Regular Meeting of the Recreation and Park Commission held on January 20, 2011.

Margaret A. McArthur, Commission Liaison

March 1, 2011

Dear Linda,

Thank you for your help yesterday

Please accept the attached for my re-application to the "Education" Seat for the Urban Forestry Council. I have enjoyed serving the past 3 years, and hope to continue serving in the months ahead, with the approval of the Board.

I have included the list of qualifications and experiences that supported my original application to the Council. While old, it is still relevant and accurate, with the exception of the last item referring to my son's elementary school. That work is done.

Please let me know if anything is missing or appears out of order. My cell number is 415-652-3309.

Again, thank you for your service. I'll look forward to hearing from the Board regarding this application.

Best regards,

J. Malcolm Hillan
Instructor, CCSF
District 8 Resident

UrbanForestry 2010CouncilApplicationLetter2.doc BonnieOraSherk2Resume.doc

Dear Supervisors Kim, Elsbernd, and Farrell,

The Rules Committee will be reviewing applications for the Urban Forestry Council this Thursday. Unfortunately, I am in NYC this week on Living Library business, and will be unable to attend the Hearing. However, I wish to express my genuine interest in being reappointed to the Council for either the Non-profit, Education, or Community-at-Large Seat, as I am qualified for all of these Seats.

I have been actively engaged in ecological planning, systemic design, and greening communities and schools for over 3 decades, and have literally been responsible for planting and maintaining tens of thousands of trees and other plantings, and training thousands of people of all ages to do so as well.

Additionally, Life Frames, Inc., the non-profit that I founded and direct, is actively engaged at this time, in planting hundreds of California Native Trees in parks, schools, housing projects, along streets, and other open spaces with the community, creating a Nature Walk to help integrate, showcase, and frame the Islais Creek Watershed that links at least 11 communities in Southeastern and Southwestern San Francisco: Noe Valley, Mission, Bernal Heights, Potrero Hill, Bayview, Portola, Crocker-Amazon, Excelsior, OMI, Sunnyside, Glen Park. To date, as part of this effort, we have planted over 600 native trees in Bernal Heights leading to the Islais Creek at the south side of St. Mary's Park, funded by the California Department of Forestry and Fire Protection.

Part of our initiative is also to call attention to, and expand, Green Skills Job Training opportunities to include tree planting, maintenance, ecological habitat rehabilitation, and other greening efforts.

We also work with over 900 children and youth each month, developing and maintaining our neighborhood Branch Living Library & Think Parks, year-round, during the school day, after school, and summers. Students are greening and transforming their school and community in the OMI/Excelsior at James Denman Middle School and San Miguel CDC; in Bernal Heights at

Junipero Serra Elementary School and Junipero Serra CDC; and in Chinatown, at Gordon Lau Elementary School and Commodore Stockton CDC - while learning math, science, history, language arts, arts, and technology, amongst other subjects, through hands-on, interdisciplinary participation, that also improves the public realm, and greatly expands the urban forest canopy.

Please see my attached letter of application and resume. Additional documents and articles were previously submitted.

I am sorry that I cannot be present at this Thursday's meeting to talk with you directly. I hope to be able to meet and talk with you at another time.

Thank you for your kind consideration.

Sincerely, Bonnie Ora Sherk

November 3, 2010

Rules Committee
San Francisco Board of Supervisors, City Hall
1 Dr. Carlton B. Goodlett Place, Room 244
San Francisco, California

To the Rules Committee:

I am pleased to submit my application for reappointment to the Urban Forestry Council for either Seat # 5 or other, Non-Profit, Education, or Member of Community Seat, whichever is preferable to the Board. As a professional ecological planner, designer, and implementer of green public places, as well as being an educator of urban forestry and sustainable systems for all ages, I am qualified and would be honored to continue to serve the City in this capacity. I feel that I have much to contribute, particularly in helping to promote the use of site-sensitive California Native Trees and Understory, Multicultural Tree Plantings with culturally significant meaning(s), and Community Education about the need for developing, choosing, planting and maintaining our urban forest. Additionally, I am responsible for the planting of literally, many thousands of trees in San Francisco over many decades, beginning with my work as President and Founding Director of Crossroads Community (the farm) in 1974, which inspired the creation of a new City Park and was a pioneering, urban agriculture and arts community center that incorporated the freeway interchange at Army (Chavez) and Potrero, and transformed 7 acres of derelict land in the crossroads of four communities: Mission, Potrero, Bayview, Bernal Heights.

The non-profit that I founded in 1992, and still direct, *Life Frames, Inc.*, works with schools and communities throughout San Francisco and other parts of the country and world, to research, plan, design, and implement unique, ecological, place-based, hands-on learning environments, each called *A Living Library & Think Park*. *A Living Library (A.L.L.)* incorporates the local resources of each place – ecological, built, and multicultural – seen through the lens of time – past, present, future – and provides a powerful, systemic framework of linked assets with integrated community programs and curricula that inspires and implements relevant change in communities.

Three *Branch Living Libraries* are underway in San Francisco and several others are in the planning stages:

- The *OMI / Excelsior Living Library & Think Park* is transforming 3 public school campus' and adjacent streets, helping to mitigate flooding from the southern-most fork of the Islais Creek, and has planted hundreds of trees, created beautiful gardens and Learning Zones with students and community, all adding immeasurably to the urban forest canopy.
- The *South Bernal Heights Living Library & Think Park Nature Walk* began as an environmental transformation and Garden/Ecology/MultiArts/Literacy/Nutrition Program at Junipero Serra Child Development Center and Junipero Serra Elementary School, where we have school day and after school Living Library programs. The Nature Walk is growing and linking, transforming, and making more accessible, major resources in this community: several schools, a reservoir, two City parks, and many streets, all helping to begin to *Frame the Islais Creek Watershed*. The Opportunity, as envisioned, is that this *Nature Walk* will eventually link, and interconnect, at least 10 neighborhoods in this Watershed including Bernal Heights: Noe Valley, Mission, Potrero, Bay View, Portola, Crocker-Amazon, Excelsior, OMI, Sunnyside, Glen Park – while promoting tree planting, traffic calming and safety, providing flood mitigation, economic development, creating relevant community programs integrated with the environments, amongst other benefits. Several grants of close to 200K have been already been awarded to Life Frames by the California Department of Forestry for this endeavor, and already, we have planted over 500 California Native Trees in Bernal Heights. This work is being accomplished in cooperation with SF Recreation and Park Department, SF Housing Authority, SFDPW, SFUSD, neighbors, the Mayor's Office, and hundreds of other volunteers.
- The *Chinatown Living Library & Think Park* was launched in 2007 in conjunction with students, teachers, and parents from Gordon Lau Elementary School, Commodore Stockton Child Development Center, *Indoor/Outdoor Community Learning Environments, International Culture-Ecology-Technology Think Parks®, & A Living Library® with Integrated Programs, Curricula, & Products*

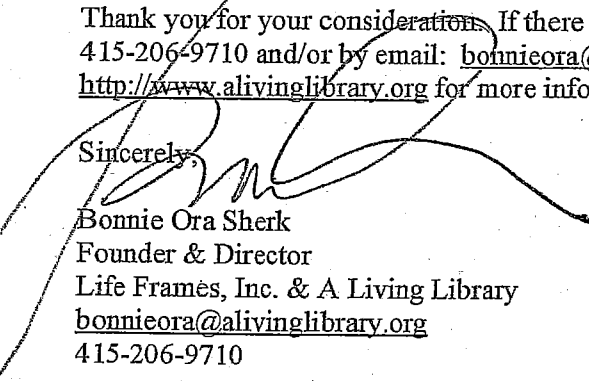

Chinatown Beacon, and neighbors. There, we are transforming the campus' of Gordon Lau, Commodore Stockton and surrounding streets. This Chinatown greening program is planting trees and themed gardens, installing rainwater harvesting cisterns, and bringing relief to this densely populated, formerly only concrete and asphalt environment. A Living Library also provides important hands-on ecological learning opportunities, including the planting of trees, for the children and adults of the neighborhood.

At these three San Francisco sites, Life Frames works with six schools and over 900 children and youth each month, year-round, planting and maintaining trees and other vegetation. It is an exciting and transformative learning program that also greatly improves the public realm, and adds considerably to San Francisco's forest canopy.

Enclosed is the completed application form, biographical materials, coverage on our work from the San Francisco Chronicle, and two articles that I wrote. One is currently on the United Nations Website featured in the UN Chronicle, titled, "*A Living Library: A Global Ecological Network Of Diversity And Commonality*". The other article was published in the United Nations DPI/NGO, September 07, 60th Anniversary Conference Journal that was devoted to Climate Change. My article is, "*A Living Library & Think Park: Place-Based, Ecological Transformation of Schools & Communities.*"

Thank you for your consideration. If there is any additional information needed, kindly contact me by phone: 415-206-9710 and/or by email: bonnieora@alivinglibrary.org. You may also like to visit our website: <http://www.alivinglibrary.org> for more information.

AND NOW WHO

CLIMATE CHANGE:

HOW IT IMPACTS US ALL

A Living Library & Think Park.

Place-Based, Ecological Transformation of Schools & Communities

**by Bonnie Ora Sherk, Founder and Director
of Life Frames, Inc. & A Living Library**

Incorporate Local Resources & Help Develop a Local – Global Network of Diversity & Commonality for Sustainability & Education

A Living Library & Think Park provides a powerful and systemic, ecological planning, design, and educational learning framework for transforming new or existing schools and communities into site and culturally-sensitive *Green Centers for Community*, while helping to solve multiple local problems simultaneously and sustainably.

Working with diverse stakeholders, including children, youth, parents, educators, and neighbors, *Life Frames, Inc.* designs and develops site and culturally-sensitive ecological and sustainable, indoor/outdoor community learning environments for all ages, in diverse places in the world – each called *A Living Library & Think Park*.

Incorporating local resources of the area – human, ecological, economic, historic, technological, and aesthetic – seen through the lens of time – past, present, and future – each unique *Branch Living Library* results in a content-rich, vibrant, indoor/outdoor, learning landscape or series of linked landscapes for all ages. Each is place-based, relevant, and can address multiple community concerns creatively and ecologically, while also serving as a vehicle for community and economic development of the area.

A Living Library, or *A.L.L.*, for short, is created with students (PreK-16) and adults through hands-on, interdisciplinary, standards-based curricula, bringing all subjects to life: math, science, history, language arts, arts, and technology. *A.L.L.* involves all ages in research, planning, design, implementation, use, maintenance, management, and communications.

Every part of the process of planning, developing, and maintaining *A Living Library & Think Park* becomes a relevant, hands-on, *real world* learning opportunity that helps to revitalize communities while simultaneously providing exciting educational experiences and green skills job training for all ages, and also helps mitigate local issues, like flooding, drought, air pollution, wastewater conservation, and improves underused, sterile concrete or blighted places. This is accomplished through creative ecological and systemic design solutions that come from *A Living Library* framework and processes, leading to the development of content-rich, sustainable, transformed landscapes created by all sectors of community – including children, youth, adults, elders, and the disabled.

This comprehensive and systemic planning, design, and integrated education approach, targets and involves all sectors of the community including local and regional community groups and individuals, and diverse agencies within local city, state, national, and international governments.

A Living Library is a metaphor: Everyone and Everything on Earth and in Space is part of *A Living Library* – people, birds, trees, air, water – and all the things we create, such as: parks, gardens, schools, curricula, artworks, networks, communities, businesses, celebrations.

By participating in *A.L.L.*'s framework, processes, and methodologies, we learn and understand that culture and technology are interconnected and part of nature – a fundamentally important systemic idea. *A Life Frame* provides a way to frame life, so we can see it and experience it more profoundly. *A Think Park* helps us to think, feel, and be more empathetic.

The vision and opportunity is to create *Branch Living Libraries* in diverse places of the world, linked electronically and programmatically, live, through state-of-the-art interactive communications technologies. This will bring communities and ecologies together locally and globally, forming an international network of diversity and commonality.

When interconnected, through interactive broadcast, and viewed through *Green-Powered Digital Gateways*, each *Branch Living Library* also showcases and celebrates the local place and its resources through its *A.L.L. Multimedia Digital Archives*, created by all ages of participants, documenting

their community's transform us as one of many *Living Library* integrated educational and multi-cultural programs.

All of these elements help provide magnetic visibility for each locale, attracting new resources to the community, while also creating profound opportunities to appreciate and understand distant cultures and ecologies. *When we learn all that we can about our local place, from that we can extrapolate and learn about the world.*

By discovering and celebrating our local resources, and experiencing the diversity and commonalities through participation in a global network of *Branch Living Libraries*, we will be closer to creating and sustaining world peace and prosperity for all species on Earth. And, locally, we will be creating healthy, sustainable communities, integrated with life-long learning for all.

BEFORE: NOVEMBER, 1999—Barren, sterile Streetscape at OMI/ Excelsior Living Library & Think Park in front of James Denman Middle School and behind San Miguel Child Development Center, San Francisco, CA

AFTER: MAY, 2006 - Same Streetscape becomes a California Native Uplands Learning Zone planted with drought tolerant native trees and understory, integrated with children's artworks at OMI/ Excelsior Living Library & Think Park in front of James Denman Middle School and behind San Miguel Child Development Center, San Francisco, CA

DURING: DECEMBER, 1999 - Students transforming the Streetscape and creating new California Native Uplands Learning Zone by digging holes and planting drought tolerant California Native Trees at OMI/ Excelsior Living Library & Think Park in front of James Denman Middle School and behind San Miguel Child Development Center, San Francisco, California

Bonnie Ora Sherk is the Founder & Director of Life Frames, Inc. & A Living Library. She is a Planner, Landscape Architect, and Educator, as well as an internationally exhibited Artist and published Author. She has been developing Life Frames and plans for A Living Library for sites around the world for over 30 years. Life Frames, Inc. works in affiliation with the World Council of Peoples for the United Nations.

A lesson in S.F. history that runs through Islais Creek, its watershed

Invaluable font of water hidden from sight but not hearts

Even when you banish a creek from view, it has a way of making its presence known.

San Francisco's Islais Creek is mostly out of sight — running through an underground culvert except for a stretch in Glen Park and its bay outfall at Third Street. That's the creek that runs under Balboa High School, where it occasionally floods the cafeteria, and the Alemany Housing Project, also reportedly subject to wet spells.

Bonnie Ora Sherk is among those who'd rather try to keep it in mind even when it's not in sight.

Last week we described Sherk's involvement with the San Miguel Child Development Center on Seneca Avenue, where native trees

have redeemed a sterile cityscape and a school garden has become what the local artist and landscape architect calls the OMI (Ocean-view-Merced-Ingliside/Excelsior Living Library and Think Park. The garden's lively student-designed mosaic murals depict, among many other things, historic Islais Creek.

"Water from Islais Creek was once the most valuable water in San Francisco," Sherk told us last month. "It was used after the 1906 earthquake. It feeds down from San Bruno Mountain through the Cayuga Valley. Then two forks join and go out to the Islais Channel at Third Street." The Islais Creek watershed is the city's largest, linking nine neighborhoods as disparate as Noe Valley and Bayview.

"Islais" comes from "slay," an American Indian name for the holly leaf cherries — shrubby trees with shiny tooth-edged evergreen

Photos by BONNIE ORA SHERK

Junipero Serra students, including Angelina Molina, Angeles Alva Villatoro, Esmeralda Acosta, and Martin Sanchez, above from left, planted native trees and shrubs at Holly Park.

leaves — that used to line its banks. Central and Southern California Indians processed the cherry pits into flour. The name first appeared on a Mexican map in 1834. The cherries still grow on San Bruno Mountain, but they're long gone from San Francisco.

By the 1850s, water from Islais Creek irrigated the produce gardens of the Bayview's Portuguese, Italian and Irish growers. It wasn't long, though, before the creek was befouled with offal and sewage from the slaughterhouses of Ductertown. People began to refer to it by the name of that proverbial creek that we have all been up without a paddle. After 1906, much of Islais Creek was "reclaimed" with rubble from the quake.

Even in its diminished state, the creek fires Sherk's imagination. "This watershed won't leave me alone," she said. "It turns out I've been working in the same watershed all these years." That work began with an urban farm and art center at Army Street and Potrero Avenue and evolved into the Living Libraries at San Miguel and at Junipero Serra Elementary School and Child Development Center near Holly Park.

Its most recent extension is the Bernal Heights Nature Walk, framing the Islais watershed from the south slope of Bernal Heights to St. Mary's Park.

Sherk acknowledges that she is "doing rehabilitation rather than restoration," looking for "places where water can be liberated."

She sees San Francisco's Better Streets Program as a chance to redefine and redesign the city's streets: "I'd like to see Cesar Chavez Street redesigned as more serpentine to reflect the water underneath. There's no reason a street has to be straight. That's Cartesian old thinking. Solutions will become obvious — the place will tell us what it can be."

For now, her focus is on the living frame. In November at Holly

Islais Creek history:
www.sfnpc.org/islaiscreekhistory
A Living Library: www.alivinglibray.org

when neighborhood volunteers were assisting Recreation and Park Department crews with more plantings. Rec and Park's John Miller, in charge of Holly Park, stopped by. "Sometime Bonnie reminds me of Julia Hearn and I'm William Randolph Hearst," Miller joked.

More oaks and other drought-tolerant trees will go in around the Alemany project and College Hill Reservoir. St. Mary's Park will get a riparian mix of species, including Islais Creek's namesake holly leaf cherries. The goal is to have 500 trees in the ground by March.

Sherk sees art as another key component of the Nature Walk. "On Oneida Street we have giant polychrome wooden cutouts of students' leaf and flower drawings. There are opportunities for creating narrative artworks — murals and sculptures — that will celebrate local ecologies, histories and cultures."

The Nature Walk is not just a woman's crusade. The design evolved through a series of community meetings, and more are planned. "In calling attention to the watershed," says Sherk, "we have the opportunity to demonstrate the interconnectedness of these diverse communities." It's her way of recognizing the complex ecology of San Francisco, and the unacknowledged links among natural and human histories.

Joe Eaton and Ron Sullivan are naturalists and freelance garden writers in Berkeley. Check out their Web site at www.selborne.com or e-mail them at home@schronicle.com.

We visited the park last month.

SF Chronicle

Ron Sullivan and Joe Eaton | *The Dirt*

'Living library' teaches more than gardening

Public spaces a natural classroom for math, science

We've been spending lots of time and column inches on school and other public and community gardens over the past few years, so it was inevitable we'd ask each other, "Why didn't we have this stuff when we were in school?"

It's almost enough to make one (or two) believe in the Myth of Progress. We were in grade school in the 1950s — good schools with decent buildings and modern teaching techniques: kindergartens, SRA reading kits, early IQ testing, Dick and Jane "See Spot run" readers.

But when Joe spent recess looking at bugs in the weedy border strip, it was considered odd behavior. When Ron's parish got the whole playground/Sunday parking lot covered in asphalt, it was considered an advance of civilization. We might have planted beans in Dixie cups and pulled them up later to see their roots, but that was as close to nature as we got in the school day then.

We didn't know beans about the native plant and animal life in Arkansas or Pennsylvania or meet much of it up close and personal except what we collected ourselves: Joe's infamous cocoon that hatched a flock of black widow spiders on his mother's curtains; Ron's cecropia moth resonantly beating itself to death in a big pretzel can and violets stolen from the woods shriveling in the sun by the south wall. Our only defense is that we didn't know any better — and that fact is indefensible.

It's encouraging that people are starting to tip up pavement in cities and to daylight urban creeks. It's even more encouraging that they're getting the kids involved, that field trips to real fields

are more common than they were in the 1950s. Most encouraging, though, is the fact that gardens — food gardens, herb gardens, flower gardens, native-plant gardens — are being not only planted around schools, but incorporated into curricula.

There's much more to be learned in a garden than gardening, and gardening itself incorporates a great fraction of what schoolkids need to learn.

Fractions are part of it. Mathematics from simple arithmetic to geometry and even calculus; astronomy, for seasonal sun and shade patterns; geology and soil science; chemistry, hydrology, physics, engineering; natural history; and biology of all kinds, from microbes to mammals, all come into play in garden-making. Science isn't foreign to humans; it's our natural language.

So are culinary and other arts. You can garden for color or form, for scent and sound. You can see firsthand how rough winds do shake the darling buds of May and how short summer's lease is. To lack that language is to be culturally deprived.

It's heartening to see natural literacy being encouraged in a place like San Francisco's San Miguel Child Development Center, near Balboa High School, and to see it done in a way that embraces school, neighborhood and watershed.

Bonnie Ora Sherk, local artist, landscape architect and visionary, has been working there for 10 years. "In 1998, I thought it was one of the most depressing places I'd ever seen," she recalled. That was before the street in front of the school was lined with native trees, and before the San Miguel gardens had been planted.

The lower garden is now an engaging and much-loved space. Everything — food plants, ornamentals, the composter — has a bilingual or trilingual label. (Now we

Photos by RON SULLIVAN / Special to The Chronicle

At San Miguel Child Development Center, students experiment with fava beans, above, in soils from different areas of San Francisco, or they might find student art; top right, and helpful worms, right.

know what "abono" — fertilizer — means.) Student art is everywhere: brightly painted butterflies, birds, the occasional plesiosaur. A hedge has been transformed into a coiling dragon. In one corner, you can sit on hay bales and drink herb tea brewed from student-grown ingredients.

A more recent project, San Miguel's upper garden, reclaimed an asphalt wasteland. (Sometimes the arrow of "progress" can be reversed.) Students helped make the hundreds of ceramic stepping stones that form an ADA-accessible pathway. A contingent from Grinnell College planted redwood trees for a reading circle.

People from the neighborhood — not just parents — meet at the school every month to share potluck meals and ideas. It's all part of what Sherk calls a living library — "a framework for making profound systemic changes in local communities." Long term, Sherk wants to use street redesign, tree

plantings and art to frame the watershed of Islais Creek, which flows under Balboa's football field.

We met Daniella Alvarez, who's been mentoring San Miguel students through the New Door Ventures program, and asked her what she liked there. "It's outside and I get to work with my hands," she told us. "When I first came, I was very prissy and afraid of everything. Now I'm not afraid of bugs anymore. Or as much."

On one level, that's what it's about: encountering the natural world and being not as much afraid of it. It's our heritage and human right.

Joe Eaton and Ron Sullivan are naturalists and freelance garden writers in Berkeley. Check out their Web site at www.selborne-surveys.com or e-mail them at home@sfcronicle.com.

In support of the cause and values of Bay Nature and its friends, our dealership provides this magazine issue to worthy organizations that are making a difference in the Bay Area.

"When we learn all that we can about our local place, we can then extrapolate and learn about the world."

A LIVING LIBRARY®

Life Frames,® Inc., the non-profit sponsor of A Living Library, works with diverse locales to create Green Centers of Community, transforming bleak environments into lush, content-rich learning landscapes, each site linked to another. A goal is to have Branch Living Libraries around the world.

Every Branch Living Library & Think Park® is unique, designed in a site and culturally-sensitive way, systemically linking and incorporating local resources: human, ecological, economic, historic, technological, and aesthetic – seen through the lens of time – past, present, future.

Children and adults are involved in all processes of transformation: research, planning, design, implementation, use, maintenance, management, and communications. All subjects come to life through hands-on, interdisciplinary, standards-based curricula, engaging all ages in making relevant change in their community.

Life Frames, Inc. currently has several Branch Living Library & Think Parks underway in San Francisco and New York City. Contact us if you or your community would like to develop A Living Library, to volunteer or make a tax-deductible donation:

FRAME THE ISLAIS CREEK WATERSHED: CREATE A.L.L. CULTURE-ECOLOGY-TECHNOLOGY LINKED NEIGHBORHOODS

A Phased Development Project

© 2004-10 Bonnie Ora Sherk & Life Frames, Inc.

Incorporate systemic ecological design to link open spaces, parks, schools, streets, transportation corridors in diverse neighborhoods and *Frame the Islais Creek Watershed*, simultaneously serving multiple functions, while supporting the Mayor's Greening Initiatives, Better Streets Program, and SFPUC's Sewage System Improvement Program Project Priorities:

- ***Call Attention To, and Frame the Islais Creek Watershed***, through development of a new narrative, expressive landscape of integrated elements that link and reunite several San Francisco communities: Noe Valley, Bernal Heights, Mission, Bayview, Potrero Hill, Portola, Excelsior, Sunnyside, Glen Park - through their connection to the Islais Creek Watershed.
- ***Mitigate flooding*** from the Islais and Precita Creeks in areas of flood plain and reduce volume of flow in sewer system and the Bay.
- ***Plant native riparian and uplands trees and native understory in schools, open spaces, parks, and along transportation corridors*** – reconfiguring streets, medians, sidewalks, and other public places, when possible, to help stop flooding, beautify local environs, while re-attracting wildlife.
- ***Provide traffic calming, bike and pedestrian paths, and seating areas, where possible.***
- ***Discover areas of Creek that may be daylighted:*** along Highway 280; near Balboa HS and Denman MS, south end of St. Mary's Park, Farmer's Market area, 101 Interchange area, along Cesar Chavez, Precita Park, Potrero del Sol Park, multiple other opportunities.
- ***Develop, with community artists, themed narrative murals and other artworks*** along the corridors that celebrate local ecologies, history, and cultures - past, present, future.
- ***Attract new businesses to underserved neighborhoods*** by adding charm and interest to neighborhoods by creating an *A.L.L. ECO/Culture Zone* in each community.
- ***Celebrate uniqueness of each neighborhood; transform and beautify it; and make it safer***, by showcasing local resources: ecological, built, and multicultural – past, present, future – through creation of *A.L.L. Multimedia Digital Archives* developed in concert with community residents, including youth, and displayed on green-powered, sculptural *Digital Gateways* throughout Watershed and open spaces, while linking neighborhoods through live interactive broadcast.
- ***Link BART stations in Islais Creek Watershed:*** Balboa; Glen Park; 24th Street through live, interactive connections between sites and displays of local *A.L.L. Multimedia Archives*.
- ***Create meaningful intergenerational ecological learning programs and multiple community educational, stewardship, and civic engagement opportunities*** including Green Skills Job Training, linking interrelated subjects based on *A.L.L. Framework, Standards-Based Curriculum, and Watershed*.
- ***Link existing Branch Living Library sites*** in Excelsior, Bernal Heights, Chinatown, and Roosevelt Island, NYC communities through interactive programs and live broadcast; link with *Branch Living Library* sites as they emerge in diverse parts of the world – creating local and global opportunities.
- ***Link multiple city and state agencies, community groups, and individuals*** in processes & opportunities.

The main streets to involve and transform may include sections of: Cesar Chavez, 101 Freeway Interchange, Mission Street, Evans Avenue, Third Street, Alemany Blvd., Highway 280, Geneva Avenue, Cayuga Avenue, other opportunities.

B O N N I E O R A S H E R K

ENVIRONMENTAL PLANNING & DESIGN INTEGRATED PROGRAMS & CURRICULA

Bonnie Ora Sherk, W.B.E. in San Francisco and San Jose, and **Founder & Director of *Life Frames, Inc. & A Living Library***, is an environmental architect, planner, educator, author, and artist with over 35 years experience in conceiving, planning, designing, and developing, site and culturally sensitive, indoor/outdoor, themed, **Multi-culture/Ecology/Technology Park and Schoolyard environments** that are integrated with vibrant **community programming**, relevant **interdisciplinary project-based curricula linkages to schools** (PreK-College), and **community-originated products**. Ms. Sherk's systemic designs often include innovative funding opportunities and mechanisms for generation of revenue, as well as sustainable, organizational, maintenance, and management strategies. Sherk's work integrates extensive community involvement resulting in a *social weaving* of all sectors of community, often through the creation of **Community Research Mentoring Teams**. Projects result in innovative community and economic development strategies that give heightened visibility to a locale and meaningfully synergize local resources: human, ecological, economic, historic, technological, & aesthetic.

Examples include:

- Creator of the internationally recognized, ***A Living Library / Life Frame / Think Park*** concepts & content-rich systemic, ecological plans for diverse sites around country that include innovative community processes, programs, and curricula as well as funding, maintenance, & management strategies for community. Provides economic revitalization & enhancement for area including extensive community / student involvement & high visibility for locale. Sherk's ***A Living Library Framework & Model*** was nominated by Steve Jobs of Apple Computers, Inc. for a ***Smithsonian Computerworld Award*** in the category of "***Environment, Agriculture, & Energy***" and was suggested by the Secretary General of the United Nations Habitat 11 Programme to become part of the "***World's Best Practices & Local Leadership of Habitat 11***".
- ASLA award - ***Guadalupe Gardens***, San Jose, member Master Planning Design Team for 150 acre park adjacent to San Jose International Airport. Responsible for community and resource programming with integration of state-of-the-art communications technologies. Identified & involved extensive local community including schools in planning process & ongoing programs.
- **Lincoln Unified School District**, Stockton, California, member, Master Planning Design Team with Concordia Architects for new campus with integrated programs & curricula for students & community. Project considered state-of-the-art model for national educational reform, campus design, & community involvement.
- Award -Winning, ***Crossroads Community (the farm)*** resulted in new 7 acre inner- city Farm Park in San Francisco - Potrero del Sol & community environmental education & arts center integrating land fragments (DPW, Rec-Park, private owners) adjacent to major Freeway interchange. Sherk was creator of concept & Founding Director/President of 501C3 non-profit that initiated the project and involved local surrounding communities in process. Project generated extensive national & international coverage and became model for other community projects.

EDUCATION

M.A. San Francisco State University, Environmental Sculpture
Certificate, Landscape Architecture, University of California Extension
Teaching Credentials: New York, New Jersey, California (K-12)
B.A. Rutgers University, Douglass College-Art (Honors)
Certificate - Oomoto School of Traditional Japanese Arts- Kameoka, Japan

SELECTED AWARDS & HONORS

2006, 2008	Appointed by SF Board of Supervisors to SF Urban Forestry Council
2000	Named a Laureate of the Smithsonian Institution for A Living Library
2000	Life Frames, Inc. & A Living Library become part of the Permanent Research Collection of Smithsonian's Museum of American History; featured on Smithsonian Computerworld Website
2000	A Living Library & Life Frames, Inc. nominated for Smithsonian Computerworld Award in the category of "Environment, Energy, & Agriculture" by Steve Jobs of Apple Computers, Inc.
1999	Named "Outstanding Healing Artist of the Arts & Healing Network for the Year 2001" by Marion Rockefeller Weber, Founder & Director, Arts & Healing Network
1996	"Biennial Honor Award, ASLA, 1995 (Northern California Chapter) -"Building & Community" - Guadalupe Gardens Master Plan, San Jose. Member Design Team with Tito Patri
1993	Member design team, St. Vincent's/Silveira Ranch, New Sustainable Living Learning Community As A Life Frame, San Rafael, CA, 3rd place, National Competition
1987	Redesign of Todos Santos Plaza - Concord, Ca. National Competition, Runner-Up Winner. Collaboration with Mark Bunnell, ASLA
1977	San Francisco Tomorrow Environment Award
1973	San Francisco Art Commission Merit Award
1970	MADEMOISELLE MAGAZINE Woman of the Year Award
1970	San Francisco Museum of Modern Art SECA Vernal Equinox Award for <i>Portable Parks 1-111</i>

SELECTED PROJECTS

2007 - Present

Project Director & Chief Designer

Chinatown Living Library & Think Park

With Commodore Stockton Child Development Center, Gordon Lau Elementary School, and larger Chinatown community

Development of Interdisciplinary, hands-on Living Library, year-round, school day and after-school program for PreK-School Age students. Developed and implemented plans for ecological transformation of school yards and development of integrated gardens and landscapes based on local resources of community – past, present, future. . Will be linked electronically with multiple Branch Living Libraries. Ongoing hands-on, standards-based Living Library Garden/Ecology/Arts Programs PreK-5th grade with local schools.

2002 - Present

Project Director & Chief Designer

Bernal Heights Living Library & Think Park Nature Walk

with Junipero Serra Child Development Center, Junipero Serra Elementary School, SF Recreation & Park Department, SFPUC, SFDPW, Housing Authority, SFUSD, Neighbors, & others, San Francisco, California

Development of Conceptual Master Plan for environmental and educational transformation to engage the community and its resources into a unique Bernal Heights Living Library & Think Park in diverse parts of this low income, multicultural community. Planted hundreds of California Native Trees with community as part of Nature Walk linking parks, schools, streets, and other open spaces leading to Islais Creek. First portion of Nature Walk to eventually frame Islais Creek Watershed, linking 9 communities in Southeast and Southwest San Francisco. Will be linked electronically with multiple Branch Living Libraries. Ongoing hands-on, standards-based Living Library Garden/Ecology/Arts Programs PreK-5th grade with local schools as part of Bernal Heights Program.

2001-Present

Project Director & Chief Designer

Roosevelt Island Living Library & Think Park

with PS/IS 217, Roosevelt Island Seniors Association, Roosevelt Island Artists Association, Roosevelt Island Disabled Association, Roosevelt Island Residents Association, RIOC Roosevelt Island, New York City

Organizing the community and development of Conceptual Master Plan for environmental and educational transformation to aid in community and economic development of the area. Engaging the community and its resources – ecological, built, and multicultural - to develop a unique Roosevelt Island Living Library & Think Park in diverse parts of this low income, multicultural community. Will be linked with multiple Branch Living Libraries. Ongoing hands-on, standards-based Living Library Garden/Ecology/Arts Programs K-8th grade with PS/IS 217, Coler-Goldwater Hospita and other community members.

1998 - Present

Project Director & Chief Designer

OMI / Excelsior Living Library & Think Park

**with James Denman Middle School, Balboa High School, San Miguel Child Development Center, SF Department of the Environment, SF Recreation & Park Department, SF PUC, Neighbors, Other Agencies & Community Groups
San Francisco, California**

Environmental & educational transformation of three typical "factory model" public schools which sit on a contiguous piece of land of nine acres in what used to be a fertile river valley and is now a mostly concrete, asphalt environment surrounded by chain-linked fences. Transformation of site through creation of indoor / outdoor Learning Zones based on ecological, built, and cultural resources of area - past, present, and future. Includes work with currently culverted, flooding river and rehabilitating riparian habitat and creation of multicultural gardens. Student, teacher, parent, and community involvement in all aspects of creation, use, maintenance, management, and communication through interdisciplinary project-based learning linked to the curricula of the schools. Includes arts and communications technologies integrated into landscape. Ongoing hands-on, standards-based Living Library Garden/Ecology/Arts Programs PreK-High School with local schools and community. Also, Environmental Skills Training Program for Adults.

May 1992 – 2001 – Founder & President

2001 – Present – Founder & Executive Director

Life Frames®, Inc.

New York, New York

San Francisco, California

Established a non-profit 501 C3 Corporation to develop content-rich site and culturally sensitive indoor/outdoor culture-ecology-technology Think Parks®, Living Libraries®, and Life Frames® in different communities around the world with integrated programs, curricula, and products, to be linked electronically. Each integrates local resources: human, ecological, historic, technological, and aesthetic and creates a social weaving of all sectors of community to be involved in the creation, use, maintenance, management, and communications of all elements.

March 1981 - Present

Founder & Executive Director/Chief Designer

A LIVING LIBRARY®

New York, New York

San Francisco, California

Responsible for over-all concept, integrated environmental and program design for creation of A LIVING LIBRARY, an indoor/outdoor culture-ecology-technology park, lifelong learning magnet, and linked with international network of such parks, each integrated with programs, curricula, and products that bring the local cultural & ecological diversity of the area to life through plants and other living forms, the built and ecological environment(s), all the arts, state-of-the-art communications technologies, and diverse educational, ecological, and entertaining activities. Formed Board Advisors, non-profit corporation called Life Frames®,

Inc., led negotiations with government, corporate, and community leaders in New York City, San Francisco, and other cities in the country and abroad. Developed innovative uses for new communications technologies for an international interactive network and unique educational strategies for a multigenerational and multicultural public. Developed new maintenance techniques for urban public open spaces that utilize existing resources promoting community stewardship, education, job creation, and economic development.

July 1985 - May 1986

Producer/Director/Designer

A GARDEN OF KNOWLEDGE

New York, New York & Houston, Texas

Developed traveling interactive installation as mini-demonstration for A LIVING LIBRARY. Involved corporations, teachers & students (K-College), professional artists, horticulturists, video/computer technologists in environmental exhibition. Produced interactive videodisk and electronic "Tree of Knowledge".

May 1974 - November 1980

Founding Executive Director/President

CROSSROADS COMMUNITY (THE FARM)

San Francisco, California

Creator of integrated concept and environmental plan for new city Farm Park and environmental education and culture center. Directed implementation. Developed non-profit corporation and formed Board of Directors and Advisors. Coordinated participation of city, state, and federal agencies, and private corporations and foundations in community development projects. Managed paid staff and volunteers. Oversaw operation of programs including capital improvements and open space acquisition. Designed, wrote, and presented winning visual proposals; developed and administered budgets and grants; negotiated contracts. Initiated and led successful campaign for city to acquire and develop multi-million dollar park. Developed mechanisms for projects to produce revenue. Designed and implemented innovative and ongoing public educational programs and exhibitions for all ages in environmental education, agriculture, and all the arts. Created programs that promoted ecological sensitivity and multi-ethnic and international diversity for an intergenerational and multi-economic public including teens, young children, senior citizens, and at-risk students. Involved participation of individuals and classes from over 75 schools (K-College) with programs linking nature and the arts with math, language arts, civics, history, science; worked with teachers in curriculum development; Generated extensive media coverage for events and projects.

EDUCATION

- 1996 "Biennial Honor Award, ASLA, 1995 (Northern California Chapter) - "Building & Community" - for Guadalupe Gardens Master Plan, San Jose. Member Design Team with Tito Patri
- 1993 Member design team, St. Vincent's/Silveira Ranch, New Sustainable Living Learning Community As A Life Frame, San Rafael, California, 3rd place, National Competition
- 1987 Redesign of Todos Santos Plaza- Concord, Ca. National Competition,

- 1980; 1975 Runner-Up Winner. Collaboration with Mark Bunnell, ASLA
 NEA Individual Artist's Fellowships
 1975-79 CAC Grants
 1977 San Francisco Tomorrow Environment Award
 1976-79 NEA Grants: Expansion Arts, Architecture & Environmental Arts, City Spirit,
 Visual Arts
 1974-80 Numerous Foundation Grants for THE FARM
 1975-79 California Arts Council Project Grants
 1973 San Francisco Art Commission Merit Award
 1970 MADEMOISELLE MAGAZINE Woman of the Year Award
 1970 San Francisco Museum of Modern Art SECA Award

SELECTED CONSULTANCIES

2006-Present

Consultant to diverse stakeholders in community of Chinatown, San Francisco including Commodore Stockton Child Development Center, Gordon Lau Elementary School, Chinatown Beacon, parents, neighbors, and other local resources to create a unique *Chinatown Living Library & Think Park* at both school sites based on local ecological, built, multicultural resources linked to *Branch Living Libraries* as they emerge.

2002-present

Consultant to diverse stakeholders in community of Bernal Heights, San Francisco including Junipero Serra Child Development Center, Junipero Serra Elementary School, public housing project, other neighbors and incorporating local resources to create unique *Bernal Heights Living Library & Think Park Nature Walk* based on local ecological, built, multicultural resources linked to *Branch Living Libraries* as they emerge.

2001-present

Consultant to multiple stakeholders in Roosevelt Island, New York City to create a unique *Roosevelt Island Living Library & Think Park* based on the local ecological, built, and multicultural resources to be linked to *Branch Living Libraries* in diverse locales.

1998-present

Consultant to James Denman Middle School, San Miguel Child Development Center, Balboa High School to develop an ecological, multicultural, and technological *OMI / Excelsior Living Library & Think Park Master Plan* to transform the indoor/outdoor facilities and link the three schools with Balboa Park, City College, and other community resources to the schools as *Centers of Community*. Work to include development of Community Research Mentoring Teams, real-world project-based curricula, teacher training, Natural Resources Training for community, and assessments of program

1995-97

Life Frames, Inc. - Preliminary conceptual design with integrated programs and curricula to rearticulate historic San Francisco Civic Center into sustainable 21st century lifelong learning magnet for whole community that celebrates the past, present, and future. Involved and received support from all sectors of community including public and private schools K-College, foundations, international & multicultural groups, and environmental organizations, Sister Cities.

1994-95

Lincoln Unified School District, Stockton, Ca., Member Educational Design Team to

- create new high school as farm with student & teacher participation & all aspects of built & natural environments integrated into interdisciplinary curriculum
- 1993 Eastside Union High School District, San Jose, Cal., Design Team Facilitator for conceptual redesign of existing high school as A Living Library
- 1993 Indianapolis Children's Museum, Indianapolis, Indiana
Conceptual Redesign of indoor/outdoor integrated systems facilities
- 1992-93
Member design team with Tito Patri & Associates to develop Master Plan for Guadalupe Gardens, 150 acres, San Jose, Ca. Involved all sectors of community including schools K-College
- 1991 NASA, Lewis Research Center, Cleveland, Ohio Conceptual plans to develop A Living Library in conjunction with Lewis Research Center Education Department
- 1991 Monkey Jungle, Miami, Florida; conceptual development plans for Life Frame
- 1989 City of Harrisburg, Pennsylvania, conceptual development plans to create A Living Library for the city of Harrisburg
- 1987-89
National Park Service, Washington, D.C., Harper's Ferry, West Va. Plans for NPS Interarts Program; NPS Living History Columbus Quincentennial Program; Presented idea of a national park as A Living Library
- 1981 Port Authority of New York & New Jersey, Schematic Plans for renovation of NY & NJ Entrance/Exit Areas to Holland Tunnel

PROFESSIONAL AFFILIATIONS

Appointed Member, San Francisco Urban Forestry Council
 Appointed Member, California State School Garden Council
 Board Member, Youth Arts New York
 Laureate, Smithsonian Institution
 Advisory Board Member, National Learning Foundation, Washington, D.C.
 Advisory Board Member, Solutions: Town Hall, San Francisco, California
 Member, San Francisco Green Schoolyards Alliance
 Member, SPUR/AIA Civic Center Task Force, San Francisco, California

SPECIAL SKILLS

Systemic Ecological Design - Environmental, Landscape, & Urban Design; Planning, Development, & Implementation integrated with Ecological & Interdisciplinary Community Programs / Interdisciplinary, standards-based curricula, PreK-12 / products

Community Participation, Facilitation, Visioning, Organizing; working with youth and children; multicultural communities

Application for Boards, Commissions and Committees

Application for Appointment to: San Francisco Urban Forestry Council

Name of Board, Commission, Committee, or Task Force

Seat # or Category (If applicable): Seat #3

District: 5

Name: Megan Sutherland

Home Address: Baker St #12, San Francisco, Ca

Zip: 94115

Home Phone: 916- ~~_____~~

Occupation: Utility Arborist

Work Phone: 650-280-3452

Employer: Western Environmental Consultants, Inc.

Business Address: 450 Eastmoor Ave, Daly City, Ca

Zip: 94015

Business E-Mail: m6sq@pge.com

Home E-Mail: ~~_____~~

@gmail.com

Check All That Apply:

A citizen of the United States.

At least 18 years old on or before Election Day.

Not in prison or on parole for a felony conviction

A resident of San Francisco Yes: No: (Place of Residence):

Please state your qualifications (attach supplemental sheet if necessary)

I am a certified arborist and utility specialist. I have worked as a utility arborist in several areas throughout the state. I recognize the unique forestry opportunities and challenges presented in San Francisco. I have in depth knowledge of PG&E's vegetation management program and strong interpersonal and written communication skills.

Education:

ISA Certified Arborist & Utility Specialist (WE-8058AU)

B.S., University of Wisconsin - Biological Aspects of Conservation & Certificate In Environmental Studies

WildLifeSafe Certified (519)

Business and/or professional experience:

2005 - Present; Western Environmental Consultants, Inc.

I have been a contract utility arborist for PG&E over 5 years. The last 4 years were in the Bay Area. I have experience in many facets of the vegetation management program and am a student of the 'right tree, right place' philosophy.

Civic Activities:

I enjoy volunteering to help plant trees, remove invasive species, and improve the habitat quality for our endangered Mission blue butterfly.

Ethnicity: (optional)

Sex: (optional) M F

Have you attended any meetings of the Board/Commission to which you wish appointment? Yes No

For appointments by the Board of Supervisors, appearance before the RULES COMMITTEE is a requirement before any appointment can be made. (Applications must be received 10 days before the scheduled hearing.)

(Please Note: Once Completed, this form, including all attachments, becomes public record)

Date: 3/9/11

Applicant's Signature: (required)

Please Note: Your application will be retained for one year.

FOR OFFICE USE ONLY:

Appointed to Seat #: _____ Term Expires: _____ Date Seat was Vacated: _____

Mar. 9. 2011 10:58AM Pacific Gas and Electric Co.

Re: SF Urban Forestry Council, Seat 3 Pages: 7 including the cover

CC:

Urgent For Review Please Comment Please Reply Please Recycle

To Whom It May Concern:

This is my application for seat #3 on the San Francisco Urban Forestry Council. I was contacted by Maria D'Agostino, the chair for the SF Urban Forestry Council. She indicated that she was interested in having me fill an empty seat (#3). I am really excited for this opportunity and I think I'm a good match for the position!

I have included the following documents: an application for seat #3 on the SF Urban Forestry Council, my resume, arborist certification, utility specialist certification, WildLifeSafe certification, and Lean Six Sigma white belt certification.

Please feel free to contact me with any questions or concerns. My contact information is at the top of the page. I look forward to hearing from you! Thank you and have a great day!

Authority:

Ordinance 21-01 (Admin. Code Chapter 5 Article XXIII). Ordinance 171-03 (repealed Admin. Code Chapter 5, Article XXIII). Ordinance No. 210-08 restructured the Council.

Board Qualifications:

The Urban Forestry Council composition and administration was restructured by Ordinance No. 210-08 as follows:

Council members will represent the full range of urban forest stakeholders including city agencies, non-profit organizations, tree management organizations, and community members. The Urban Forestry Council shall be comprised of 11 total members, 7 of whom will be appointed by the Board of Supervisors as follows:

One representative from an educational organization involved with tree management (University of California Cooperative Extension, etc.);

Two members certified by a professional tree management organization (International Society of Arboriculture, American Society of Consulting Arborists, or American Society of Landscape Architects);

Two members of non-profit organizations involved in urban forestry or other environmentally-related issues; and

Two members from the community.

The Mayor shall appoint two voting members as follows:

One member from the tree care industry; and one member at large.

The following departments shall have voting members:

Director of the Department of Public Works or designee; Director of the Planning Department or designee.

San Francisco
BOARD OF SUPERVISORS

The Council shall have advisory members comprised of representatives from the following departments: Recreation and Park Department and Public Utilities Commission.

In addition, the San Francisco Redevelopment Agency, and the Golden Gate National Recreation Area are invited to send representatives to sit as advisory members of the Council. The Body that appoints Council members also may appoint at-large members to serve any unfilled Council positions. Members shall serve for a term of two-years. Members can serve successive terms if reappointed by the body originally appointing the Council member. The Council shall meet at least once each month and establish its own operating procedures, which at a minimum, shall meet the public notice, meeting, voting, agenda and other procedural requirements set forth in local law. Subcommittees shall be created to adequately address other special areas of concern on an as needed basis. The Department of the Environment, with adequate funding to assist the Council in carrying out its mission, shall provide professional and administrative staff to the Council.

As newly constituted by Ordinance No. 210-08, at 12:00 noon on the 30th day following the effective date of this ordinance (Nov. 18, 2008), the tenures of the persons currently holding seats on the Urban Forestry Council shall expire. The eleven persons appointed as members of the Urban Forestry Council as provided in this Section shall assume office at 12:00 noon on November 18, 2008; provided that if any appointing authority has not made a new appointment by such date, the sitting member shall continue to serve for sixty days. The two-year terms of those members appointed pursuant to subsections (a)(1), (a)(2), and (a)(3) shall commence on that date.
