Subject: Most recent draft grant agreement

Colleagues –

We are getting there. Most recent draft attached.

Still to do:

1. Agree on RPD PM fees as a % of design costs (its much bigger than 2%). RPD will charge against public dollars for PM fees for construction.
2. Agree on Grantor's campaign cost cap and decide if any fiscal sponsorship fee for SF Downtown Partnerships for administering private sources.
3. Bring SF Downtown Partnerships into conversation. I know of Robby but we haven't worked together much. Need to make sure they are ok w all of this.
4. Insert Exhibits. Prelim budget and schedule
5. Legal review of fine print.
6. Meet to strategize on messaging and next steps on Fountain.

Subject: Request for Proposal: Preservation Plan for Vaillancourt Fountain
Date: Monday, January 27, 2025 9:27:00 AM
Attachments: [2025_01_17 Vaillancourt Letter Proposal.pdf](#)
[P24146A Vaillancourt Fountain Preservation Plan Qualifications_01172025.pdf](#)

Hi Aaron,

See attached for the Page & Turnbull proposal and cost summary pasted below. Assuming we would want to move forward with Tasks 0, 1, 2, and 6 (total of \$33,330 + \$20k T&M) at this point. Here is the feedback we just received from Planning upon their review:

*“We’ve had a chance to review the proposal from Page and Turnbull. Because the Embarcadero Plaza was outside of the study area of the Better Market Streets EIR, **we should go ahead with the HRR to get a formal and robust analysis of the fountain.***

***The proposal and estimate appears on track;** we may not need preservation alternatives if we aren’t doing an EIR, but we will know more after the completion of the HRR. It makes sense that Tasks 5 and 6 are T&M.”*

--

• Task 0: Historic Research + Historic Resource Report	\$5,000.00
◦ + Significance Diagrams	\$3,500.00
• Task 1: Laser Scan / As-Built Drawings	\$6,150.00
◦ Locus Laser Scanning	\$3,150.00
◦ Page & Turnbull	\$3,000.00
• Task 2: Conditions Assessment + Documentation	\$22,180.00
◦ Hazardous Materials Assessment	\$5,250.00
◦ AME Ground Penetrating Radar + report:	\$1,930.00
◦ Page & Turnbull:	\$15,000.00
• Task 3: Disassembly Plan	\$8,500.00
• Task 4: Storage + Crating Plan	\$12,500.00
• Task 5: Integration into Plaza Art Installation (Pres. Alternatives)	\$20,000.00 (T&M)
• Task 6: Preservation Consultation	\$20,000.00 (T&M)
	Total \$97,830.00

Reimbursable expenses are in addition to the professional fee and are not expected to exceed \$2,500.00.

Mary – let's touch base before you talk to the artist so we can all be on the same page. We are also speaking to him and want to be consistent.

Let me know some good times. Thanks!

Sarah

Hi Eoanna,

Following up to see if the reports re. Vaillancourt are available for review.

It would be great to understand how our process (VAC and CDR approval) coincides with RPD approval process and EIR. When is a good time to review this?

We are meeting with the artists and his son on May 20th.

Thanks,
Mary

[Exhibit B - Project Budget.pdf](#)

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Phil,

Agreed we are getting close. Please find attached our redline of the document, including a clean version. While there's a good amount of red ink, a lot of this was to clean up the agreement and based on further discussions with you. We've had our internal legal do a preliminary review of this as well. I hope the City finds these revisions acceptable so we can put ourselves in a position to execute the MOU shortly.

Couple other follow up points:

1. I'm attaching Exhibit A (Project Description) and B (Concept Budget) to the email for review. RPD agreed to put the Schedule exhibit together.
2. I spoke with Robbie Silver and they are on board with being a party to the agreement and being the "Fiscal Grantor", whereby their immediate role would be to fundraise private dollars to fill any funding gaps needed to start the project. I will be sharing a clean version of this MOU with him today so he can do his concurrent review.
3. As discussed, there are several issues that will be covered in a subsequent "operations and maintenance agreement" that we'll discuss once we advance the project a little further. Items that will be included in this agreement are as follows:
 - a. RPD to operate, program and maintain the park in accordance with mutually agreed-upon standards
 - b. BXP Grantor (or affiliate) shall have a right to supplement security personnel at the Park at its discretion
 - c. BXP Grantor will construct a new public restroom facility in EC4 that will be available to the public during a mutually agreeable schedule (ie 7 days/week, 8am – 8pm). The restrooms are still on private property, so BXP would reserve the right to refuse entry to any persons it deems a nuisance, hazard, risk, etc.

As always, I am available to discuss live to work through any remaining issues.

Subject: CPC/RPD meeting notes 8/13/24
Date: Wednesday, August 14, 2024 11:24:56 AM

Hello all,

Please see below our meeting notes from yesterday.

- **McLaren Trails**

- Project scope of work has not changed, number of trees that need to be removed have been refined due to field analysis and more trees have been identified as hazardous than previously anticipated
- Planning to inquire internally about the appropriate way to codify this addition.

- **IB PG&E Pit Acquisition**

- RPD is acquiring the PG&E parcel that is located within India Basin Shoreline Park
- The park renovation is cleared under the India Basin mixed-use EIR
- RPD requires 'not a project' email from Planning for BOS approval for the acquisition

- **Twin Peaks Acquisition**

- RPD is acquiring PW property to complete the Twin Peaks promenade
- Twin Peaks promenade project has a CatEx
- RPD requires 'not a project' email from Planning for BOS approval for acquisition

- **Not a project memo**

- Planning in process of updating their 'not a project' memo and will share with RPD for review

- **Great Highway Dune Revegetation**

- The project area would fall on both RPD and NPS jurisdiction
- NEPA, CEQA would likely need to be completed, Coastal Development Permit may also be needed

- **Embarcadero Plaza**

- Boston Properties interested in partnering with RPD to renovate the Plaza
- Historic status of the Plaza must be analyzed
- Planning to inquire if the Plaza has been analyzed under previous EIRs in the area

- **Lot Mergers**

- Planning will inquire whether RPD needs to continue submitting a GPR for lot mergers as it is a costly and time-consuming process
- RPD to continue filing, if changes are needed the GPRs can be reissued

Subject: CPC/RPD: Meeting minutes 10/08/24
Date: Wednesday, October 9, 2024 11:32:20 AM

Hi Planning team,

Below our meeting minutes from yesterday.

[@Langlie, Michelle \(CPC\)](#) friendly reminder to pls take a look at the plans we discussed yesterday to see how the Embarcadero Plaza Revitalization Project could get codified. The most recent concept designs are in that SF Chronical article, see link below.

McLaren Trails

- Revised NTF is in review
- Will be issued early next week

Great Highway (GH) Dune project

- Dune rehabilitation is a separate project to the possible GH closure
- Dune rehab is a maintenance project exempt under the LCP and considered 'not a project' under CEQA
- Planning will issue a 'not a project' confirmation memo
- NPS will complete their own NEPA review

GH Closure

- If voters elect to close the GH, then closure needs to be codified as soon as possible
- Need to determine correct environmental clearance as the project will require a coastal development permit
 - Could likely get a StatEx which will consolidate the SFMTA project at Sloat Blvd and the GH closure

Embarcadero Plaza

- Planning to review the **Better Market Street** and **Waterfront Plans** to determine how the Embarcadero Plaza revitalization project can get codified
- Fountain would potentially be moved to another location, red bricks may be removed
- Most recent concept designs are available here: <https://www.sfchronicle.com/sf/article/s-f-embarcadero-plaza-new-park-19577945.php>

Thanks!

Subject: Embarcadero Plaza and Sue Bierman HRR
Date: Wednesday, February 26, 2025 12:01:36 PM
Attachments: [image002.png](#)
[image003.png](#)

Hi All,

Looking forward to discussing today if necessary. See our current plan below by Page & Turnbull's for the HRR:

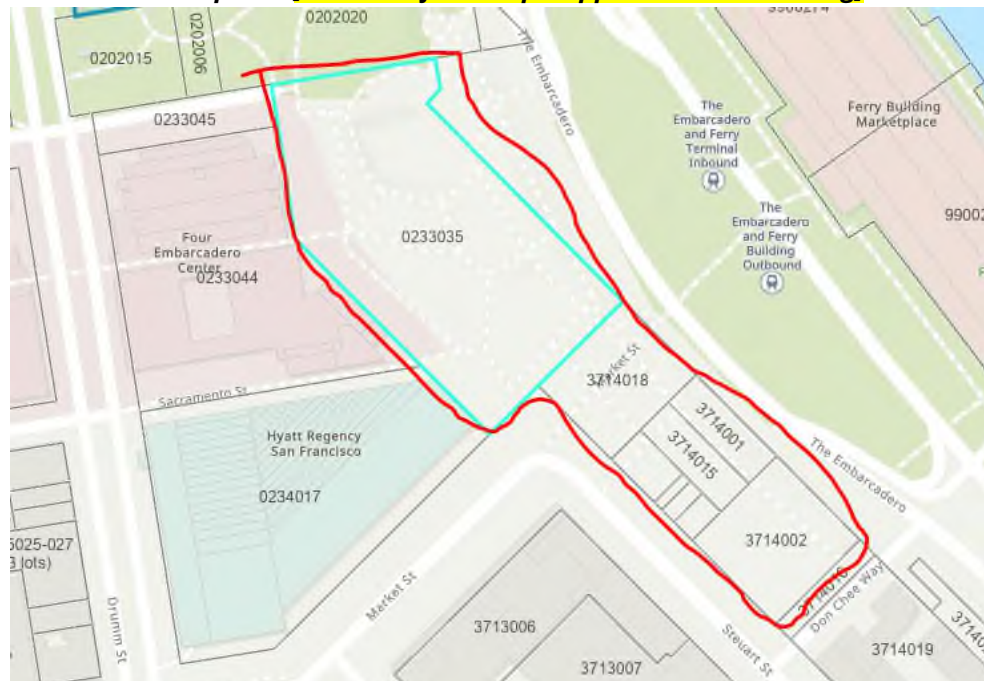

- **Vaillancourt Fountain HRR**

- *Intro: This HRR will focus on Vaillancourt Fountain only (not full Embarcadero Plaza - see below for explanation as update vs full HRR)*
- *Existing historic status: Fountain has not previously been individually evaluated as an individual object. Contributing feature to the NR/CR-eligible Market Street Cultural Landscape Historic District as identified in the Better Market Street EIR (2016 DPR prepared by ICF)*
<https://sfplanning.org/project/better-market-street-environmental-review-process#info>
- *Current photos*
 - *Vaillancourt Fountain*
 - *Surrounding Embarcadero Plaza and neighboring building context (will not include comprehensive documentation of all elements/features in Embarcadero Plaza)*
- *Summary Site History*
 - *Brief Site Context*
 - *Alteration Chronology*
 - *Summary Ownership History*
- *Evaluation – Evaluation of Vaillancourt Fountain only as an individual object*
 - *National Register & California Register significance evaluation*
 - *Integrity discussion*
 - *Character-defining features list (if relevant)*
- *References*
- *Appendix*
 - *Historic maps and photos*
 - *Selected newspaper & journal articles*
 - *2016 DPR form for Embarcadero Plaza (from Better Market Street EIR)*
 - *Preparer Qualifications*

To the best of our knowledge, Sue Bierman Park has not been previously evaluated. Given that Embarcadero Plaza was evaluated in 2016 (so within the last 10 years), we do not know if a new evaluation would be required by Planning Department. However, if requested by Planning, we could prepare a more abbreviated HRR that does not include a new evaluation, but rather summarizes the prior findings/historic status and

provides some updates. Here is what we might propose as additional scopes for HRRs:

- **Embarcadero Plaza HRR Update** **[TBD – Confirm Scope/Approach with Planning]**

- Intro
- Existing Historic Status: Embarcadero Plaza was found to contribute to the NR/CR-eligible Market Street Cultural Landscape Historic District as identified in the Better Market Street EIR (2016 DPR prepared by ICF). Embarcadero Plaza was found to be individually significant under NR/CR Criterion C/3 (Architecture) but to lack sufficient integrity.
<https://sfplanning.org/project/better-market-street-environmental-review-process#info>
- Current Photos
 - Embarcadero Plaza including main landscape features of entire plaza (north and south)
 - Surrounding properties
- Alterations since 2016 documentation
- References
- Appendix
 - Historic maps & photos [can Planning confirm if required?]
 - Selected newspaper & journal articles [can Planning confirm if required?]
 - 2016 DPR form for Embarcadero Plaza (from Better Market Street EIR)
 - Preparer Qualifications

- **Sue Bierman Park HRR**

- Intro
- Existing Historic Status – Planning to confirm if any prior evaluations on file
- Current Photos
 - Sue Bierman Park
 - Surrounding Properties
- Summary Site History & Construction Chronology
 - Would include brief discussion of site prior to Golden Gateway Redevelopment Area, summarize the 1960s design of the site, and the 1990s alterations (freeway removal) and more recent c.2011 redesign.
- Evaluation – National Register & California Register
 - Integrity discussion and list of character-defining features, if relevant
- References
- Appendix
 - Historic maps & photos
 - Selected newspaper & journal articles
 - Preparer Qualifications

Date: Friday, May 16, 2025 9:38:40 AM
Attachments: [image001.png](#)

Hi Michelle,

Below is the link to the final 3 HRR docs for the Embarcadero Plaza Improvement Project.

P&T added some updates to the Fountain HRR with some new info they learned and sent us the updated doc yesterday. These are now the final docs which you can use for your HRR Part 1 reports.

 [FINAL HRRs-051625](#)

FYI...These are the updates that were made to the Fountain HRR per P&T

“Since we issued the previous report, I was made aware that the original concrete cubes around the air intake vents are in fact extant within the chain-link fence area – so I wanted to correct the chronology which said that they were demolished in the 2000s renovation”

Thanks,
Kerstin

Subject: Embarcadero Plaza Update: Safety Fencing at Vaillancourt Fountain
Date: Monday, June 9, 2025 5:48:01 AM

Hi Rich, Michelle, and Tania,

I hope you are doing well. I'm reaching out to give you a quick heads-up that the Recreation and Park Department will be installing temporary safety fencing around the Vaillancourt Fountain starting today, Monday morning (6/9/25).

This is a precautionary step being taken purely for safety purposes. The recent Conditions Assessment included a structural and environmental review that identified several serious concerns, including:

- Compromised structural elements
- Presence of hazardous materials

Given these findings, we believe it's important to take this measure out of an abundance of caution. I want to emphasize that this action does not indicate any change in direction for the project. The longer-term process is continuing as planned, including full public review through the Arts Commission and Visual Arts Committee, along with ample opportunities for public comment.

Best,

Eoanna

Hi Michelle,

We want to start the process of bringing on a preservation consultant for the fountain disassembly.

Can you help me put together high level a scope of work that we would need the consultant to perform?

What should we be thinking of?

- give input for disassembly (how to)
- How to reconstruct
- How to best to store, size of storage space needed?
- Does a hazmat test need to be completed before disassembly?

Thanks for your help on this!

Subject: CPC/RPD meeting minutes: 11/27/24
Date: Monday, December 2, 2024 2:52:22 PM

Hi Team Planning,

Below our meeting minutes from last week's meeting.

Meeting minutes:

- **Embarcadero Plaza Improvement Project**

- Plaza has been determined in the Better Market Streets EIR to not be a historic resource due to a lack of integrity
- Fountain is considered a contributing feature
- Brick work is not contributing as its also lost integrity
- Fountain can possibly be placed in storage to be relocated to another location.
- Planning to determine the appropriate method for codifying this project.
- RPD will contract with a preservation consultant to determine best method to dismantle the fountain
- Kerstin and Michelle to work on scope for preservation consultant

- **Bernal Heights Playground**

- Kirola lawsuit is requiring REC to fix non-compliant issues at playground by fall 2025
- New ADA ramp to access playground will be installed
- Entire playground will be replaced, sand removed and poured in place will be installed
- Community will decide if the sandpit is to be retained.
- RPD to submit CEQA application by end of year (2024)

- **Botanical restroom and Pathway Improvements, Tenderloin Rec Center Bathroom Improvements**

- Kirola lawsuit requires ADA improvements at SF Botanical Garden south restroom and Tenderloin Rec Center restroom and pathway updates at Botanical Garden
- Improvements, all must be completed by fall 2025.
- All 3 improvement projects will be submitted on 1 CEQA application

- **22nd street stairs at Potrero Hill Rec Center**

- REC to submit CEQA soon
- DPW's minor encroachment permit not needed for application but state that the permit application is in progress
- Approval action will be the PAL

- **Japantown Peace Plaza: Pagoda Roof**

- During construction contractor discovered copper roof on Pagoda is ribbed

- ARG recommends replacing in kind, however, there were water intrusion issues with this design when originally installed and may not be feasible to reinstall
- Planning recommends ARG compose a memo identifying the issue and proposing a solution

- **GGP Indigenous Garden**

- Planning will confirm boundaries of the Murphy windmill landmark to see if current project encroaches on the landmarking site.
- Project will likely require an HRR part 2 as part of the exemption.

Hi Michelle,

I'm adding Rick Cooper and Eoanna Goodwin who is PMing Embarcadero Plaza to the thread here. We want to get out an email RPF to a preservation consultant as soon as possible. We're aiming to work with Page&Turnball on this project.

We want them to create a plan on what we can do with the fountain.

- Disassembly and storage
- Maybe incorporating aspects of the fountain into the plaza art installations

Can you help with fine tuning the scope of work? What else should be thinking of asking them to do?

Thanks!

Happy Holidays,

Kerstin

Kalchmayr, Kerstin (REC) invited you to edit a folder

Hello Rich and Michelle,

Please see the link to the review the revised Fountain HRR and Appendices. We want to ensure we have a robust HRR on this fountain and would like to discuss the next round of edits at our check in with Planning next Tuesday April 8.

Thanks,
Kerstin

Rich – am I missing anything?

Generally speaking, I do have concerns about placing the disassembled fountain into storage. We will likely need a concrete plan for reuse of the fountain before we can sign off on its removal.

Hi Michelle,

I'm adding Rick Cooper and Eoanna Goodwin who is PMing Embarcadero Plaza to the thread here. We want to get out an email RPF to a preservation consultant as soon as possible. We're aiming to work with Page&Turnball on this project.

We want them to create a plan on what we can do with the fountain.

- Disassembly and storage
- Maybe incorporating aspects of the fountain into the plaza art installations

Can you help with fine tuning the scope of work? What else should be thinking of asking them to do?

Thanks!
Happy Holidays,
Kerstin

Hi Michelle,

We want to start the process of bringing on a preservation consultant for the fountain disassembly.

Can you help me put together high level a scope of work that we would need the consultant to perform?

What should we be thinking of?

- give input for disassembly (how to)
- How to reconstruct
- How to best to store, size of storage space needed?
- Does a hazmat test need to be completed before disassembly?

Thanks for your help on this!

Kerstin

Apologies.

I do think it's a good idea to file an HRR for the fountain and make sure that we have a lot of info on it. If it hasn't been assessed, we need to make sure it gets assessed.

Relative to the scope, the only fee that seems a bit high is the preservation alternatives one. If we aren't doing an EIR, then preservation alternatives aren't necessary.

Task 6 should also be on T&M.

All of the other items look fine.

Rich

Okay, so no HRR. What do you mean by the larger one? There's the Better Market Streets EIR but didn't we determine the Embarcadero was officially outside of the study area?

What do you think about the fees?

Subject: RE: Embarcadero Plaza - Page & Turnbull Proposal

I don't think we need a specific HRR for the fountain. It can be looped into the larger one and it can be dependent on what is uncovered.

Want to respond back and state we're ok?

Rich and Michelle,

Quick-ish question: Big picture, if we can and are able to move the fountain - to a different location or in storage as sites are being analyzed - I believe that would avoid an EIR. Would or could that be a CatEx or a Neg Dec?

Just added a few comments into fountain HRR. Its very well written. I do want them to reconcile the description of the fountain's HRR with the Embarcadero Plaza HRR. I feel like the Fountain HRR made a clearer statement of the Plaza's eligibility rather than the actual Embarcadero Plaza HRR.

Subject: RE: Embarcadero Plaza: City Reviewed HRRs

Hi Carolyn and Sarah,

Thanks again for taking the time to talk through the *Vaillancourt Fountain Conditions Assessment* with me on Friday. I really appreciated the conversation and your openness to feedback. Following our review of the May 2, 2025 draft, I'm sharing several comments and recommendations for revision in the following folder:

[<image004.png>](#)
[Conditions Assessment RPD Comments](#)

In it you'll find a marked-up version of the conditions assessment with comments in **purple**, as well as supporting documentation including nearby soil condition reports and an assessment of the fountain from the structural maintenance yard. We believe this additional context should be integrated into the final report. Taken together with the structural and environmental findings, this material will be key to supporting a coordinated planning effort, estimate, and assessment with the San Francisco Arts Commission.

As we discussed, the current conclusions section still closely reflects the April 28 draft and doesn't appear to incorporate findings from DCI's structural assessment. The statement that the fountain is "overall in fair condition" feels out of sync with what we now know and could be misleading—especially since this language predates the structural analysis.

I understand from our conversation that the conclusions were intended to reflect your assessment of the surface-level conditions. That said, since it's the only "conclusion" referenced in the table of contents, it may cause confusion for readers. Given what DCI identified—particularly that the structure doesn't meet seismic thresholds even under ideal conditions, and that there's visible corrosion, displacement, and missing tension rod—it would be helpful if the conclusions section reflected those realities a bit more directly. Similarly, the hazardous materials findings (asbestos, lead-based paint) will have a big impact on future work and should be acknowledged clearly.

Additionally, could the DCI team clarify whether their structural modeling assumes

100% material capacity? If so, we would appreciate a short note confirming that the actual condition is likely worse due to corrosion and material degradation, and that the results should be viewed as conservative.

On the hazmat report—some of the pages in the PDF came through illegible, with symbols or question marks in place of text or numbers. Could you please replace those sheets with a clean version?

Lastly, could your team put together a draft scope of work outlining what restoring the fountain would involve? If you have an estimator or cost consultant you typically work with, we'd also be interested in a rough cost estimate to support our planning efforts.

For next steps, please review and respond to the comments in the attached PDF and provide a revised draft by **EOB Friday, May 16**. If you need additional time, do let me know and we can discuss priorities. Feel free to reach out with any questions.

Best,

Eoanna

Subject: RE: Embarcadero Plaza: City Reviewed HRRs

Thanks for the input, Sarah! I believe their structural comments were referring to the vault and waterproofing membrane, but I can see how that can be unclear. I removed the language and added that it is the systems that are beyond repair for clarity. Update is in the folder and attached.

Sounds good that we will work through corrosion repair options with DCI in the next phase. The conclusion from DCI states that there is likely non-visible corrosion which impacts the resilience of the tubes, so we would need to inspect this to confirm whether there is corrosion. In addition to treat existing corrosion there should be a note to inspect non-visible structural components for corrosion. How we do this can be in the forthcoming scope of work as we review options.

From page 118, *"In addition, non-visible corrosion is likely pervasive throughout the steel plate lining that is used to reinforce vertical precast concrete elements. This corrosion and degradation have a significant impact on the resilience of the tubes to resist future seismic events."*

Subject: RE: Embarcadero Plaza: City Reviewed HRRs

Thank you, Eoanna,

I have a couple of comments/clarifications in response:

- The revised conclusion in the memo you've provided is currently contradictory. It starts off by

saying that it is mechanically, structurally, and electrically beyond repair as it did in the prior version, but then goes on in the added paragraphs to more closely align with the findings of our assessment with respect to the options for restoration. I particularly request revision to the assertion that it is structurally beyond repair, which is not the case and is not supported by the findings of the rest of that memo or our assessment.

- You've also included a note on our conclusion regarding your understanding of what will be required for the structural repairs and treating the corrosion. That is the purview of our forthcoming additional services for treatment recommendations, and I would not feel comfortable providing more specifics about what is required prior to working through those options with DCI. I do understand that one of your colleagues had some thoughts about what would be needed, but I think it is more appropriate to take those into consideration during our next phase of work than to speculate about it in this conclusion.

Thanks again,

Sarah E. Brummett, AIA

Subject: RE: revised agreement

Team:

Thank you for a productive call this morning. Please find attached the cumulative redline that captures Jacob's comments noted below, as well as our discussion on the call this morning.

Only material thing left is for Michelle and Manu to agree on the indemnity language, specifically as it relates to environmental review.

Let me know if you have any further questions.

Lawrence Halprin

telegraph.co.uk/news/obituaries/technology-obituaries/6782150/Lawrence-Halprin.html

Sarah Knapton

December 10, 2009

Ghirardelli Square – a collaboration with his fellow architect William Wurster, an old friend from Harvard – came to be considered a model of how to renovate ageing industrial buildings.

But Halprin's work on redesigning Market Street – San Francisco's three-mile-long central spine – proved controversial. At its affluent eastern end it incorporated the Vaillancourt Fountain, created by the Quebecois sculptor Armand Vaillancourt, with its brutally-contorted concrete piping, while further west Halprin's UN Plaza, commemorating the founding of the United Nations in San Francisco, proved a magnet for homeless people, beggars and drug dealers; several spaces he designed in other cities have been altered or closed.

Elsewhere in the United States, Halprin's best-known work is the Franklin Delano Roosevelt Memorial in Washington, DC. Although he won a design competition for the project in 1976, it was completed only in 1997.

Many of Halprin's designs typically incorporated cascading water features, and water became his signature. A seasoned observer of nature on his relentless travels, Halprin walked thousands of miles in California's hills and mountains, filling some 250 notebooks with powerful ink drawings.

He sketched views of San Francisco and many other cities, but natural scenes predominated – of mountains, valleys, trees, bushes, rocks, grasses and, invariably, water.

In the 1970s he designed a park above a freeway in Seattle, effectively burying the sight and sound of a 13-lane interstate highway and creating a pleasant landscape where there would have been dirt and noise. In his 1966 book *Freeways*, Halprin explained: "The trick is to perceive the old freeway as a part of the cityscape and tame it, rather than complain about it."

In Seattle, he practised what he preached. The city had planned a small park on one side of the highway where it tunnelled under the ground. Halprin's vision was to bridge the road and fill both the broad bridge and the top of an adjacent parking garage with grass, trees, water and dramatic concrete forms.

In the early 1970s, when Halprin and his firm created this design, such highway-taming bucked conventional wisdom. But, like other Halprin projects, the Seattle park set an example that other cities would follow.

Most of Halprin's parks have a particular look. Although his rough, cubic shapes – waterfalls, buildings or benches – derive from the Brutalist school of architecture, he humanised the style. While most of his parks contain massive forms made of exposed concrete, people still loved to walk around and on them.

Halprin was an astute observer of human nature. Reflecting his collaborations with his wife, a dancer, as well as his lifelong study of how people move about in public spaces, he often referred to his park design as "choreography". He coined a new word – "motation", combining motion and notation – to describe his practice of plotting movements through his spaces with a system of personal hieroglyphs. In their initial stages his designs often resembled scores for *musique concrète*.

Lawrence Halprin was born in Brooklyn on July 1 1916. In 1933 his mother, Rose, an advocate of a Jewish state, took her son to Palestine, where they spent two years helping to establish a kibbutz near Haifa.

In 1940, while a horticulture student at the University of Wisconsin, Halprin married Anna Schuman, a dancer and fellow student who became his creative as well as his life partner. It was she who suggested a weekend trip to Taliesin, the Wisconsin home of the controversial architect Frank Lloyd Wright. The visit made Halprin change his career course, and he determined to be an architect.

He enrolled at the Harvard University Graduate School of Design, but in 1943 left to enlist in the US Navy, and was at the invasion of Okinawa when a Japanese kamikaze plane ploughed into the destroyer on which he was serving. "The damned thing hit my bunk," Halprin recalled in a 2005 newspaper interview.

After the war he and his wife settled in San Francisco, and he started his own practice in 1949. Over the next 30 years, Halprin designed many public works, including several large plazas in Los Angeles.

In 1961 he became special consultant to the Market Street design plan and won the contract to redesign the area, incorporating attractive pavements of brick and granite, period light fittings and modern street furniture.

Since the remodelling was completed in the early 1980s, the area has met with mixed fortunes: while the Vaillancourt Fountain is a popular al fresco lunch spot for office workers, the UN Plaza is hemmed in by squalor, compounded by years of official neglect. Even the sycamores which Halprin had ordered to be planted were dying for want of water.

More successful was his redesign of the former chocolate factory in Ghirardelli Square in 1968, creating the open plazas and passages that helped reanimate the buildings. Like the nearby Fisherman's Wharf, the area has become a popular tourist destination.

Halprin was awarded a gold medal in 1978 by the American Society of Landscape Architects. In 2000 he won a Presidential Design Award for his FDR Memorial, one of Halprin's personal favourites.

He was the author of nine books, and in 1976 his documentary on Salvador Dali, *Le Pink Grapefruit*, won an award at the San Francisco Film Festival.

Lawrence Halprin, who died on October 25, is survived by his wife and their two daughters.

S.F.'s redo of Sue Bierman Park wastes opportunity

SFG sfgate.com/bayarea/place/article/S-F-s-redo-of-Sue-Bierman-Park-wastes-opportunity-2326864.php

John King

October 15, 2011

Chris Womack works in Sue Bierman Park located west of the Embarcadero next to Justin Herman Plaza on Friday, October 14, 2011. The park has been newly upgraded.

Susana Bates/Special to The Chronicle

With its grassy central meadow, its meandering oval footpath and its old-fashioned black metal benches, San Francisco's makeover of Sue Bierman Park wants to sit amid genteel Victorian homes.

Instead it is framed by tower podiums and a parking lot, a busy roadway and the concrete rump of Vaillancourt Fountain - all of which make a far more lasting impression than the lost opportunity they surround.

Rather than embrace the potential drama of a bay-facing block within a stone's throw of the Ferry Building, the city has spent \$1.9 million on a space that seems designed mainly to look nice from surrounding buildings. It improves on what was there before, but not in a way that will attract people seeking the vibrant spirit of today's city.

The redone park fills the block directly north of Justin Herman Plaza and Embarcadero Center, with the Embarcadero on the east and Drumm Street to the west. It also includes a thickly planted block to the west that so far has received minimal improvements.

The park is named for Sue Bierman, a former supervisor who started as a community activist fighting freeways. It's an appropriate honor, since these 5.3 acres once were reserved for ramps leading to and from the elevated Embarcadero Freeway.

That double-deck imposition was demolished after the 1989 Loma Prieta earthquake, leaving in its wake mature trees that had served to (slightly) buffer freeway noise and fumes. Sod was unrolled and soon after that, residents of the adjacent Golden Gateway Commons began calling for permanent open space; the Recreation and Park Department acquired the parcels in 2001.

Three years later, community meetings were held to discuss how to turn the accidental greensward into an enticing park. Construction began this spring, and the reborn park opened earlier this month.

Basalt and ginkgoes

A concrete walkway circles the eastern block with six benches along the way. The ficus are gone but the poplars remain - they're popular with the wild parrots that also frequent Telegraph Hill - and carefully spaced ginkgoes now are part of the mix. Along the north rim are 16 scooped-out chunks of basalt that, theoretically, offer seating for adults and climbing opportunities for toddlers.

The new space is contoured to improve the irrigation and create a few low berms. The cobbled end of Clay Street has been cleared of trash bins. New paths lead into and out of Justin Herman Plaza.

And that's it.

By all accounts, the community meetings were dominated by a sentiment that a quiet, traditional park was the best approach.

But that sort of space needs a sense of enclosure. You want to feel part of a context, out of the swirl yet part of an urbane scene. Here, by contrast, there's little to look at except the windowless bases of 1960s-era slabs, the tall fence of a private health club and the afternoon swirl of parrots from tree to tree.

All this is compounded by a design that squanders the setting: The park's elevation is too low to allow strong views of the bay. You're more aware of traffic on the Embarcadero, especially since a line of poplars screens out much of the Ferry Building.

As for those basalt chunks, Friday morning their concave surfaces still held pools of water from the prior weekend's rain. Not exactly ideal seating conditions.

What might have been

The designers say that with time the space will blossom.

"The main goal was to make it a better park, improve the edges, take a light touch," said Bonnie Fisher of Roma Design Group, which worked on Bierman Park with landscape architects from the Department of Public Works. "The adjustments to be made around it will be interesting to see."

True, Embarcadero Center is spiffing up its lobby entrance on Clay Street. Supervisor David Chiu has introduced an ordinance to let the park add a play structure, which wasn't among the improvements allowed in the 2001 transfer.

But when you look to other American cities, it's galling to think what might have been.

New urban spaces in the past decade have become catalysts of civic pride and neighborhood revival; ask anyone who's been to Millennium Park in Chicago, or the High Line in New York. Landscape architecture is taking dynamic and sculptural forms.

Before visiting Bierman Park one morning last week, I strolled along the bay side of the Ferry Building. Few shops were open inside, the commute peak had passed, but 35 people lingered to savor the scene, filling benches and leaning against the rails.

Across the way there were six people, one barking obscenities from his sleeping bag. This during the only time of the day when the Embarcadero Center's towers don't blot out the sun.

With Sue Bierman Park, San Francisco followed the design path of least resistance so as not to ruffle the neighbors. Sometimes, though, being pretty is not enough.

John King is the Chronicle's former urban design critic. His book "Portal: San Francisco's Ferry Building and the reinvention of American cities," is now available in paperback by W.W. Norton.

San Francisco's rock and roll landmarks: How many have you paid homage to?

SFG sfgate.com/music/article/San-Francisco-s-rock-and-roll-landmarks-How-many-6816212.php

Peter Hockaday

February 12, 2016

Jefferson Airplane house, 2400 Fulton St. 'The Mansion' was ground zero for S.F. rock parties and the group named their 1987 greatest hits album after the address.

Craig Lee/The Chronicle

San Francisco's rock roots run deep, so naturally we've got a lot of places to pay homage to the greats. From Hendrix at Winterland to Metallica at Outside Lands, these are the famous concerts to remember and the top rocker residences to visit.

We've culled some of the landmarks from [a series](#) by former Chronicle critic Joel Selvin, with some additions and some archival favorites dug up by pop culture guru Peter Hartlaub (check out his pieces for more on [the U2 'Save the Yuppie' concert](#) and [the SNACK concert](#)).

ALSO: [We examined 93 years of San Francisco movies: Here's the worst era. Yes, 'The Room' is involved.](#)

Keep clicking through the gallery for more on the best Bay Area landmarks outside San Francisco, because places like 924 Gilman in Berkeley and The Record Plant in Sausalito definitely deserve a look.

Know of any locations we've missed, or have any Bay Area landmarks you want to add? Leave them in the comments.

Positioning the Park

Positioning the Park in various contexts to determine the park's 'why' or 'role' in the city and region.

The Park is a Gateway to the Region - to wine country, to Tahoe, to Silicon Valley and more

The Park is a key first impression for everyone visiting the city. Market Street and Embarcadero is where everyone's typical experience begins

The Park serves many audiences - as downtown transitions from homogenous commercial to mixed-use - how is this a Mixed Use Park.

Urban Land Institute : Shape the future of the built environment for transformative impact in communities worldwide

'It All Starts Here' : Civic pride campaign launched by a collection of committed business leaders to engage, activate and inspire San Franciscans to articulate their love of the City

Platform Park - Phase I and II GC Qualifications, Clarifications and Exclusions**Qualifications & Clarifications**

- 1 Priced in today's dollars (BXP included a 6% escalation allowance in overall budget)
- 2 18" Topsoil import is included at groundcover areas. No other import/export is included. BXP included an allowance for import/export to balance the site
- 3 Synthetic turf in Phase I is priced as Synlawn SYNRYE or similar, and includes a drain mat.
- 4 Work stops at back of curb or inside edge of sidewalk. A 25% allowance for repairs to curbs and sidewalks has been included.
- 5 Removal of the abandoned boiler and pumps in the electrical vault is included.
- 6 Budget includes transplanting 22ea existing palm trees.
- 7 Budget includes 6ea new hose bib connections around the event space and 2ea at the Phase II plaza.
- 8 Budget includes new 220v electrical service to the stage area and 24ea 120v outlets at the event space.
- 9 Sport court is budgeted as a concrete slab with a synthetic surface overlay (Plexipave or similar).
- 10 Shipping containers are budgeted as full MEPF fit out, including design/build services. BXP included allowance for brewery fit-out (kitchen equipment, signage, decals, decorations, seating, tables, bar tops, specialty lighting, furnishings, etc)
- 11 Budget includes Subcontractor Default Insurance (SDI).
- 12 Shipping container build-outs are included as follows:
 - One 40' taproom with accompanying 20' cold storage box and trash/utility room
 - One 40' kitchen, including a range hood. Appliances and fixtures are assumed be covered by Tenant Improvement Allowance in overall budget.
 - One 40' restroom which can accommodate two ADA stalls and three other fixtures
 - Two 40' seating containers. Seating to be loose furnishings and covered by the Tenant Improvement Allowance in overall budget.
 - One 20' dry storage container.
- 13 An allowance of \$225,000 has been included for an architectural wood trellis and patio lighting

Exclusions

- 1 Design costs and contingencies. BXP carrying these costs in overall budget.
- 2 Permits and fees. BXP is carrying an allowance overall budget.
- 3 Utility fees and consumption fees. BXP is carrying an allowance in overall budget.
- 4 Hazardous material abatement. Minor abatement required in electrical vault. Contingencies to cover any haz soil handling.
- 5 Artwork, except foundations. BXP is carrying an artwork allowance budget in overall budget.
- 6 Code upgrades/modifications to existing electrical vault. BXP assumes the vault can remain as-is.
- 7 Monument signage. BXP is carrying an allowance for new wayfinding signage in overall budget.
- 8 SF Muni work, including any streetcar track work or overhead power line work. BXP assumes this is not an issue based on scope of work.
- 9 Salvage of existing market plaza pavers.

Stacy and Kelli,

I am pleased to share with our my concept budget for Phase I and Phase II for Platform Park. Also attached is the scoping drawings we prepared to help Webcor prepare the concept budget. I would strongly request that we setup a meeting in person to review the layout of the budget and to address any questions you may have. I would likely want to have HOK Architects and Webcor Builders present in the meeting to help address specific scope and budget questions.

@Bradley, Stacy (REC) A side note, I've updated our presentation to include Phase II (bocce court area) into the scope, and I have some early renderings to show what that area would look like. I can share these with you when we meet in person next.

Hi Aaron,

Thank you for the inspiring conversation! My cell is 415-823-9120. Yes, please send over your detailed conceptual budget so we can validate from the City's perspectives. Happy to set up a meeting as well. I'm adding Kelli Rudnick who is our Deputy Director of Capital to work with me on this effort.

Thank you!
Stacy

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi Stacy-

It was a pleasure to meet you this morning and discuss our vision for the plaza. It was really great to hear P&R's enthusiasm to advance the project with us. Should I be sending you our detailed conceptual budget and takeoffs so we can begin to validate the project costs? I think it would be prudent to have a meeting with your cost estimator and Webcor to review the project scope and assumptions, so that we are all aligned. Let me know!

Also, can you let me know your cell # so I can contact you more easily? Mine is 415-730-8391.

Best,

Aaron Fenton

The Bono fountain is broken. Is SF too broke to pay for its \$3 million fix?

By Stephanie K. Baer can be reached at

Published Jun 21, 2024, 6:30 AM

Source: <https://sfstandard.com/2024/06/21/bono-vaillancourt-fountain-drained/>

A huge concrete fountain that U2 frontman Bono famously graffitied during a free concert at San Francisco's Embarcadero Plaza in 1987 has been drained after "a major mechanical failure" forced the city to shut the water off.

The last pump that serviced the Vaillancourt Fountain, also known as "Quebec libre!," failed about two weeks ago, Tamara Aparton, a Recreation and Parks Department spokesperson, told The Standard. Now, the 53-year-old brutalist sculpture must have its mechanical and electrical systems replaced. The cost? Upward of \$3 million.

"The fountain systems were extremely antiquated and past the end of their useful life," Aparton said in an email. "Due to [the] age of the infrastructure, the fountain systems require a full renovation." It's unclear if or when those repairs could happen. Aparton said there was "no timeline." For now, the department is working with the Arts Commission to install temporary container plants in the fountain.

A man with a rolling cart and another person walk by a large, abstract concrete sculpture. In the background, there is a clock tower and palm trees.

Designed by Canadian artist Armand Vaillancourt, the sculpture was conceived with the now-demolished Embarcadero Freeway in mind and built so that people could interact with it. | Source: Morgan Ellis/The Standard

A discarded can lies on a rusted metal grate, partially submerged in murky green water with muddy debris surrounding it.

Puddles of water and gunk remain in the pool of the now-drained Vaillancourt Fountain on Thursday. | Source: Morgan Ellis/The Standard

Coma Te, communications director for the commission, told The Standard the agency is working closely with Recreation and Parks to repair the fountain and “get it running as soon as possible.”

But with a looming \$800 million budget deficit → <https://sfstandard.com/2024/05/31/san-francisco-budget-deficit-breed-plan/>, those planters may not be all that temporary.

Mayor London Breed’s office did not immediately respond to The Standard’s questions about whether the city can afford to fix the fountain.

According to The Standard’s AI bot → <https://sfstandard.com/2024/06/03/san-francisco-budget-2024-breakdown-cuts-chatgpt/>, which we trained to understand the mayor’s proposed \$16 billion budget for fiscal years 2025 and 2026 (opens in new tab) → https://www.sf.gov/sites/default/files/2024-05/CSF_Proposed_Budget_Book_June_2024_r8.pdf, the 362-page docu-

ment unsurprisingly makes no mention of the fountain. However, the budget does allocate \$15 million for capital improvements and maintenance of public spaces.

The mayor has proposed a budget of \$255.9 million for Recreation and Parks for the 2025 fiscal year—a decrease of \$7.2 million or 2.7% from the current budget—according to The Standard’s AI bot, which analyzes budget documents. The Arts Commission also has money for the maintenance and conservation of public art installations, the bot notes.

Aparton said she could not provide the cost of operating the fountain, which pumps up to 30,000 gallons of water per minute. In 2004, the department said it cost \$200,000 a year (opens in new tab) → <https://www.sfgate.com/bayarea/article/vaillancourt-fountain-makes-a-splash-again-2736404.php> to keep the water running.

The image shows a large concrete sculpture with rough textures, surrounded by tall buildings. A puddle reflects the sculpture and buildings, with a small green tennis ball in it.

The city is planning to install temporary container plants in the fountain while it is not operational. | Source: Morgan Ellis/The Standard

A person in a blue jacket walks past a large, abstract concrete sculpture composed of irregular, weathered geometric shapes, with a palm tree slightly visible in the background.

The water supply to the fountain has been shut off previously, most recently in 2014 during California's historic drought. | Source: Morgan Ellis/The Standard

Decried by some and adored by others, the fountain has long been controversial—or perhaps misunderstood. Designed by Canadian artist Armand Vaillancourt in 1971 and installed that same year, the sculpture was conceived with the now-demolished Embarcadero Freeway in mind and built so that people could interact with it.

But when the freeway was demolished in 1991, some called for the fountain to be torn down with it. Supervisor Aaron Peskin renewed those calls in 2004 (opens in new tab) → <https://www.sfgate.co>

[m/default/article/SAN-FRANCISCO-Councilman-wants-to-dismantle-2780809.php](https://www.sfchronicle.com/default/article/SAN-FRANCISCO-Councilman-wants-to-dismantle-2780809.php)
after the water had been shut off for several years due to the state's energy crisis.

The fountain went dry again 10 years later because of the drought. It cost the city \$500,000 to turn the water back on in 2017, according to the [San Francisco Chronicle \(opens in new tab\)](https://www.sfchronicle.com/bayarea/place/article/Testing-the-waters-for-bringing-the-Vaillancourt-11821748.php) → <https://www.sfchronicle.com/bayarea/place/article/Testing-the-waters-for-bringing-the-Vaillancourt-11821748.php>.

"It's an iconic piece of public artwork here in the city, so you know everybody has their opinions about it," Te said. "But it's part of San Francisco's Embarcadero waterfront environment. We definitely want to do what we can to ensure that it is repaired as quickly as possible."

Perhaps Bono, with an estimated net worth in the high hundreds of millions of dollars, could be the fountain's savior. We emailed his management firm to find out, but we're still waiting for a reply.

SF's Embarcadero Plaza could become 'world class' park

 sfchronicle.com/sf/article/s-f-embarcadero-plaza-new-park-19577945.php

John King

July 17, 2024

[Bay Area](#)//[San Francisco](#)

Could S.F.'s Embarcadero Plaza become a 'world class' park? There are plans to make it happen

Developers have offered a plan to replace San Francisco's Vaillancourt Fountain in Embarcadero Plaza with a green grassy space.

Scott Strazzante/The Chronicle

Update: [S.F.'s controversial fountain deemed 'hazardous' and will be fenced off indefinitely](#)

Largely ignored despite its prominent setting near the bay, San Francisco's stark Embarcadero Plaza is getting more attention than it has in decades — with a private developer and Mayor London Breed's administration working on overhaul plans while one of Breed's mayoral contenders this week floated a concept of his own.

The owners of the multi-towered Embarcadero Center complex to the west are working with city officials on the idea of remaking the stark red-brick clearing best known for the enormous, [concrete-tubed Vallaincourt Fountain](#) at its edge. The idea would be to demolish the plaza and replace it with a more parklike space that would attract nearby residents and workers on a regular basis, rather than just for large events.

The makeover would also include Sue Bierman Park directly to the north. The two spaces total 5 acres — roughly twice the size of Union Square.

A rendering of the conceptual proposal for a remake of Embarcadero Plaza at the foot of Market Street, including sculptures and walking paths.

HOK, BXP

“The Embarcadero has been on our to-do list for a long time,” said Phil Ginsburg, general manager of the city’s Recreation and Park Department. “This is the most optimistic I’ve felt about the possibilities for the space in years.”

Any overhaul would be done by the city, rather than private developers. But Embarcadero Center owner BXP has been working on the idea since last fall with the design firm HOK, and several presentations have been made to city officials and planners in recent months.

“We want to kick-start a conversation. We’re not trying to command what the space should be,” said Aaron Fenton, senior vice president of BXP, formerly known as Boston Properties and the longtime owner of Embarcadero Plaza. “The plaza is our front door. ... Even on the nicest of days, you don’t see many people there.”

That was the case Wednesday morning, when the only people within the slightly sunken plaza either were cutting through it on the way to work or working up a sweat in one of the two padel courts [installed last year by Rec and Park](#) in a bid to stir up activity.

As for the 40-foot-tall, defiantly right-angled Vaillancourt Fountain — famously referred to by former Chronicle [architecture critic Allan Temko](#) as something “deposited by a concrete dog with square intestines” — it sat at the edge of the plaza, devoid of water and life, a few tall poplar trees spiking behind it.

A rendering of the conceptual proposal for a remake of Embarcadero Plaza at the foot of Market Street. The idea is from BXP, owner of the multi-towered Embarcadero Center to the west.

HOK, BXP

The fountain and the trees are the only clues to what stood behind the plaza until 1991: the double-deck Embarcadero Freeway, an elevated roadway that severed the Ferry Building and adjacent piers from the rest of the city. It ended abruptly a few blocks to the north, but also had ramps curving west to Clay and Washington streets.

The idea for the plaza that opened in 1971 was to create a European-styled gathering spot but also obscure the reality of the glum barrier behind it. The fast-growing trees were envisioned as a visual screen, while the roaring fountain would muffle at least part of the freeway’s noise.

The approach that BXP dubs “Platform Park” would start by clearing away the existing plaza and treating the bare site as a blank slate. There’d be no depressed brick plateau and no raised bermed walkway along the plaza’s edge above the now buoyant Embarcadero.

“The plaza and fountain were designed for a different era,” said Brian Jencek, a landscape architect principal at HOK. “It puts a wall in front of what we now celebrate.”

People gather around Vaillancourt Fountain in April 1971 on the opening day of Embarcadero Plaza.
Art Frisch/The Chronicle

Besides reconnecting with the Embarcadero, the makeover would unite the current plaza with Sue Bierman Park, a grassy but little-used block once reserved for freeway ramps. It also would be rethought — though its one popular feature, a fenced-in children’s playground, would remain.

The conceptual approach tosses in a bandshell stage and a dog run in the north, retail kiosks and public art in the south. There would be a large lawn that concludes near Market Street and, proponents say, could handle large crowds when a gathering spot is needed for marches or marathons, the sort of occasion where the current plaza shines.

“We want to explore the question of what this space can be,” Jencek said, emphasizing that it should serve a variety of publics, including families, in a variety of ways.

Ginsberg, who called the conceptual approach from BXP “a good starting point,” said that aside from the scale, such partnerships with the private sector to renovate parks are not unusual. He stressed that any makeover would proceed after the city’s required process, with public hearings and reviews.

According to BXP’s Fenton, the firm “is committed to making a financial investment in the new park” if it proceeds. He also said BXP started to look at the potential of the publicly owned plaza following a [report last summer from the Urban Land Institute](#), which offered ideas for how to shake downtown San Francisco’s malaise.

“After reading the report, a light bulb went off,” Fenton said. “We were the obvious ones to take the lead.”

A rendering to illustrate how the mayoral campaign of Mark Farrell wants to redesign Embarcadero Plaza in San Francisco so that it becomes “a world-class, family-friendly downtown park.” The rendering was released as part of a larger downtown revitalization plan proposed by the former supervisor.

Gensler

The importance of a revived Embarcadero Plaza to a revived downtown also surfaced from mayoral candidate Mark Farrell.

Besides serving the new residents that Farrell and other candidates hope to attract to the area, “think about what a new park at the foot of Market Street, right in front of the Ferry Building, will do to people who are imagining and visiting San Francisco for the first time,” Farrell said at a press conference Wednesday. His campaign’s plan for downtown features a conceptual rendering for the space that it commissioned from the Gensler design firm.

Whatever the outcome of the current focus, Robbie Silver of the Downtown SF Partnership welcomes the interest.

“Downtown is being taken seriously, and that is so good to see,” said Silver, who has talked with BXP about the landowner’s initiative. His nonprofit’s boundary ends a block or two to the west.

“I’m a ferry commuter and walk by Embarcadero Plaza five days a week. Right now it’s arguably the most underutilized space in the entire downtown area. It should be a world-class park for a world-class city.”

J.D. Morris contributed to this report.

|Updated

John King is the Chronicle’s former urban design critic. His book “Portal: San Francisco’s Ferry Building and the reinvention of American cities,” is now available in paperback by W.W. Norton.

New plans have emerged to give Embarcadero Plaza a glow up

The plans for the new Embarcadero park are great—except for one thing

We need to keep the Vaillancourt Fountain.

The Embarcadero has always been a great part of San Francisco (ever since the earthquake took down the divisive freeway in '89): a way to connect with the waterfront through a pleasant promenade, catch a vintage trolley, board a ferry at the beautiful Ferry Building → <https://www.timeout.com/san-francisco/shopping/ferry-building-marketplace> (and enjoy tons of great dining and coffee inside), see the magnificent span of the Bay Bridge and enjoy the bustle of street vendors.

Now there are plans to glow up the plaza, as reported by SF Gate → <https://www.sfgate.com/bayarea/article/san-francisco-new-park-twice-size-un-ion-square-19584602.php>, which we're all in favor of—except that we adore the Brutalist Vaillancourt Fountain, which faces extinction as the plans currently appear.

What's great about the plans?

Renderings—which you can see at the top of this story—show a very attractive span of grassy areas linked by sinuous pathways. There's a fenced-in dog park, several new sculptures and lots of lavender bushes to sustainably bloom and provide color. This park would basically unite three already existing spaces: Embarcadero Plaza, South Embarcadero and Sue Bierman Park. The only drawback is that, as far as we can tell from the renderings, we're missing that iconic Vaillancourt Fountain. Where it currently sits, we see instead a few volleyball courts. Sure, replace an iconic piece of art with some sticks with netting stretched between them.

Embarcadero Plaza San Francisco

Photograph: Erika Mailman

What's great about the fountain?

It's a freaking masterpiece of square pipes, like Dr. Seuss and a dystopian plumber went on a bender. It was designed by Armand J. R. Vaillancourt → <https://www.wikiart.org/en/armand-vaillancourt> and sometimes called *Québec libre!*, since that's what Vaillancourt wrote on it with red paint the night before its 1971 unveiling. (Gotta love an artist who tags his own work!) And rock historians would want to know that U2 also tagged it; during a free concert in 1987, Bono climbed on it to write, "Rock N Roll Stops Traffic," which is so cute and dated we can hardly stand it.

This thing stands 40 feet high, stretches 200 feet long and 140 feet wide and provides ample pleasure to passersby. You can climb around on it to various platforms and listen to the relaxing flow of

water (which is sometimes dyed blue to make it more luscious) that evacuates from several of the cast concrete tubes.

Who doesn't love the fountain?

Well, San Francisco's beloved artist Ruth Asawa tried to block it at the design stage, calling it something that would be "unleashed on the unsuspecting people of this city." But we prefer the perspective of Sea Ranch → <https://www.wsj.com/real-estate/luxury-homes/the-sea-ranch-california-be0f00a8> landscape architect Lawrence Halprin, who said that if it didn't turn out to be one of the nation's great works of civic art, he would slit his own throat. So we owe it to his memory to keep it.

Embarcadero Plaza San Francisco

Photograph: Erika Mailman

Where did the park plans come from?

They emerged from a partnership between the city and workplace developer BXP → <https://www.bxp.com/>, which owns Embarcadero Center (the renderings are from design and planning firm HOK → <https://www.hok.com/>, which sounds like in another reality it could be an Outside Lands → <https://www.timeout.com/san-francisco/news/outside-lands-2024-lineup-schedule-tickets-and-dates-for-san-francisco-festival-073124> band).

Does the plaza need a redo?

For sure! It'd be great to have a destination → <https://www.timeout.com/san-francisco/news/san-franciscos-taking-a-hint-from-new-orleans-with-outdoor-alcohol-areas-071224> here for wandering and picnicking. At night, it'd be a

great live music and festival spot (the nighttime rendering shows fairy lights, encircled food trucks and glowing vendor tents, all very magical).

Everybody wants healthy foot traffic and economic growth, and the hope is that the new park could host large-scale events like viewing parties for the Super Bowl or World Cup games. But we feel certain that the new park could encompass all that *and* keep the Vaillancourt Fountain. After all, U2 played here at the height of their popularity! People love to walk on it, it's Instagrammable and it's an unusual piece of art that's been in place for more than 50 years. If we tear it down, the future will be super pissed.

Rendering: Courtesy, HOK and BXP

What happens next?

Funds for the park project need to be raised from a mix of public and private sources—once the money's in hand, “we’re going to step on the gas,” San Francisco Recreation and Park Department General Manager Phil Ginsburg told *SF Gate*.

\$30 million-plus Embarcadero Plaza park plan gets a boost | The City

 [sfexaminer.com/news/the-city/public-private-vision-for-30-million-embarcadero-plaza-overhaul-advances/article_ca075db0-8cde-11ef-bee6-ffe667b08e53.html](https://www.sfexaminer.com/news/the-city/public-private-vision-for-30-million-embarcadero-plaza-overhaul-advances/article_ca075db0-8cde-11ef-bee6-ffe667b08e53.html)

By Patrick Hoge | Examiner staff writer |, Patrick Hoge

October 17, 2024

Plans for a \$30 million-plus overhaul of San Francisco's underused Embarcadero Plaza took an important step forward Thursday when The City's Recreation and Park Commission endorsed a public-private plan to begin design work and start raising money.

Commissioners voted unanimously in support of accepting \$2.5 million from real-estate company BXP in cash and in-kind grants, which will support park design and project-management services provided by the Recreation and Park Department.

The plan, which has the support of Mayor London Breed, will next go to the Board of Supervisors for consideration.

The proposal calls for the Recreation and Park Department and The City's Office of Economic and Workforce Development to work to secure at least \$15 million in public funding to build what boosters say they hope will be a greener and more unified new park in the area covered by

Embarcadero Plaza and Sue Bierman Park just to the north.

Meanwhile, the DowntownSF Partnership, a nonprofit community-benefit district covering the historic Financial District north of Market Street and Jackson Square, would also work with BXP to raise \$10 million in private funding for the park project. Boston-based office real-estate company BXP also owns Salesforce Tower, in addition to the enormous four-tower Embarcadero Center complex.

The agreement calls for planning and the securing of fund commitments to be completed within three years of supervisors' approval.

"It's an exciting moment for this important space that's really a gateway to San Francisco in many respects," said Phil Ginsburg, general manager of the Recreation and Park Department. "There's so much more potential at Embarcadero Plaza than has been realized."

A parks report said that in addition to funding planning efforts, BXP intends to spend approximately \$2.5 million to construct a new restroom available to the public in a vacant retail suite in Four Embarcadero Center, which abuts the plaza.

Aaron Fenton, a BXP senior vice president, said that the full cost to the company — including forgone income from the retail space — will be around \$5 million, bringing the company's total likely contribution to \$7.5 million or more.

It's an investment that BXP says the company hopes will help the bottom line as well as the urban fabric by luring workers back to downtown office buildings, many of which have had increased vacancies since the COVID-19 pandemic amid the rise of remote work.

BXP, which operates higher-class buildings of a sort that have fared relatively well, has outperformed the market — but occupancy is still down from before the pandemic, Fenton said.

"We're trying to be part of the story of inducing our office workers to come back downtown," said Fenton, extolling the virtues of Embarcadero Plaza's location across from the Ferry Building and near a BART station.

"And if you can provide them a world-class amenity, like a brand-new green space that we're proposing, we think that's really going to help drive employment to come back downtown," he said. "We want to be part of San Francisco's downtown revitalization story."

Embarcadero Plaza opened in 1972 to create a pedestrian gathering spot and soften the hard end of the street created by the double-deck Embarcadero Freeway, which was torn down in 1992 after being damaged in [1989's Loma Prieta earthquake](#), according to a parks department memo.

With the freeway's removal, the department acquired and developed Sue Bierman Park on the other side of the Vaillancourt Fountain, the large concrete sculpture in the plaza. The fountain currently has no water running through it and might eventually be removed.

“San Francisco is a world-class city that deserves a world-class waterfront,” said Robbie Silver, Downtown SF Partnership’s president and CEO.

Visitation to both the plaza and the park dramatically dropped off in the wake of the COVID-19 pandemic and the subsequent decline in downtown office usage amid the rise of remote work, the department said. An annualized comparison of 2019 and 2024 showed the number of visitors at the two sites fell by nearly half, from just over 1 million visitors to about 571,000.

San Francisco officials have already been trying various strategies to activate the Embarcadero Plaza. Last year, The City installed two padel courts in the plaza that have proven popular, and a third will be added soon, he said.

In July, concert promoter Another Planet Entertainment drew about 5,000 people there for a free electronic-music show, [one of three the company agreed to stage](#) downtown this year in exchange for getting another weekend for performances in Golden Gate Park after [the Outside Lands music festival](#).

In addition, The City sponsored the 12-week [Bricks at Embarcadero Plaza](#) pilot series of events running Wednesdays through Saturdays until Oct. 26, featuring trivia nights, tango dance lessons, Friday happy hours with DJs, lunchtime panel discussions and, on the weekends, family activities.

City officials said they welcomed it when BXP approached the parks department and the Office of Economic and Workforce Development with a general preliminary design plan that would reimagine and reinvigorate the area and also offered to help make it real.

BXP had engaged HOK, the global design, architecture, engineering and planning firm, to produce renderings that showed more grass, meandering paths, kiosks, a large playground and spaces for sports and entertainment.

A new park may come to SF's Embarcadero with help from the Salesforce Tower owner

By Kevin Truong can be reached at

On the eve of an incredibly tight November election → <https://sfstandard.com/2024/11/04/san-francisco-voters-turnout-election-trump-kamala/> that will dictate her political future, Mayor London Breed took the podium to announce a new park on the Embarcadero.

Technically, it's the creation of a public-private partnership to potentially enable the construction of a new park, but who's counting?

Breed plans to introduce legislation on Tuesday to greenlight a partnership between the city, Salesforce Tower owner BXP Inc. (formerly Boston Properties), and the Downtown SF Partnership to redesign and upgrade the Embarcadero Plaza in front of the Ferry Building and the adjacent Sue Bierman Park.

"We are going to reimagine what Embarcadero Plaza will be for the future so that people who want to come here can enjoy it," Breed said at the press conference, before listing a string of recent park projects that have been open to the public, including Bayfront Park → <https://sfstandard.com/2024/07/05/bayfront-park-chase-center/>, China Basin Park → <https://sfstandard.com/2024/04/29/china-basin-park-opens/>, and Presidio Tunnel Tops → <https://sfstandard.com/2022/07/17/party-on-a-freeway-sfs-much-anticipated-tunnel-tops-park-opens-in-the-presidio/>.

“All these open public spaces every single weekend are packed with people. This is one step further to making a plaza like this come to life differently.”

Source: Courtesy of BXP and HOK

The resolution would call for BXP to spend \$2.5 million on the design of the project, while the Recreation & Parks Department and the Office of Economic and Workforce Development would commit to securing \$15 million in public funds for the park.

BXP and the Downtown SF Partnership would also be charged with working to secure an additional \$10 million in private funding.

What exactly the project would consist of is still an open question and subject to community outreach, but ideas include entertainment venues, a new children’s playground, or a marketplace space with kiosks. Any potential renovation of the park would go through public hearings and review.

“San Francisco needs a world-class park in its downtown,” said Aaron Fenton, senior vice president of BXP, at the press conference. “This is such a prime piece of real estate with its iconic views and its access to public transportation”

BXP has been working with the design firm HOK for about a year on a redesign of the plaza in a bid to better activate the area and make it an attractive amenity for its tenants. During that time, the city has tried to activate the area with programming like concerts, raves, and DJ sets.

“As the front door to San Francisco, Embarcadero Plaza is arguably the most underutilized public space in the greater downtown area and prime to welcome residents and visitors downtown to experience a world-class waterfront park in a world-class city,” Robbie Silver, Downtown SF Partnership CEO and president, said in a statement.

Initial renderings shared by the team show the removal of the Vaillancourt Fountain → <https://sfstandard.com/2024/06/21/bono-vaillancourt-fountain-drained/>, perhaps one of the city’s most reviled pieces of public art.

The real estate developer, which also owns the adjacent Embarcadero Center, touted increased vitality from its planned revamp, including a publicly accessible bathroom at its property with an eye-popping \$2.5 million price tag.

Breed’s legislation is being put forward a few months after Mark Farrell — one of Breed’s leading competitors for mayor — proposed his own version → <https://sfstandard.com/2024/07/17/mark-farrell-downtown-recovery-plan/> of a new Embarcadero Plaza park as part of a larger downtown revitalization plan.

At the time, a Breed campaign spokesman derided the plan as a “Chat-GPT” envisioned fantasy.

S.F. to revamp Embarcadero Plaza into 5-acre park under Breed plan

HOK and BPX

Update: [Controversial S.F. fountain not part of Embarcadero Plaza renovation plans, officials say](#)

A plan to dramatically [transform San Francisco's stark Embarcadero Plaza](#) into a green and vibrant park twice the size of Union Square could move forward this week, Mayor London Breed announced Monday.

Standing on the brick-and-concrete plaza with the huge brutalist Vaillancourt Fountain looming behind her, Breed said she would introduce legislation at the Board of Supervisors meeting Tuesday to approve a public-private partnership and allow for private fundraising to remake the plaza. The city would work with the landlords of the adjacent Embarcadero Center towers to make the plan a reality.

"Working together, we are going to reimagine what Embarcadero Plaza will be in the future," Breed said.

The mayor noted that the plaza was created as a paved and bricked buffer zone in the shadow of the old Embarcadero Freeway, the elevated double-decker roadway built in the late 1950s that cut off the Ferry Building and adjacent piers from the rest of the city.

San Francisco Mayor London Breed, with Vaillancourt Fountain in the background, on Monday discusses a plan to transform Embarcadero Plaza.

When the [freeway was demolished](#) in the aftermath of the 1989 Loma Prieta earthquake, the paved plaza became obsolete.

The plaza is now seen as a barrier between housing and offices on the east side of the Embarcadero and the waterfront Ferry Building and promenade across the street to the west.

Under the proposed agreement, a new public-private partnership would redesign and improve both Embarcadero Plaza and the adjacent Sue Bierman Park.

The concept is to tear out the brick-and-concrete plaza, cover it with grass or other natural surfaces, and combine it with Sue Bierman Park to create a seamless property of nearly 5 acres.

The plan includes creating a retail corridor with an event stage on the perimeter of Four Embarcadero, and a promenade closer to the Embarcadero.

The partnership, approved last month by the San Francisco Recreation and Park Commission, comprises the Rec and Park Department and Office of Economic and Workforce Development, real estate developer BXP and the community benefit district Downtown SF Partnership.

BXP, formerly Boston Properties, owns the adjacent Embarcadero Center row of four office and retail high-rises. BXP will provide the first \$2.5 million for the preliminary renderings drawn up by HOK, the architecture firm that designed Oracle Park, and to fund a project manager through the Rec and Park Department.

A rendering of the conceptual proposal for a remake of Embarcadero Plaza at the foot of Market Street. The idea is from BXP, owner of the multi-towered Embarcadero Center to the west. Any makeover would be a city project, so details are likely to change if it eventually occurs.

HOK and BPX

The park project does not yet have a budget, but the city is expected to contribute \$15 million or more in public money. BXP and the Downtown SF Partnership would commit another \$10 million, if the board approves it. It is possible that if Measure B, the infrastructure bond, passes, it could be another source of funding.

“I am excited and proud about this transformation,” said Kat Anderson, president of the Recreation and Park Commission, who noted that completion of construction is at least three years away and is likely to rise in cost from the preliminary estimate of \$25 million.

“With the Ferry Building just across the street and the Bay Bridge in the backdrop, Embarcadero Plaza’s strategic position between downtown and the iconic waterfront has always been its greatest asset,” said Rec and Park General Manager Phil Ginsburg in a statement.

In the last year, attempts have been made to revitalize the plaza starting with the installation of two pop-up padel courts. In August, a [public dance party](#) drew 5,000 people, and in September, Free Shakespeare in the Park was [held in Sue Bierman Park](#) for the first time.

Breed said she attended a rave at the plaza and quipped that the only function of the Vaillancourt Fountain was to block the view of the bay.

The dried-up Vaillancourt Fountain, which was installed at San Francisco’s Embarcadero Plaza in 1971.

The mayor did not specifically call for demolition of the fountain sculpture, but none of the four park renderings she presented included it in the plan. The Arts Commission will ultimately determine the fountain’s fate.

The plaza belongs to Rec and Park, as does Sue Bierman Park.

Former interim mayor and Supervisor Mark Farrell, one of Breed's opponents in her bid for reelection, also proposed reviving Embarcadero Plaza during his campaign, offering a conceptual rendering from the Gensler design firm of a new park in front of the Ferry Building.

Breed made her announcement the day before the election.

"We want to get this project going and make Embarcadero Plaza amazing," she said. "This is exactly what we need to do to make downtown better."

Mayor Breed Presses Forward With Embarcadero Plaza Revamp on Eve of Election

By Jay Barmann

Published Nov 5, 2024, 10:25 AM

Source: <https://sfist.com/2024/11/05/mayor-breed-presses-forward-with-embarcadero-plaza-revamp-on-eve-of-election/>

On the last day before Election Day, SF Mayor London Breed held a press conference in Embarcadero Plaza, announcing a public-private partnership that, if approved by the Supes, intends to entirely remake the plaza along with the adjacent Sue Bierman Park.

The plan has been in the works for several months, and we first heard about it → <https://sfist.com/2024/07/17/city-looks-at-total-reimagining-of-embarcadero-plaza/> in July. But it's now up for a funding vote at the Board of Supervisors, and Mayor London Breed took the opportunity Monday to bolster the project and add one more item to her credits list ahead of the election, vis a vis downtown revitalization.

Embarcadero Plaza, with its brick pavers and general uselessness, would be transformed into a grassy park, and combined with Sue Bierman Park next door, would feature a new playground, entertainment areas, a designated marketplace zone, and more. Conceptual renderings released this summer also included a new water feature outside the Hyatt Regency, and large-scale public art.

One piece of large-scale public art, the much reviled Villain-court Fountain → https://sfist.com/2017/08/10/appalling_embarcadero_fountain_woul/, would likely disappear for good, though the Arts Commis-

sion will get the final word on that.

The creation of this new park is currently estimated to cost \$25 million, and would be funded by a public-private partnership that includes the city, Downtown SF Partnership (the area's community benefit district), and BXP, the development firm formerly known as Boston Properties, which owns Embarcadero Center and part of Salesforce Tower. Rec and Parks and the Office of Economic and Workforce Development are agreeing under the plan to put up \$15 million of the project's cost, and (at least) \$10 million more would be privately funded. BXP is agreeing to pay for the design plans, to the tune of \$2.5 million.

Funding may also come from the Proposition B downtown infrastructure bond, assuming it passes.

"The Embarcadero is the gateway to Downtown, a place where residents, visitors, and workers should be able to experience the best of what's possible in our City," said Mayor Breed in a statement. "Transforming this Plaza into a vibrant park and gathering space will help us usher in a new era Downtown as a vibrant, 24/7 neighborhood and destination for everyone. I'm excited to work with BXP and Downtown Partnership to realize this vision because when we all work together, we can bring joy and excitement to the future of San Francisco."

Rec and Parks General Manager Phil Ginsburg added, in a statement, "With the Ferry Building just across the street and the Bay Bridge in the backdrop, Embarcadero Plaza's strategic position between Downtown and the iconic waterfront has always been its greatest asset. Now, thanks [to] this public-private partnership, we have the opportunity to revive this unique space and transform it into the vibrant community hub it's always been meant to be."

Rendering by HOK via BXP

BXP has already engaged HOK Architecture to draw up conceptual designs. HOK designed Oracle Park, as well as 535 Mission Street → <https://www.hok.com/projects/view/535-mission-street/>, and this curvilinear office park in Sunnyvale → <https://www.hok.com/projects/view/central-and-west/>.

At the press event on Monday, per the Chronicle → <https://www.sfgchronicle.com/sf/article/san-francisco-embarcadero-plaza-park-19886165.php>, Breed spoke about how the plaza — formerly known as Justin Herman Plaza — was originally created as a buffer zone between the foot of Market Street and the Embarcadero Freeway, which used to loom over the area, and which was demolished after suffering damage in the 1989 Loma Prieta earthquake. For 35 years, the plaza has essentially been overlooked and obsolete, just a brick-paved stretch you have to walk over to get to the Ferry Building.

Since last November, it has been home to two new temporary padel courts → <https://sfist.com/2023/09/13/sf-is-now-getting-two-padel-courts-d-own-at-embarcadero-plaza/>, and in July, the plaza was the site of a free concert/rave → <https://sfist.com/2024/07/15/another-planet-entertainment-to-thro-w-free-concert-on-sunday-in-embarcadero-plaza/> put on by Another Planet Entertainment, featuring DJs from the Dirtybird collective.

Estimates are that this new, as yet unnamed park, would be completed in about three years.

SF mayor reveals reimagined Embarcadero Plaza in new renderings

By Ryan Mense

Published Nov 5, 2024, 10:46 AM

Source: <https://www.kron4.com/news/bay-area/sf-mayor-reveals-reimagined-embarcadero-plaza-in-new-renderings/>

SAN FRANCISCO (KRON → <https://www.kron4.com/>) — San Francisco Mayor London Breed plans to introduce legislation Tuesday to approve a partnership agreement between the city, a real estate developer and a nonprofit community group to transform Embarcadero Plaza and Sue Bierman Park into a new waterfront park. Photo renderings of what the reimagined park could look like were released by the mayor's office on Monday.

"The Embarcadero is the gateway to Downtown, a place where residents, visitors, and workers should be able to experience the best of what's possible in our City," Breed said in a statement. "Transforming this Plaza into a vibrant park and gathering space will help us usher in a new era Downtown as a vibrant, 24/7 neighborhood and destination for everyone."

Possible renovations, according to the mayor's office, could include a marketplace, an entertainment space or a new children's playground. Renderings released Monday also show ideas for a fenced dog park, large art sculptures, vast grass spaces, winding walkways, food trucks and a nighttime market.

The San Francisco Recreation and Park Commission along with the Office of Economic and Workforce Development aim to secure more than \$15 million in public funding for the project. The devel-

oper, BXP, would spend \$2.5 million on the design. BXP would also work with the nonprofit Downtown SF Partnership to secure \$10 million in private funding.

“As the front door to San Francisco, Embarcadero Plaza is arguably the most underutilized public space in the greater downtown area and prime to welcome residents and visitors Downtown to experience a world-class waterfront park in a world-class city,” said Downtown SF Partnership CEO Robbie Silver. “We look forward to collaborating with the City and BXP as stewards and place-makers for the space, in addition to fundraising alongside public and private partners to make the waterfront a gathering place for future generations and ensure Downtown remains center stage as the city’s economic engine.”

Subject: Page & Turnbull Report on Vaillancourt Fountain at Embarcadero Plaza

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Ms. Goodwin,

Good morning. Just read the [San Francisco Chronicle](#) about the fencing being erected around the Vaillancourt Fountain. The article mentions a 122-page report by Page and Turnbull that assesses the condition of the fountain; I've been searching the SF Rec and Parks website and have not been able to find a link to the report. Would you please send a link or an electronic copy of the report?

Many thanks for your assistance.

Sincerely,

Nord Wennerstrom

Subject: Vaillancourt Fountain report and newly documented risks

Hi Sam,

Here's a dropbox link to the [embargoed report](#). Let me know if you can't access it. I understand it's scheduled to go live on the website at 4 a.m. Monday. As agreed, please hold off on outreach to the artist or other constituents until Sunday afternoon. You're welcome to contact the Arts Commission—they've already received the report.

We've been reviewing a series of technical reports as part of early planning for the Embarcadero Plaza and Sue Bierman Park Renovation Project, and this one, which just came

in, is extremely concerning because the findings point to a clear and immediate public safety risk at the Vaillancourt Fountain. The piece was designed to be interactive. People were encouraged to walk through it and engage with the sculpture. That's clearly no longer safe. The structure is unstable, hazardous materials are present, and we cannot allow public access to a space that now poses multiple safety risks.

As a precaution, we'll be installing protective fencing around the entire fountain starting Monday morning. There's already a 72-inch barrier behind the fountain; this new addition will include a 42-inch ClearVu fence in front—low-profile but effective at preventing climbing or close contact, without obstructing views. A rendering is attached.

This report, prepared by Page & Turnbull, with structural analysis by DCI Engineers and hazardous materials testing by North Tower Environmental, is the most thorough assessment of the fountain to date. The bottom line is that the fountain is no longer safe to approach or interact with.

Here are some key findings in the report: (see *Conclusions*, p. 31 of the PDF):

1. The structure is failing and dangerous.

- The fountain doesn't meet modern seismic safety standards and could fail in a major earthquake.
- Parts of the structure are cracked, corroded, or missing, including a key support rod in one arm.
- It sits on unstable Bay Mud and unconsolidated fill—high-risk conditions during seismic events.

2. The infrastructure is nonfunctional.

- All pumps and motors have failed.
- The underground vault floods, violates OSHA standards, and is no longer safe for staff.
- Electrical and lighting systems are beyond repair.
- Waterproofing has failed, allowing ongoing structural damage.

3. Hazardous materials are confirmed and presumed.

- Lead and asbestos are present in multiple areas.
- Asbestos is also presumed in structural joints and the original waterproofing membrane, based on 1960s–70s construction methods.
- Any repair would require full abatement and specialized safety protocols.

4. Full restoration would require massive investment.

- Report doesn't give a dollar amount but our structural maintenance yard estimated the cost of just replacing the systems to be \$10 million. With the structural work needed and the removal of the hazardous materials, it could easily be \$12-17 million.
- As you recall, the fountain has required roughly \$100,000/year in maintenance.

Here's a quote from me if you need one

“The fountain isn’t just falling apart—it’s hazardous. The structure is cracked, corroded, and missing key supports. Add lead and asbestos to the mix, and it’s a serious safety risk. That’s why we’re fencing it off now, to protect the public while longer term decisions are made.”

What's Next?

- This latest development doesn’t change the pace or scope of the Embarcadero Plaza and Sue Bierman Park Renovation Project. That effort is moving forward as planned. This is simply a necessary safety step in response to a newly documented risk.
- The Vaillancourt Fountain is part of San Francisco’s Civic Art Collection. Any proposals or recommendation for consideration of removal of works in the Civic Art Collection from City property would be required to go through a formal public process led by the San Francisco Arts Commission (Charter Sec. 5.103.). This would include a presentation at a future Visual Arts Committee and Full Commission meeting, which will include an opportunity for the public to provide comments.

Subject: RE: [EXT] RE: SFGATE story: Future of Vaillancourt Fountain

Thanks, Coma.

Amanda, this covers most of what you asked me in a separate email, but wanted to make sure your additional questions were answered:

On what led to the decision: We've been reviewing a series of routine technical reports as part of early planning for the Embarcadero Plaza and Sue Bierman Park Renovation Project. This one, which came in last week, raised immediate concerns about public safety.

Why install a fence – did you consider any other methods? We wanted to preserve views of the fountain while preventing climbing or close contact. There's already a 72-inch barrier behind the fountain; this new addition is a 42-inch ClearVu fence in front—low-profile and clear for viewing, but still deters people from interacting with the piece.

What would be the cost to fully renovate the fountain?

We estimate \$12-17 million.

Is it possible it could be preserved?

Report says it could be possible—it would just be a very expensive and hazardous endeavor.

Hi Amanda,

An independent structural report about the fountain was just released, which you can find [here](#)

Given the findings presented in the structural report, public safety comes first. The Arts Commission supports Rec and Parks' decision to secure the area as they work to complete planning and design work for the plaza.

Here's a statement from Rec and Park:

The Vaillancourt Fountain was designed for people to interact with it. This report made it clear that is no longer safe. Parts of the structure are cracked, corroded, or missing,

including a key support rod in one arm. It also contains lead and asbestos. As a result, we are fencing it off. People will still be able to view the piece, but not walk through it. This step is strictly about ensuring public safety. It doesn't impact the timeline or scope of the broader Embarcadero Plaza and Sue Bierman Park Renovation Project. Any long-term decisions regarding the future of the fountain will follow the public process established by the Arts Commission, including review by the Visual Arts Committee and opportunities for community input.

Looping in REC communications for any further input/questions about the installation of the fence and to help answer your questions.

Hi Alyssa and Coma,

Thank you so much for getting back to me on this. I hope you had a nice weekend!

I wanted to reach out again because I'm looking into a follow-up on this story and the news that city officials have fenced off the fountain for safety reasons. Some questions below:

Can you tell me more about what led to that decision, and why it's happening now?

What are some of the safety concerns?

Why install a fence – did you consider any other methods?

What would be the cost to fully renovate the fountain?

Is it possible it could be preserved?

What's next for the future of the fountain? How long will it be fenced off? When will any final decisions be made about its fate?

Additionally, if you're able to share the report from Page & Turnbull, that would be super helpful. Thanks for your time and consideration!

Best,

Amanda

Subject: [EXT] RE: SFGATE story: Future of Vaillancourt Fountain

Hi Amanda,

Yes, San Francisco Arts Commission staff met with the artist on Tuesday and engaged in conversation about the fountain. We thank the artist and his representatives for meeting with staff and for the opportunity to hear the artists' thoughts in person.

As part of the Civic Arts Collection, the sculpture falls under the jurisdiction of the Arts Commission. However, Rec and Park has historically maintained the mechanical aspects of the fountain and its pumps. It required near-daily maintenance due to its aging infrastructure and frequent vandalism. Their crews regularly handled graffiti removal, pump repairs, debris clearing, electrical issues, and water quality management. The system had persistent leaks and drainage failures that made upkeep

especially complex and labor-intensive.

The fountain has now been fully inoperable since May of 2024 when its last operational pump failed. It was installed in 1971 and its system's mechanical and electrical infrastructure is obsolete. It would require a complete restoration.

The San Francisco Recreation and Park Department (REC) is leading this public-private partnership to redesign Embarcadero Plaza and Sue Bierman Park. Further details about the project can be found here: <https://sfrecpark.org/1819/Embarcadero-Plaza-and-Sue-Bierman-Park-R>.

The project is currently in the planning and design phase. REC plans to hold a second community meeting that will be scheduled for later this summer, which members of the public are invited to attend to learn more and share their feedback. A date for that meeting has not yet been set.

Best,
Alyssa

Subject: SFGATE story: Future of Vaillancourt Fountain

Good afternoon Coma,

I hope you're having a nice week so far. I'm reaching out because I'm looking into a story about the future of the Vaillancourt Fountain at Embarcadero Plaza after reading about how artist Armand Vaillancourt flew down to SF to ask city officials to preserve it within new park renovation plans after not seeing it included in renderings. I wondered if you could confirm whether you have planned/are planning to meet with him to discuss further and if so, what he had to say about the sculpture and what else you talked about?

What are the costs to maintain the sculpture, and what challenges does it face?

What would take its place if it were to be replaced? Where does the future lie for the sculpture itself?

Any other information you can provide would be greatly appreciated.

Thanks so much!

Amanda

Subject: [EXT] RE: Vaillancourt closure

Hi Ida! Congrats on the SFGate job.

Yes, crews are extending the fencing around the fountain this morning. The background in this is we've been reviewing a series of technical reports as part of early planning for the Embarcadero Plaza and Sue Bierman Park Renovation Project. After this one came in last week it was clear immediately that we had to fence it for public safety reasons.

The piece was designed to be interactive. People were encouraged to walk through it and engage with the sculpture. That's clearly no longer safe. The structure is unstable and hazardous materials are present. People will still be able to view the fountain, but not interact with it.

This step is solely about safety and does **not** affect the timeline or scope of the renovation project, which continues as planned.

Any longer-term decisions regarding the fountain will go through the public process outlined by the Arts Commission, including review by the Visual Arts Committee and opportunities for public comment.

Subject: [EXT] Vaillancourt Fountain report and newly documented risks

Hi Sam,

Here's a dropbox link to the [embargoed report](#). Let me know if you can't access it. I understand it's scheduled to go live on the website at 4 a.m. Monday. As agreed, please hold off on outreach to the artist or other constituents until Sunday afternoon. You're welcome to contact the Arts Commission—they've already received the report.

We've been reviewing a series of technical reports as part of early planning for the Embarcadero Plaza and Sue Bierman Park Renovation Project, and this one, which just came in, is extremely concerning because the findings point to a clear and immediate public safety risk at the Vaillancourt Fountain. The piece was designed to be interactive. People were encouraged to walk through it and engage with the sculpture. That's clearly no longer safe. The structure is unstable, hazardous materials are present, and we cannot allow public access to a space that now poses multiple safety risks.

As a precaution, we'll be installing protective fencing around the entire fountain starting Monday morning. There's already a 72-inch barrier behind the fountain; this new addition will

include a 42-inch ClearVu fence in front—low-profile but effective at preventing climbing or close contact, without obstructing views. A rendering is attached.

This report, prepared by Page & Turnbull, with structural analysis by DCI Engineers and hazardous materials testing by North Tower Environmental, is the most thorough assessment of the fountain to date. The bottom line is that the fountain is no longer safe to approach or interact with.

Here are some key findings in the report: (see *Conclusions*, p. 31 of the PDF):

1. The structure is failing and dangerous.

- The fountain doesn't meet modern seismic safety standards and could fail in a major earthquake.
- Parts of the structure are cracked, corroded, or missing, including a key support rod in one arm.
- It sits on unstable Bay Mud and unconsolidated fill—high-risk conditions during seismic events.

2. The infrastructure is nonfunctional.

- All pumps and motors have failed.
- The underground vault floods, violates OSHA standards, and is no longer safe for staff.
- Electrical and lighting systems are beyond repair.
- Waterproofing has failed, allowing ongoing structural damage.

3. Hazardous materials are confirmed and presumed.

- Lead and asbestos are present in multiple areas.
- Asbestos is also presumed in structural joints and the original waterproofing membrane, based on 1960s–70s construction methods.
- Any repair would require full abatement and specialized safety protocols.

4. Full restoration would require massive investment.

- Report doesn't give a dollar amount but our structural maintenance yard estimated the cost of just replacing the systems to be \$10 million. With the structural work needed and the removal of the hazardous materials, it could easily be \$12-17 million.
- As you recall, the fountain has required roughly \$100,000/year in maintenance.

Here's a quote from me if you need one

"The fountain isn't just falling apart—it's hazardous. The structure is cracked, corroded, and missing key supports. Add lead and asbestos to the mix, and it's a serious safety risk. That's why we're fencing it off now, to protect the public while longer term decisions are made."

What's Next?

- This latest development doesn't change the pace or scope of the Embarcadero Plaza

and Sue Bierman Park Renovation Project. That effort is moving forward as planned. This is simply a necessary safety step in response to a newly documented risk.

- The Vaillancourt Fountain is part of San Francisco's Civic Art Collection. Any proposals or recommendation for consideration of removal of works in the Civic Art Collection from City property would be required to go through a formal public process led by the San Francisco Arts Commission (Charter Sec. 5.103.). This would include a presentation at a future Visual Arts Committee and Full Commission meeting, which will include an opportunity for the public to provide comments.

Subject: Fence imagery

Hi Eoanna,

Sharing the attached documents for the fence design.

The fence around the back will be 6ft tall ClearVu fence (similar to the attached image) and could get installed this month.

The 42" fence around the front of the fountain has material delays and will not be available for installation until mid-Summer.

Thanks,

Cort

Subject: heads up on Chronicle story publishing Monday

Hi Aaron and Kate,

I wanted to give you both a quick heads-up that the *San Francisco Chronicle* will be publishing a story early Monday morning regarding the Vaillancourt Fountain.

The story (which the Chronicle is embargo-ing until Monday morning to coincide with safety fencing going up around the fountain is this:

Rec and Park has been reviewing several technical reports as part of early planning for the renovation, and one of the most recent—prepared by Page & Turnbull with structural input from DCI Engineers and hazardous materials testing by North Tower Environmental—raises serious public safety concerns about the fountain.

Key findings include:

- The fountain is structurally compromised and doesn't meet current seismic standards.
- Critical elements, including a key support rod, are missing or corroded.
- It contains lead and asbestos, with full abatement required for any repair.
- Its infrastructure is nonfunctional (failed pumps, lighting, and flooding of the vault).
- A full restoration would likely cost \$12–17 million.

As a precautionary measure, Rec and Park will be installing a low-profile but effective ClearVu fence around the fountain beginning Monday morning. This step is solely about safety and does **not** affect the timeline or scope of the renovation project, which continues as planned.

Any longer-term decisions regarding the fountain will go through the public process outlined by the Arts Commission, including review by the Visual Arts Committee and opportunities for public comment.

Happy to share more details or answer any questions, but mostly just wanted you to be aware before the story before it's published. Arts Commission was contacted for comment and gave a "safety comes first" statement.

External Email

Hi Hannah,

You can find the report [here](#).

Here's a statement:

The Vaillancourt Fountain was designed for people to interact with it. This report made it clear that is no longer safe. Parts of the structure are cracked, corroded, or missing, including a key support rod in one arm. It also contains lead and asbestos. As a result, we are fencing it off. People will still be able to view the piece, but not walk through it. This step is strictly about ensuring public safety. It doesn't impact the timeline or scope of the broader Embarcadero Plaza and Sue Bierman Park Renovation Project. Any long-term decisions regarding the future of the fountain will follow the public process established by the Arts Commission, including review by the Visual Arts Committee and opportunities for community input.

Hi SF Rec and Park Department,

Do you have a statement about the public safety risk posed by the Vaillancourt Fountain on Embarcadero Plaza? And the fact that it will be fenced off indefinitely?

Where can I find your report about its condition?

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hello, this is Sergio Alexander, Assignment Editor, from KRON4 in San Francisco.

I was looking for information regarding the possible closure of the Vaillancourt Fountain on Embarcadero Plaza. I saw on another outlet that the fountain was supposed to be fenced off today due to safety concerns. Can you confirm this? Can you give me the reasons why it may have been deemed unsafe?

Thank you for your help in advance.

Hi Sam,

Regarding the placement of a fence around the Embarcadero Fountain, given the findings presented in the structural report, public safety comes first. The Arts Commission supports Rec and Parks' decision to secure the area as they work to complete planning and design work for the plaza.

Thanks,

Hi Coma: I working on a story about the order by Rec and Park to completely fence off the Vaillancourt Fountain while it awaits a final decision.

I'm hoping you can get me a quote on behalf of the Arts Commission regarding this decision. It comes as a result of a 122-page report by Page & Turnbull. The story is being embargoed at the request of Rec and Park but I have to have it ready to go when the embargo is lifted and will need a response from the Arts Commission today or Thursday.

Thanks.

RE: Proposal for Vaillancourt Fountain – Historic Preservation Consultation [P24146A]
As-Needed Agreement Peoplesoft ID# 1000033364

Dear Kerstin and Eoanna,

Thank you for requesting a proposal from **Page & Turnbull** for Historic Preservation services related to the history, significance, documentation and design alternatives for the Vaillancourt Fountain, located San Francisco's Embarcadero Plaza. We are excited about the possibility of working with you on this important piece of public art.

The fountain, which was designed by Canadian sculptor Armand Vaillancourt, was installed in Embarcadero Plaza in 1971 and was accessioned by the San Francisco Arts Commission. The fountain is owned by the San Francisco Arts Commission Civic Art Collection.

The 2016 Better Market Street EIR found that Embarcadero Plaza, including Vaillancourt Fountain, contributes to a California Register-eligible Market Street Cultural Landscape District. It appears, however, that the fountain itself has not been evaluated for individual significance or integrity. In order to identify character-defining features and determine the best path forward, we recommend that the fountain be evaluated for individual eligibility for listing in the California Register as part of this study.

This proposal shall serve as a memorandum of our agreement to initiate historic preservation services for the scope and professional compensation described below. The continuation of this letter is in the form of our standard Letter of Agreement.

The following attachments are included in this proposal:

- Exhibit A – Scope of Services
- Exhibit B – Compensation and Fees

Imagining change in historic environments through
design, research, and technology

This work would be a sub-task of our existing As-Needed contract with the City and County of San Francisco Recreation and Park Department ("RPD", Peoplesoft ID# 1000033364), dated June 10, 2024. The Terms and Conditions of the As-Needed contract will apply.

If you have any questions regarding this proposal, please contact me, or Elisa Skaggs via e-mail at skaggs@page-turnbull.com or by phone at (415) 593-3224.

Sincerely,

Carolyn Kiernat, AIA, Principal
California Architect License No. 28638
kiernat@page-turnbull.com
cell: 415-931-2128

EXHIBIT A – SCOPE OF SERVICES

Task 0: Historic Research + Historic Resources Review (HRR) Report

Prior to initiating the conditions assessment and preservation alternatives study, we recommend that a Historic Resources Review Report (or similar historic evaluation) be prepared to determine the basis of significance and the character-defining features of the Vaillancourt Fountain. The research required for the HRR would be required to inform other aspects of the scope requested by RPD, but the additional value of an HRR is that it would provide clarity on the historic status of the fountain as an individual object. Furthermore, the HRR would be a single report with concise and collated information about existing status, historic background, construction chronology, and character-defining features for the project team's reference.

- Historic Resources Review (HRR) Report: To prepare the San Francisco Historic Resources Review (HRR) application, Page & Turnbull will conduct a site visit and photograph the fountain, plaza, and adjacent properties, and conduct archival research. The report will include current photographs of the fountain, plaza, and adjacent properties on the block, a list of alterations, and an evaluation of the fountain as an individual object for listing in the California Register. This task includes internal review of the draft report prior to completion.

Note: As part of our previous study for the San Francisco Redevelopment Public Artwork Inventory (2024) project for SFAC, we exhausted research avenues at the San Francisco Public Library and at the Redevelopment Agency archives held at OCII. The main additional research avenue would likely be RPD files and archives, and additional historic newspaper research. Page & Turnbull would also contact the Architectural Archives at University of Pennsylvania, which holds Lawrence Halprin's collection; as the landscape architect of the Embarcadero Plaza, there may be additional drawings or materials related to the fountain in the collection. Page & Turnbull would also request any building permits and records of maintenance or alteration on file at DBI, RPD, and SFAC.

- Significance Diagrams: We recommend that Significance Diagrams be prepared as part of the HRR to graphically identify the character-defining features of the fountain and surrounding features, as well as any alterations.

Task 1: As-Built Drawings – Laser Scanning

- Laser Scan and Revit Model: Page & Turnbull will sub-contract Locus Laser Scanning to scan the fountain and its immediate surroundings and to prepare a 3D Revit model of the sculpture. The laser scan will create accurate existing base drawings to support future documentation, decision-making and planning.

- Page & Turnbull will peer review (QA/QC) the Revit model so it is ready to use as a base model for future studies.
 - Deliverables: Revit model on base sheets

Task 2: Conditions Assessment and Documentation

- Conditions Assessment: Using the accurate Revit model as a base, Page & Turnbull will conduct a detailed visual conditions assessment of the Vaillancourt Fountain. Representative areas of the fountain accessible from the ground will also receive hands-on assessment. The conditions of the fountain will be documented with digital photographs and field notes on the drawings, and the findings will be described in an illustrated narrative report.
 - Deliverables: drawings, photos and written report
- Ground-Penetrating Radar (GPR): Page & Turnbull will engage a qualified testing agency to perform non-destructive testing to identify where the reinforcing and connections typically are within the structure. The GPR scan would focus on representative sections to get a better picture of the fountain's construction / assembly to inform the disassembly plan.
 - Deliverables: Scan and report of findings as an appendix to the Conditions Assessment Report.
- Hazardous Materials Testing: Page & Turnbull will engage a qualified environmental testing consultant to conduct sampling and testing for asbestos in the concrete, asbestos in waterproofing membranes, lead containing/based coatings, and PCBs in caulking materials.
 - Deliverables: Haz Mat report as an appendix to the Conditions Assessment Report.

Task 3: Disassembly Plan

- Using information gained from both the Laser Scan and the Ground-Penetrating Radar scan, Page & Turnbull will determine to the best of our ability how the fountain was assembled and prepare a plan for disassembly. The plan for disassembly will include narrative instructions for cataloging and labeling sections of the fountain to indicate their position and orientation in its original condition, as well as recommendations for protection, and limitations on the means and methods to mitigate risks to the fountain during disassembly. This plan may be conducted in tandem with the Storage plan, as space constraints may impact the approach to disassembly, such as the maximum size for the disassembled sections.
 - Deliverables: Plans, diagrams, and written report

Task 4: Storage Plan

- If it is determined that the fountain will be disassembled and placed into either temporary or long-term storage, Page & Turnbull will develop a comprehensive storage plan, including considerations for custom crate fabrication and environmental requirements to ensure the fountain's protection. Page & Turnbull will work with RPD and agency stakeholders to identify appropriate and feasible storage locations for the fountain.
 - Deliverables: Storage specifications, crate specifications, and written report.
Note: full crate shop drawings and transportation plan will not be prepared at this time. These documents would be prepared under separate contract by a specialized art relocation contractor.

Task 5: Integration into Plaza Art Installations

- Page & Turnbull will work with RPD to develop design options for the fountain's retention and integration into the renovated plaza/park.
- Page & Turnbull will also work with RPD to explore and recommend opportunities to incorporate elements of the fountain into the plaza's new art installations or design features. This work will take place under the direction of RPD and in collaboration with the Embarcadero Park design team.
- Deliverables: determined as needed
- Fee for Task 5 will be T&M up to approved not-to-exceed limit.

Task 6: Preservation Consultation

- Page & Turnbull will provide Historic Preservation Consultation services to Rec and Park and to the Embarcadero Park design team, including advice regarding conservation and reuse, partial reuse, and future interpretation.
- We will attend public meetings as needed and meet with design team and city staff to discuss and prepare for public engagement.
- Fee for Task 6 will be T&M up to approved not-to-exceed limit.

Assumptions and Exclusions

The following services are excluded but may be provided as an additional service if requested by the Client:

- Attendance at additional meetings or community hearings not identified above. These additional services may be provided on a time and material basis if requested by the Client
- Preparation of graphic presentations for public meetings and hearing.
- Preparation of CEQA/Environmental review and impacts analysis documents.
- Preparation of design documents, construction documents or project specifications.

- Future recommended services: Interpretive display and Historic American Buildings Survey / Historic American Landscapes Survey (HABS /HALS) documentation.

Professional Staff

All professional staff working on this Project meet or exceed the Secretary of the Interior's Professional Qualification Standards for Historic Architecture, Architectural History, History, or Archaeology. Primary staff assigned to this project include:

- Carolyn Kiernat, AIA, Principal in Charge
- Elisa Skaggs, AIA, Project Manager, Entitlements and Community Engagement
- Sarah E. Brummett, AIA, Technical Lead for Documentation and Disassembly
- Hannah Simonson, Cultural Resources Planner, Research and Historic Resource Report

Additional staff may be assigned if needed.

EXHIBIT B – COMPENSATION AND FEES

Compensation for Page & Turnbull to perform the Scope of Services described in Exhibit A will be billed on a percentage of completion basis (except as noted below), plus reimbursable expenses, according to the following:

Task 0: Historic Research + Historic Resource Report.....	\$5,000.00
+ Significance Diagrams.....	\$3,500.00
Task 1: Laser Scan / As-Built Drawings	\$6,150.00
Locus Laser Scanning	\$3,150.00
Page & Turnbull	\$3,000.00
Task 2: Conditions Assessment + Documentation	\$22,180.00
Hazardous Materials Assessment	\$5,250.00
AME Ground Penetrating Radar + report:	\$1,930.00
Page & Turnbull:	\$15,000.00
Task 3: Disassembly Plan	\$8,500.00
Task 4: Storage + Crating Plan	\$12,500.00
Task 5: Integration into Plaza Art Installation (Pres. Alternatives)	\$20,000.00 (T&M)
Task 6: Preservation Consultation	\$20,000.00 (T&M)

Total \$97,830.00

Reimbursable expenses are in addition to the professional fee and are not expected to exceed **\$2,500.00**.

Additional Services

Additional services not described in Exhibit A will be authorized by Client in advance of performance by Page & Turnbull and will be billed on a time and materials basis in accordance with the attached Professional Fee Schedule.

Preliminary Schedule

Our anticipated schedule:

- Milestone Dates:
 - February 2025: Public Meeting
 - June 2025: Anticipated completion of CEQA / Environmental Review
- Laser Scanning: 2 week duration for scanning + Revit model preparation

Outlook-for EMAIL .png

Hi Eoanna,

I have reviewed the report by Applied Materials & Engineering. We are unable to perform a structural analysis with this limited information. As such, we are unable to form an opinion on the potential seismic performance of the Vaillancourt Fountain during a severe earthquake.

From the photos in the report, there appears to be some cracking and spalling of concrete and corrosion of steel reinforcement and anchor plates.

Subject: FW: Vaillancourt Fountain - draft deliverable schedule

Hi Ray,

I messaged you a moment ago on Teams. I am working on a renovation at Embarcadero Plaza <<https://sfrecpark.org/1819/Embarcadero-Plaza-and-Sue-Bierman-Park-R>> which includes Vaillancourt Fountain. We have hired Page & Turnbull, a historical consultant, to do a historic resource report and with it, they provided a ground penetrating radar test on the fountain, see attached. Would you be able to provide a structural analysis of the fountain and/or peer review of the attached report? Basically, want to know if this fountain can withstand the next earthquake? How safe is this thing as folks are walking around and on it?

Best,

Eoanna

Subject: RE: Vaillancourt Fountain - draft deliverable schedule

Hi All,

Did the hazmat group send a schedule for when they may have any results and reports from last Friday's testing? Can you send an updated schedule on the tasks now that we have some additional information?

Best,

Eoanna

Hi Eoanna,

North Tower says that it depends on the visual inspection, but they typically take 3 samples of each individual type of material (concrete, plaster, coatings, membranes, mastics, etc.).

Hi Eoanna,

Locus Laser can scan the fountain on Wednesday or Friday starting at 8am. Do you have a preference? Please confirm that those times work for you, understanding that Locus will need access to the vault.

Subject: Re: Vaillancourt Fountain - draft deliverable schedule

Hi Eoanna,

We'll need to check in with our laser scanner and confirm his availability. I'll try to find out more tomorrow.

Carolyn

Fabulous. Are you still on track to laser scan this week? Are you able to laser scan the vault? If so, let me know so I can coordinate access.

Thanks, Eoanna. That's great news!

We'll get this staffed and started on our end.

Hi Eoanna, all:

A couple quick questions:

1. We have a staff historian who is available to get started on the HRR, and we'd like to know if we have your authorization to proceed.
2. Do we have your ok to get our consultants under contract? We have laser scanning, haz mat, and ground penetrating radar consultants who are ready to get under contract and schedule their work.

Thank you,

Carolyn

Subject: Vaillancourt Fountain - draft deliverable schedule

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi Eoanna, Kerstin and Rick:

Thanks for the call today. We're excited to get things started on our end!

For starters, here is a draft schedule for our deliverables. We'd be happy to adjust these dates as needed to fit the overall project schedule.

Draft Milestone Schedule

1. Task 0: Historic Research + Historic Resource Report:
Duration: 4 weeks

1. February 24: Bullet point findings prior to public meeting scheduled for February 26
2. February 28: Draft HRR to client

1. Task 1: Locus Laser Scan / As-Built Drawings: 2 weeks
completed
and sheets to P&T
1. Week of February 3 or Week of February 10: Scan to be
2. Week of February 24: Locus to send draft Revit file

1. Task 1: Page & Turnbull As-Built Revit Sheets: 2 weeks
1. Week of March 10: P&T to issue accurate backgrounds for Conditions Assessment and Significance Diagrams
2. Week of March 24 Significance Diagrams (Task 0) complete 2 weeks after completion of Revit drawings

1. Task 2: Conditions Assessment + Documentation:
approximately 4 weeks

1. Hazardous Materials Assessment (awaiting schedule from testing agency)
2. AME Ground Penetrating Radar + report (awaiting schedule from testing agency)
3. Page & Turnbull conditions assessment and summary recommendations

1. Week of April 14: Final report deliverable including

history + significance, significance diagrams, conditions assessment, and summary treatment recommendations.

1. Task 6: Preservation Consultation: \$20,000.00 (T&M)

1. As needed through June 2025

Requests: Do you have any of the following documents at RPD?

1. Historic drawings, photos, written records that RPD has on file related to the fountain and/or plaza
2. Maintenance or planning/environmental compliance reports
3. Permission to reach out to SF Arts Commission and SF Planning for any records that they have on file. (We don't think they have anything that we don't already have, but we'd like to double check). Arts Commission may have some maintenance records that could also be useful to the team.

Question:

1. Would you like the laser scan to include any other features, such as the pump room or electrical room? We were anticipating that just the sculpture and fountain / pool area would be scanned, but we'd like to confirm expectations.

Thanks again,

Carolyn

Subject: Notification of Hazardous Materials Testing at Vaillancourt Fountain

To: Chou, Mary (ART) </o=ExchangeLabs/ou=Exchange Administrative Group
(FYDIBOHF23SPDLT)/cn=Recipients/cn=f65ae555b8464c56bea6b5702eee954c-mary.chou@sfgov.org>

Hi Mary,

My name is Eoanna Goodwin, and I am a Project Manager with the San Francisco Recreation & Park Department, working on the Embarcadero Plaza and Sue Bierman Park Renovation.

I wanted to inform you that we are planning to collect quarter-sized material samples from the Vaillancourt Fountain this Friday, February 14, for hazardous materials testing. The number of samples will depend on the visual inspection, but typically, three samples are taken from each distinct material type (concrete, plaster, coatings, membranes, mastics, etc.) in inconspicuous areas to ensure the integrity of the fountain remains unaffected.

This testing is a precautionary measure to determine whether any hazardous materials are present, allowing us to incorporate appropriate planning and safety measures for the project.

Please let me know if you have any questions or require further information.

Best,

Eoanna

To: Chou, Mary (ART) </o=ExchangeLabs/ou=Exchange Administrative Group (FYDIBOHF23SPDLT)/cn=Recipients/cn=f65ae555b8464c56bea6b5702eee954c-mary.chou@sfgov.org>

This is interesting and somewhat concerning. Typically, we would be more involved in something this invasive pertaining to an artwork in the collection. (conservator oversight, etc.) Obviously, the train is moving with or without us. I would like to know more about how this work is undertaken – are they scraping material off the sculpture? Chipping out material? They mention gathering material from “inconspicuous” areas, but what does that mean? At the least, we want full documentation of what they are doing and where. I would also like to explain that they will be on the hook for repairs.

Happy to discuss on a quick call today – while my calendar is blocked, it’s mostly admin.

-Allison

Hi Allison –

This is interesting. It seems like they are already planning for this to be taken down... It seems like this testing is okay. Do we want to find out where?

Thanks,
Mary

4 **agreement with BXP Embarcadero Plaza LP (BXPE), the Downtown San Francisco**
5 **Partnership, and the Office of Economic and Workforce Development regarding**
6 **potential improvements and renovations at Embarcadero Plaza and Sue Bierman Park;**
7 **and to accept cash and in-kind grants from BXPE of approximately \$2,500,000 for**
8 **design and RPD project management services; and to accept potential additional**
9 **grants of approximately \$10,000,000 that could include cash grants from Downtown**
10 **Community Benefit District (known as the Downtown San Francisco Partnership) or in-**
11 **kind grants of construction services from BXPE, for the period starting on the**
12 **execution date of the agreement through December 2028; and authorizing the RPD to**
13 **enter into amendments or modifications to the agreement provided they do not**
14 **materially increase the obligations or liabilities of the City and are necessary to**
15 **effectuate the purposes of the Project or this Resolution.**

16
17 WHEREAS, The Recreation and Park Department (RPD) operates and maintains
18 certain real property owned by the City that is commonly referred to as Embarcadero Plaza
19 and Sue Bierman Park (collectively, the "Park"), located on the western side along the
20 Embarcadero between Washington Street and Market Street, and seeks to activate the public
21 spaces it manages for the well-being of everyone in San Francisco's diverse community; and

22 WHEREAS, The Office of Economic and Workforce Development (OEWD) strives to
23 create a thriving and resilient economy, where barriers to economic and workforce
24 opportunities are removed, and prosperity is shared equitably by all; and
25

1 WHEREAS, BXP Embarcadero Plaza LP ("BXPE") is an affiliate of the entities that own
2 certain commercial office buildings adjacent to the Park, which are commonly known as One
3 Embarcadero Center, Two Embarcadero Center, Three Embarcadero Center, and Four
4 Embarcadero Center, consisting of approximately 3.3 million square feet of commercial office
5 and retail space in the aggregate; and

6 WHEREAS, The Downtown Community Benefit District, also known as the Downtown
7 San Francisco Partnership ("DSFP"), is a nonprofit community benefit district working to
8 enhance San Francisco's Downtown Core; and

9 WHEREAS, BXPE approached OEWD and RPD with a potential Project to renovate
10 the Park and has proposed to support the Project through a cash grant of up to approximately
11 \$200,000 to fund certain project management services, and an in-kind grant of additional
12 professional design services valued at approximately \$2,300,000; and

13 WHEREAS, An initial design for the project has undergone a preliminary review by
14 RPD and is consistent with its goals and objectives to create activated public open spaces;
15 and

16 WHEREAS, The parties intend to conduct community outreach and seek
17 environmental and other reviews to develop a Concept Plan for the Project; and

18 WHEREAS, RPD will work to secure \$15 million to \$20 million of public funding for the
19 construction of the Project; and

20 WHEREAS, DSFP has offered, to attempt to raise an additional approximately
21 \$10,000,000 in third-party philanthropic donations for the Project; and

22 WHEREAS, OEWD will assist DSFP in fundraising efforts as allowed and support RPD
23 in obtaining governmental approvals; and

24 WHEREAS, The specific terms and conditions of the above grants and the partnership
25 between RPD, BXPE, DFSP, and OEWD are outlined in an Agreement, a copy of which is on

1 file with the Clerk of the Board of Supervisors in File No. 241095 and which is incorporated by
2 reference herein; and

3 WHEREAS, On October 17, 2024, the Recreation and Park Commission adopted
4 Resolution No. 2410-004 recommending that the Board of Supervisors authorize RPD to
5 accept and expend the Grants from BXPE and DSFP and to approve the Agreement; now,
6 therefore, be it

7 RESOLVED, That the Board of Supervisors authorizes the Recreation and Park
8 Department to enter into the Agreement; and, be it

9 FURTHER RESOLVED, That the Board of Supervisors authorizes RPD to accept and
10 expend the grants from BXPE valued at approximately \$2,500,000; and, be it

11 FURTHER RESOLVED, That the Board of Supervisors authorizes RPD to accept and
12 expend the grants from the Downtown Partnership valued at approximately \$10,000,000; and,
13 be it

14 FURTHER RESOLVED, That the Board of Supervisors hereby waives inclusion of
15 indirect costs in the grant budget; and, be it

16 FURTHER RESOLVED, That the Board of Supervisors authorizes the RPD General
17 Manager to enter into any modifications and amendments to the foregoing agreements
18 including to any of their exhibits, and authorizes the RPD General Manager to execute further
19 agreements related to the Grant, that the RPD General Manager determines, in consultation
20 with the City Attorney, may be in the best interests of the City and do not materially increase
21 the obligations or liabilities of the City, are necessary or advisable to effectuate the purposes
22 of the Project or this Resolution, and are in compliance with all applicable laws, including the
23 City's Charter; and, be it
24
25

1 FURTHER RESOLVED, That within thirty (30) days of the agreement being fully
2 executed by all parties, the Recreation and Park Department shall provide the final contract to
3 the Clerk of the Board for inclusion into the official file.

City and County of San Francisco

Tails Resolution

City Hall
1 Dr. Carlton B. Goodlett Place
San Francisco, CA 94102-4689

File Number: 241095

Date Passed: March 04, 2025

Resolution authorizing the Recreation and Park Department (RPD) to enter into an agreement with BXP Embarcadero Plaza LP (BXPE), the Downtown San Francisco Partnership, and the Office of Economic and Workforce Development regarding potential improvements and renovations at Embarcadero Plaza and Sue Bierman Park; and to accept cash and in-kind grants from BXPE of approximately \$2,500,000 for design and RPD project management services; and to accept potential additional grants of approximately \$10,000,000 that could include cash grants from Downtown Community Benefit District (known as the Downtown San Francisco Partnership) or in-kind grants of construction services from BXPE, for the period starting on the execution date of the agreement through December 2028; and authorizing the RPD to enter into amendments or modifications to the agreement provided they do not materially increase the obligations or liabilities of the City and are necessary to effectuate the purposes of the Project or this Resolution.

December 04, 2024 Budget and Finance Committee - RECOMMENDED

December 10, 2024 Board of Supervisors - RE-REFERRED

Ayes: 10 - Chan, Dorsey, Engardio, Mandelman, Melgar, Peskin, Preston, Ronen, Safai and Walton

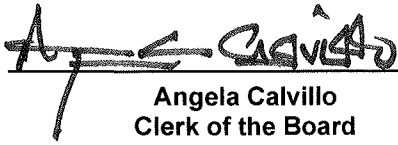

February 26, 2025 Budget and Finance Committee - RECOMMENDED

March 04, 2025 Board of Supervisors - ADOPTED

Ayes: 10 - Chan, Chen, Dorsey, Engardio, Mahmood, Mandelman, Melgar, Sauter, Sherrill and Walton
Excused: 1 - Fielder

1. Project Delivery Updates

1.1 Overview of community meeting #1

EOANNA TO ADD NOTES

1.2 Strategy for design next steps

Carve out where Bocce Courts might go in new design on North Side

Solve for desire to retain history with by preserving piece of fountain to be repurposed and placed in the park.

Create almost skateable art with a piece of the fountain pointing up and featuring lighting; look for ways to invite better behavior from skater community.

HOK to work on design for tributes to skate community to make them feel heard and respected

Need to meet with skaters sooner rather than later. Before fencing goes up around the fountain. Talk to them about how do you want to honor the history of this site. More than where do you want to skate.

Fencing going up around fountain late April. Meetings with skate community needs to happen before then

Desing needs to meet universal accessibility standards

1.3 Community Meeting #2 Preview

One focus will be circulation. Need to keep site of goal of the project which is economic revitalization which speaks to focusing on east-west transversing of the space

1.4 CEQA updates

Page and Turnbull found fountain eligible to be an individual historic resource at the national or state level. We think some of their criteria are incorrect. Also possible that the work required to keep it would significantly degrade it. Need to mitigate risk of litigation so if we are going to get sued then could be important to do an EIR and could happen during design.

Hazmat testing showed asbestos in bolts and in some of the waterproofing materials
If we are relocating it to avoid EIR we need to determine where.

2. Communications Updates

2.1 Fencing item noted above.

Thoughts placing a story before next public meeting

3. Funding Update

3.1 Public Funding Update

Good plan to invite Mayor down to see the project. We have competing projects for the bond funding.

We have good signals that the Mayor is with us on the project.

Mayor has said both Embarcadero and Powell should be able to happen

Plan is to get \$15m from downtown bucket and \$4m from RPD bucket and last \$1m from CFD and downtown.

Question is whether this can come in under \$35

3.2 Private Funding Update

Several options with fundraising consultants.

4. Next Steps: Next PGT meeting Weds Jan 22 or Weds Jan 29 at 9am at BXP Offices

[Behested Payment Waiver Embarcadero Plaza and Sue Bierman Park]

Resolution authorizing the General Manager of the Recreation and Park Department, the Director and staff of the Recreation and Park Department's Partnership Division, the Mayor, and the following staff in the Mayor's Office: Chief of Staff, Chief of Infrastructure, Assistant Chief of Infrastructure, Chief of Housing and Economic Development, Director of Public Affairs, and Policy Advisor, to solicit donations for the renovation of Embarcadero Plaza and Sue Bierman parks from individuals, nonprofits, private organizations, grantmakers, and foundations for six months from the effective date of this Resolution, notwithstanding the Behested Payment Ordinance.

WHEREAS, The Recreation and Park Department ("RPD") operates and maintains certain real property owned by the City that are commonly referred to as Embarcadero Plaza and Sue Bierman Park (collectively, the "Park"), located on the western side along the Embarcadero between Washington Street and Market Street, and seeks to activate the public spaces it manages for the well-being of everyone in San Francisco's diverse community; and

WHEREAS, The Office of Economic and Workforce Development ("OEWD") strives to create a thriving and resilient economy, where barriers to economic and workforce opportunities are removed, and prosperity is shared equitably by all; and

WHEREAS, BXP Embarcadero Plaza LP ("BXPE") is an affiliate of the entities that own certain commercial office buildings adjacent to the Park, which are commonly known as One Embarcadero Center, Two Embarcadero Center, Three Embarcadero Center, and Four Embarcadero Center, consisting of approximately 3.3 million square feet of commercial office and retail space in the aggregate; and

1 WHEREAS, The Downtown Community Benefit District, also known as the Downtown
2 San Francisco Partnership ("DSFP"), is a nonprofit community benefit district working to
3 enhance San Francisco's Downtown Core; and

4 WHEREAS, RPD and OEWD intend to partner with BXPE and DSFP on a project to
5 renovate the Park that is expected to cost approximately \$32,000,000 (the "Project"), and are
6 separately seeking authorization from the Board of Supervisors to for RPD to accept cash and
7 in-kind grants of approximately \$12,500,000 for the Project (approximately \$10 million from
8 DSFP for construction, \$200,000 from BXPE to cover RPD project management, and an
9 additional \$2,300,000 from BXPE in the form of professional design services), all pursuant to
10 the terms of the agreement which is on file with the Clerk of the Board of Supervisors and
11 which is incorporated herein by reference (Board of Supervisors File No. 241095); and

12 WHEREAS, Among other things, the agreement requires BXPE and DFSP to comply
13 with disclosure requirements regarding sources of outside funding and donor financial interest
14 information as set forth in Administrative Code Section 67.29-6, ensuring a high level of
15 transparency in the funding efforts; and

16 WHEREAS, As part of the agreement DSFP will endeavor to raise approximately
17 \$10,000,000 in third-party philanthropic donations for the Project, and is likely to require
18 assistance from RPD and BXPE; and

19 WHEREAS, RPD and the Office of the Mayor partner with numerous individuals
20 nonprofit organizations, private entities, grantmakers and foundations, often through contracts
21 or permits; and

22 WHEREAS, The General Manager of RPD, the Director and staff of RPD's Partnership
23 Division, the Mayor, and the following staff in the Mayor's Office: Chief of Staff, Chief of
24 Infrastructure, Assistant Chief of Infrastructure, Chief of Housing and Economic Development,
25 Director of Public Affairs, and Policy Advisor seek a waiver of the City's Behested Payment

1 Ordinance (Campaign and Governmental Conduct Code, Section 3.600 et seq.) to the extent
2 it prohibits solicitations of financial support for the Project from persons or entities who would
3 qualify as interested parties under the Behested Payments Ordinance; and

4 WHEREAS, The parties receiving this waiver have agreed to report to the Board of
5 Supervisors donations to the City that were solicited under this waiver; such reports will
6 identify the donor, the amount of the donation, and the interested relationship the donor has
7 with the department that solicited the donation; the department or office will submit the reports
8 to the Board within 60 days of the expiration of the 6-month period authorized by this waiver;
9 now, therefore, be it

10 RESOLVED, That under Section 3.620(f) of the Campaign and Governmental Conduct
11 Code, the Board of Supervisors hereby waives application of the Behested Payment
12 Ordinance as to the General Manager of RPD, the Director and staff of RPD's Partnership
13 Division, the Mayor, and the following staff in the Mayor's Office: Chief of Staff, Chief of
14 Infrastructure, Assistant Chief of Infrastructure, Chief of Housing and Economic Development,
15 Director of Public Affairs, and Policy Advisor, for six months from the effective date of this
16 Resolution to fundraising from nonprofits, private organizations, grantmakers and foundations
17 to support the Project; and be it

18 FURTHER RESOLVED, That granting this waiver under Section 3.620(f) serves the
19 public interest by bringing private funding to a project that is critical to the economic
20 revitalization of the City; and be it

21 FURTHER RESOLVED, That granting this waiver under Section 3.620(f) does not
22 create an appearance of impropriety.

Description

Based on conversations with San Francisco Recreation and Park Department (RPD) on direction received from the San Francisco Planning Department (CPC), Page & Turnbull has prepared this Additional Service Proposal for the following work:

- Historic Resources Review (HRR) report for Embarcadero Plaza;
- Historic Resources Review (HRR) report for Sue Bierman Park;
- Structural Assessment by DCI Engineers.

These additional HRRs will be used for environmental review under the California Environmental Quality Act (CEQA). The Structural Assessment will provide additional information to be included in our overall Conditions Assessment of the Vaillancourt Fountain.

Based on the fact that Embarcadero Plaza was evaluated within the last ten years as part of the Better Market Street EIR, a streamlined approach will be utilized for the Embarcadero Plaza HRR; the HRR will include a summary of the prior evaluation findings, existing conditions photos, and a summary of alterations to the site since the prior 2016 DPR form evaluation. Sue Bierman Park has not previously been evaluated, so the HRR will have a typical scope outline.

We *imagine change* in historic and contemporary environments
to cultivate thriving, sustainable, and resilient communities.

Task 7: Embarcadero Plaza HRR

The Embarcadero Plaza HRR will cover both Embarcadero Plaza North and Embarcadero Plaza South (bocce ball court area). The HRR will include the following sub-tasks:

- **Site visit:** A site visit will be conducted to document existing conditions of Embarcadero Plaza North & South and adjacent properties
- **Limited archival research:** Research will be focused on alterations to the property since 2016, and may include San Francisco Public Library, San Francisco Department of Building Inspection (DBI), RPD files, and other online repositories.
- **HRR Report:** The HRR report will include the following sections:
 - Introduction
 - Summary of Existing Historic Status: Embarcadero Plaza was found to contribute to the NR/CR-eligible Market Street Cultural Landscape Historic District as identified in the Better Market Street EIR (2016 DPR prepared by ICF). Embarcadero Plaza was found to be individually significant under NR/CR Criterion C/3 (Architecture) but to lack sufficient integrity for listing in either the National Register of Historic Places or the California Register of Historical Resources. <https://sfplanning.org/project/better-market-street-environmental-review-process#info>
 - Current Photos
 - Embarcadero Plaza including main landscape features of entire plaza (north and south)
 - Surrounding properties
 - Timeline of alterations since construction in 1972
 - Skate Spot History: Brief summary of the use of the site by skateboarding community beginning in mid-1980s, including specific reference to built features. This will not be a comprehensive historic context for urban street skating, but will be a focused discussion. Relevant photos and articles will be cited and/or appended as relevant.
 - References
 - Appendix
 - 2016 DPR form for Embarcadero Plaza (from Better Market Street EIR)
 - Preparer Qualifications

Note: The Embarcadero Plaza HRR will not include a new historic resource evaluation; it will only include a summary of the prior finding and note whether any changes since 2016 have impacted historic integrity. Historic photos, newspaper articles, and journal articles will not be included.

Task 7 includes internal review of the draft report prior to completion, as well as one round of review by RPD and one round of review by CPC.

Figure 1. Embarcadero Plaza HRR study area indicated by yellow outline.

Task 8: Sue Bierman Park HRR

The Sue Bierman Park HRR will cover both blocks of the park, bounded by The Embarcadero, Clay, Davis, and Washington streets. The HRR will include the following sub-tasks:

- **Site visit:** A site visit will be conducted to document existing conditions of Sue Bierman Park and adjacent properties
- **Archival research:** Archival research will include all repositories as required by the HRR application, including: RPD files; permits on file at DBI; San Francisco Public Library; and other online repositories.
- **HRR Report:** The HRR report will include the following sections:
 - Introduction
 - Existing Historic Status
 - Current Photos
 - Sue Bierman Park
 - Surrounding Properties

- Summary Site History & Construction Chronology
 - Will include brief discussion of site prior to Golden Gateway Redevelopment Area, summarize the 1960s design of the site, and the 1990s alterations (freeway removal) and more recent c.2011 redesign.
- Evaluation – National Register & California Register
 - Integrity discussion and list of character-defining features, if relevant
- References
- Appendix
 - Historic maps & photos
 - Selected newspaper & journal articles
 - Preparer Qualifications

Task 8 includes internal review of the draft report prior to completion, as well as one round of review by RPD and one round of review by CPC.

Figure 2. Sue Bierman Park HRR study area indicated by yellow outline.

Task 9: Structural Assessment

The attached proposal from DCI Engineers includes the scope of work for the proposed structural assessment of the Vaillancourt Fountain. Coordination and review required by Page & Turnbull related to this scope of work will be billed to our Consultation phase. Once we receive approval of this scope of work from Rec & Park, we will execute the attached agreement.

Compensation

Compensation for Page & Turnbull to perform the Scope of Services described above will be billed on a time & materials basis, plus reimbursable expenses, according to the following:

Task 7: Embarcadero Plaza HRR	\$5,700.00
Task 8: Sue Bierman HRR	\$4,800.00
Task 9: Structural Assessment.....	\$9,000.00
▪ 5% Mark up on Consultant invoice.....	\$ 450.00

Total \$19,950.00

Reimbursable expenses are in addition to the professional fee and are not expected to exceed **\$600.00**.

Additional services and costs are subject to the exclusions and terms and conditions of the original As-Needed agreement #1000033364 dated June 10, 2024 and Purchase Order #0000905018 dated February 7, 2025.

Attachment: Structural Assessment Proposal from DCI Engineers

Professional Service Agreement

March 25, 2025

Carolyn Kiernat, FAIA
Principal
Page & Turnbull
170 Maiden Lane
5th Floor
San Francisco, California 94108

Re: Structural Engineering Professional Services Agreement
Vaillancourt Fountain - Structural Assessment
San Francisco, California

Dear Carolyn,

DCI Engineers ("DCI") is pleased to present this professional services agreement ("Agreement") to Page & Turnbull ("Client") for the **Structural Assessment** of the **Vaillancourt Fountain** ("Project") within the Embarcadero Plaza in San Francisco. Please let us know if you have questions about any aspect of this proposal agreement.

PROJECT DESCRIPTION

The Vaillancourt Fountain, located in the northern corner of Embarcadero Plaza, completed construction in 1971. The 40-foot-tall fountain is primarily constructed of reinforced, precast concrete tubes, bolted together to create the well-known crisscrossed "pipe" configuration. It is understood the fountain's modernist design was intended to compliment the two (2)-story concrete Embarcadero viaduct which ran along the San Francisco waterfront until 1989, but was demolished following the Loma Prieta earthquake.

DCI will collaborate with Page & Turnbull to evaluate the existing condition of the Vaillancourt fountain. In particular, the effort will focus on documenting any deterioration or damage that may have taken place over the years, and establishing potential performance levels for the fountain during seismic events.

SCOPE OF ENGINEERING SERVICES

DCI's proposed scope of structural engineering services is described below. Items not specifically identified in this proposal are assumed to be outside of DCI's scope. If additions or changes to the scope are desired, please inform us so that we may revise our scope and fees accordingly.

1. Coordinate with Page & Turnbull to establish the layout, framing, and design parameters for the original fountain. DCI understands that Page & Turnbull as well as other consultants such as Applied Materials Engineering (AME) have conducted previous evaluations of the fountain which will assist in identifying the layout and spacing of reinforcement within the precast concrete elements. DCI also understands that original design drawings for the fountain may be available for review.
2. Perform an independent structural observation of the fountain. The primary focus of DCI's structural observation will be to establish the existing conditions of the fountain framing and precast elements, including any deterioration or corrosion that may have taken place during the previous 54 years. Damage or deterioration of the structural elements, in particular the connections, could have a significant, detrimental impact on the performance of the fountain.
3. Develop a structural finite element model of the foundation in order to perform a detailed analysis and establish expected performance levels. The analysis will primarily be focused on the seismic resiliency of the fountain. DCI will consider for a California Building Code level seismic event (Maximum Considered Earthquake accounting for a 2,500-year return period), as well as a Service Level Earthquake with an approximate 50-year return period.
4. Generate a summary report, outlining the scope of structural work performed, reference documentation utilized as part of the analysis, and recommendations related to the potential performance of the fountain. This report will be provided as a draft to Page & Turnbull, as well as other members of the development team, prior to finalizing or distributing.
5. Participate in follow-up conversations, discussions, public presentations, or other communications related to the structural work performed and the conclusions within the report noted above. DCI has assumed this effort will include multiple internal meetings with Page & Turnbull and the property owner (BXP), as well as one (1) meeting with City officials and one (1) meeting in a public forum. If the extent of these meetings becomes extensive, DCI may need to discuss additional services.

ASSUMPTIONS AND QUALIFICATIONS OF PROPOSAL

For the purpose of this proposal DCI has made the following assumptions. If these assumptions are inaccurate in any way, please contact us so that we may determine if modifications to this proposal are required.

- A. This proposal does not include the production of any structural drawings, details, or other documentation to assist in the repair or upgrade of the fountain. If this scope of work is desired, DCI is happy to provide a separate proposal to assist with the effort.

- B. DCI anticipates the review, evaluation, and coordination of the Vaillancourt Fountain will occur over the course of approximately three (3) months. If this time period is exceeded excessively, DCI may request additional fees to accommodate the supplemental management effort.

SUMMARY OF STRUCTURAL ENGINEERING FEES

The Structural Design Review services outlined in the Scope of Services above will be provided for an hourly to maximum fee of **Nine Thousand Dollars (\$9,000)**. This fee will be invoiced monthly based on the attached DCI Schedule of Expenses and invoices will be considered past due in 30 days of the invoice date.

Unless otherwise noted, direct project reimbursable expenses are separate from our fees. They include in-house production plotting, reprographic services, courier, and travel expenses. These will be billed at 1.10 times the direct cost per the attached Schedule of Expenses.

ACCEPTANCE OF AGREEMENT

Professional services for this project shall be provided according to this Agreement and the attached Terms and Conditions. The parties agree that this Agreement and all terms and conditions shall become effective immediately upon execution of this Agreement by the Client or by the Client's communication of a direction to proceed with the services, including by electronic mail, and shall remain in effect unless and until amended or superseded by a written agreement executed by both parties.

Thank you again for the opportunity to propose these structural services for the Vaillancourt Foundation evaluation. We look forward to assisting your team on this project.

SINCERELY,

DCI Engineers

ATTACHMENTS

This Agreement is executed with the following attachments which are part of this Agreement:

General Terms and Conditions
Schedule of Expenses

GENERAL TERMS AND CONDITIONS

These General Terms and Conditions, together with the professional services agreement, constitute the "Agreement" between DCI and Client. This Agreement shall become effective immediately upon execution by Client or upon Client's written direction (including by electronic mail) to proceed with the services, and shall remain in effect unless and until amended or superseded by a written agreement executed by both parties.

STANDARD OF CARE: DCI shall perform its services consistent with the degree of skill and care ordinarily exercised by members of the same profession currently practicing in the same or similar locality under the same or similar circumstances. DCI makes no warranty with respect to its services, express or implied.

CLIENT FURNISHED INFORMATION: Client shall provide DCI with a survey describing the physical characteristics, legal limitations and utility locations for the Project site, a written legal description and geotechnical reports. DCI shall be entitled to rely on, and shall not be responsible for the accuracy, completeness or timeliness, of services and information furnished by Client and Client's consultants, contractors and agents.

FEES: The fees set forth in this Agreement are good for 90 days from the date on the first page of this Agreement to the commencement of substantial work, as reasonably determined by DCI. If Client requests any material changes to this Agreement, or if the Project's design or construction schedule is substantially delayed, DCI reserves the right to modify its fees.

PAYMENTS: Client's failure to pay any invoice within 30 days of the invoice date shall constitute a material breach of this Agreement by Client and DCI shall have the right to suspend its services, including the withholding of deliverables, without liability to the Client for any costs or damages resulting from such suspension. Amounts unpaid 30 days after the invoice date will be subject to a monthly finance charge of 1.5% on the unpaid balance or maximum rate allowed by law, whichever is less. Client shall have no right of setoff against any billings of DCI for disputed services or claims.

ADDITIONAL SERVICES: Additional Services may be provided after execution of this Agreement without invalidating the Agreement. DCI will notify Client of the need to perform Additional Services. Additional Services shall entitle DCI to compensation as agreed upon by the parties.

DELAY: DCI shall not be liable for any costs or delays resulting in whole or in part from causes beyond the control and without the fault or negligence of DCI or its subconsultants, including, without limitation, stoppages and strikes, acts of God and natural disaster, failure of a public agency to act in a timely manner, and/or acts of Client and its consultants, contractors and agents, including, without limitation, their failure to furnish information in timely fashion and/or their faulty or untimely performance.

CONTINGENCY RESERVE: Client and DCI acknowledge that changes may be required because of possible omissions, ambiguities or inconsistencies in the Project plans and specifications and that the costs of the Project as a result may exceed the construction contract sum. Client agrees to establish a reasonable design contingency reserve (no less than 5% of anticipated construction costs) to pay for any such costs. Client further agrees not to make any claim against DCI with respect to any payments made to any construction contractors within the limit of the design contingency reserve.

INDEMNIFICATION: Client shall indemnify and hold harmless (but not defend) DCI, its officers and employees, from and against any and all damages, losses and expenses (including reasonable attorney's fees) arising from claims by third parties to the extent caused by the negligence or willful misconduct of Client, its employees or anyone for whom Client may be legally responsible. For purposes of the foregoing indemnification provision only, Client waives any immunity it may have under any applicable worker's compensation laws.

LIMITATION OF LIABILITY: In recognition of the relative risks, rewards and benefits of the Project to both Client and DCI, the risks have been allocated such that Client agrees that DCI's maximum liability to Client for any and all injuries to persons or property, claims, losses, expenses, damages, legal fees or costs, and claim expenses, whether arising out of DCI's breach of this Agreement, or arising out of DCI's breach of duties owed independent of this Agreement, if any, including but not limited to breach of warranty, indemnity, negligence, strict liability, or other tort or statutory cause or causes, or otherwise related to formation of this Agreement or services rendered by DCI in connection herewith, or any amendment thereto, shall not exceed ten times DCI's fee or \$500,000, whichever is less. In the event that the foregoing is deemed unenforceable by a court or arbitrator having jurisdiction, DCI's liability shall in no event exceed any limits of liability insurance then available at the time of settlement or judgment.

CONSEQUENTIAL DAMAGES: DCI and Client waive consequential damages for claims, disputes or other matters in question arising out of or relating to this Agreement. This mutual waiver is applicable, but not limited, to lost profits, loss of capital, loss of use, or any other indirect, special or consequential damage, whether arising in contract, tort, warranty or strict liability.

INSTRUMENTS OF SERVICE: DCI's Instruments of Service (as defined in AIA Document A201™-2017) will be prepared and are intended for use solely for this Project. DCI's Instruments of Service also include any Building Information Models (BIM) or other electronic files ("Digital Media Files") prepared by DCI. DCI shall retain all rights, including ownership and copyright, to the Instruments of Service. Provided Client substantially performs all obligations under this Agreement, including prompt payment of all sums when due, DCI grants Client a non-exclusive license to use the Instruments of Service solely and exclusively for purposes of constructing, using and maintaining the Project. If Client modifies or uses DCI's Instruments of Service without retaining DCI, then Client releases DCI from and against any liability, claims or damages arising out of such use and further agrees to defend, indemnify, and hold harmless DCI from and against any liability, claims or damages arising out of such use. Except for rightful termination of this Agreement by Client, termination of this Agreement shall terminate the license granted in this section. DCI shall have the right to include photographic or artistic representations of the Project among DCI's promotional and professional materials.

DIGITAL MEDIA FILES: DCI may provide certain Digital Media Files, including DCI's BIM model, to Client upon request, but any use of the Digital Media Files by the Client shall be at Client's sole risk. DCI does not warrant the Digital Media Files in any way. Unless otherwise specified in this Agreement, only the officially-issued, stamped and signed documents are to be interpreted as correct. Client agrees to not further disseminate the Digital Media Files without DCI's prior written consent.

PROJECT SITE: DCI shall not have control over, charge of, or responsibility for construction means, methods, techniques, sequences or procedures, or for safety precautions and programs in connection with construction of the Project, nor shall DCI be responsible for any contractor's failure to construct the Project in accordance with the requirements of the construction agreement. DCI shall have no responsibility for the discovery, presence, handling, removal or disposal of, or exposure of persons to, hazardous materials or toxic substances in any form at the Project site.

MEDIATION: DCI and Client agree that as a condition precedent to any litigation, all disputes arising out of or relating to this Agreement or DCI's services shall be submitted to mediation. The cost of the mediator shall be shared equally by the parties. DCI and Client further agree to include the foregoing provision in any and all agreements with independent contractors and consultants retained for the Project.

LAW AND FORUM: This Agreement shall be governed by and construed in accordance with the laws of the State of Washington, without reference to laws regarding choice of law. Any mediation or litigation relating to this Agreement shall be brought in Seattle, WA.

CORPORATE RESPONSIBILITY: DCI's services shall not subject DCI's individual employees, officers or directors, including any engineer who affixed his or her seal to the plans for the Project, to any personal legal exposure for the risks associated with this Project. Client agrees that as Client's sole and exclusive remedy, any claim, demand or suit shall be directed and/or asserted only against DCI, a Washington state corporation, and not against any of DCI's individual employees, officers or directors.

TERMINATION: Either party may terminate this Agreement upon not less than seven (7) days' written notice should the other party fail to substantially perform in accordance with the terms of this Agreement through no fault of the party initiating the termination.

THIRD PARTIES: Nothing contained in this Agreement shall create a contractual relationship with, or a cause of action in favor of, a third party against either DCI or Client. Neither DCI nor Client shall assign this Agreement without the written consent of the other.

RIGHTS CUMULATIVE: All rights and remedies of either party under the Agreement, at law and in equity, will be cumulative and not mutually exclusive; the exercise of one right or remedy will not be deemed a waiver of any other right or remedy.

ENTIRE AGREEMENT: If any term, condition or provision of this Agreement, or the application to any circumstances is determined to be invalid or unenforceable to any extent, the remaining provisions of this Agreement shall not be affected but shall instead remain valid and fully enforceable. Neither party has relied upon any statement, estimate, forecast, projection, representation except for those expressly contained in this Agreement. This Agreement incorporates and supersedes all prior negotiations, agreements and representations.

COUNTERPARTS: This Agreement may be executed in any number of counterparts, each of which shall be deemed an original but all of which together shall constitute one complete instrument. Transmission by fax or electronic mail of an image of an executed counterpart shall have the same binding effect as the hand-delivery of a manually-signed original.

Thanks Lisa and Eric - We have a timeline for when the fence will go up? Does that mean the netting for the frame of the fencing came in? Let's coordinate signage in advance for when it goes. Happy to jump on call to coordinate.

Hi Eric,
I have no issue with the fence going in early. Couple of things though, (1) can your team photograph/document the bad behavior and (2) signage should be especially thoughtful here and I'd want to communicate it with project partners as well. Can you/Felix let us know the timeline?
Thanks,
Lisa

Hi Bev and Lisa,
See below in red.

We need to move forward with installing the fencing frame in the front of Vaillancourt. There's been a lot of illegal activity in the fountain that Phil is asking that we address. There are considerable liability concerns and it's just a bad look for us. The fencing frame will provide the best solution. Much better than police barricades and caution tape. Let me know of any further concerns. Thanks
Eric

Hey Eric,

- Cort is out today, but my understanding is the mesh in the image below is the material we are waiting for. We can clarify on Monday.
- The contractor can start the install of the metal frame in 2 weeks, the same time as they mobilize for the back fence. I confirmed this with them today. This is their preference.
- Lisa Bransten and Beverly requested Cort to hold off on the “front” fencing until the installation could be completed.

Subject: Re: Vaillancourt Signage Coordination

Hi Ryan,

Something clear and simple for the Vaillancourt signage would be best:

"Please admire our fountain from a distance only. No climbing into or entering the basin is permitted".

As Bev mentioned, construction begins tomorrow.

Thank you,

Cort

Hi Ryan, Elton, Beverly,

Wasn't sure if you have already coordinated signage for the upcoming fence installation at Vaillancourt Fountain? I understand the communication piece on this upcoming work is a priority.

Just a reminder that the contractor will begin work next Tuesday April 22nd. The fence project should be complete by June. Let me know if you need anything else from my end in the meantime.

Thank you,
Cort

Subject: RE: Vaillancourt Fountain

Yes, this is critical to understand. Let's see if we can get to it in this meeting and if not we will set up a separate meeting. Eoanna – can you do an agenda? I see us needing to discuss in no particular order:

1. Overview of applicable laws
2. Constraints and opportunities with in the laws
3. Technical evaluation of fountain – can it be moved? Can parts be kept there? Other?
4. Interplay with CEQA process – historical, mitigations etc.
5. Strategy with preservation groups

Thanks! Can we also review the process and sequencing of the different City approvals for the re-design? I'd like to also understand what design options are being considered that preserve the fountain and how the EIR may factor into design decisions. Perhaps this is a separate meeting with just Rec/Park.

Thanks,
Mary

Hi all,

Also, just FYI, we've received about seven emails so far related to the fountain calling for removal or preservation of the fountain that have been sent to Eoanna, and Supervisor Sauter's office.

A few examples attached. They all appear to be coordinated/copy and paste emails.

Thanks,

Interestingly, this same thing came up in 2004, and so did the argument for taking it down—that the piece had lost its context after the freeway came down. Cutline says it was meant to mock and mirror the freeway?

Subject: RE: Vaillancourt Fountain

Hi Sarah,

Our understanding is that the fountain was not built and placed to block or shield the plaza from the freeway. The artist has stated this publicly before.

Made some minor adjustments to the second to last paragraph. Here is the updated draft. If there are no other edits/concerns, will plan to send this over to Sam Thursday afternoon.

-

Hi Sam,

Confirming that the Embarcadero "Vaillancourt" Fountain, 1971, by Armand Vaillancourt, (<https://kiosk.sfartscommission.org/objects-1/info/1460>) is part of the Civic Art Collection of the City and County of San Francisco.

The sculptural elements of the fountain are under the care and jurisdiction of the Arts Commission.

The fountain's mechanical components and the land/plaza it is sited on, are under the jurisdiction of the Recreation and Parks Department.

The fountain has not been operable since June 2024 when the fountain's pumps and electrical systems suffered major mechanical failures and was drained to protect the sculpture.

The fountain has been a major focal point of the plaza and Embarcadero waterfront for over 50 years. In the five decades since it was installed, the City and surrounding area have grown and changed significantly.

Our downtown core and waterfront areas are vital parts of our city, and downtown revitalization is among the City's top priorities.

The Recreation and Park Department is leading this public-private partnership and working in close coordination with all of the city agencies that have roles in this project, including the Office of Economic and Workforce Development, Planning Department, and the Arts Commission, as well as our private partners.

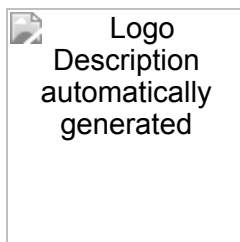

No final decisions have been made about the fountain as the Embarcadero Plaza and Sue Bierman Park Renovation Project is currently in the planning and design phase, which aims to reimagine and revitalize the plaza and create a new public space that is vibrant, open, welcoming, and accessible to all who live in and visit our city, and in turn, will support San Francisco's future and economic recovery. You can learn more about the project [here](#).

As part of REC's ongoing planning and design process to reimagine and revitalize the plaza, they are working with the community and partners to arrive at a design. A future public meeting will be scheduled for later this spring, which members of the public are invited to attend to learn more and share their feedback.

The project is expected to be reviewed by the Civic Design Review Committee, and any decisions related to works in the Civic Art Collection would need to come before the Visual Arts Committee and full Arts Commission body at a future [public meeting](#) before a final decision is made about the fountain.

The Arts Commission has not yet received a letter from the Docomomo Foundation, so we cannot comment on the contents of that letter at this time.

Thanks, Coma!

Do you think we could add a bit more to this section? The fountain has been a major focal point of the plaza and Embarcadero waterfront for over 50 years. In the five decades since it was installed, the City and surrounding area have grown and changed significantly.

My understanding is that the fountain was built and placed where it is to shield the plaza from the freeway. Is that correct? If so I think it is relevant to include.

Sarah

Subject: Vaillancourt Fountain

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi Coma: I am working on a story about a loose alliance of landscape architects and skateboarders and Lawrence Halprin preservationists who are mobilizing to save the Vaillancourt Fountain from removal or destruction as part of the planned renovation of Embarcadero Plaza.

I am writing to confirm that the fountain is part of the Civic Art Collection and to see if there are, in fact, any plans for the fountain and to get a statement from the Arts Commission regarding the fountain.

This would be in response to a letter from the Docomomo foundation mailed April 12 to the Arts Commission arguing for the preservation of the fountain.

I'm hoping you would have a statement for me by the end of the day, Thursday, regarding plans, or the absence of a plan for the fountain.

Thanks.

Hi All,

Sharing an updated installation schedule from the contractor below:

- **Tuesday April 22:** Begin installation of posts and frame for short fence in front of fountain.
- **Wednesday April 23:** Anticipated Delivery of 6ft high fence in back of fountain.
- **Early May:** Complete Fence installation.
- **Late May:** Anticipated Delivery and Installation of cable mesh inside front fence panels.

Thanks,
Cort

Hi Bev and Lisa,

See below in red.

We need to move forward with installing the fencing frame in the front of Vaillancourt.

There's been a lot of illegal activity in the fountain that Phil is asking that we address. There are considerable liability concerns and it's just a bad look for us.

The fencing frame will provide the best solution. Much better than police barricades and caution tape.

Let me know of any further concerns.

Thanks

Eric

Hey Eric,

- Cort is out today, but my understanding is the mesh in the image below is the material we are waiting for. We can

clarify on Monday.

- The contractor can start the install of the metal frame in 2 weeks, the same time as they mobilize for the back fence. I confirmed this with them today. This is their preference.
- Lisa Bransten and Beverly requested Cort to hold off on the “front” fencing until the installation could be completed.

Controversial SF fountain 'hazardous,' will be fenced off indefinitely

 sfchronicle.com/sf/article/vaillancourt-fountain-fence-safety-20363833.php

Sam Whiting

June 9, 2025

Vaillancourt Fountain is seen through the frame of a security fence being built around it Monday in San Francisco. The city ordered the giant concrete sculpture fenced off indefinitely after a new report concluded that its crumbling condition poses a public safety risk.

Lea Suzuki/S.F. Chronicle

San Francisco officials ordered Vaillancourt Fountain on Embarcadero Plaza to be fenced off indefinitely Monday morning after a new report concluded that its crumbling condition poses a public safety risk.

Construction of the fence, scheduled to begin at 7 a.m. Monday and continue throughout the week, cast new doubt on the massive artwork's future as a [major renovation of the plaza](#) gets underway.

- **Update:** [S.F. officials take first formal step to remove controversial fountain from Embarcadero Plaza](#)

- **Read more:** [S.F. fountain's 95-year-old creator returns: 'I'm here to save that piece of art'](#)
- **Chronicle survey:** [What should San Francisco do with the Vaillancourt Fountain?](#)

The blocky, 710-ton sculpture has been a lightning rod for public opinion for more than a half-century, but it was a draw for parkgoers who darted through its gushing water and for skateboarders who plied its famed stairs and ledges.

But a pump failure has left the fountain dry for the past year, and the closure seeks to prevent anyone from climbing on the interactive structure or even getting close to it.

The Ferry Building looms behind Vaillancourt Fountain, which is being fenced off Monday.
Santiago Mejia/S.F. Chronicle

It comes as a result of an independent report commissioned by the San Francisco Recreation and Park Department, which manages Embarcadero Plaza, as officials consider how to treat the fountain as part of the planned \$30 million plaza renovation.

The 122-page assessment issued last week by architecture firm Page & Turnbull found that the 55-year-old public art is corroding and deteriorating, contains toxic materials including asbestos and lead, and fails to meet seismic safety codes. Based on those findings, recreation and park staff judged the sculpture unsafe for the public to interact with and for structural maintenance workers to get inside and repair.

“The fountain isn’t just falling apart — it’s hazardous,” said park department spokesperson Tamara Aparton. “The structure is cracked, corroded and missing key supports. Add lead and asbestos to the mix, and it’s a serious safety risk. That’s why we’re fencing it off now, to protect the public while longer-term decisions are made.”

The new steel mesh security fencing will be 3½ feet tall on the Market Street side, so people can still lean over it and look at the sculpture. In the back, on the Embarcadero side, it will connect to an existing 6-foot-tall fence.

Canadian artist Armand Vaillancourt, center, visits his namesake Vaillancourt Fountain in May with wife Joanne Beaulieu and son Alexis Vaillancourt. Armand Vaillancourt traveled to San Francisco to urge city officials to keep his sculpture in place as part of the planned renovation of Embarcadero Plaza.

Lea Suzuki/S.F. Chronicle

The reinforced concrete artwork by Canadian sculptor Armand Vaillancourt, completed in 1971, is part of San Francisco’s Civic Art Collection, and any final decision about its fate will be determined by the arts commission after public hearings and possibly a vote by the Board of Supervisors.

The city is in the planning and design phase for an ambitious new park that will combine Embarcadero Plaza and the adjacent Sue Bierman Park in a space spanning 5 acres, twice the size of Union Square.

Since the release of a preliminary rendering of the park that omitted the fountain, Vaillancourt and architectural preservationists have been lobbying for it to stay put.

The report, which included structural analysis by DCI Engineers and hazardous materials testing by North Tower Environmental, did not specify the cost of bringing the fountain up to code and restoring the water element. The park department estimates the cost to fully renovate the artwork, inside and out, at \$12 million to \$17 million, with ongoing maintenance costs of \$100,000 per year.

One rendering of the conceptual proposal for a remake of Embarcadero Plaza did not include Vaillancourt Fountain.
HOK and BPX

Boosters of Brutalist architecture and other [preservationists have been lobbying](#) on the fountain's behalf, and in May, the [95-year-old Vaillancourt made a trip](#) from his home in Montreal to meet with arts commission and park department staff to plead for his sculpture's preservation.

"They made the new plan, and my monumental sculpture is not there," Vaillancourt told the Chronicle during a visit to his namesake work. "I'm here to save that piece of art."

The fountain is 40 feet tall, and Vaillancourt told the Chronicle it is anchored 40 feet down. It survived the 1989 Loma Prieta earthquake, which severely damaged the adjacent Embarcadero Freeway, forcing that structure's demolition. The sculptor argued that cleaning and repairing the fountain would return it to its original glory and keep it sound for another century. He also said the fountain is immobile, and demolishing it would cost more than it would to fix it.

But the technical report tells a different story. It states that the fountain sits on bay mud and infill and does not meet seismic safety standards. In a major earthquake, “the structure is likely to yield and deform beyond that deformation already apparent in some of the stress cracking in the concrete,” it says.

The report also states that parts of the interior support structure are corroded or missing, and asbestos-containing materials and lead-based paint were found in parts of the sculpture, including the pump room.

Mechanical and electrical systems “are beyond their serviceable life” and would need to be replaced, it says.

Children take in the view of Vaillancourt Fountain as water flows from it in 2017. The fountain has been dry for the past year because of a pump failure.

Lea Suzuki/S.F. Chronicle

Disassembling and reassembling the fountain would be “feasible,” the report says, but “require substantial effort and time” to perform. The job would be complicated by the large machinery needed to stabilize and move the concrete tubes, and the dangers to workers who would have to climb in and around the pipes to cut them — as well as the precautions needed to prevent asbestos exposure.

“Overall, Vaillancourt exhibits a range of deterioration that must be addressed for the fountain to be enjoyed safely,” the report summary reads.

“That said,” it concludes, “the fountain does not appear yet to have deteriorated beyond repair, though certain systems and components have, and there may be a variety of approaches to treatment to be explored in future phases that could stabilize and restore it.”

In the meantime, Aparton said, “the bottom line is that the fountain is no longer safe to approach or interact with.”

Arts commission spokesperson Coma Te concurred. “Given the findings presented in the structural report, public safety comes first,” he said in an email. “The Arts Commission supports Rec and Park’s decision to secure the area as they work to complete planning and design work for the plaza.”

SF's Controversial Vaillancourt Fountain Deemed 'Hazardous,' Now Getting Fenced Off to the Public

By Joe Kukura

Source: <https://sfist.com/2025/06/09/sfs-controversial-vaillancourt-fountain-deemed-hazardous-now-getting-fenced-off-to-the-public/>

The fugly but beloved-to-some Vaillancourt Fountain at Embarcadero Plaza was already on the ropes and uncertain to be kept around, but now the city is fencing it off, as a new architectural report says it's a hazard to the public.

Embarcadero Plaza's 54-year-old Vaillancourt Fountain already appeared to be on thin ice, after a proposed \$30 million renovation of the plaza → <https://sfist.com/2024/07/17/city-looks-at-total-reimagining-of-embarcadero-plaza/> released last summer did not include the fountain. There was no formal announcement that the some-would-say-appallingly-ugly → https://sfist.com/2017/08/10/appalling_embarcadero_fountain_woul/ fountain would be removed, but the fountain was not included in the recent renderings → <https://www.instagram.com/p/C9ktJFgPon3/> for that redesign, and this has set off some pushback — both from lovers of Brutalist design and from the artist Armand Vaillancourt himself to preserve the fountain → <https://sfist.com/2025/04/21/very-unattractive-embarcadero-fountain-may-be-demolished-but-its-fans-are-fighting-to-serve-it/>.

There's a new development today that does not bode well for the fountain's survival. The Chronicle reports that the Vaillancourt Fountain is being fenced off to keep people away → <https://www.sfchronicle.com/sf/article/vaillancourt-fountain-fence-safety-20363833.php>, as the city has declared the structure "hazardous." Per the Chronicle, the installation on the fences was scheduled to start at 7 am Monday morning, and will continue through the week.

Image: San Francisco Recreation and Parks Department

The Chronicle obtained the rendering seen above of what the fences will look like, and these are not the huge restrictive fences that were put up 24th Street BART station → <https://sfist.com/2022/07/25/in-first-week-end-fences-at-24th-and-mission-fail-to-deter-vending-mostly-just-block-sidewalk-acce>

ss/ back when the vending there was out of control. The Chron describes this as “steel mesh security fencing,” which is about 3.5 feet tall, and does not really limit access to the perimeter of the fountain but discourages skateboarding on the fountain's dry pool bed.

Having now gated the thing off, there is clearly an emerging rationale from the city to tear the thing down.

“The fountain isn’t just falling apart — it’s hazardous,” Rec and Parks spokesperson Tamara Aparton told the Chronicle. “The structure is cracked, corroded and missing key supports. Add lead and asbestos to the mix, and it’s a serious safety risk. That’s why we’re fencing it off now, to protect the public while longer term decisions are made.”

“The bottom line is that the fountain is no longer safe to approach or interact with,” she added.

This conclusion comes from a 122-page report from the architectural firm Page & Turnbull on the fountain’s deterioration. Water has not been flowing at the fountain → <https://www.sfgate.com/bayarea/article/san-francisco-found-junk-in-drained-fountain-19515396.php> for about a year now, after a pump failure last summer. That report also found that the structure no longer meets seismic safety codes.

The fountain’s designer, 95-year-old Armand Vaillancourt, visited SF last month → <https://sfist.com/2025/05/22/95-year-old-artist-behind-of-the-reviled-embarcadero-plaza-fountain-flies-to-sf-to-save-it/> in hopes of saving it, and claimed it would be cheaper to restore the fountain than to tear it down. But that is not the consensus opinion, as Rec and Parks estimates that restoring the fountain (tearing it down and putting it back together) would cost somewhere between \$12 million and \$17 million, plus annual maintenance fees of \$100,000 each year.

Vaillancourt also claimed that since the structure survived the 1989 Loma Prieta earthquake, it is therefore proven earthquake-safe. But the Page & Turnbull report does not agree, saying “The struc-

ture is likely to yield and deform beyond that deformation already apparent in some of the stress cracking in the concrete.”

That report does not declare that the fountain needs to be torn down. “The fountain does not appear yet to have deteriorated beyond repair,” the assessment says. “Though certain systems and components have, and there may be a variety of approaches to treatment to be explored in future phases that could stabilize and restore it.”

The decision on whether to keep or remove the fountain will ultimately be made by the SF Arts Commission. That body’s spokesperson commented to the Chronicle, but in vague terms that did not broach the topic of whether the fountain would stay or go.

“The bottom line is that the fountain is no longer safe to approach or interact with,” Arts Commission director of communications Coma Te said to the Chron. “The Arts Commission supports Rec and Park’s decision to secure the area as they work to complete planning and design work for the plaza.”

That said, this is not good news for fans of Vaillancourt Fountain. And the fact that the fountain now needs to be fenced off, however slight that fencing is, is certainly ammunition for anyone who wants to see the thing torn down.

TRANSCRIPT FROM COMMUNITY MEETING #2 ON JULY 8, 2025 FORMAL PRESENTATION

Aaron Fenton: Alright everybody, I think we're going to get started. If you could have everybody who needs to take a seat or include the conversation, but I'd appreciate it. Thank you very much. There's a couple of seats up front if anybody wants a better view. I think there were a couple seats up front we had to make some more room for. If you need a seat, we have a seat. So come on up front, we have an empty seat.

All right, great. Well thank you all for coming, uh, to our space called Codi. This is a, a temporary pop-up that we've created. Um, you know, since the pandemic, which has been a really great collaborative meeting space, uh, that the community, our tenants, and really anybody can, uh, can utilize. Uh, so thank you. My name is Aaron Fenton. Uh, I work for BXP. I run our development teams, uh, for the West Coast. Um, I introduced myself the first time around, so it's nice to see a lot of familiar faces here.

[01:29] As I mentioned in the first meeting, this is a project that was conceived, I mean, less than a year and a half ago. Uh, and, you know, we had the fortune of being able to partner, uh, with HOK architects, and uh, Park and Rec, and, uh, OEWD in the City of San Francisco to collaborate and work on and push forward what we think could be a tremendous, tremendous opportunity for the city of San Francisco, its residents, employees, the tourists.

[01:57] Basically everybody that comes to work, live, and enjoy downtown San Francisco. This is such a great piece of real estate that's highly accessible through various modes of transportation. It's got the iconic views with the Ferry Building and

the Bay Bridge. You've got all the great retail that exists here in Embarcadero Center and at the Ferry Building.

[02:16] You've got the connection all the way up through Market Street. And again, we think this is a tremendous opportunity. And it's just so nice to see so many people in the crowd here today who are engaged and willing to participate in this community process. Because this is a park for the people, right? And that's why you're all here. So with that, I'm going to turn it over to Park and Rec, uh, Eoanna Goodwin who's been the project manager, leading the way, um, on behalf of, uh, RPD, uh, to commence the presentation. Thank you.

Eoanna Goodwin: Hey everybody. Um, so great to see a full crowd. Again, like Aaron mentioned, everybody really cares about this space. Um, we're here to make it better. I think you all share that goal in mind. Um, and how we do that is what we really want to get out of this meeting, right? We want to, we want your help in shaping this beautiful space.

[03:09] Uh, we want your help giving ideas on kind of our next steps and how to move this project forward. Um, as Aaron mentioned, this is a private-public partnership. So we're working with BXP. We're also working with the Office of Economic and Workforce Development. Um, and we're also working with, uh, Prop K. So we have money from Prop K. We have money from Prop B.

[03:30] Um, within Rec and Park, there's a handful of us here. I think they're kind of in this corner. We have Lisa Bransten and Stacy Grantley, if you could wave your hands. From Park Folk, Family A and Wyatt Pritchett over there as well. Um, and so when we break up the sessions, I'll probably about to see you to warm you up. Um, so you guys kind of know who to go to and obviously come to me as well. [03:52] If you need to leave early, no problem. My business cards are up front. We'd love to connect with you directly with, um, your thoughts. I read all of your emails. I try to respond kindly. Um, and if I don't, please email me again. I'm happy to talk to you over the phone or via email and get your thoughts and concerns, ideas, so on and so forth.

[04:17] Uh, so the agenda for tonight, just did a welcome check. Uh, we're going to go through some of the survey findings. So this is our second community meeting. Our last one was at the beginning of March. Uh, afterwards there was a survey open for

about three weeks, an initial survey and then we also had input through a handful of different community engagement, um, methods.

[04:38] So we were talking to different stakeholder groups and, uh, we also had a paper survey here at the last community meeting and then we also had community engagement boards. So we're kind of taking all that feedback and this was our survey recap. Um, and a site assessment. So from the last community meeting to some new findings we've had, so wanted to do a report back with everyone. Um, and then finally go into the park program. So taking all the input we had and using that for how we're shaping, uh, the next steps in the design process.

[05:10] Then we'll break out into a community engagement activity followed by Q&A. Um, I'm asking for two big things. One is hold off questions until the end. Hopefully we'll be able to get through all of your questions and answer them either here or at the community engagement boards. We'll do a report back from what we heard at those boards here, just to relay back what we heard.

[05:32] And maybe we missed something and you're like, that's not right. Um, just let us know, right? So that's kind of our opportunity to hear what you said and report it back. Um, and then at the end we'll have Q&A. We did this at the last community meeting. Took as many questions as we could and I think we were able to answer all the questions that people had, which was great.

[05:49] Um, the second big thing I'm really asking people is to be respectful. Um, we learned through the community engagement process, people have a lot of different ideas about what this site can become and we need to respect that. So one person might say, I want this green lawn and the person next to you has a completely different thought. And that's okay. We're here to hear you out and we want to be respectful and have a, um, have a dialogue that will be productive, right? So, saying you hate something or you're wrong, great, right? But let's really talk about solution-oriented opportunities.

[06:23] All right, so the question I get the most with all of my projects is when the heck is this happening? When will it get done? Um, there are a handful of things that have to happen, so I can't give you a definitive answer, but I'll, I will walk you through some of the steps. I think with a private public partnership, um, people are, are thinking like, oh, this will get done with private money and you're going to skip

past some of the public process. That is not the case. Um, we had our first community meeting in March. The, as I mentioned, the next one is today. Welcome. Um, and then the third community meeting will likely be in a couple months. Uh, if you remember, if you were at the first community meeting, we were hoping that the next one would be about a month later or so.

[07:02] We got an overwhelming response from the surveys and so we had to kind of pump the brakes, make sure we were responding to those thoughtfully and be able to answer questions that were had. Um, so yeah, we have hopes and desires for schedule and speed of things, but we also need to be mindful that we're, we're responding to all the questions that we have come in. Um, after we go through the community meeting, we will be developing a concept design. It'll go to the Rec and Park Commission for approval and we'll also be doing an environmental review. We'll start going into the next design phases, secure construction funding and that's when construction documentation will begin. That's basically like the blueprint drawings.

[07:47] Then we'll go to the city agency for permit approval at DBI. Then we'll be the bid and award phase. This will all be through, um, public works. So our typical, um, bid and award, lowest bidder, contract's going out. It'll all be very public. Um, and then finally, once we get the, uh, final bid, it'll go to a Rec and Park Commission for approval of the construction contract and then construction begins.

[08:12] Okay, survey findings and community meeting one recap. So there were a total of 1,054 total responses to the survey, which is fabulous. Um, 9% of those were in person, 91% of those were online responses. Um, there is definitely a difference. People were getting all the information and responding to kind of the presentation that we gave.

[08:36] And a lot of people were kind of seeing this blind, right? And so, um, that's just important to note. I'm really happy that so many people are here so that we are getting the information firsthand. Um, and also spread the news to your friends to give your feedback and give your comments. People are responding to this, to the survey from literally all over the country. Um, and just one point to make is that the survey that I'm giving a snapshot of on the bottom, the survey results reflect input from the digital responses and the community meeting participants.

[09:07] They're not a representative sample. We hope that it would be, um, but it's just one piece of the broader engagement process. We know that coming to a community meeting and taking an online survey might be more difficult for some than others, right? And people might not even heard about this project. Some people can't take it for various reasons. And so stakeholders that came, came to us, we also try to set up meetings with them and meet in person as well. Um, so we talked about our project goals in the last community meeting and this was, this is them in order of, um, popularity. People are asked to select their top three. So create a world class iconic park that represents San Francisco's vibrant culture for both local and international visitors. That was clearly the top contender.

[09:52] Uh, next was creating a welcoming public space with access for all. Tied in, tied for third was igniting the downtown recovery and revitalizing the heart of the San Francisco waterfront and also honoring the rich history of the San Francisco waterfront. Um, and lastly, still important, it still got about a third of the responses was activating the park with a wide range of programming catered towards diverse communities.

[10:16] The next question is what new features or improvements would you like to see? Um, the survey showed a vast majority, and this is a select all that apply. So if you're doing math and saying there are 1,000 responses, this is way over. This is why people could choose as many as they wanted to. Seating and gathering took the cake for this one at 60%, followed by public art and more grassy open areas.

[10:38] People really wanted to, you know, engage with culture. We saw outdoor dining, stages for performances coming in as well. Um, and then towards the bottom, we have dog park, outdoor fitness equipment, temporary ice rink, group exercise area. Um, and then we also had a write in area. And what was really, um, prominent here, over 20% of the responses typed in skateboarding, right? So I kind of had this on the side because if it was a selection, maybe it would have been more. Um, but we've really heard, you know, I didn't expect the most organized group to be the skateboarders, but good job, guys. Right? We heard you.

Eoanna Goodwin: Similar demographic as community meetings, so we're happy to have you. Welcome. Um, okay, survey findings. So what best describes your connection to the Embarcadero Plaza? This was also a select all that apply. Uh, the top vote on this one or whatever, response was the recreational user. So people

coming for skateboarding or padel or exercise or walking. Again, for this next survey, we, we put skateboarders into their own category because we, they were so prominent.

[11:56] Um, local residents came in next. So about, for the most part, about 40% of responses were local residents or recreational users. Then came in urban design and preservationists, community advocates, commuters, the business community, visitors, tourists, event participants, family and play. Um, and this is select all that apply, which means there's a wide range of users and we use this data to make sure that who uses the park is reflective of the demographics that we saw on site or what we see day to day, or are there, you know, additional outreach we need to do for some of these groups.

[12:29] And how often do you visit the park? About a third come in weekly, 20% or so monthly. Uh, 17%, two to three months, 19% daily. So people are coming to this park very frequently. 1%, I've never been. If you're here, walk there after this meeting. Um, and then when do you usually visit? This is an interesting one because this is kind of known as a downtown site.

[12:52] And we have an even number of weekday, not even, but you know, pretty evenly faired weekdays and weekends. Almost 70% or about 70% or so. Um, so for a downtown area that's getting visited so much on the weekday, weekdays and weekends, um, this is a really special site. And how do you typically travel to the site? Again, select all that apply.

[13:14] We're having half the people walk or take public transit, 30% or so skateboarding, rollerblading or scootering. Um, and not really a car-heavy area. Those were driving and ride-share were the lowest, uh, percentages on here. All right, some of the responses from those write-ins. Um, so this is what I'm calling diverse perspectives.

[13:38] There were some, um, categories in the write-in responses that people had very different opinions on. Uh, when it came to events and programming, people were saying, I love having events here. It brings the community together. This is so much fun. Other people are like, this is noisy. Get this out of here. I live over here. I don't want to hear it.

[13:58] Um, and so we're going to talk about how we're responding to each of these as well. Uh, landscape preferences, we heard everything from we want native planting to lawn, to turf, to concrete paving, to restore the brick plaza. Um, padel, a lot of people called it pickleball. That's how you know that people don't know what's going on in this space.

[14:18] They just see some loud ball knocking around. Um, some people thought it really brought the community together and it activated the space really well. Other people are like, why is it here? It doesn't fit here. Get it out. Um, Vaillancourt Fountain, known as an iconic historic piece. Other people are calling it, I'm not going to say those words, but in the room, and I saw her so on and so forth.

[14:43] And the shared priorities. Guys, these are the least sexy things I've ever seen, but we're all on the same page, so that's great. Um, safety and access. People want to feel safe. They want it to be accessible. There are a handful of band-aid issues that, you know, we've just been making it accessible versus really getting to the root of the problem. Um, having clean, accessible restrooms on site, and then maintenance and upkeep. People want trash bins. Um, people want something that can be maintained forever, not easily graffitied or broken or so on and so forth. So from all this data, we came out with what we're calling the Five Ls for designing Embarcadero Plaza. Um, any new parents out there might know about the Five Ss. Um, this is kind of similar to that. It helps you remember some of the, um, phrases with the alliteration. So we're talking about location. This is the placement of the programs and the features that respond to the site context, accessibility, and user flow. So some of the adjacencies that are really important to people. Um, ledges. So having a variety of seating options constructed with high quality, durable materials, different types of seating will invite relaxation and also informal activities like skateboarding. Um, having smooth, level ground, um, it allows for multimodal access and meandering pathways, encouraging exploration and leisure.

[16:08] Um, a well-lit place lighting, this will enhance safety, visibility, allow the site to be used at night. Um, and lastly, layers. This is really talking about celebrating the site's layered history, acknowledging its unique character and spirit. I'm going to do a quick history recap for folks. We went through this in detail in the first community meeting.

[16:30] Um, these slides are also up on our website. Uh, the slides that I'm showing from the last first meeting are up on our website. The slides I'm showing will be available tomorrow as well. Um, so 1898, the Ferry Building was originally completed as a terminal for ferries. This key transit hub. Um, at that time, the ground level was not open to the public and there was a double-decker freeway right in front of the Ferry Building.

[16:56] It wrapped around our site. Um, in response to what was going on with the waterfront and in response to a 1960s, uh, city report called What to do about Market Street, Lawrence Halprin and others came up with an idea for how to reinvigorate Embarcadero Plaza. Um, that included the plaza that's there today, as well as Vaillancourt Fountain.

[17:18] So in 1971, 1972, the Vaillancourt Fountain went in. Um, very popular site. It was there for a lot of reasons. Um, it brought water, a new water feature since you couldn't access the waterfront anymore. Um, it also blocked the, blocked, not blocked, it was in front of the freeway. At the same time, we had the Embarcadero Center and the Hyatt being built, um, around the same time.

[17:44] So you have these kind of brutalist architecture pieces made of concrete in front of this huge concrete mass of the freeway. Um, and then in 1990, 1980s and 1990s, there was also, um, an intervention by William Turnbull Jr. um, and the rise of skateboarding on site. So on the left you'll see what this was really designed for, right?

[18:07] You can see some of the construction I was talking about on the left with Embarcadero Center and the Hyatt. Um, and the Vaillancourt Fountain. Um, on opening day, very popular. Um, in front of the freeway. And this was really made to face, have like an inward facing, um, site versus what it is today. Once that freeway came down, suddenly it was, the parking plaza could model it with outward and starting to connect with the waterfront and their surroundings.

[18:35] Um, a view of the existing conditions. So this is what's on site today. We have the Abraham Lincoln Brigade Memorial, um, just on the east side of the fountain. Um, we have, um, Sue Bierman Park. This, um, was redesigned and opened in 2010, 2011. Um, and most recently there was arson on site, so it got redone in 2023.

[19:16] Um, Sue Bierman Park has a drainage issues that we're, we're looking at too. Um, and there are a host of accessibility issues both physically and visually. So you have these ramps that are coming up, just to go back down to go to different parts and programs of the plaza. Um, and a lot of people are on the Ferry Building side, not even knowing what is across because you kind of have these different tiered levels over there.

[19:43] Um, and then lastly, Vaillancourt Fountain. Um, Vaillancourt Fountain's last pump went out last year in 2024 and it's been dry since and we're going to talk about some of the findings, um, on the fountain as well today. Okay, so the fountain conditions assessment. This is new information since the last community meeting that we wanted to walk through and share with you all. Um, this was done as we do with any of our projects. If there's a structure on site, we need to assess it, assess it for structural integrity, hazardous materials, so on and so forth to really understand what we're getting into, um, and find out what's, what's on site as it has been explored previously. Here are some of the key findings from that assessment. Some we knew such as the end of life of the infrastructure systems. Um, the plumbing and the electrical systems are completely shot. This, this fountain when it was running, it had water going through it about 30,000 gallons a minute. Um, and that was really noisy and it was noisy for a purpose. It was trying to block out the sound of the freeway behind it.

[20:48] Um, as I mentioned, it was creating a water feature. Um, but the pumps no longer work. It had four working pumps and the last one went out last year. Um, from the conditions assessment, there are also hazardous materials found throughout the fountain, including asbestos and including lead. We tracked some of the maintenance costs over the last few years when the fountain was running. It was costing about 100K a year to maintain the fountain. Um, our, our structural maintenance staff was coming out pretty much daily to, uh, check on the fountain. It got cleaned out completely quarterly. Um, but it was starting to be hazardous. One of the items here is also the failed waterproofing membrane in the pool of the fountain, starting to flood the underground vault, um, that is at the fountain. Um, the fountain itself is not accessible. It was designed in the 70s, about 20 years prior to, um, the ADA Act being signed into law. Um, unsuitable soil conditions and then a host of structural issues from corrosion of the structural elements, cracks and spalled concrete, surface level, a lot of things look fine, but then when you start to get into

the fountain, um, it's not. And even under ideal conditions, if this fountain was designed and built today, it would not meet current seismic and safety standards. So then tying on all the corrosion and all the issues, um, it's, it's starting to be a lot. The fountain restoration cost, um, RPD did an internal cost, um, through some of the recommendations from the stakeholders, they asked us to hire a third party consultant to do cost estimating. So we did that. Um, we just got the cost in and the cost to renovate to, restore the fountain to its full glory to have, uh, take care of all the structural issues, to, um, have the new systems in place, um, it is estimated at \$29 million. Um, the fountain itself is about 710 tons.

[22:45] When you think about each arm, they're about 10 to 11 tons each. So in order to fix this piece, um, you know, those arms are coming off, you need to check all the structural elements for corrosion, make sure that it's safe putting it back on. The reason that this is what it is is it's a handful of reasons. One, um, this is, you know, a structural restoration project, a seismic retrofit, but it's also an art piece.

[23:14] And so we're treating it as both of those. Um, which is important to note. Um, this fountain was designed, as you saw in the previous slides, to be participatory. People are supposed to be running through it. There's supposed to be water, you're supposed to be engaging with it. What it is right now from finding this report at the beginning of January, we had to put up fences because people are sleeping in it, they're climbing on it.

[23:36] That's what they're supposed to do, maybe not sleeping in it, but hey, rent's expensive. Um, but yeah, people are kind of doing a host of things and that's really what the idea was, right? I think the hard news is that this is over our budget. I think what I'm hoping comes out of this meeting and maybe I'm being like overly optimistic is that we can come together and figure out ways to honor the site's history, to bring in that character and to bring in the spirit and to move this project forward.

[24:05] Um, it'll, it'll take us kind of, you know, being creative and, and thinking about options and opportunities, but what we want to hear from you is like what is important to you and how we can do that. Um, Lawrence Halprin, when he was starting to design this space, he was, he was more or less talking about this as, um, a space where, you know, it's, it's a total space of participation.

[24:28] All these elements are coming together. And what it is in its current state, it's not participatory. All these elements are kind of fractured. And so we want to bring us together and bring those pieces together and take in what we can from these community engagement processes to keep this going. Um, from here, I'm going to hand it over to Brian Jencek at HOK.

[24:51] Um, what he's going to do is walk us through a possibility of what the site can be, taking in the constraints of safety, of accessibility, of our budget constraints. Um, and then from there, we're going to start to break up into sessions, talk a little bit more and more about, you know, how we can start to shape this plaza together as a team.

Eoanna Goodwin: Great. Thank you. Um, I don't know where you are, but I've heard Supervisor Sauter is in the house. Um, and we'd like to recognize you. Thank you for joining us. Um, Supervisor of District 3 where this project is at. Um, would you like to...

Danny Sauter District 3 Supervisor: I will, please. Um, good evening everyone. I'm really happy to see such a large audience out here tonight. Um, I'm Supervisor Danny Sauter and as your District 3 supervisor, I represent the space just steps from here, uh, where this project is, is being... Thank you for coming out tonight. Um, if you're interested in this project, if you have feelings about this project, if you want to see something in this design, if you think that, uh, this park, this plaza, this space needs to meet a certain, uh, criteria, a certain need for you, maybe as a business owner nearby or as a resident nearby, this is exactly the time to get involved.

[26:22] I think that, um, we all share, I hope we all share a broad vision that this space can be a lot more than it is today. It is still a relic of when there was a freeway looming above it. And we know it can be a lot better. We know it also can tie into our downtown recovery and reimagination of open spaces around here.

[26:43] How we get there exactly and what that looks like is what we're all going to decide together and what we're going to start the conversation on tonight. Um, our office has been busy, uh, in early in our term passing legislation securing, uh, bond funding for this project, um, doing that in tandem with all of our partners at downtown partnership, BXP, uh, Rec and Park of course, and many others. So, uh, we're excited about this. Please, uh, in addition to the stakeholders here tonight,

continue to engage with our office. We want to make sure that this project is something you're excited about. I certainly am. I know there's a lot of steps between now and getting this open, uh, in a few years, but I think we can do it and I'm really excited. I think it will be a big part of our downtown recovery. And again, I also want to recognize that it needs to work for all of you that live right here. So thank you.

Brian Jencek: Well great. I'm going to try to keep that energy going because that kind of vision is exactly what helps get these projects done. So it's good to see you all again. I'm Brian Jencek. I'm the lead designer from the firm HOK. We have the honor of leading the design for all of you on behalf of the city, BXP, and so many other stakeholders. I'm going to now get into the programming building on our last meeting here together.

[27:54] I'm going to keep this fun going, then we're going to get into an interactive activity. And as Eoanna mentioned, we're going to then have a Q&A. So, here we go. So program organization. What we're going to do next is essentially take the uses and priorities that you identified on the poll, as well as in our last session here at the Embarcadero Center, we were upstairs for that green dot exercise.

[28:14] I see a lot of familiar faces. We're going to take those priorities that you listed and begin to land them on your park. So to do that, what we do as designers for you is analyze first our understanding of the site. Um, the maps that you're going to look at all have a scale. We live in planned view as designers. We look down on things like birds.

[28:33] So I know not everybody is used to looking at a site like this. The Ferry building is here. This is 300 feet, which is, you know, approximately a football field. So that length of the park right there, about a football field, that helps you orient yourself. Um, this faces east. North is that direction. This is Sue Bierman Park today.

[28:52] I see a lot of the, um, um, residents that live around us over there on that side to the north. The Embarcadero Center where you're in today is right here. So all the maps will orient the same way for our activities as well as here on the screen. So for site understanding, there's a few things that really just struck us about the existing park that resonate and inspire us for where we may land the uses you identified.

[29:12] The first is just working from the top to the bottom, the Embarcadero buffer. I think we would all agree that along that edge, there's an opportunity for something that helps separate the park a little bit from the busy road. Whether that's plantings with stops and parent soccer ball from rolling into the street, whether it's gardens, whether it's potentially historic or interpretive elements.

[29:32] We think that that edge is really important, not just for buffering the street, but that's also where we get great views out to the bay and connects us to our ferry terminal and everything that you want to discussed. Market Street itself, this extension where it becomes pedestrian during this segment before you cross the street. This is an opportunity for Market Street to spill in. We see that currently today where the various markets set up, artisans come out on the weekends, that occurs right here on this plaza.

[29:59] We think there's an opportunity for continuing that. In blue, this is where the current retail spill-out is, where you see tables and chairs out there today in the plaza. Some of the most used spaces, people just, you know, enjoying their lunch break, eating a sandwich, going to the various restaurants, coming out, enjoying a place to sit. There's trees, there's shade from the Embarcadero Center. That blue area we think is very successful and should continue.

[30:22] As we come around the horn, there's an existing restroom over on Drum Street, um, which you, you know, if you've been there. Clay Street extension, which is right here. This is on the north side of the Embarcadero Center and it's how you get down into the garage. But you'll see in the future, this becomes an incredible asset. As we think about future activities and events, Clay Street gives us an access for trucks and other things to set up tents, Shakespeare in the Park, a lot of the things that we know and love.

[30:47] Those require truck access. So that little gray rectangle there is actually really important for successful parks around the world we've done. Continuing around, the existing playground. It works. It's great. It's one of the most utilized places in the park today. We see it full on the weekends, full during the week. We want to keep that. It's, it's not broken. Don't fix it.

[31:07] And then, of course, we have the large, you know, expanse within the middle that we can now land your program priorities on. So think of this in many ways as

our canvas. And then on top of that, we begin to think about how do we place your program? So one of the first things that we do is start with bubble diagrams like these. And many of you probably been through this process before.

[31:27] We think about what are the big buckets or areas of the site that really just ask for certain programs? This is how we organize them into various categories just top to bottom. I'll read them out for those in the back. So purple is community and family oriented. Now, why would that use and any uses within begin to orbit in this direction? Well, Washington and Drum is how a lot of our residents that live just north of the park currently access the park.

[31:52] We know that there's families and children living in there. That's where the current playground is, we just talked about moments ago. There's a restroom, there's quieter streets, much quieter than the Embarcadero Center or the Embarcadero, um, uh, avenue. And so this is where we can have drop-offs. It's a little quieter. There's a lot of reasons why these kinds of uses listed up here make sense over there.

[32:13] Going around the horn, so next is ecology and history. We have heard from you that we want to have wildflower gardens, pollinator gardens, we want places for habitat, ecology in what is right now largely a paved plaza. When we're thinking about where that wants to go, the site slopes towards the Embarcadero. And so that suggests to us that as we celebrate ecology and nature on the site, that's a good location for it. It's where water wants to go for the plantings. It's inherently a low spot. It also speaks to our history on the waterfront. So as we celebrate those interpretive elements, it could be that that's a great place for them to land. Market Festival and art. I just, we went over this just moments ago. We think that, you know, as we think about the terminus and Market Street, how they connect you over to the Ferry building, connects back to our downtown, this plaza, it wants to get a little bigger.

[33:02] Right now, there's enough room for the various tents and activities that set up along it on the weekend, but it gets pretty crowded as you cross over here and you see you're kind of jammed, right? I know the residents around here know what I'm talking about. So we think we want to extend that plaza. It needs more room. Dining and spill-out continues. And then in the middle, we've got that multi-purpose space that Eoanna was talking about.

[33:21] That canvas where we can bring together all those uses to create this iconic park. Those are the various big picture zones. We think make sense based on your park, the five acres that you have, the relative views and opportunity around us. So now, how do we actually take your program priorities and land them on the site?

[33:43] Now, we're not going to actually design the park as a bunch of blue and pink circles. This is just a diagram suggestive of where these uses might land. But this is really the bones of the design that will follow. Let me walk you through it real quick. In the upper right, this is the various buckets or zones that I went through before. And in the middle of the screen, now is where we start to think about, okay, within a multi-purpose area, where might we place a stage?

[34:09] And how might that stage orient its amplified sound out towards the southeast, out towards the water, away from residents, away from the hotel, where we could actually have a multi-purpose area for a larger scale events once you ask for. We think orbiting around that is a large multi-purpose area, maybe broken into a larger area towards the ferry building, potentially larger opportunities for activities.

[34:33] And then maybe something smaller over here towards the family zone. Places to play, kick around a soccer ball, that kind of thing. Um, as we continue around, the plaza extends, we think there's a great opportunity for art in that plaza. We know how vocal the ferry building, its clock tower, the Embarcadero Center, Market Street. We think somewhere around there, a permanent art piece or potentially some type of a rotating exhibition could make a lot of sense.

[34:59] So we want to hear your thoughts on that. It's very vocal, very visible. Um, as we continue around, along the, along the Embarcadero itself, the blue dots represent interpretive historic elements. This is where we really celebrate that history that you all walked through moments ago. Some picnic areas, as we now move into the gardens, continue around to the, to the playground. And we're going to need your help in the activities here to follow. We've all been to a children's playground. We all know that nearby we want a picnic table set up for a birthday or put down some pizza after a soccer game or whatever it is. And then near that, we may need restroom. We may want a fitness area. So as the kids are playing, others can work on fitness.

[35:42] We know often on our weekends and our weekends are very similar to mine, there could be a dog involved. And so, kids are playing, people are setting up their picnic tables, maybe there's a workout area. Maybe potentially that's also now where the dog park goes, close to our crosswalks, close to the residents that have pets in the surrounding area. The reason I share that example is in a moment, we're going to break into activities. And in those activities, those various zones, we're going to go through, are these program areas in the right location? Do you agree with it? And then the various uses, are they aggregated together? So that again, it makes for a wonderful Saturday afternoon, a busy Monday morning, and it accommodates all of your desires and, gateway plazas, we want when you first arrive in the park to feel really open and welcoming. Very accessible, accessible for everyone. We want to make sure that everybody can navigate through this open space and be able to get to wherever they want to go without walls or railings or stairs and things in their way. We really want this to be highly accessible.

[36:43] So you'll see these gateways at all the corners. I could go on, but we'll get into this at the stations. We'll have a station devoted to this. But this is how we as designers take your program priorities, size them. And again, there's a scale down here, and then begin to land them where it makes sense on the property. We're very excited about where this could go.

[37:03] We're seeing that these five acres can accommodate everything you've asked for in an incredibly world-class open space way. So, pretty excited about where this is going. This ultimately, after we get your feedback, becomes next, the bones for the design. That's where we begin to lend form and craft. But that comes next. Tonight, we really want to make sure we heard you.

[37:25] We got the uses and we've landed them on the park in the best possible way. So that's park programming. I truly multi-use park. I think as we think about overall, what's really organizing this park? That priority of multi-use as opposed to just one surface, hardscape for one kind of a thing. We've heard more and more you want multiple uses throughout your park.

[37:48] So you'll see that throughout the various activities and throughout that park programming diagram. We took photos of the red dot green, green dot exercise that we went through before. We know that we are going to integrate skateboarding throughout. We know there's a want for more green space. You want activities that

you can do in your park, whether it's movie night, festivals, art, and honestly, you all want just a great place of casual hangout area most of the time when it's not an event mode for the residents and visitors.

[38:18] Honoring our history is going to be a big part of this project as well. It's interesting to think about where San Francisco began, this harbor that we had once here. We would have been in open water long ago when our city was first founded. Incredible histories unfolded. Piers, cotton sailed ships, ultimately creating the ferry building, extending our downtown to the water, and creating the Embarcadero Center and the site we have today.

[38:41] Since then, we have, of course, the former freeway location, um, that gave us this connection to the water, the Abraham Lincoln Brigade Memorial, um, concrete ledges that are currently used by both skateboarders and folks who just want to sit and enjoy the plaza. Um, we got the brick paving with the divots, um, that Ashley and others have helped us really understand the deep history on the site for, as well as we've got remnants of the seating, you know, that was in the original design.

[39:07] We've got an opportunity to celebrate these elements, these cultural elements throughout the park. We have some ideas about where they might go in terms of the blue dots, but we love to hear from you where you'd like to see your history and your culture celebrated and if we've overlooked anything on the list.

Audience Member: And the fountain.

Brian Jencek: And the fountain, which Eoanna spoke to. Absolutely. So, this is, this is how we begin the design process. Um, we take your ideas, we convert them into space and size, and we begin to think about where they want to go and how they work together. I think one of the big hallmarks in addition to multi-use that we heard from all of you is that you want a unified park, a park that feels connected and open and welcoming, and not one that's broken up. And so we'd love to hear your thoughts about sure, multi-use, but how do we engage that multi-use space effectively? We've heard large scale events and other things like that. We'd love to hear more as we break into our stations. So, our activity for tonight, this is community meeting two. Community meeting three will focus on design.

[40:11] Tonight, what we would love your help with is first, the program. As I mentioned, have we captured everything? And is it what you think in the right

location? Give us some feedback. We'd love to hear your thoughts. The other stations, two, three, and four, we want to now start to get feedback from you in terms of the character of the park that you would like to have. I'll give you some examples and with our docents, you'll you'll be able to have a more kind of one-on-one conversation.

[40:34] But I'll just kind of see a few ideas that we've been talking about. One is, one of the highest priorities was actually just bringing more green ecology, um, lushness to our downtown. Right now, it's a very heavily paved, um, plaza. Those types of landscapes, those gardens, they can be very informal, they can be very natural-looking.

[40:54] Think like Tunnel Tops Park, which I'm sure many of us enjoy. They can also be quite structured and formal on the other end of this gradient. Uh, similar to some of the gardens around the museums at Golden Gate Park, you know, where the landscape is very structured, very geometric. You asked for more landscape, more green. Now we're asking you, give us some thoughts on the character of that green.

[41:14] The way we'll do that is across these, these, um, these gradients here, we once again got the red dots and green dots to help us understand where you, where your priorities fall. Another great example is plazas. They can be quite urban, quite orthogonal, quite structured, quite geometrically. And then you'll see at the station, they can also be quite landscaped, you know, quite curvilinear and quite sculptural. So yes, paving, yes, a plaza for various users, but how would you like it to feel? So that's where we're going next. I'll let the docents at the stations go through the rest. I'll be at station one alongside Yuliana. We'll be talking about program. Station two, um, will be set up back over there. Um, this is where we'll be talking about the program character, um, gradients for seating and gathering and fitness.

[41:57] Um, station three, if you can't read it, is dining, picnic and gardening. And then station four is historic recognition, the deep cultural and historic history of the site, as well as the plaza. Rotate around. We hope to get your feedback at every one of these stations if you can, though we recognize you might have certain priorities or certain interests and kind of stick at one.

[42:15] We want to get all your feedback, and then we'll come back up here and, uh, Q&A at the end. I know that was a lot. I tried to get through it quickly so we can get

to the activity. But I think with that, we're going to move into the activity. Is there anything I missed?

This transcript was automatically created through the use of generative AI. Some

Eranna Goodwin: Um, so yeah, Brian mentioned, we're going to split up into different stations around the room. Um, we're going to have a paper survey for people to fill out. Um, there will also be a digital survey and we'll put the QR code up here. It'll also be on the paper survey. We encourage you guys to take the survey, to pass it along to friends.

~~[42:53] Um, and just from rumblings and kind of hearing about, you know, typically~~
all these projects, we'll have multiple options. We did look into keeping the fountain on site, but once we are looking at all the site constraints, including the budget constraints, it's not possible to have it on the site with our current budget, like where we are financially right now.

[43:15] So this is why we're showing this program and we do welcome all of your feedback on how we can still integrate the history of the site on, on here. Um, I just wanted to kind of let that note out, because I did hear that a couple of times. I want to make sure everyone's aware of where we are. Um, and it is in a handful of reasons, but just this is why we're showing this. Um, we'll be around, feel free to come up to us too with additional questions and feedback.

[43:35] Um, you can start on any station you'd like. Station one over there, two, three.

**DOCOMOMO US/NORTHERN CALIFORNIA · 33 TOPAZ WAY,
SAN FRANCISCO, CALIFORNIA 94131**

TRANSCRIPT FROM REPORT OUT AND Q & A FROM JULY 8, 2025 COMMUNITY MEETING

Okay. So we're going to do a report out, so I can have your attention for a second.

Um, I just wanted to make a couple points. So one, I know it's already 7:00. If you know me, I'm always running late, so I apologize. I do have business cards up in front. Uh, feel free to email me if you have a question and you need to head out. Uh, but like I mentioned, we're going to do a report out real quick of the stations. Um, I'm going to have somebody come up from each station, come back and give us kind of the big, overarching themes. Um, and then after that we're going to open it up to Q&A.

All right, so Brian, putting you on the spot. Station One. What'd you hear?

[00:00:43] Brian: Thank you. Hey, big shout out to Station One. You know, we're not playing favorites, but you guys brought it. Thank you so much for your feedback.

[00:00:50] Brian: Um, okay, couple of things. We talked a good amount about skateboarding. I had an interesting mix of park board, um, uh, passionate folks, um, skaters and residents. And so I thought that was a really healthy conversation as well as dog advocates, as well as children's play area. Some of these things are inherently, they might feel like they're in conflict, but we found a ton of common ground. For example, we heard from members of the skate community that if there aren't places that skaters are going to gravitate towards, they're probably going to be in more of this geographic area because of the current community at Harry Bridges Park and Plaza, as well as here, as well as over towards the pier, um, further to the north. And

so, the even the residents themselves who at first voiced uh, noise concerns about skating said, "Well, if they're skating in the park, it probably makes the most sense here." And so too did skaters.

[00:01:38] Brian: The other thing that was discussed was, you know, children and dogs on the surface, you know, the two might not mix, but then a lot of the family members, you know, talked about just what a Saturday looks like. Got some kids in tow, um, you got a fitness area, you might have the dog and how if we do collocate those uses together in this area, they actually make for a nice afternoon and kind of completes an entire experience, whereas otherwise families might be split up, having to sort of divide and conquer if those uses weren't together.

[00:02:04] Brian: I could go on. Those are some of the hallmarks of us finding common ground between uses and users that don't inherently maybe feel complimentary, but actually can find a home on this great park because of its scale. That was really inspiring for me. Thank you.

[00:02:18] Speaker 1: Thank you.

[00:02:20] Speaker 1: All right. Station Two. Jen?

[00:02:25] Speaker 1: Do you have the mic?

[00:02:31] Speaker 1: Thank you, Eoanna.

[00:02:37] Jen: Um, so my station was um, seating and gathering areas and fitness, um, elements. Um, so first of all, there's a lot of green on here, so it was really great to see all of your feedback. Um, and then the reds were really interesting to hear from as well. So starting at the top one, seating and gathering. Um, so it was a range of uh from discreet, kind of interactive, movable, singular seating elements to continuous or sculptural features. Um, and you can see a lot of the, the greens are towards the continuous element. Um, and those are really cool to see. Um, there's a lot of red in the movable and the reasons for that were really interesting and it actually made me really happy to hear that people were concerned about theft, uh, maintenance, that, um, I really appreciated the mindset that people were already thinking about this park, wanted to make sure that the amenities are preserved for future users to use. Um, and then for the fitness, also interesting in that um, greens are kind of in the middle of the, of the gradient and then more reds on the other end. And so the

gradient here was something that was more imaginative, um, um, environmental, almost like a play towards something that's more uh prescriptive or standardized kind of um uh fitness equipment that you see around the city. Um, and people seem to like something that was in between. Um, something that wasn't too kind of cold or corporate looking, but something that also didn't feel like it was too out of place in an urban setting where you um have an actual kind of uh natural kind of uh workout area. So, um, thank you for all your input.

[00:04:07] [applause]

[00:04:27] Presenter 1: Okay, so for the color for programming character gradients, um, we had dining and picnic and garden. Um, I really appreciate these boards because these green dots and red dots can, can really tell a story here where, um, folks are kind of landing more for the garden spaces more towards natural, naturalistic. Um, less folks for highly structured. Um, we had some folks write in, you know, that um these highly structured ones might need too much maintenance, whereas with the naturalistic ones, um, less maintenance. Um, some notes here about um, local native plants for birds and butterflies. So some great ideas layered into this. Um, even some ideas on wetlands with native plants. Um, for dining and picnic areas, you know, less folks into the natural loose picnic and dining and more into um, splendid, maybe a little bit of both with natural ordered. Um, and folks really like civic. This is a picture of Bryant Park. Um, so that was great feedback to here as well.

[00:05:31] [applause]

[00:05:43] Presenter 2: Hello everyone. Um, I was in station four, um, and what I heard for historic recognition. Um, there were a lot of uh opinion on like reuse of the fountain. Um, the fountain itself is a different topic, but like in terms of the historic recognition, a lot of features that that it would be nice to recognize the fountain in different ways. There are great ideas in the sticky notes that we are noting down for our design. Um, and I think overall I felt that people were really integrated towards the reuse of the fountain. Um, and for the plaza space, um, I think the main comment that I heard from a lot of people was, uh, the street artists didn't feel uh, represented in the gradients. So, um, there was, um, like they had their comment in here. So we are noting down that. Um, and then, uh, there were mixed reaction on the integrated, uh, option where, uh, people liked skateboarding, some people didn't like it. So, um, there was some mixed reaction on that. Um, the layered was

something that a lot of people liked, like integrating, um, landscape and hardscape together and making that space more green. Um, that was another, um, huge comment that I saw a lot of people were putting big thoughts on. Um, yeah, I think that's it. And I have more comments that I've jotted down which we will consider.

[00:07:11] [applause]

[00:07:18] Speaker 1: All right, the moment many of you are waiting for. Q&A. Um, so here just to answer questions, make sure we're all leaving on the same page. I can't answer everything, but I'm going to answer things to the best of my ability. Um, and I'll bring in some, um, experts up if I need to. So, um, anyone in order up here. Yes.

[00:07:42] Oshiana: Hi, my name is Oshiana. Oshiana Ballencourt, and I am a daughter of Armand Vaillancourt, who designed the fountain. Um, and his son, that was, uh, talked about today. Um, in 96 years, I don't think my dad has ever asked me to help him. He, um, he's going to be devastated by this news and I'm hoping that today all of you can help, help us with this decision. Um, I think the fountain is a big part of our history. My mother was a street artist. I love the comments about where are the street artists. My mom was a street artist in the 70s. She worked at the fountain. She met my dad at the fountain and without the fountain, I would not exist. I live, I I work in San Francisco. I'm two blocks away. I go by the fountain every day. Obviously, it's a big part of my history, part of my family's history. And I just can't imagine the fountain not being there. So, I know the skateboarding community has really been, you know, back us up in regards to the fountain because um a lot of the skateboarders come to the fountain to skateboard. It was a big part of, you know, Tony Hawk's video back in the day. And I just hope that we can gather the community and hopefully change the decision of removing the fountain. Um, again, please help me. Please help us.

[00:09:12] [applause and cheers]

[00:09:21] Oshiana: And I, I'm going to get to my question, but what was the cost of of removing the fountain? There's going to be a very high cost of removing the fountain. Also, why has the fountain not been kept up kept? It is, you know, I don't think it's 29 million, but you're saying it's 29 million. This should have been something that the city upkeep every single year and we would not be in this predicament of removing the fountain.

[00:09:46] [applause]

[00:09:49] Oshiana: Thank you so much.

[00:09:50] Speaker 1: Thanks, Oshiana. Um, yeah, so we did meet with the Vaillancourt family. Not Oshiana, but we did meet with Alexi. Um, we did meet with Armand Vaillancourt, Jean Vaillancourt, and we heard what they wanted to say as well. Um, their, um, we did ask them. We heard from the first community meeting, people wanted the fountain to be removed, people wanted to keep the fountain. Is there something in between? Um, their answer to us was a hard no. They wanted to be restored in its full glory. Um, if you've been up to it, it's, it's, it's an iconic piece. It is huge. There was running water, it was participatory, there was steam coming through it. Um, nothing like this could be built now. Like it's, it's quite an impressive piece and I'm not arguing that.

[00:10:35] Speaker 1: The thing that they asked us to do was to get a cost of restoring it and a cost to demolish it, which is what you're asking, right? Um, the cost to restore the fountain was 29 million for construction alone. So that's not including permits, it's not including soft costs or anything else. The cost to remove the fountain is about 2.5 million, um, has map included. And so we're looking at this with a lens of this is our project budget of 32.5 for the project. The cost to restore the fountain is over our project budget when you're including all the soft costs as well. Um, in terms of why is it in the condition it is, what the heck? Um, the piece itself is part of the Civic Arts Collection. Um, so it's on Rec and Park Park property, but it is part of the Arts collection. What that means is that for their, um, charter, they're responsible for upkeep and maintaining it, so on and so forth. Through the years, Rec and Park has been maintaining a lot of the underground systems, um, just because we don't have a contract to do so. We just have been. Um, when, when kind of finding out why that has been is when the fountain was created in 1971, um, Arts Commission didn't have the means or the ability to bring on engineers or plumbers to continue maintaining the fountain. So Rec and Park just has been over the years. When the last fountain or when the last pump stopped working last year, we started to do internal cost estimates just getting that pump going again is 3 million.

[00:12:13] Speaker 1: Now that we're looking at this whole thing as a whole piece of restoring it and bringing it back to life, taking in the structural considerations that it's not a seismically safe piece, um, we have to kind of go into it. So right now as the

fountain sits without water and with a fence around it is the way that it is. And to bring it back to life and to all its glory is 29 million. So the next kind of parts and steps is from here, we're gathering community input. We are then it goes to the um, Visual Arts Commission and there's another opportunity for community input at that stage.

[00:12:57] Oshiana: I just wanted to add, like I'm all for the redevelopment of the plaza. I work with developers. I'm actually here in the city. I've been part of our development of the city. I've built, I think, over seven buildings here in the city. So, I am all about redevelopment. I understand innovation. I understand that there's change needed. But I think we could do that with keeping the rich history that the fountain has with San Francisco.

[00:13:25] Speaker 1: Thank you. Um, I'm going to go these guys and then you. Um, do you have a second mic? No. Okay.

[00:13:38] Speaker 1: She's on her way for you, Vanna White for a second. So, if you don't mind coming up, because unfortunately the cord's not long enough. Thank you. I'll hold the mic for you. No problem.

[00:13:46] Audience Member 1: What a thrill. Uh, I didn't know your parents, but I did work in the plaza in the 70s. And so I enjoyed the fountain a lot. I used to climb on it a lot. In fact, just before the fence was put up, I uh, went and took another look and uh, it brought back a lot of good memories. I think now, because they didn't uh restore it and keep it, because many times it wasn't working and it turned into a big toilet, unfortunately. But I think it should be memorialized in some way or another.

[00:14:14] Audience Member 1: But what I'm here really to speak for is the street artists. You see all these photos up here? Street artists have been there since 1972. There's no photo of street artists. None. And your parents were street artists. We love to see street artists out there as well. And somehow when you see pictures of the Ferry building in downtown, the Embarcadero makeup, no street artists. They always take a picture on a Monday when nobody's working.

[00:14:36] Audience Member 1: But we've been there in the beginning, 150 artists working in the lower plaza. The numbers dwindled when the program opened up and people could sell all over the street. But in 2003 when the Ferry building opened, the number of street artists uh went up to 125, 150 sometimes. So we are there. We keep

the place safe. Okay? We keep the place safe. And so I want to make sure that we have a place there. Now I see there's a great little thing there that says "Art," okay? I see the color of "Art." Don't forget the street artists. The other thing is skateboarders. I love you guys. I think it's a great exercise, but skateboarding and an art booth, an arts and crafts booth, do not mix. And sometimes you guys go down walls and stairs and stuff like that and the boards go crashing into us. And there's no apology and they just give me my goddamn skateboard, let me go. So I want you guys to have a place, but when I see it's right next to where the artists are set up, that's ridiculous because people make stained glass and jewelry and everything else. So don't forget the street artists. I'll be glad to give you guys some good photos. And uh, let's make this beautiful. I think what you've got so far is fantastic. It's really good. Thanks a lot.

[00:15:47] Speaker 1: Thank you.

[00:15:50] Speaker 1: And then the woman you were just pointed to?

[00:15:58] Audience Member 2: Hi, uh Andrew Sullivan, I'm a landscape architect and um, I just wanted to say, uh first thanks to the uh all the work and thinking that's been done. I mean, I know it's a really complex uh process and project and that similarly, I'm like understand the need for redevelopment and all of that. That said, I just, I don't buy the idea that like the presumption is that the fountain has to go. I think there's a um, uh, there should be a more reasoned and kind of thoughtful process that includes both the historic and the cultural implications of the fountain, the plaza, their context where they are, and then also within the whole redevelopment of Market Street and the, the Embarcadero Holiday UN, etc. And that whole, that the contextual importance of those. You know, the fountain, I think it's crazy and like in both a good way and sometimes a bad way, but it's iconic and it's iconic in that location because of the location. And I think it's important to understand and respect that and that we develop a design that um, that is not a kind of design by committee, uh, bits and pieces to make everybody happy. There's a reason why it was like bombastic and I think there's a part of that that needs to be uh kept and even if that's reincorporating it as components of a stage or parts of other elements within a design, there's there's a huge opportunity that I think we shouldn't let go of.

[00:17:25] [applause]

[00:17:32] Audience Member 3: I just have a question for all the boards. How much square footage would you gain by taking the fountain out? There's lots of great ideas. And so much of something that, I mean I love the fountain. I've lived for 20 years. I thought it was going to stay on forever. But that's, that's beside the point. But it doesn't mean you can't have a great space. The art, and uh, it's a park that's been a long time coming for one. It shows a name. But, um, my question is how much square footage would you gain for something, something else?

[00:18:18] Speaker 1: The fountain itself is about 8 to 10,000 square feet around it, um, and the plaza itself is about 40,000 square feet.

[00:18:26] Audience Member 3: So it's it's almost 25% of the plaza. That's a lot of space that can be utilized for replication and because something that was mentioned before, amenities don't work. It's still a part of the problem. It is a unique piece for sure. It's just seems to have done a number on the fountain. Talking 25, 20, 25% of the square footage of the whole location for other things.

[00:19:06] Speaker 1: Thank you.

[00:19:14] Audience Member 4: Well, there seemed to be an amazing amount of applause for keeping the fountain. Um, and so with the time left in the development of the park, and it's all very good, uh, and and it is a unique fountain. Has there been any discussion of a GoFundMe? It's not in your budget, but there's other parameters that could be thought of to raise the funding for the fountain itself aside which would also be private. Has any consideration been given? And in terms of the cost, you mentioned it was 100,000, 100,000 dollars a year to maintain it. I think we have 800,000 residents in San Francisco, that's 25 cents apiece per year. So \$100,000 to me doesn't sound like a lot of money compared to the amount of people that live here. And um, again, the 28,000 sounds like a large figure to someone who doesn't have 28,000, but the city budget even with all the cuts is still larger than the state of like New Jersey. So, I I think there was a scare tactic of throwing out those numbers, but those numbers to me don't sound so scary when you consider the total San Francisco. But the fundraiser aspect of of of gathering funds to restore the fountain and put it back in condition, has that, uh, has any consideration been given to that?

[00:20:44] Speaker 1: Um, yeah, so two parts of the puzzle there. It's \$100,000 to maintain it a year, but there's also the time consideration, right? So our staff that's

maintaining this also can't maintain other parks and other areas because they're spending time on this, right? That's one part. I'm just saying whole picture. Uh, 29 million to completely restore the fountain. Um, and that cost, that would be something that we would need to talk with the Arts Commission about because it's their piece. The funds that we have right now for downtown revitalization aren't to, um, fix an art piece. It's to revitalize the downtown area and to revitalize the parks. And so that's a conversation that we'd need to have with the Arts Commission on how to bring those funds to restore the fountain.

[00:21:39] Audience Member 5: What should I write one?

[00:21:42] Speaker 1: Whatever you would like.

[00:21:43] Audience Member 5: Um, I just want to ask that those of you in charge consider this question, which is why Justin Herman's name was removed on Justin Herman was as a lot of you probably know was the father of so-called urban renewal agenda. His approach was to rip everything out. When I was a kid, all the Victorians were being ripped out and start fresh. That's clearly what we're doing here and in a way, this is like the Justin Herman approach, which is to get rid of everything that means will here in order to have a clean slate where you can think about programming. And I think that those of you who are both removed Justin Herman's name from the plaza should really be thinking about this larger question.

[00:22:35] Speaker 1: So, I can help answer that one. So, then former Supervisor Aaron Peskin was the one who did the resolution before the Board of Supervisors to remove the name of Justin Herman Plaza because he felt a lot of the history of his work in redevelopment wasn't fitting. So he moved forward, the board approved his resolution to remove the name. He had a temporary placeholder, which is Embarcadero Plaza, which is what it is today.

[00:22:58] Audience Member 5: We all agree on removing the name. What I'm saying is that Justin Herman would have approved of this process, which is to get rid of the past to make way for for whatever.

[00:23:11] Speaker 1: Appreciate that comment. I'm just clarifying because you were asking when it got removed and how that's the answer to that one. Sorry. Yes, gentleman in the navy shirt.

[00:23:26] Audience Member 6: Thanks. I'm Dan Rabinowitz, um, and I wanted to make two observations. First, I think we owe a huge debt of thanks to the people who are putting this project together, to Rec and Parks and to the designers. This is conceptually a genuinely brilliant design. And it is a design which hinges on the ability of integrating both parts of this park as one greensward space. That's a huge benefit for the city, for all of the different individual and collective users of this park and for the future. And it is hard for me to see A, regardless of the extraordinary cost that would be clearly entailed in maintaining the fountain, it's hard for me to see how the core of this design would actually work unless we can recapture that space for green space for the future. So, I think these are, I think this is a core element of the design that all of us have been admiring this evening. And I think we have to recognize that. I do believe that memorializing the fountain in some fashion is an entirely feasible project and I think that's something that should be undertaken as part of this redevelopment. But we have an obligation to the future as well.

[00:25:01] Audience Member 7: [unintelligible] I just want to agree with what the gentleman just said. I moved here when the freeway was coming down and the fountain was flowing and the freeway was up, and it really identified the area. When the water was flowing and it's like it just, it really dignified what the fountain was supposed to be about, I think different, it was lively. And so I'm dead set against getting rid of the fountain. And I think most of the people that've been here since, you know, before 1989 option where you could save the fountain in under current circumstances, with the intention of renovating it later so that you can create the park around it, and then at some future time when maybe you can raise that money or you get a new generation of volunteers on a commission out there, that's what I want to see happen.

[00:25:52] [applause]

[00:26:02] Speaker 1: So, just to re-clarify because I think there's been questions in regards to the funding for this project is for downtown improvement and recovery and revitalization. What Joanna was talking about, the cost of our project budget would not be able to cover the cost of the art restoration of the fountain piece. So that's the reason why it puts us in a position where the funding needs to go to an actual project that we can deliver. It cannot be used for restoration purposes because that was not the intention of that fund.

[00:26:36] Speaker 1: Okay. I see the person with the hoodie in the back over there.

[00:26:40] Audience Member 8: You mentioned how much it would cost to to restore. You mentioned how much it would cost to tear it out. How much would it cost to spend 30 minutes of your time brainstorming other options, like in visual.

[00:26:54] Speaker 1: That is why we're here today.

[00:27:02] Audience Member 9: I appreciate the work is being to. So my question is, what can be had for use of space for the unhoused and our homeless population?

[00:27:23] Speaker 1: Thanks. Um, so the plans over here are talking about having a stage and increasing um, usability. A stage facing outward, so that way it's not towards the residents, but yeah, basically like having some kind of iconic stage. Hasn't been designed yet. Here's a placeholder of location based on our studies of sun and wind and sound. Um, and also being able to kind of have that flow go outwards. U2 concert happening at the Vaillancourt Fountain is facing this way and really limits the amount of people that are able to see and access it, unless you're on the freeway. Um, but yeah, thanks.

[00:28:06] Audience Member 10: Hi. Um, thank you for hosting everything tonight. Um, I feel like there's, uh, I'm speaking on behalf of the document and the contractor and I think in perspective, um, and you know that there's a huge skateboard community in my family. Um, I think there's sort of a tension in what is being presented tonight and that it looks to show a demolition of the fountain and Embarcadero Plaza and then what is offered is the space, not a design, which is a space that is still in motion. Um, but there's these ideas about programming. And I think what is lacking or what feels like is lacking in this presentation is a conversation about preservation. Um, I would think that a park stage area would be very appropriate for, um, in front of a stage, we can have a concert or something like that, which would be more accessible maybe than what's on, um, what you're calling a plaza where there's currently a plaza and the actual plaza that made, um, will you be, I mean, are you thinking about demolishing the Embarcadero plaza? Um, how much does that like play into, um, what you're preserving? And then I'm also going to call this a park. Um, once you get any hot like a park and a plaza. So, I guess I'd be great if you could just touch on Embarcadero Plaza, its role for, um, mass gatherings.

That's something that we need more than anything to see people downtown. That has been a huge, um, important part of our school and our community.

[00:29:49] Speaker 1: Yeah, so a couple points that I think we're looking at what the actual materials are being used here. And this is just initial concept. The idea of the project is that we're unifying this space into a park that will have hardscape, that will have softscape, that will be mixed use, that will have circulation paths throughout. And so we're looking at how we can have a well-integrated single park instead of having a split down the middle of this versus that, but instead having this kind of multi-use area be the connecting factor, um, to really be able to make this a dynamic, vibrant, accessible area. Um, in terms of the plaza, are you demolishing the plaza? Are you getting rid of this or that? I think we're here today to really hear about what parts and pieces of Embarcadero Plaza, Sue Bierman Park and their history are super important. And then go into a deeper dive of cost estimates and what it takes to preserve that or relook at pieces and parts as we're continuing on. So, yeah, there's parts of the brick paving that no longer meet ADA. Does it mean we're just going to like take them out and throw them in the garbage? Or does it mean those parts and pieces are really important? Can we integrate bricks into the, those exact bricks into the new design, right? And so we're looking for that kind of feedback of what's important to you right now and why. I think the why is what, the meat of the question, right? So hearing that people had these lovely memories of Embarcadero Plaza and I got so many emails and people talking about, you know, I I ran through it as a kid and I was splashing water and maybe I drank some or, you know, whatever. But that's the reason that this makes this really difficult to consider it is like what people love is that it was a working fountain. What people love is that they could play and they could interact with it. And that's where, that's where that struggle is. So again, typically on our projects, we're offering multiple options with the fountain, without the fountain. That's kind of where we were starting at after community one is we're hearing these wants and needs from, from the mama, from SF Heritage, from the Vaillancourt family. So yeah, we absolutely are considering this. But then once we got that cost estimate, which is something that's from the stakeholders requested, this can't fit within our project budget, but also there are safety concerns and there's hazardous materials, there's seismic concerns, so on and so forth. So we're here to hear you out with this announcement. I know it's a lot and we just want to take that feedback and so we can continue the project.

[00:32:30] Audience Member 11: I was the person from the development college.

[00:32:37] Speaker 1: Okay. Because it's 7:30 and we're way over time, but I'm going to take three more questions from folks, the woman with the mask in blue.

[00:32:48] Audience Member 12: Hi, I'm one of the street artists in the Street Artists Program and I just heard the gentleman this explain that this area might be for skateboards. This is where we are, we have two rows of booths right here. This is Market Street sidewalk, so this is where the foot traffic goes right now. And that's very important for our, um, you know, how we make our living. And most of us, all of us are, this is our business, this is our livelihood. And so, and it's program's been around since 1972. Um, basically, it's very important for us to have foot traffic. This, I hope would continue to be a, you know, sidewalk. Skateboarders right now are over here. This is a crosswalk basically. So, I've seen the skateboarders like wait for pedestrians to have to go by. And I understand that they deserve their own space. I think it'd be great um for somewhere over here where it's completely safe for everyone because those skateboards go flying. They have to, I mean, I've seen people crash into pedestrians or whatever and so it's, I, I'm not against them at all, but I'm just saying that they deserve their own safe space and somewhere where they can just go for it, you know? And I hope that's not where we are. Because we are, we've been there for a long time. And anyway, that's all.

[00:34:22] [applause]

[00:34:25] Speaker 1: All right, I'll take two more questions, the guy in the back in glasses, blue t-shirt.

[00:34:39] Audience Member 13: Uh, thanks. I appreciate the thought that's been going into the presentation and uh the design process. I think maybe a question since the city is facing over an \$800 million budget deficit, uh federal funding is obviously being cut off at the knees for the arts. We're facing a lot of uh economic turmoil. And we've thought about doing a version of this that costs less and then actually maintaining it? Because that seems to be where things fell apart. We failed to do the maintenance. Can we consider an option that may cost \$5 million, \$10 million, that doesn't rip everything up? Instead promotes the idea of maintaining what we have and figuring out a plan that will last the next 30 years? Because I just worry, you heard about the Sue Bierman Plaza, had to fix it, what is it, 10 years later? I worry

that will happen here. Is there an option where the capital cost is lower and then we spend that money more thoughtfully over time that doesn't require just a one-time thing and then we're going to defer that maintenance all over again?

[00:35:38] [applause]

[00:35:45] Speaker 1: Thanks. Um, yeah, so I think we're here to kind of consider what all the options can be. And I think part of it is that the issues with the fountain are from literally the soil on up. And so it's not just putting a band-aid fix or just making it so we can kind of continue it on for a few years, um, but part of that is—

[00:36:04] Audience Member 13: The plaza overall, not the fountain.

[00:36:05] Speaker 1: Oh, thank you. Plaza. I understand spending \$35 million on the plaza and then have no plan of maintaining it.

[00:36:10] Speaker 1: Yes, thanks. Got it. Understood. Um, so yeah, plaza overall, that was one of the shared goals that people wanted was a place that is easily maintainable, a place that is accessible, a place that does feel safe. So yeah.

[00:36:26] Speaker 1: All right, one last question. The guy in the black t-shirt.

[00:36:37] Audience Member 14: Thank you. Uh, my name is Andrew. I'm one of the skater guys. I was here at the last meeting as well. Um, I just want to say I appreciate everyone voicing their opinions. I also appreciate hearing about all the concerns with the skate space, um, and especially, um, we definitely hear you about the potential clash with like the artists. Like that's the last thing we want to do is have any clash. I can hear a story that absolutely broke my heart about people feeling that they were forced out by the skate community. That's the last thing that we want to do and I want to just make that clear, like representing us skaters over here, that's the last thing we want to do is force anyone out. We just want a space where we still feel that we're included, as was mentioned. Um, you know, we're here, we're over at Pier 7, like we're already in the space. Um, we just want to feel represented as well. And if that means like a separated space, that means a separated space. And I know that was a bit of a controversial thing, but um, I just want to voice to the folks here that, um, we just want a place to practice our craft and we're in favor of multiple options.

[00:37:41] Speaker 1: Thank you so much. So we have been talking with the skateboard community, Ted Barrow, Ashley Rayfield. One of the questions we had was how do

we design a space for the skateboarders and how do we not design the skate space for the skateboarders in some areas, right? And the response to that was through design. How do I say no skateboarding here without being a jerk and without just adding, adding skateboard deterrents as an afterthought? And so part of that will be how we're designing this space and hearing your voices on precedents that work really well and you see it and you're like, okay, yep, can't skate in this area. Okay, this is my zone. So our preference is to not have to put signage up and have skateboard deterrents, but to make it obvious. And I think hearing these voices from the art vendors, hearing the voices from the skateboard community, I think the overarching idea that everyone wants to be heard and respected and that's what we're trying to do here.

This transcript was automatically created through the use of generative AI. Some minor corrections were made to speaker names, but no other adjustments were

[00:18:35] Speaker 1: Um, we're way past time. I thank you so much and my ask is that everybody be sure to turn in your surveys so that way your comments are heard, right? And there are multiple ways to engage with us. There's the surveys here. We're going to do we have a digital survey out as well. There's a QR code on there. If you're following our email updates, we'll send you the link, pass it around. Um, and thank you everyone for your time.

Vaillancourt Fountain excluded from Embarcadero Plaza revamp plans

 [sfchronicle.com/bayarea/article/vaillancourt-fountain-embarcadero-renovation-20759560.php](https://www.sfchronicle.com/bayarea/article/vaillancourt-fountain-embarcadero-renovation-20759560.php)

Sam Whiting

July 9, 2025

Vaillancourt Fountain is seen through the frame of a security fence being constructed around it on San Francisco's Embarcadero Plaza in June. City officials said Tuesday that the fountain is not included in plans to renovate the plaza.

Lea Suzuki/S.F. Chronicle

UPDATE: [Removal of controversial fountain from S.F.'s Embarcadero Plaza formally approved](#)

The fight for Vaillancourt Fountain heated up Tuesday night at a community meeting where a San Francisco city official said publicly for the first time that the controversial concrete sculpture is not part of the renovation plan for Embarcadero Plaza.

"We did look into keeping the fountain on-site," Recreation and Park Department Project Manager Eoanna Harrison Goodwin told a decidedly pro-fountain audience, "but once we got the cost estimate, it is beyond our project budget."

- **Update:** [S.F. officials take first formal step to remove controversial fountain from Embarcadero Plaza](#)
- **Read more:** [S.F.'s controversial fountain deemed 'hazardous' and will be fenced off indefinitely](#)
- **Chronicle survey:** [What should San Francisco do with the Vaillancourt Fountain?](#)

The revelation, while not the final word on the 710-ton sculpture, was perhaps the most discouraging sign yet for its ardent supporters that its days on Embarcadero Plaza may be numbered.

The blocky Brutalist fountain, a lightning rod for public opinion since its debut a half-century ago, has deteriorated and broken down in recent years. In June, the park department fenced it off [after declaring it a public hazard](#) based on a report that concluded a full renovation would cost roughly \$17 million.

A new independent estimate now pegs the cost at \$29 million, Goodwin said Tuesday — a dramatic jump that earned a collective groan from the crowd. That number did not include the cost of plans, permits and annual upkeep of at least \$100,000.

That means fixing the fountain would cost nearly as much as the entire Embarcadero Plaza makeover project, budgeted at \$32.5 million, Goodwin said.

The estimated cost to dismantle and remove the fountain is \$2.5 million, Goodwin said.

A sign warns that the fenced-off Vaillancourt Fountain is closed to the public for safety reasons at Embarcadero Plaza.

The plan is to combine Embarcadero Plaza and the adjacent Sue Bierman Park to form a single 5-acre multiuse park, twice the size of Union Square. The complicated project is a public-private partnership between the Recreation and Park Department, which manages the land; BXP, which owns the four Embarcadero office towers; the Downtown SF Partnership; and the Office of Economic and Workforce Development.

Though the park department maintains the fountain and is indicating it no longer wants it, it does not own the sculpture and has no authority over its possible removal. It is part of the Civic Art Collection, and its fate will eventually be determined by the San Francisco Arts Commission and possibly the Board of Supervisors.

Tuesday's community forum at Codi, a meeting popup at Embarcadero Three, came just one month after the fountain's creator, 95-year-old artist [Armand Vaillancourt, made a rare visit](#) from his Montreal home to lobby the park department and the arts commission to preserve his namesake work.

The fountain has been shut off for a year since its pumps broke, but Vaillancourt told the Chronicle that with some cleaning and repairs it would last another 50 years or more.

Vaillancourt was not among the 200 people who RSVP'd for Tuesday's meeting, but his daughter, San Francisco resident Oceania Vaillancourt, attended and made an emotional plea for her father's creation.

"My dad asked me to help him," said Vaillancourt during the Q&A session after the city's presentation, noting she lives two blocks away and goes by the fountain every day. "I just can't imagine the fountain not being there," she said through tears. "I just hope we can gather the community and hopefully change the decision of removing the fountain."

San Francisco Recreation and Park Department officials make a presentation on the Embarcadero Plaza renovation and the Vaillancourt Fountain at Codi, a meeting popup at Embarcadero Three, on Tuesday night.

Also in attendance were members of the Northern California [chapter of Docomomo US](#), a modernist architecture preservation group that has been staging actions to save the fountain.

The sculpture, which currently sits in the middle of the multiuse area, was not on any of the diagrams presented Tuesday by HOK, the design firm hired for the project. The diagrams showed a location for a “permanent art piece,” though apparently not the one that is already there, Petra Marar of Docomomo noted.

“The fountain is not on any of the options,” said Marar. “It feels like it is all or nothing, keeping it or removing it, and it feels like they are removing it.”

Andrew Sullivan, a landscape architect who worked with the famed Embarcadero Plaza designer Lawrence Halprin, said, “The process that the city went through to determine that the fountain needs to be removed is disingenuous. They predetermined that the demolition of the fountain is a given without any actual design. They just created excuses to get rid of it without any meaningful discussion.”

The design of the park has also yet to be determined. The future unification of Embarcadero Plaza and Sue Bierman Park will be continued at a third meeting to be scheduled this fall. The park will then enter the design phase.

“We want your help in shaping this beautiful space,” said Goodwin.

MEETING NOTES

Project: Embarcadero Plaza Refresh

Meeting Date: July, 21 2025

Meeting Location: BxP Office

Notes By: Roana Tirado

Participants: SF Park & Rec:

LB: Lisa Bransten (online)
EG: Eoanna Goodwin
BV: Beverly Ng (online)
KR: Kelli Rudnick

BxP:

AF: Aaron Fenton

Hellmuth, Obata + Kassabaum (HOK)

BJ: Brian Jencek (online)
RT: Roana Tirado
YK: Yong Uk Kim
ZB: Zorana Bosnic

The following meeting notes were prepared by HOK. The notes reflect the author's understanding of discussions and provide a record of the agreements reached at the meeting. Should any of those present have different recollections or find errors or omissions in the notes, please advise the author in writing within five calendar days of receipt of the meeting notes. The failure to notify HOK of errors or omissions within a reasonable time following receipt of the meeting notes is deemed acceptance of the discussions and record of agreements stated herein.

Notes:

Item No.	Item	Action By	Date Req'd.
	Meeting Purpose: Weekly Project Delivery Meeting		
1	Survey Summary 1) EG shared update on Survey Response a) Preservation of Site Character & History: i. Desire to maintain the existing character of the plaza and incorporate more historical context into the design. b) Programming Balance i. Some feel the park is over-programmed and trying to serve too many users, reducing its quality as a public space. c) Vaillancourt Fountain i. Divided views remain on keeping vs. removing vs. preserving parts of the Vaillancourt Fountain. d) Street Artists i. Strong support for keeping dedicated, visible space for street artists and vendors. They very much like their current location in the middle of the right of way so folks need to walk past their booths. e) Skate Area i. Questions on what it will be, where it will go, and concerns about conflicts with street artists, kids, seniors, and pedestrians. Strong preference to separate from other uses f) Dog Park i. Many question if it's needed or if it's too large. Some suggest smaller or more integrated dog-friendly options. Other question the location – some say it should be along Embarcadero where it's noisier and further away from some of the habitat life at Sue Bierman West while others think it should be at Sue Bierman West. g) Stage Use i. Concern that the stage will become inactive when events		

	<p>aren't happening. Suggestions to ensure it remains engaging daily</p> <ul style="list-style-type: none"> h) Public Art <ul style="list-style-type: none"> i. Questions about whether art will be a single feature or dispersed throughout the site. Desire for thoughtful integration i) Playground <ul style="list-style-type: none"> i. Requests for more shade and an expanded footprint to serve more families j) Circulation & Multi-Use Areas <ul style="list-style-type: none"> i. Confusion around definitions of multi-use versus plaza and where circulation paths will be. Concern about mixing skaters and pedestrians in shared circulation paths k) Native Plants & Biodiversity <ul style="list-style-type: none"> i. Strong interest in preserving and enhancing native plantings to support urban biodiversity—especially birds and pollinators. Requests to prioritize ecological design and avoid overly ornamental landscaping. <p>2) Group Discussion of Preliminary Results</p> <ul style="list-style-type: none"> a) Street Artists <ul style="list-style-type: none"> i. One touchpoint meeting with the street artists recommended as their use is currently permitted by the Arts Commission not RPD b) Skate Area <ul style="list-style-type: none"> i. BJ noted feedback at community meeting regarding the skate zone the team identified was positive from all stakeholders c) Stage Use <ul style="list-style-type: none"> i. AF recommended shaping the stage like the Vaillancourt Fountain as a way of memorializing the fountain with the incorporation of a ledge that tiers up to the stage for use as an informal skateable space. Structure recommended for ease of use by users of the stage. ii. Concerns around potential for clash of uses discussed d) Preservation of Site Character & History <ul style="list-style-type: none"> i. Reclamation of brick discussed ii. Resue of exact brick difficult but new bricks can be used 		
2	<p>Design Schedule Discussion</p> <ul style="list-style-type: none"> 1) Mayor's mandate for groundbreaking by Fall 2026.HOK developed a proposed schedule with critical milestone dates to achieve that date. 2) Proposed Design Schedule Discussed (See attached) <ul style="list-style-type: none"> a) Select Final Program July 28th b) Final Survey Results August 1st c) Submit CEQA application August 1st d) Visual Arts Committee Early August <ul style="list-style-type: none"> i. Draft letter to be crafted by RPD outlining recommendations on next steps regarding the Vaillancourt Fountain. ii. RPD to explore risks around lack of maintenance to the fountain iii. Goal to broach initial approval to remove, with final removal occurring after CEQA completion e) Select Final Design Concept August 18th f) Arts Commission September 5th g) Renderings Complete October h) Community Meeting 3 Early November i) RPD Commission Mid-November 		
	<p>Next Steps</p> <ul style="list-style-type: none"> 1) HOK to send list of decisions needed to RPD (sent via email 7/22) 2) RPD to have responses by 7/29 PD meeting 3) RPD (Lisa) to provide donor recognition packages (sent via email 7/23)

Subject: Embarcadero - Fundraising Meeting

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi all,

Looking forward to seeing everyone at our Fundraising Campaign meeting this Wednesday at 10:00 AM. Please see the agenda below:

1. Review previous uncompleted tasks
2. Review and Discuss following Documents:
 - a. Naming Opportunities document
 - b. Donor Recognition document
 - c. FAQ document
 - d. Deck
 - e. Top Prospects for DDC
3. Share update on conversation with DDC
4. Update on interview status
5. Discuss next steps

Please note that Tulshe and Travis from CCS will join us for this meeting.

Best,
Sonia

How the Embarcadero Plaza became an iconic skateboarding spot

 surfertoday.com/skateboarding/embarcadero-plaza-skate-spot-history

Luís M. Pinto

August 7, 2025

When you step on San Francisco's Embarcadero Plaza's red bricks, you can almost feel and hear the urethane wheels of thousands of skateboarders rolling and stomping this magical and historical spot.

For an outstanding era in skateboarding's timeline, "EMB" was its beating heart. Could it last forever?

When architects Lawrence Halprin and Mario Ciampi first laid out the plaza in 1971, they imagined an Italian piazza, wide, open, graceful, red brick inspired by Siena's Piazza del Campo.

The idea of it becoming a landmark for an urban sport would be unimaginable.

After its construction, Armand Vaillancourt added a dramatic, roaring fountain holding about 30,000 gallons of recycled water per day that hid the roar of the old double-decker freeway.

That freeway framed the plaza until 1989, when the Loma Prieta earthquake toppled it and cleared the view to the Bay.

The Embarcadero Skate Pioneers

Suddenly, EMB, formerly known as Justin Herman Plaza, shifted from a quiet civic plaza to the perfect urban skatepark.

By 1986, [Mark Gonzales](#) and James Kelch were already pushing Embarcadero into legend.

They were among the pioneering crew, which also included Michael Kelly, Danny Alvarez, Craig Fry, and a few more.

Gonzales ollied "The Gonz" gap, then kicked it up a notch with a kickflip over the same wide stair gap. He boardslid the kinked C-ledge.

Kelch and early locals like Kelly and Alvarez skated benches, walls, and the fountain's edge.

Word spread fast: EMB was ground zero for technical tricks. In 1989, a new sidewalk surfing wave arrived.

Tricks flipped from parking-lot freestyle into fearless street stunts. Primo axle marks appeared in clusters on the west-side stairs.

Those tiny dents stand for every slam during endless kickflip and shove-it sessions. They're pure raw street art.

Skaters chased that fleeting moment when board, feet, and brick align in perfect harmony.

Watch Video At: <https://youtu.be/hXrdZ5kWRqs>

The Making of a Myth

1992 became EMB's high-water mark.

Mike Carroll and Jovontae Turner made their names here. Carroll's nose-manuals and Turner's powerful lines showed finesse and raw style.

Henry Sanchez landed pop-shove-it crooks that stunned viewers in "Tim and Henry's Pack of Lies."

On the "Seven" - actually a six-stair dubbed in jest - a young Fausto Vitello snapped photos of skaters carving the wall above the fountain.

Every trick etched itself in EMB's stone. Crowds swelled. On a busy day, nearly a hundred skaters pushed lines and filmed parts.

Jeremy Wray chased gap impossibilities. Karl Watson embodied San Francisco's laid-back flair. Lavar McBride showed local pride and prodigious power.

James Kelch earned the title of Embarcadero's "mayor" by the mid-1990s, ruling sessions, judging lines, and inspiring newcomers.

But it seems like the adage that says everything that has a beginning has an ending is inevitably true.

By 1995, plaza security cracked down. Skate-stopping brackets crept onto ledges. Once-golden lines narrowed or vanished completely.

The spot's golden era (1989-1993) seemed over, yet the Embarcadero's legend still showed signs of growth and vitality.

Photos of Jim Thiebaud frontside ollieing a corner ledge made magazine spreads. Mike Carroll's backside lipslide around a kinked ledge became part of skatepark design worldwide.

Video game creators even modeled "[Tony Hawk's Pro Skater](#)" "Streets" level on Embarcadero's layout as solid proof of the plaza's global reach. "Skater XL" did the same in the 21st century.

At the turn of the millennium, a major redesign removed many original ledges and steps.

Embarcadero's skateable features faded in the early 2000s redesign, with, for instance, bricks giving way to smooth concrete and planters.

Clouds Over EMB

Short-lived pop-up events - like the \$1.5 million roller-rink experiment in 2023 - couldn't spark lasting interest. Meanwhile, skateboarders crossed the Bay to DIY parks or headed to Golden Gate Park.

Then came the multi-million-dollar redevelopment plan in early 2025.

The Board of Supervisors signed off on a public-private deal to raise over \$30 million for a five-acre reimagined plaza.

Renderings showed grassy lawns, playgrounds, concert stages, and no ledges to grind.

Skateboarders feared losing the last tangible piece of EMB's story: the perimeter of Vaillancourt's fountain.

Historian Ted Barrow launched a "Save Embarcadero Plaza" petition that racked up over 2,000 signatures in a day.

He reminded planners that skateboarders risked arrest and board confiscation since the mid-1980s to keep EMB alive.

He urged the city to include skateable elements, preserve the fountain's edge, and install a plaque honoring the plaza's role as street skating's colosseum.

But when you step onto EMB's bricks, you still feel the echo of Gonzales' ollies, Carroll's manuals, Turner's fluid power, and every skater who chased that perfect landing.

May the bricks never disappear and the spirit of skateboarding prevail.

Embarcadero Park Campaign Agenda & Notes

Date: August 20, 2025

Attendance:	Aaron Fenton, BXP	Lisa Bransten, RPD
Robbie Silver, DSFP	Jacob Bintliff, OEWD	Claude Imbault, DSF
Laura Kerl, B	Sonia Gonzalez Banks, DSFP	

1. Review Outstanding Tasks

- Mark A/B for Survey or Interview - Laura said she would work with Aaron on this. COMPLETED
- RPD Deck with Hi res photos to Sonia - RPD - COMPLETED
- Finalize top 15 - Lisa would work from materials she received from Sonia to build a list of prospects and send directly to Tyler. She told Sonia she would let her know when it was completed. COMPLETED
- Approve FAQ - Sonia to received final edits from Lisa COMPLETED
- Approve Donor Recognition Draft - ONGOING/On HOLD

2. [CCS Study Project Timeline](#) The team discussed delaying the report another two weeks to priritize the right prospects for the interview data. To that end, Lisa and Sonia will work together to make sure new names are invited this week.

3. Interview Update

- Completed: Amazon, Hudson Properties, Third Plateau
- Upcoming: Reuben Junius Rose, Swig & Co., Lending Club,
- Pending: Alaska Airlines, Pieces Foundation, C.M. Capital Corporation
- Declined: JPMorgan Chase
- RPD Contacts to be connected: Katie Hall, Andy Schwab John Osterweis, Noah Wintroub

4. **E Survey Update** Sonia shared that the E-curvey will go out thursday morning to people designated to receive it and also to the interview candidates as a last effort to engage them.

5. **Status with SF DDC** The team reviewed Ned Seegelman's reply to Lisa's email and agreed that the goal is to have him and the DDC focus on the culled list Lisa originally shared. Lisa will send a response tomorrow after Aaron and Robbie review the list.

6. Review Gifts Table/[Naming Opportunities document](#)/[Donor Recognition document](#)

The team review this document and agreed that this needed to be on hold till the next iteration of the design was finalized. The gift table and naming opportunities will be built to go hand in hand.

7. Next Steps

- Lisa to reply to Ned with Culled Prospect List
- Lisa to introduce four prospects to Sonia to invite for an interview.
- Lisa and Sonia to work to gather more names for interview list.
- Aaron and Robbie to review culled list.

S.F. officials formally request removal

 sfchronicle.com/sf/article/vaillancourt-fountain-removal-embarcadero-plaza-20825905.php

Sam Whiting

August 20, 2025

The Vaillancourt Fountain at San Francisco's Embarcadero Plaza was fenced off indefinitely on July 8 after officials deemed the aging structure unsafe.

UPDATE: [Removal of controversial fountain from S.F.'s Embarcadero Plaza formally approved](#)

San Francisco parks officials have requested the removal of the massive Vaillancourt Fountain from Embarcadero Plaza, the first written acknowledgement that they do not intend to include the controversial 710-ton sculpture in [the plaza's planned redesign](#).

"We respectfully request the Arts Commission's consideration and approval to proceed with the formal deaccession of the Vaillancourt Fountain from the Civic Art Collection and its removal from Embarcadero Plaza," read a letter from Recreation and Park Department General Manager Phil Ginsburg sent Monday to top management of the Arts Commission, which owns the fountain.

“This step is necessary to ensure public safety, uphold responsible stewardship of civic assets, and realize a reimagined Embarcadero Plaza that serves all San Franciscans.”

[Add Preferred Source](#)

The letter, a copy of which was provided to the Chronicle by park department officials, notes that it would cost an estimated \$29 million to restore the broken-down fountain to working order. That sum almost equals the entire \$32.5 million budget for the ambitious park makeover to combine the area formerly known as Justin Herman Plaza with Sue Bierman Park, creating a seamless 5-acre multiuse destination across from the Ferry Building.

The concrete Brutalist fountain, which has been a lightning rod for public opinion since its premiere a half-century ago, sits in the middle of the planned multiuse area. A park department report estimates that it would cost \$2.5 million to remove it.

A rendering of the conceptual proposal for a remake of Embarcadero Plaza at the foot of Market Street. The idea is from BXP, owner of the multi-towered Embarcadero Center to the west. Any makeover would be a city project, so details are likely to change if it eventually occurs.

HOK and BPX

The park department owns the property and is in charge of the plaza renovation project, which is a public-private partnership. But the Arts Commission will ultimately determine the fountain's fate.

The letter was received by the Arts Commission on Monday afternoon, and staff is considering next steps, which will include evaluation and a presentation to the Visual Arts Committee and full commission at a meeting this fall. The fountain cannot be removed without the commission's approval.

If the commission votes to deaccession it, the sculpture will no longer be part of San Francisco's Civic Art Collection, in which case it would either be destroyed or offered back to the artist who created it, Armand Vaillancourt, or even a private collector. Either party would have to cover the cost of its removal, according to Coma Te, director of communications for the Arts Commission, the city agency in charge of art and culture.

"Due to the size and nature of the work it would prove difficult to relocate elsewhere in the city," Te said. "The full commission will have the final say, and if they decide to keep it we will need to find a funding source to renovate it."

The cost of its removal, should that be the final decision, is included in the budget for the Embarcadero Plaza project, which is in the design phase. Initial renderings did not include the fountain, prompting an outcry from preservationists who want the sculpture, opened in 1972, to remain. Those concerns even brought a visit from Vaillancourt, now 95, from his home in Canada to San Francisco in May [to argue for its restoration and preservation](#).

“This survived a 7.1 earthquake with no damage, not a scratch, but they never took care of it,” he told the Chronicle during the June visit in reference to the 1989 Loma Prieta quake, whose magnitude was downgraded to 6.9. “There’s nothing wrong with it except the dirt.”

But the fountain, which has been inoperable for more than a year, [was determined to be a public hazard and fenced off indefinitely in June](#).

Armand Vaillancourt visits his Vaillancourt Fountain in Embarcadero Plaza in May.

Lea Suzuki/S.F. Chronicle

At a community outreach [meeting in July](#), Project Manager Eoanna Goodwin told the audience that it was impractical to keep the fountain, a statement that moved the artist's daughter, Oceania Vaillancourt, who lives in San Francisco, to tears.

The letter sent Monday was the written follow-up to that determination.

“The current location, scale, and orientation of the fountain fragment the plaza, hinder sightlines, and constrain circulation and event programming,” read the letter. “The scale of the fountain is incompatible with the open lawn and gathering spaces envisioned in the new design. Simply put, the design cannot meet community needs or project goals while retaining the fountain in place.”

Alexis Vaillancourt, who represents his Montreal-based father, said he still held a glimmer of hope when reached by phone Wednesday. “We are not surprised. Everything was going that way,” he said. “We are still trying to see what is possible to do, in order to preserve it.”

SF Rec and Parks Officially Requests Removal of Embarcadero's Vaillancourt Fountain

By Joe Kukura

Published Aug 20, 2025, 3:20 PM

Source: <https://sfist.com/2025/08/20/sf-rec-and-parks-officially-requests-removal-of-embarcaderos-vaillancourt-fountain/>

In the most decisive move yet to remove the ungodly but marginally beloved Vaillancourt Fountain in Sue Bierman Plaza, the SF Rec and Parks Department has come right out and asked the city to tear that fugly fountain down.

The writing has been on the concrete tubes for more than a year that the Brutalist and currently fenced-off → <https://sfist.com/2025/06/09/sfs-controversial-vaillancourt-fountain-deemed-hazardous-now-getting-fenced-off-to-the-public/> Vaillancourt Fountain next to the Embarcadero may be dismantled and removed. The massive, sculptural fountain was very conspicuously not included in the plans of a proposed \$32 million renovation of Embarcadero Plaza → <https://sfist.com/2024/07/17/city-looks-at-total-reimagining-of-embarcadero-plaza/> that were released in July 2024. There have been some pleas to preserve the fountain → <https://sfist.com/2025/04/21/very-unattractive-embarcadero-fountain-may-be-demolished-but-its-fans-are-fighting-to-preserve-it/> over the years, even from the fountain's 95-year-old sculptor Armand Vaillancourt → <https://sfist.com/2025/05/22/95-year-old-artist-behind-often-reviled-embarcadero-plaza-fountain-flies-to-sf-to-save-it/>, but the piece seems to have fewer and fewer supporters who want to see it stay. And, the cost of keeping it is reportedly prohibitive.

On Monday, the highest-profile City Hall figure yet openly called for the fountain to be torn down. The Chronicle reports that SF Rec and Parks Department manager Phil Ginsburg officially requested that Vaillancourt Fountain be removed → <https://www.sfchronicle.com/sf/article/vaillancourt-fountain-removal-embarcadero-plaza-20825905.php> in a letter to the SF Arts Commission.

Ginsburg's request is not surprising, because other Rec and Parks officials already said they'd rather it be removed → <https://sfist.com/2025/07/09/embarcadero-plazas-highly-unattractive-vaillancourt-fountain-likely-d-one-for-according-to-rec-and-parks-official/> in previous public meetings. But this came from Phil Ginsburg, the boss at SF Rec and Parks, so it's a pretty strong shot across the bow.

"We respectfully request the Arts Commission's consideration and approval to proceed with the formal deaccession of the Vaillancourt Fountain from the Civic Art Collection and its removal from Embarcadero Plaza," Ginsburg said in his letter to the Arts Commission. "This step is necessary to ensure public safety, uphold responsible stewardship of civic assets, and realize a reimagined Embarcadero Plaza that serves all San Franciscans."

Regardless of whether you feel the fountain is monstrously ugly, this City Hall debate is being largely motivated by economics. The currently water-less fountain → <https://sfist.com/2017/08/10/appalling-embarcadero-fountain-woul/> would cost \$29 million to fix and make operable again, and the budget for the whole Embarcadero redesign is \$32.5 million. Meanwhile, Rec and Parks estimates it will cost just \$2.5 million to remove Vaillancourt Fountain.

It is not Phil Ginsburg or Rec and Parks' decision on whether to remove the fountain. While Rec and Parks technically owns the Sue Bierman Park property, the Arts Commission owns the fountain itself, as a piece of civic artwork. So it is ultimately the decision of the SF Arts Commission on whether the fountain will stay up or be torn down.

That commission's next meeting is scheduled for Friday, September 5 → <https://www.sf.gov/meeting-september-5-2025--full-arts-commission-meeting>. But the SF Arts Commission said in a statement to SFist that the matter will be heard by the commission's Visual Arts Committee before going to the full SF Arts Commission.

Note: This post has been updated with a statement from the SF Arts Commission.

Karl Watson sits on his skateboard in front of the Vaillancourt Fountain in San Francisco on Sept. 10, 2025. San Francisco's planned overhaul of Embarcadero Plaza would see the controversial Vaillancourt Fountain removed. Generations of street skateboarders know it well. (*Martin do Nascimento/KQED*)

He jumped on his board, went for a trick that he now admits he didn't have the skills to pull off, and fell hard.

James Kelch, whom Watson described as the leader of the famed "Embarcadero crew, → <https://www.thrasher magazine.com/articles/emb-30-year-reunion/>" approached him, picked him up and sat him on a concave concrete wall the skaters knew affectionately as the "wave."

"That was my initiation," Watson said, laughing.

The wave itself was torn down decades ago, and now, the city is planning a multimillion-dollar renovation that would destroy another of the plaza's most iconic features: the Vaillancourt Fountain.

Watson is among a growing cohort of skaters, architecture historians and the artist himself who are pushing to preserve the brutalist tangle of boxy concrete pipes that was featured in the background of so many famous skating video parts filmed at the plaza. The fountain, they say, is a part of the city's history.

A touchstone of street skating

Embarcadero Plaza — or “EMB” to skaters — is already almost unrecognizable from the spot where Watson spent long days as a teenager in the 1980s and '90s.

The public square across from the Ferry Building once featured blocky concrete steps and ledges, a playground for street skateboarders. It's since been renovated to add uneven cobblestones, grassy patches and metal skate-stoppers on railings. Two pop-up padel courts tower in the center.

The Vaillancourt Fountain in the Embarcadero Plaza in San Francisco on Sept. 8, 2025. The 40-foot concrete fountain was designed by artist Armand Vaillancourt and installed in 1971. *(Beth LaBerge/KQED)*

The controversial Vaillancourt Fountain has been fenced off since it was deemed a safety hazard in June.

EMB hasn't been as prominent a skate spot for years, Watson said, since the city cracked down in the '90s and renovations at the turn of the century made the landscape less enticing.

And aside from a drop-in stunt by famed skater Zachary Kovacs for the cover of *Thrasher Magazine*, the Vaillancourt Fountain wasn't actually skated in — or even too close to — by most.

"If our board went in the water ... we'd either leave it in there, or fish it out reluctantly," Watson said, adding that the recycled water turned from blue to green to brown as it grew algae, was peed in and worse.

(L–R) Henry Sanchez and John Cardiel at the Embarcadero, 1992. (*Tobin Yelland; Courtesy Thrasher magazine*)

But since city officials began to talk of removing the Vallaincourt Fountain to make way for a new waterfront park → <https://sfrecpark.org/1819/Embarcadero-Plaza-and-Sue-Bierman-Park-R> last year, historical preservationists, landscape architects and art enthusiasts opposed to its

teardown have found an unlikely alliance in a skate community that said the fountain is a touchstone of the sport's history in San Francisco.

"That plaza ... and the fountain ended up becoming the epicenter of street skateboarding in the late '80s and early '90s," said Ted Barrow, a San Francisco skate and art historian. "At this moment, when the next generation of the best skateboarders in the world were filming video parts and shooting photos at this plaza, all of the surrounding buildings showed up in the background.

"Those landmarks made that spot really easy to find for skateboarders who were visiting San Francisco, and skateboarders started to visit San Francisco because of the videos," he said.

A controversial history

Canadian artist Armand Vaillancourt debuted the public art piece in 1971 to serve as a sort of counterweight to the towering Embarcadero Freeway that cut off the Financial District's high-rise apartments and office buildings from the city's eastern waterfront.

The 30,000 gallons of rushing water that circulated through the fountain every minute distracted from the din of horns and speeding cars, and its brutalist design brought together the freeway and cityscape, Barrow said.

The Vaillancourt Fountain in the Embarcadero Plaza in San Francisco on Sept. 8, 2025. (Beth LaBerge/KQED)

The fountain has always been mired in controversy — flyers passed out at its opening called it a “loathesome monstrosity → <https://web.archive.org/web/20250305215947/https://www.newspapers.com/image/460183168/>” and crowds cheered when Bono defaced it → <https://www.sfgate.com/entertainment/article/u2-s-bono-cited-as-graffiti-artist-4023631.php> during an impromptu public concert in 1987 — but since the freeway was torn down in the wake of the 1989 Loma Prieta earthquake, many have deemed the piece obsolete.

When the fountain’s water was shut off during California’s energy crisis from 2001 to 2004, then-Supervisor Aaron Peskin introduced a resolution to remove it, saying it looked out of place without the freeway and was too expensive to operate.

Questions about its purpose reemerged when it was again drained for years, along with the rest of San Francisco’s public fountains, in 2014 during California’s severe drought.

Now, it seems plans to demolish the fountain, which ran dry again in June 2024 after its final working pipe gave out, might finally come to fruition.

In November, then-Mayor London Breed announced that Embarcadero Plaza would undergo a \$25 million transformation, connecting it to the adjacent Sue Bierman Park and creating a 5-acre public square across from the Ferry Building.

The news spurred speculation about the fate of the fountain, which wasn't included in any of the drafted renderings. Vaillancourt, 96, traveled to San Francisco to advocate for his work's restoration in the spring, but last month, the Recreation and Parks Department confirmed his supporters' fears, formally requesting permission to remove the fountain from the city's Civic Art Collection → <https://www.sfartscommission.org/our-role-impact/about-commission/policies-guidelines/Public-ArtCivic-Art-Collection>.

In a letter sent to multiple departments last month, Vaillancourt demanded the city cease and desist all efforts to remove his work, and his attorneys say that they — along with a coalition of preservation groups — will take further legal action if needed.

Also ready to jump into the fight are skaters such as Barrow, who said the fountain is integral to a history the city shouldn't be so quick to forget.

The EMB Crew

Barrow remembers watching skate videos featuring Embarcadero Plaza with Vaillancourt Fountain looming in the background.

"I fell in love with San Francisco through those videos, and I'm not alone," he said. "Every city has these great attractions, and they're not always what they were intended to be. I think this is one of those things, and it's kind of appalling to me that they're even considering destroying this."

Skaters at the Embarcadero, 1992. (Kevin Thatcher; courtesy Thrasher magazine)

Barrow explained that before the late '80s, people mostly skated in empty backyard pools, skate parks or on wooden half-pipes.

Street skating as a style was developed at EMB.

"That is factual," Watson said.

Skaters who had popularized "sidewalk surfing" in the 1950s were aging and retiring. Meanwhile, a younger generation — galvanized in part by Michael J. Fox's skateboard chase in *Back to the Future* → <https://www.youtube.com/watch?v=qW2syroSQTs> — were arriving on the scene.

"Towards the end of the 1980s, street skating as a way of skateboarding started to develop," Barrow told KQED. "It embraced the non-purpose-built urban environments — so stairs, ledges, what we call gaps, [or] spaces between two blocks of concrete, and smooth surfaces all started to appeal to skateboarders in a certain way. And Embarcadero had those obstacles."

Jacob Rosenberg, who describes himself as a more talented filmmaker than skater, spent his teenage years at EMB with a camera, recording young skaters as they invented new tricks and nailed

elaborate lines → <https://www.urbandictionary.com/define.php?term=ON+THE+LINE&page=6>.

Like many Bay Area kids at the time, he said, he didn't feel connected to mainstream culture of the '90s. But in skating's "EMB crew," he found a sort of unique, welcoming fringe community.

"It was really where I felt a sense of purpose with my camera for the first time, where I kept coming back and I kept filming the same people, and I watched the culture and the tricks of skateboarding transform right in front of me ... in the lens of my camera," he said. "Those of us who were a part of Embarcadero in the late '80s and early '90s ... we felt so connected to each other and to skateboarding there, maybe more than any other time in our lives."

Javonte Turner skates at Embarcadero Plaza in 1990. (Courtesy of Jacob Rosenberg)

Vaillancourt's brutalist fountain, he said, was the backdrop. Now it's a relic of that era.

"The fountain is this anchor," he told KQED. "You can't skate the fountain, but if you were telling someone about the Embarcadero, you'd say, 'It's the place with the bricks, with the fountain.'"

It was featured in the *Tony Hawk's Pro Skater* video game, and inspired a movement of urban skating that spread as far as Barcelona and Berlin.

People from all over the world came to San Francisco to skate the iconic wave, and in the years since, generations of skaters have returned to the plaza → <https://www.kqed.org/news/11871628/teen-rediscover>

s-san-franciscos-enduring-skate-spot-emb where spots like Mark Gonzalez's "The Gonz Gap → https://www.espn.com/espnw/news-commentary/story/_/id/7360682/history-lesson-embarcadero-gonz-gap" were made famous.

'That's the skateboard experience'

Despite the fountain's storied history, the skaters say they aren't really surprised it seems overlooked in the plans for the new plaza.

"That's kind of the skateboard experience," Rosenberg said.

"They're not taken seriously, they're sort of looked down upon.

"For the city to take something that really is an incredible place to celebrate, a very rich and unique history that San Francisco should really own ... to treat that in a dishonest way is a real irony," he continued. "As a skater, you're like, 'Of course that was what was going to happen.'"

The Vaillancourt Fountain in 1991. *(Courtesy of Jacob Rosenberg)*

San Francisco's Arts Commission is expected to consider the Recreation and Parks Department's request to remove the Vaillancourt Fountain this fall. Rec and Parks officials estimate that to restore it would cost \$29 million.

If the commission does approve the teardown, it could still be stalled by legal action.

Vaillancourt's son Alexis told KQED his father's attorneys have gotten no response to the cease and desist letter sent to multiple city departments, as well as BXP, the private development company handling the renovation, on Aug. 29.

He believes further litigation, like a request for an injunction, will likely be necessary.

The city attorney's office said departments are still reviewing their next steps and no final decision has been made.

But in an email, office spokesperson Jen Kwart called the fountain "a structurally unsound, hazardous structure with no viable path forward short of a multi-million dollar renovation. That's before considering its long-term maintenance and seismic vulnerability."

In addition to high renovation and restoration costs, it's also been maligned as a place unhoused people have used to rest or bathe and is seen by many as an eyesore synonymous with the city's struggling downtown.

Barrow pointed out that that's not too dissimilar from the context in which it rose to now-nostalgic fame → https://www.instagram.com/reel/DOZwbgbCc-3/?utm_source=ig_web_copy_link&igsh=bDJramY4eTdxGZ4&hl=en.

"The early '90s was a pretty fraught time — just like ours — when it came to fear of cities and fear of youth subcultures," he said. "Street skating in San Francisco ... showed a very diverse group of skateboarders skating in an urban place. Skateboarders had kind of figured out how to be in a city and how to create a community in this era when there was a lot of fear."

Skaters Are Latest Group to Voice Opposition to Removal of Vaillancourt Fountain

By Jay Barmann

Published Sep 15, 2025, 2:32 PM

Source: <https://sfist.com/2025/09/15/skaters-are-latest-group-to-voice-opposition-to-removal-of-v/>

You may not know this, but the much reviled Vaillancourt Fountain at Embarcadero Plaza has become an iconic backdrop, and set piece, for skateboarding videos over decades.

As city officials move closer to signing the death certificate for SF's Vaillancourt Fountain — a jagged, hulking Brutalist work of public art that hasn't necessarily aged well and currently requires millions of dollars in repairs — another constituency has come forward besides Brutalist art and architecture fans to oppose the fountain's removal: skaters.

As [KPIX reports](https://www.cbsnews.com/sanfrancisco/news/skaters-push-back-san-francisco-plan-demolish-vaillancourt-fountain/) → <https://www.cbsnews.com/sanfrancisco/news/skaters-push-back-san-francisco-plan-demolish-vaillancourt-fountain/>, skateboarders going back more than a generation have used the sunken pool around the fountain (when it's been dry), and the stairs within the fountain structure itself, for stunts. And it's become a visual touchstone for SF skateboarding culture, appearing in countless online videos shot at the plaza.

The oddly moving video below from Thrasher Magazine two years ago discusses how Embarcadero Plaza was the site of the "rewriting of the history of modern street skating," and prominently

features the Vaillancourt Fountain itself — as well as a since-removed, stepped, concrete podium with a C on top that was a famous skater landmark.

"I've been coming here my whole life. I've skated those stairs. I've been injured on those stairs," says skater Zeke McGuire, speaking to KPIX.

Of the 54-year-old fountain itself, McGuire says, "It's extremely awesome. There's people all across the world that come to San Francisco to skate here specifically. So for it to be gone, people would come here to visit and it wouldn't be here anymore, so I would say get it in before it's gone."

But, of course, the fountain has been more reviled over the years than it has been loved, though it might retain some ardent fans. KPIX anchor Brian Hackney even quotes the late SF Chronicle columnist Herb Caen in the piece below, who compared the fountain when it was installed to "the leavings of a giant dog with square intestines."

The SF Rec & Parks Department estimates that the fountain, which it says is currently structurally unstable, would cost between \$12 million and \$17 million to restore — a process that would require disassembling it completely and rebuilding it. And a new fence has now gone up around it → <https://sfist.com/2025/06/09/sfs-controversial-vaillancourt-fountain-deemed-hazardous-now-getting-fenced-off-to-the-public/> due to the instability, and presence of hazardous materials.

"The fountain isn't just falling apart — it's hazardous," said Rec & Parks spokesperson Tamara Aparton back in June, speaking to the Chronicle. "The structure is cracked, corroded and missing key supports. Add lead and asbestos to the mix, and it's a serious safety risk."

That restoration cost makes the fountain a lost cause, the department has said, given that the estimated cost of building an entirely new plaza that incorporates the next-door Sue Bierman Park would be around \$30 million.

The SF Arts Commission has yet to make its final determination about "deaccessioning" the fountain, and the 96-year-old artist who created it, Quebec-based Armand Vaillancourt, continues to fight its removal. The latest in that fight, after he personally visited the city in May → <https://sfist.com/2025/05/22/95-year-old-artist-behind-often-reviled-embarcadero-plaza-fountain-flies-to-sf-to-save-it/>, is a cease-and-desist letter → <https://www.tclf.org/vaillancourt-fountain-artist-lawyering> sent in late August from Vaillancourt's Montreal-based attorney, Sébastien Lormeau.

The letter demands that the Arts Commission "immediately cease and desist from taking any steps whatsoever that may endanger or damage the Vaillancourt Fountain," and vows that the artist will "pursue all available remedies provided by law" including injunctive relief to prevent the fountain's removal.

So, it remains possible that this fountain could be the subject of a legal fight for some time to come — though the artist himself does not own the work, and a court may quickly decide the city can do as it pleases.

DOWNTOWN SF
PARTNERSHIP

SAN FRANCISCO
OFFICE OF ECONOMIC &
WORKFORCE DEVELOPMENT

December x , 2025

San Francisco Downtown Development Corporation
1390 Market St, San Francisco, CA 94102

RE: Request for \$20,000,000 to Support the Embarcadero Plaza & Sue Bierman Park
Renovation Project

To the San Francisco Downtown Development Corporation Board,

I am writing to respectfully request a \$20,000,000 investment from the San Francisco Downtown Development Corporation to help advance the Embarcadero Plaza & Sue Bierman Park Renovation Project, a transformative, five-acre waterfront revitalization.

This project represents one of Downtown San Francisco's most significant public-realm upgrades. It also aligns directly with Mayor Lurie's vision for a reimagined, activated, and people-centered downtown, as outlined in the City's strategic priorities for economic recovery and long-term competitiveness.

The team leading the project includes four essential partners: BXP, San Francisco Recreation & Parks Department, the Office of Economic & Workforce Development and our non profit, Downtown SF Partnership which serves as the fiscal sponsor. To date, the project team has secured more than \$16,500,000 in committed funding, including:

- \$14,000,000 in Proposition B funds,
- \$2,500,000 BXP's investment in design, project management, and pre-development expertise.

This strong foundation ensures that the project is not only viable, but positioned for immediate advancement pending the final funding necessary to begin construction.

The Embarcadero waterfront remains one of the city's most visible opportunities to demonstrate progress, restore public confidence, and accelerate downtown revitalization. A timely commitment from the SF DDC will:

- Close the funding gap to move this project into construction,
- Catalyze additional private and philanthropic support

- Signal to the public, the business community, and potential investors that revitalization is advancing, not in theory, but in concrete, visible form,
- Reinforce the City's commitment to world-class public spaces that attract workers, residents, and visitors back to the waterfront.

Once complete, the transformed five-acre park will become a defining anchor for the waterfront, offering upgraded landscaping, expanded activation areas, safer pedestrian connections, updated amenities, and flexible spaces for cultural programming, community events, and daily neighborhood use.

In short, this project embodies the future we all want for San Francisco: vibrant, welcoming, economically resilient, and unmistakably alive.

We respectfully ask the Downtown Development Corporation to approve this \$20,000,000 investment and help us break ground as soon as possible. Your partnership at this critical moment will ensure that San Francisco delivers the type of bold, visible improvements that residents and visitors can see and feel as soon as possible.

Thank you for your consideration and for your commitment to the future of Downtown San Francisco. We welcome the opportunity to present the project in more detail, answer any questions, and work with your team to advance this once-in-a-generation improvement to our waterfront.

Sincerely,

Robbie Silver
President & CEO
Downtown SF Partnership

The team presented a comprehensive campaign plan for a \$15 million fundraising initiative supporting the Embarcadero Plaza project, including research findings and recommendations for messaging, organizational structure, and timeline. Discussions centered around addressing concerns about programming, maintenance, and scope, with suggestions for community involvement and broader messaging about the entire Embarcadero revitalization project. The team emphasized the importance of immediate campaign launch, donor cultivation, and recognition ... [View All](#)

Smart Chapters

The team presented a campaign plan for a \$15 million fundraising initiative supporting the Embarcadero Plaza project, sharing findings from qualitative and quantitative research conducted over several months. Travis outlined the presentation structure, which would cover campaign readiness, messaging strategy, organizational requirements, timeline, and prospect universe analysis. Tulsie detailed the methodology, including interviews with 21 stakeholders and a three-tier scoring system for campaign strengths and areas for improvement, highlighting the need for clearer messaging about public benefit, an articulated programming strategy, and visible political endorsement to elevate the campaign as a top civic priority.

 Sonia Banks 00:00:00

If you'll do that, I...

Thank you.

Travis Carley 00:00:08

We won't publish it anywhere, Lisa.

 Lisa Bransten 00:00:10

I'm not worried about it being published, I'm just worried about it being sunshined, but it's fine. I think it's fine, I'm pretty cautious, and I'm...

Travis Carley 00:00:21

Understood. If at any point it's, becomes an ingredient to have it that way, let us know,

Well, thank you, everyone, for gathering here today. Thanks for selecting CCS as your partner, and allowing us to do this work.

we sent the report in advance, of course, and in several buzzin slides. I promise not to read them to you today. We won't make it through all 60, but there

↑ Resume autoscrolling

Next Steps

1. CCS to create two versions of the campaign timeline - one realistic timeline and one accelerated timeline showing fundraising completion by end of 2026/Q1 2027
2. CCS to share the presentation slides with the group
3. CCS to share the list of 200 prospect names that require qualification
4. CCS to create a 3-4 slide executive summary of the presentation for Ned and David
5. Lisa/Robbie to request a 15-30 minute meeting with Ned and David after Friday's event to share the executive summary
6. Lisa/Robbie to share the gift table and timeline with the mayor's office to discuss targeting and prioritization
7. Lisa to develop a donor recognition program based on the table of gifts
8. Lisa to talk to Tyler about DDC's commitment to the project
9. Team to establish a campaign committee with 8-10 volunteers
10. Team to designate a lead partner to manage fundraising and coordination
11. Team to hire a dedicated campaign manager
12. Team to secure at least one key gift before December to show momentum for the waiver renewal
13. Team to develop a recognition policy, donor recognition plan, and donor benefit matrix
14. Team to create personalized cultivation plans for top prospects
15. Phil to stay connected to the project after leaving the city to help with donor outreach

Weekly Check-in/Inspection Services

Agenda

October 7, 2025

1. BID
 - a. Arranging a site visit for Vaillancourt Fountain.
 - b. Permit Extensions
 - c. 2277 33rd Avenue (removal of sprinklers)
 - d. Borrowing Chester Chiu for the week
2. CES
 - a. Mauricio off: extended leave from September 23 to October 13.
 - i. Jimmy G Acting 9/23-10/1
 - ii. Gilbert L acting 10/02-10/10
 - b. Carl Malchow requesting a 6-month leave extension.
 - c. Dominic Keane
3. EID
 - a. Joint solar inspections
4. HIS
 - a. Temp PT starting on 10/14
5. PID
 - a. Bob Farrow (3/28/26)
6. Support Staff
 - a. Transitioning to Webex today
7. Miscellaneous
 - a. At fleet week exercise tomorrow AM
 - b. Permit SF meeting with Chiefs on Tuesday and Wednesday
 - c. Off next week: Birmingham acting
 - d. Meeting with Kelly Sabella on Thursday (St. Philip's)

Weekly Check-in/Inspection Services

Agenda

October 21, 2025

1. BID
 - a. Vaillancourt Fountain meeting on Friday morning.
 - b. 2277 33rd Avenue (removal of sprinklers)
 - c. New Building Inspector David Real
 - d. Bill Walsh
 - e. Gunnell
2. CES
 - a. CES staff will be reviewing BID complaints for closure or referral.
3. EID
 - a. Joint solar inspections (spoke with Chad Law's team)
 - b. Inspector to PRS temporarily
4. HIS
 - a. Jamie returned to work this week.
 - b. List of complaints from the Mayor's office.
5. PID
 - a. 916 Kearny
6. Support Staff
7. Miscellaneous
 - a. 3048 Fillmore Street
 - b. Met with Planning staff yesterday re: ECC
 - c. Santa Clara interviews on Friday
 - d. Michael Turon

The Vaillancourt Fountain is back in the news.

Fifty years after it was completed and some years after the water was shut off, there are plans to remove the fountain as part of construction of a new park in San Francisco. Can the creator or proponents of the fountain somehow preserve it?

The city commissioned the work by Canadian artist Armand Vaillancourt, and it was completed in 1971. ...

SF Rec & Parks Appears to Make End Run to Get Rid of Vaillancourt Fountain In a Hurry

By Jay Barmann

Published Oct 31, 2025, 10:40 AM

Source: <https://sfist.com/2025/10/31/sf-rec-parks-appears-to-make-end-run/>

Many have called the hulking Brutalist fountain at Embarcadero Plaza "[maligned](https://sfist.com/2025/07/09/embarcadero-plazas-highly-unattractive-vaillancourt-fountain-likely-done-for-according-to-rec-and-parks-official/) → <https://sfist.com/2025/07/09/embarcadero-plazas-highly-unattractive-vaillancourt-fountain-likely-done-for-according-to-rec-and-parks-official/>" and even "ugly," but artist Armand Vaillancourt's sculptural work still has many ardent fans who will not be pleased by the latest move by SF Rec & Parks to remove it in short order.

It's been two months since San Francisco's Recreation and Parks Department [submitted its formal request](https://sfist.com/2025/08/20/sf-rec-and-parks-officially-requests-removal-of-embarcaderos-vaillancourt-fountain/) → <https://sfist.com/2025/08/20/sf-rec-and-parks-officially-requests-removal-of-embarcaderos-vaillancourt-fountain/> to have the Vaillancourt Fountain removed, seeking the SF Arts Commission's approval for deaccession of the artwork for various reasons, including public safety. The department says that the fountain, which has fallen into disrepair and has reported structural integrity issues, should be removed in part because the cost to restore it is prohibitive — and plans still taking shape to [reimagine Embarcadero Plaza and the adjacent Sue Bierman Park](https://sfist.com/2024/11/05/mayor-breed-presses-forward-with-embarcadero-plaza-revamp-on-eve-of-election/) → <https://sfist.com/2024/11/05/mayor-breed-presses-forward-with-embarcadero-plaza-revamp-on-eve-of-election/> do not include the fountain in their designs.

Since then, a battle has been brewing between preservationists, art historians, skateboarders → <https://sfist.com/2025/09/15/skaters-are-late-st-group-to-voice-opposition-to-removal-of-v/>, and 96-year-old Vaillancourt himself, on one side, and city officials and fountain detractors on the other side, a battle which threatens to slow or even derail the city's plans for a grand renovation of the two plazas.

Now, as the Chronicle reports → <https://www.sfchronicle.com/sf/article/vaillancourt-fountain-emabarcadero-plaza-21129404.php>, Rec & Parks is seeking to fast-track the removal of the fountain by proposing to pay for its disassemblage and storage, until such time as a final decision about its fate can be made. The department is proposing to pay the estimated \$4.4 million to take the 710-ton fountain apart and store it, somewhere, within a matter of months.

And a decision on this proposal is now on the agenda for the SF Arts Commission's next meeting on Monday, per the Chronicle.

The proposed action is being framed as "temporary," likely to appease some of the fountain's supporters, but it certainly sounds like a strategy to speed up the fountain's removal, with no plan in place for reassembling it should the Arts Commission decide that is what they want to do.

"This is solely for public safety reasons, after two reports have stated that the fountain poses an immediate and serious hazard," says Rec & Parks spokesperson Tamara Aparton, speaking to the Chronicle. "This is a temporary measure that does not have anything to do with the ultimate fate of the fountain, which will be decided by the Arts Commission." Aparton noted that the fountain has been recently vandalized, and that homeless individuals have been sleeping in its concrete tubes, which is not safe.

The department earlier produced a report suggesting that the cost to restore, retrofit, and stabilize the fountain would be \$29 million — a figure that some supporters have questioned. Meanwhile,

the entire estimated budget for the renovation of the two plazas is \$32.5 million, not including any fountain costs.

The Art Newspaper did its own reporting → https://www.theartnewspaper.com/2025/10/14/vaillancourt-fountain-san-francisco-demolition-documents?utm_medium=email&utm_source=exacttarget&utm_campaign=Breakfast+-+10.14.2025&utm_content=640079_10-14-2025&utm_id=640079 earlier this month, in support of the fountain's fans who question where the ultimate responsibility for the artwork's upkeep and preservation lies. The report suggests that property management firm BXP and its predecessor company Boston Properties, which manages Embarcadero Center → <https://www.bxp.com/properties/embarcadero-center> and the plaza, were referred to in 15 separate documents dating back to 1978, by the Rec & Parks department, as being ultimately responsible for the upkeep of the fountain.

BXP has sought a retraction from The Art Newspaper, saying its assertions are false, and the company issued a statement saying, "BXP and its predecessors have never been responsible for the fountain's long-term upkeep. Their obligations, which varied over time, applied only to certain plaza elements such as paving, landscaping, janitorial services, and trash collection."*

Supporters of the fountain accuse Rec & Parks of not being entirely transparent in its representations of the fountain and who bears legal responsibility for it. And the artist, Vaillancourt, has sent a cease and desist letter to the city → https://www.reddit.com/r/sanfrancisco/comments/1nef2bp/artist_behind_san_franciscos_vaillancourt/, with a potential lawsuit looming.

The Cultural Landscape Foundation asks "Will the San Francisco Arts Commission Be Complicit in the Demolition of the Vaillancourt Fountain? → <https://www.tclf.org/will-san-francisco-arts-commission-be-complicit-demolition-vaillancourt-fountain>", in a piece that also suggests that Rec & Parks has overstated the annual maintenance costs for the fountain, when it was up and running. And the Northern Cali-

fornia chapter of Docomomo, a nonprofit devoted to the preservation of modernist architecture, has also weighed in on the fountain controversy.

"In their own words, the city believes Vaillancourt Fountain is not a symbolic sculpture, but 'a critical design challenge in the Embarcadero Plaza and Sue Bierman Park project' and 'incompatible with the open lawn and gathering spaces envisioned in the new design," says Docomomo chapter board member Jack McCarthy, speaking to The Art Newspaper.

Polarizing San Francisco Fountain Will Be Dismantled

 static01.nyt.com/ads/tpc-check.html

Carol Pogash

November 5, 2025

The multiarmed Vaillancourt Fountain, [a polarizing San Francisco landmark](#) near the glistening bay, will be dismantled after the city's Arts Commission voted on Monday to remove it because of safety concerns.

Taking down the brutalist fountain, which admirers say embodies San Francisco weird, will enable the city and a private developer to convert Embarcadero Plaza and a nearby playground into a five-acre waterfront park.

For decades after the fountain was installed in 1971, it gushed 30,000 gallons of water a minute from its cubed, concrete tubes. People could leap from one concrete step to another as the sound of the water engulfed them. It became a haven for skateboarders.

But its pump system broke last year, and city-funded reports found corrosion and major mechanical and electrical problems. An engineer's report described its condition as hazardous, especially in a major earthquake.

The Arts Commission voted to store the fountain for up to three years rather than demolish it, meaning it could hypothetically be renovated. Armand Vaillancourt, the 96-year-old Canadian sculptor who created the fountain, doubts that will happen.

“They know when they remove the sculpture, it’s the end of the work,” Vaillancourt said from his Montreal studio, adding, “From a city that is supposed to be avant-garde, it’s a shame.”

Image

Armand Vaillancourt, 96, installed the fountain in 1971. Credit...Guillaume Simoneau for The New York Times

San Francisco officials say that dismantling and storing the fountain will cost an estimated \$4.4 million. They say fixing it would require nearly \$29 million and destroying it would cost \$2.7 million.

Charles Birnbaum, the chief executive of the Cultural Landscape Foundation, said the city had neglected the fountain and called the funding for storage “hush money.”

“This is a major and highly technical effort, essential to determining what comes next for the 710-ton artwork,” Tamara Aparton, a spokeswoman for the city’s Recreation and Park Department, said on Tuesday. “Rather than casting aspersions, we’d prefer to work collaboratively on next steps.”

Before the arts commissioners decided to dismantle the fountain in an 8-to-5 vote at Monday’s meeting, the focus was on safety, not on artistry.

Eoanna Harrison Goodwin, a Recreation and Park Department project manager who is overseeing the park renovation, told the commission that “unauthorized entries persist” at the fountain, making its presence “a life safety emergency.”

Patrick Carney, an architect and commission member who voted against dismantling the fountain, said in an interview that the commissioners “did not want to be accused of ignoring public safety.” By placing the fountain in storage, he said, the city “left the window open a crack.”

During a public comment section of the meeting, one woman, Jillian Sobel, called the Vaillancourt Fountain “the most beautiful piece of polarizing art I’ve ever seen.” A restaurateur and a manager of a fitness facility countered that the surrounding area was dead and that the fountain stood in the way of revitalization. Chantelle Vaillancourt, a mechanical engineering student who is Vaillancourt’s granddaughter, described the fountain as “a bold manifestation of creativity.”

On Tuesday, Armand Vaillancourt received a letter from the city attorney’s office that gave him 90 days to remove the fountain before the city would dismantle it.

“I don’t say I’m going to die from this,” he said, “but I’m very close to it.”

Removal of Vaillancourt Fountain in San Francisco approved by Arts Commission

Subject: Embarcadero - Fundraising Committee Meeting
When: Friday, November 21, 2025 11:00 AM-12:00 PM.
Where:

Good morning, this meeting is being moved due to scheduling conflicts. Thank you for your flexibility.

This is the invitation for the relaunched Embarcadero Park Fundraising Committee team. This date, time, and cadence comes from the doodle poll the team filled out on availability. Thank you and let us know if you have any questions.

Skateboarding Meets SF Architecture History in Stunning ‘Epicenter’

By Rae Alexandra

Published Nov 17, 2025, 10:45 AM

Source: <https://www.kqed.org/arts/13983681/epicenter-skateboarding-book-review-jacob-rosenberg-vaillancourt-fountain-preservation>

Later, Anthony G. Pappalardo draws a convincing parallel between skating in the 1990s at Embarcadero and music at New York’s CBGB in the late ’70s. “Like CBGB,” Pappalardo points out, “a creative scene grew from skateboarding, leading to new brands, artists, videographers and, of course, pros.”

It’s the small details, though, that truly elevate *Epicenter*. The photo book includes fun, fold-out spreads. The essay book includes architectural blueprints of Embarcadero Plaza. The set comes with a gigantic poster featuring scores of tiny snapshots of Rosenberg’s skate video footage from the era. There’s even an art print of some of Embarcadero’s long lost ledges, painted by [Eric Merrell](https://www.ericmerrell.com/) → <https://www.ericmerrell.com/>. The love and reverence Rosenberg holds for Embarcadero is reflected in every aspect of the set.

A giclée print of a painting of the Embarcadero Plaza by Eric Merrell is included in 'Epicenter.' (© 2025 Eric Merrell)

Epicenter is also a pertinent reminder of how quickly and often San Francisco transforms itself. The set asks the reader to appreciate their favorite features of the city every day that they still exist. A *Thrasher* interview quote by Greg S. Carrol from 1999 sums it up:

“There could never be another Embarcadero. Some of us spent hundreds of hours at Embarco. This just goes to show every one of you — don’t take anything for granted, whether it’s something as simple as brushing your teeth or something as fun as skating your favorite spot with your best friends, because someday it might be gone.”

'Epicenter' by Jacob Rosenberg → <https://www.jacobrosenberg.tv/shop/p/epicenter> is available now. An *accompanying exhibition* → https://gcsagency.com/epicenter/?goal=0_cd96feef6f-8a27fb5a78-570389931&mc_cid=8a27fb5a78&mc_eid=374b

15a28f is on show at GCS Agency (201 Jackson St, San Francisco) through January 11, 2026.

									\$18,000,000.00		
Total	132,855	638	145,030			\$64,678,981	\$15,800,000	\$17,000,000			
		217,800	72,770								

CALCULATED LEVEL	
Base Price per Square Foot (PPSF)	
Total Cost (from donations and financing)	\$38,000,000
Total Sq. Footage	217,800
PPSF=Total Cost divided by Square Footage	\$174

Calculated Gift Level	
Square Footage x PPSF x Location Factor (LF) x Utility Factor (UF) = Suggested Gift Amount	

Determine Location Factor (LF)	
The location and accessibility of a named space plays a key role in determining the worth of the space. For example, a 1,000-square-foot public lobby on the first floor of a building should be worth more than a 1,000-square-foot administrator's office.	
To account for differences in location among named spaces, use a scale from 0.25 to 2, with quarter-point increments. The number 0.25 on the scale represents a named space with a location that is the least accessible in the building. The number 2 on the scale represents a named space with a location that is the most accessible in the building.	

Determine Utility Factor (UF)	
Like the location factor, the utility of a named space plays a key role in determining the value of the space. To account for differences in utility among named spaces, use a scale from 0.25 to 2, with quarter-point increments. The number 0.25 on the scale represents a named space with a location that has the least utility in the building. The number 2 on the scale represents a named space with a location that is the most utility.	

Other Options Not Listed include	
Pathways, Walking Trails, Entrances,	

QUALITATIVE FACTORS CONTRIBUTING TO PROPOSED VALUE	
1. Cultural impact - The installation could become a landmark, attracting locals and tourists. 2. Artistic excellence - Commissioning a renowned artist or collective elevates the prestige and value. Use of innovative materials or techniques (e.g. interactive tech, sustainable design). 3. Impact on community/Community engagement - Designed with input from local communities, schools, or cultural groups. 4. Longevity and Maintenance - Built to last decades with minimal upkeep.Includes a maintenance endowment to preserve its condition. 5. Economic benefits - Boosts foot traffic to nearby businesses; Enhances property values and supports local tourism. 6. Environmental Integration - Uses eco-friendly materials and integrates with the park's natural landscape. 7. Recognition and Legacy - Opportunity to honor local heroes (Like India Basin) , historical events, or cultural milestones. Adds to San Francisco's legacy of public art, alongside works like the "Cupid's Span" or "Skygarden."

Preservation Group Appeals Dismantling of SF Brutalist Fountain

By Isa Farfan

Published Dec 2, 2025, 1:51 PM

Source: <https://hyperallergic.com/preservation-group-appeals-dismantling-of-sf-brutalist-fountain/>

SAN FRANCISCO — A month after the city arts commission ordered → <https://sfstandard.com/2025/11/03/vaillancourt-fountain-demolition-sf/?ref=hyperallergic.com> the dismantling of the iconic Vaillancourt Fountain along the Embarcadero, a local organization is formally challenging the work's destruction.

In an appeal sent to San Francisco's Board of Supervisors on Monday, December 1, Northern California's chapter of Docomomo US, a nonprofit organization dedicated to preserving Modernist sites, argued that the city's parks and recreation department had unlawfully bypassed a mandatory review process in its pursuit to build a park → <https://sfrecpark.org/1819/Embarcadero-Plaza-and-Sue-Bierman-Park-R?ref=hyperallergic.com> over the fountain.

The jutting Brutalist fountain, created by 96-year-old Canadian sculptor Armand Vaillancourt in 1971, has long marked architect Lawrence Halprin's Embarcadero Plaza and the surrounding structures, including the San Francisco Ferry Building. The work, also known as "Québec Libre," was graffitied → <https://sfstandard.com/2022/11/14/photos-of-u2s-bono-vandalizing-an-iconic-work-of-sf-public-art/?ref=hyperallergic.com> in 1987 by U2's Bono and stood at the epicenter of the city's skateboarding culture in the '80s and '90s. But earlier this year, the Board of Supervisors approved the creation of a multi-million-dollar

waterfront park covering the fountain and surrounding area, drawing opposition from cultural preservationists, community members, and the artist himself.

The San Francisco Arts Commission voted to dismantle and store the artwork for up to three years on November 3, citing “public safety hazards.” The city reportedly → <https://www.cbsnews.com/sanfrancisco/news/san-francisco-embarcadero-vaillancourt-fountain-future/?ref=hyperallergic.com> found lead and asbestos at the site. A city spokesperson told *Hyperallergic* that the work’s hazardous conditions exempted it from an environmental review under the California Environmental Quality Act.

Docomomo, however, argued in the recent appeal that the deteriorating state of the artwork was the result of the park department’s “calculated, long-term deferred maintenance.”

The fountain is surrounded by a fence.

“The emergency exemption is not supported by the facts. It is intended to rationalize a pre-approved project, violating the definitions of emergency established in California law,” Susan Brandt-Hawley, an attorney for Docomomo, wrote in the appeal shared with *Hyperallergic*.

Rehabilitating the sculpture would reportedly → <https://www.nytimes.com/2025/11/04/arts/design/vaillancourt-fountain-san-francisco.html?ref=hyperallergic.com> cost the city around \$29 million, while the dismantling and storage is estimated at \$4.4 million → <https://www.sfchronicle.com/bayarea/article/vaillancourt-fountain-removal-sf-21136549.php?ref=hyperallergic.com>.

The work could be removed as soon as February, a San Francisco Arts Commission spokesperson said. A spokesperson for Docomomo told *Hyperallergic* they expect a hearing with the Board of Supervisors after the holidays.

Hyperallergic has contacted the Board of Supervisors for comment.

Approaching his 97th birthday, Vaillancourt told *Hyperallergic* in a video interview about his dismay at the prospect of the destruction of his fountain, describing the sculpture as “the best of me.” The artist and his family belong to a coalition → <https://www.docomomonoca.org/more-news/2025/9/19/coalition-sends-letter-to-san-francisco-emb-vaillancourt-fountain?ref=hyperallergic.com> led by Docomomo that wants the city to rehabilitate rather than destroy the work.

The artist moved to San Francisco in 1967 after winning an international design competition to create a sculptural fountain in the plaza, and stayed for four years during its construction. Vaillancourt recounted driving over the Golden Gate Bridge every day on his way north to the town of Petaluma, where he constructed parts of the fountain in a field.

If the plan to dismantle the work moves forward, Vaillancourt's fountain could be gone as soon as February.

Vaillancourt said he rented a studio from the city, which he later opened to American Indian Movement demonstrators who occu-
 pied Alcatraz → <https://www.nps.gov/alca/learn/historyculture/we-hold-the-rock.htm?ref=hyperallergic.com> for 19 months from 1969 to '71, reclaiming the abandoned federal land on which the former prison stood.

The city of San Francisco didn't like that. Vaillancourt said he was asked to remove Native demonstrators from his studio who sought "safe haven → <https://www.tclf.org/new-video-highlights-history-and-significance-vaillancourt-fountain?ref=hyperallergic.com>" there, but refused to do so. Instead, he threatened to halt the creation of the fountain.

"I couldn't stay there four years to make my fountain and shut up," Vaillancourt recounted. "I had to keep nourishing my soul."

At the inauguration of the fountain, Vaillancourt reportedly jumped into the structure after being held back by police officers and painted "Québec Libre," a slogan of the Quebec independence

movement, across it.

“That idea was to say: Stop the Vietnam War, stop the injustice in the world; stand up for justice at the price of your life you need to,” Vaillancourt said.

A tennis facility nearly eclipses the sculptural fountain.

Over 550 pages of public testimony were collected by the San Francisco Arts Commission before it voted eight to five to dismantle and subsequently store the work for up to three years. One individual called the sculpture “hideous” and advocated for its removal. Others defended its place in San Francisco's cultural history. Alexis Vaillancourt, Armand's son, took his father to meet with the arts commissioners earlier this year, he told *Hyperallergic*. He said he wanted them to know his father is still alive.

Today, there is no water in the fountain, and the city has cordoned it off with a fence. A tennis court almost eclipses it on one side. Nearby, the parks department has installed a towering sculp-

ture of a naked woman → <https://www.sfartscommission.org/our-role-impact/press-room/press-release/r-evolution-debut-embarcadero-plaza-celebration-public-art?ref=hyperallergic.com> created by Marco Cochrane at Burning Man in 2015.

Trey Alioto, who grew up in San Francisco, took a moment to look up at the fountain while walking through the plaza on November 26.

Alioto said the fountain always “felt like something out of my imagination” when he was a kid.

“It’s kind of sad to see it go, but also at the same time, I get that this is sort of a relic of the 20th century,” Alioto added. “Sometimes you do have to eventually outgrow things. The pipes break down. Maintenance costs too much.”

EMBARCADERO PLAZA & SUE BIERMAN PARK — **RENOVATION PROJECT** —

PROJECT OVERVIEW

Embarcadero Plaza & Sue Bierman Park Renovation Project Highlights:

- Transforms the 5-acre site into a vibrant, multi-purpose destination for gatherings, events, and recreation.
- Introduces new landscaping, stormwater features, shaded seating, and picnic areas.
- Enhances accessibility and connectivity with upgraded streetscapes along Embarcadero, Drumm, and Washington streets.
- Reflects extensive community engagement to ensure the design meets the needs of residents, workers, and visitors.

PROJECT TEAM

Partnership:

- A public-private collaboration between the San Francisco Recreation and Parks Department, Boston Properties (BXP), the Downtown SF Partnership, and the Office of Economic and Workforce Development (OEWD)
- The project honors ~~the~~ Embarcadero ~~Park's Plaza's~~ historic legacy while supporting downtown's economic recovery and long-term vibrancy

DOWNTOWN SF
PARTNERSHIP

SAN FRANCISCO
OFFICE OF ECONOMIC &
WORKFORCE DEVELOPMENT

EMBARCADERO PLAZA & SUE BIERMAN PARK
RENOVATION PROJECT

EXISTING CONDITIONS

SITE HISTORY & CONTEXT

1971: Vaillancourt fountain is installed.

1972: Justin Herman Plaza opened, named after M. Justin Herman, director of the SF Redevelopment Agency.

Vaillancourt fountain in the plaza was designed and installed in the context of its surroundings: to integrate the freeway and ramp into the context of the city and to counter the freeway noise.

SITE HISTORY & CONTEXT

Significant change in context altered the way the park and plaza interacts with its surroundings.

Pre-freeway removal:

Plaza designed to be INWARD facing, bound by freeways, off ramps and buildings.

Post-freeway removal:

Park and Plaza want to look OUTWARD and connect to waterfront and surroundings.

SITE ISSUES

LACK OF ACTIVITY & PROGRAMMING

Despite its prime location, the space is underused and lacks sufficient amenities or programming to attract visitors.

Instead of serving as a bridge connecting the waterfront **to** downtown **and beyond**, the **current design** serves as a barrier.

VISITATION TRENDS BY YEAR

Visitors are returning to the Ferry Building, **but not the park.**

The project capitalizes on the improving foot traffic by offering a new waterfront attraction nearby.

THE PEERS: BRYANT PARK, NYC

The park's redesign and active programming turned a previously neglected area into a highly desirable destination, benefiting landlords, tenants, and the broader economy.

Transformative Impact on Commercial Rents

1992–2001: Asking rents near Bryant Park in NYC surged by **115% to 225%**, significantly outperforming surrounding Manhattan submarkets, which saw increases of **41% to 73%**.

THE PEERS: MILLENNIUM PARK, CHICAGO

The park's programming and cultural value transformed a formerly underused space into a major tourist and local attraction.

Significant Boost to Surrounding Business Revenues

- A major urban park investment translated into **robust annual revenue gains** across hospitality, dining, and retail sectors.
- Surrounding economic uplift (per year):
 - **Hotels:** +\$42M to \$58M
 - **Restaurants:** +\$67M to \$87M
 - **Retail:** +\$53M to \$71M

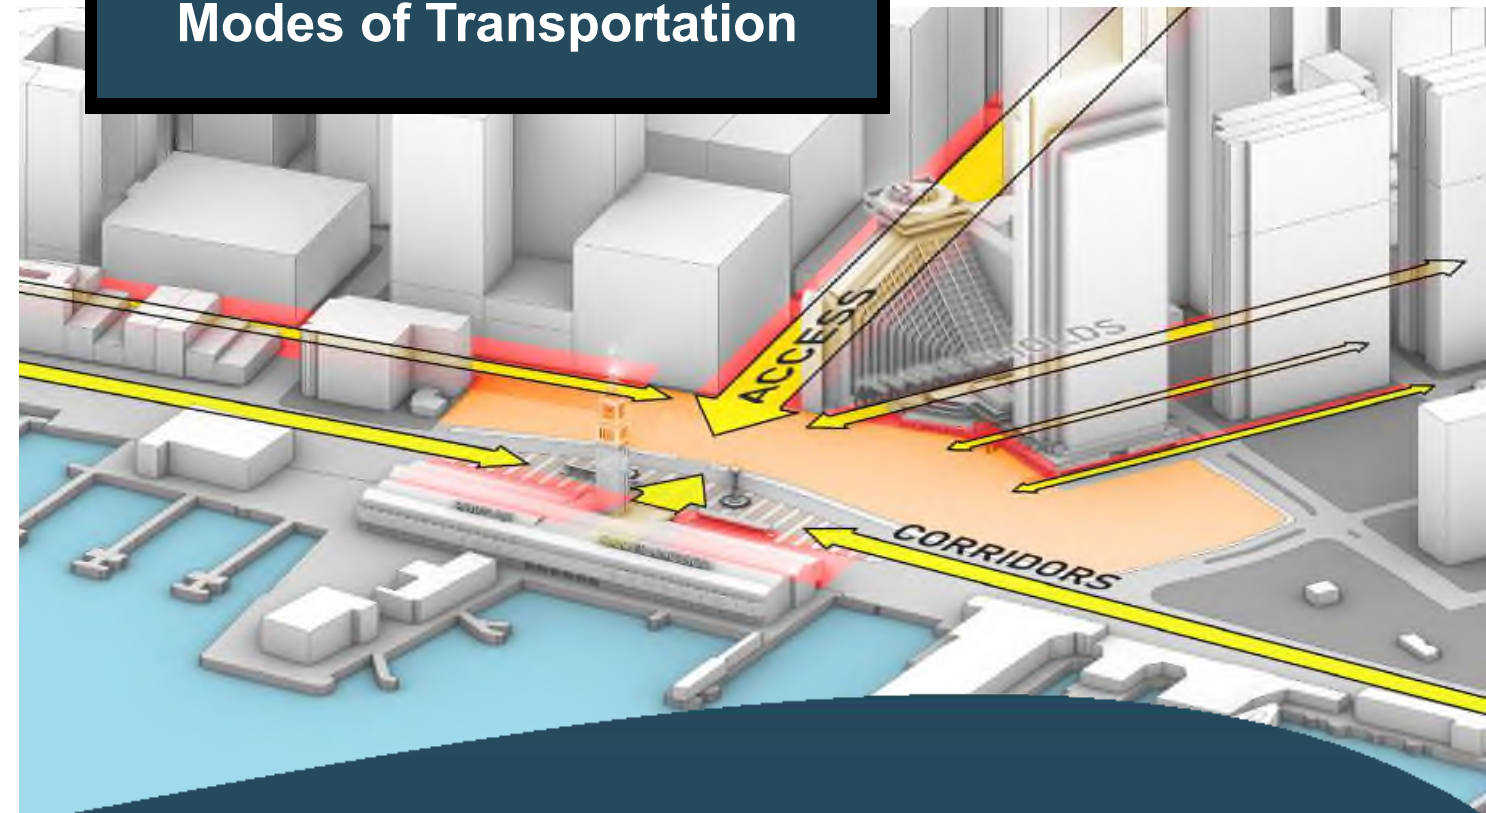

THE POTENTIAL

As the “front door” to San Francisco, this park is a nexus of transit and a gateway to the City and the greater Bay Area. It has the potential to become the iconic and inspiring welcome that defines San Francisco.

Vaillancourt Fountain removal appeal heads to S.F. board

 sfchronicle.com/sf/article/vaillancourt-fountain-appeal-21230841.php

Sam Whiting

December 9, 2025

The Vaillancourt Fountain at Embarcadero Plaza in San Francisco was fenced off in July after inspections revealed it was a safety hazard.

An appeal by preservationists in the long-running fight over San Francisco's Vaillancourt Fountain is headed to the Board of Supervisors, which will decide whether the city can move ahead with tearing the 710-ton concrete landmark out of Embarcadero Plaza — a process that could begin as soon as February.

Supervisors last Friday agreed to hear the appeal challenging last month's San Francisco [Arts Commission vote to remove the fountain](#), which has been fenced off and dry since summer after city inspectors labeled it a safety hazard. The hearing at the board's Jan. 13 meeting will mark the first time the full board has addressed the issue, and the public will be able to weigh in.

At the center of the appeal is a claim by the architectural preservation group Docomomo US/Northern California that the city stretched the definition of “emergency” to speed up removal.

The arts commission invoked an emergency exemption under the California Environmental Quality Act, which allowed it to green-light the fountain’s removal without a full environmental review. Docomomo argues there is no emergency — only decades of the city failing to maintain the Brutalist fountain created by Canadian artist Armand Vaillancourt and installed in 1971 at Embarcadero Plaza.

This assignment is closed

“They are trying to use this emergency exemption for a situation that is not an emergency,” said Jack McCarthy, a board member of Docomomo. “It is decades of deferred maintenance that led to this predictable outcome.”

In a letter to the board, the group said the emergency declaration is really a workaround to avoid studying how the fountain fits into the broader \$32.5 million overhaul planned for Embarcadero Plaza — a project in which the fountain is not included.

City attorney spokesperson Jen Kwart said the office has reviewed the appeal and does not believe it gives supervisors grounds to overturn the exemption. Once an appeal is filed, however, the board is required to hear it.

McCarthy acknowledged the appeal is a technicality, but said that’s the point: “CEQA works like a speed bump. It slows everything down. The appeal focuses on CEQA, but the reason we appealed is to make sure that all community members are heard in the process.”

The Board of Supervisors so far has not been involved in deciding whether the fountain should stay or go, but the hearing could broaden into that larger debate.

District 3 Supervisor Danny Sauter, who represents the Embarcadero, said, “The board will have to weigh in, and logistically we may take the final action.”

Sauter has made it clear that he and the majority of his waterfront constituents oppose restoring the fountain, which would cost an estimated \$29 million.

“I have expressed that I don’t see the path to keeping the fountain here, either a financial path or a path with the design of the new park,” Sauter said. “There is very little appetite in the District 3 community to see that fountain remain.”

Board President Rafael Mandelman said that appeals based on CEQA procedures seldom succeed with the board because the city planning department is very careful about following the letter of the law.

“Should this be in front of the board? I’m not sure,” he said. “But Vaillancourt Fountain is a major landmark and a piece of public art that San Franciscans have passionate opinions on, so I guess we will consider whether the CEQA was adequate.”

The Vaillancourt Fountain is owned by the arts commission and maintained by the San Francisco Recreation and Park Department. After inspectors agreed in October that the fenced-off fountain posed a safety hazard, Rec and Park asked the commission for permission to remove it and store it off-site while its future is decided. The disassembly work is expected to cost \$4.4 million.

The arts commission approved the plan on an 8-5 vote, relying on the emergency exemption that Docomomo is now contesting. Because the fountain has been designated a historic resource by the planning commission, major changes would normally trigger environmental review.

“The best possible outcome is that they (the board) see the emergency is not legitimate and they overturn the decision to remove the fountain,” McCarthy said. “It must be determined through the correct process, which would be a review of the environmental impact of the proposed project for the redevelopment of Embarcadero Plaza.”

The Board of Supervisors will hear the appeal at its meeting Jan. 13 at 3 p.m. at City Hall.

Vaillancourt Fountain Gets One Last Chance at Survival, as Demolition Gets Appealed to Board of Supervisors

By Joe Kukura

Published Dec 9, 2025, 3:33 PM

Source: <https://sfist.com/2025/12/09/vaillancourt-fountain-gets-one-last-chance-at-survival-as-demolition-gets-appealed-to-board-of-supervisors/>

There is one more last-gasp, hail mary attempt to save the Embarcadero's crumbling and controversial Vaillancourt Fountain, as preservationists have appealed the decision to remove it to the SF Board of Supervisors.

It sure looked like curtains for SF's Brutalist and debatably unattractive → <https://sfist.com/2025/04/21/very-unattractive-embarcadero-fountain-may-be-demolished-but-its-fans-are-fighting-to-preserve-it/> Vaillancourt Fountain at the Embarcadero Plaza, after the SF Rec and Parks Department specifically asked that the fountain be removed and put in storage → https://sfist.com/2025/10/31/sf-rec-parks-appears-to-make-end-run-in-october-and-the-sf-arts-commission-which-technically-owns-the-fountain-approved-its-removal → <https://sfist.com/2025/11/03/vaillancourt-fountain-will-indeed-be-removed-as-sf-arts-commission-approves-taking-the-fountain-down/> in early November. After all, the fountain has been inoperable and closed off to the public → <https://sfist.com/2025/06/09/sfs-controversial-vallancourt-fountain-deemed-hazardous-now-getting-fenced-off-to-the-public-over-safety-hazard-risks-for-more-than-five-months-but-maybe-more/>

significantly, was not included in the plans for a \$30 million renovation of the plaza → <https://sfist.com/2024/07/17/city-looks-at-total-reimagining-of-embarcadero-plaza/> introduced last year.

But supporters of preserving the Vaillancourt Fountain → <https://sfist.com/2025/05/22/95-year-old-artist-behind-often-reviled-embarcadero-plaza-fountain-flies-to-sf-to-save-it/> have decided they're not going to take this laying down. The Chronicle reports that the architectural preservation nonprofit Docomomo US/Northern California has filed an appeal with the SF Board of Supervisors to save Vaillancourt Fountain → <https://www.sfchronicle.com/sf/article/vaillancourt-fountain-appeal-21230841.php>, and that appeal has been accepted by the board.

That appeal hearing is currently scheduled for Tuesday, January 13, at 2 pm. And it will more than likely drag on for several hours that afternoon.

The Arts Commission voted on an “emergency exemption,” which allowed the removal to avoid a full environmental review. Rec and Parks project manager Eoanna Goodwin told the Arts Commission in November that the fountain’s “fencing and mesh screens have been repeatedly breached, and individuals continue to enter the fenced-off area and even sleep within the concrete tubes.”

But that said, the emergency exemption effectively acted as a workaround to avoid a California Environmental Quality Act (CEQA) review, as the fountain has been deemed a historic resource that legally should have merited that review.

“They are trying to use this emergency exemption for a situation that is not an emergency,” Docomomo board member Jack McCarthy told the Chronicle. “It is decades of deferred maintenance that led to this predictable outcome.”

So now the fate of Vaillancourt Fountain will be decided by the 11 sitting members of the SF Board of Supervisors. And we know how the supervisor representing that fountain's district, Danny Sauter, feels about the matter.

“I have expressed that I don’t see the path to keeping the fountain here, either a financial path or a path with the design of the new park,” Sauter said to the Chronicle. “There is very little appetite in the District 3 community to see that fountain remain.”

He mentions the cost of restoring the fountain, which has been estimated at \$30 million. Should it be taken down and not restored, its pieces will be placed into storage, assessed for repair and possible reconstruction, and could be reconstructed elsewhere on the off-chance there’s a taker for this thing, or should the city decide to do so down the line.

How the Vaillancourt Fountain helped shape S.F. skateboarding

 sfchronicle.com/entertainment/arts-exhibits/article/embarcadero-vaillancourt-fountain-skateboard-21238364.php

Tony Bravo

December 19, 2025

Jacob Rosenberg stands in front the Vaillancourt Fountain in Embarcadero Plaza with his camera and skateboard. Rosenberg is the author of the new photo book and exhibition “Epicenter.”

Ando/For the S.F. Chronicle

Skateboarding and the Vaillancourt Fountain are appropriate cultural companions. Both the four-wheeled sport and Armand Vaillancourt’s massive cement creation have at times been maligned as marring public spaces.

The fountain has also been a backdrop to skate history as landscape architect Lawrence Halprin’s Embarcadero Plaza (EMB colloquially) became a destination for skateboarders in the late 1980s and early ’90s. The area’s brick pavement and tiered hardscapes became a stage for showing off tricks, attracting pros including Mike Carroll, Jovontae Turner and James Kelch.

More Information

Epicenter

By Jacob Rosenberg

(Self-published; 160 pages; \$80)

“Epicenter”: Photography. 11 a.m.-6 p.m. Wednesday-Friday. On view through Jan. 11, 2026. GCS Agency, 201 Jackson St., S.F. www.gcsagency.com

Anyone who walked through the plaza in that era likely remembers the clattering of wheels and slamming of boards as essential a part of the soundscape as the rushing water of the 96-year-old Canadian sculptor’s jutting, angular creation.

Skateboarding and the fountain share a rough, severe elegance that strike me as an essential component to downtown San Francisco’s identity. Now as the San Francisco Arts Commission has voted to place the 54-year-old fountain in storage as part of a larger renovation of the plaza, the skate community has come out to claim the artwork as part of their heritage. (Earlier this month, Northern California’s chapter of the nonprofit Documentation and Conservation of the Modern Movement appealed the decision, arguing that the city’s Recreation and Park Department had unlawfully bypassed a mandatory review process.)

Jacob Rosenberg’s exhibition “Epicenter” at GCS Agency in San Francisco.
Ando/For the S.F. Chronicle

“You don’t have any of this skateboarding culture without the plaza,” said Jacob Rosenberg, the photographer behind the new photo book and exhibition “Epicenter,” on view at GCS Agency in neighboring Jackson Square through Jan. 11, 2026. “They’re intrinsically connected, with the brutalism of the fountain matching the brutalism of skateboarding.”

[Add Preferred Source](#)

From the years 1990-93, when he was ages 17-20, Rosenberg would cut class and drive from his family’s home in Palo Alto to Embarcadero Plaza to photograph the skateboarding scene. With a video and still camera, he was able to capture a burgeoning new scene.

The show and two-volume book focus on Rosenberg’s photography from that period, and the plaza and fountain play a featured role in the images.

“For me, one of the motivations for the show was wanting people and the city to understand the significance of this place,” said Rosenberg, referring to the controversial plans that would redesign much of the area. “This is a part of the country people came to because they thought differently about traditional ideas. Skateboarding is untraditional in its attitude, it’s a welcoming place for people who don’t feel connected to normal society, which you could say about San Francisco.”

“Plaza Summer” by Jacob Rosenberg (1990). “Epicenter,” an exhibition of his work documenting the skate scene at Embarcadero Plaza in the late 1980s and early ’90s, is at GCS Agency in San Francisco through Jan. 11, 2026.

Courtesy of Jacob Rosenberg

The show will definitely delight skateboarding fans who can speak to the technique of the skaters featured, but there’s plenty for regular photography audiences to enjoy.

“There’s an argument that skateboarding style is akin to dance,” said Rosenberg. “When you see a really good skateboarder there’s that same sensation as when you’re a kid and you see ‘The Nutcracker.’”

Rosenberg captured incredible juxtapositions of body and architecture as skaters fly through the air against the Hyatt Regency’s cascading pyramid. Teenage boys sit with boards in hand on the gray steps or glide along the red brick with the Vaillancourt Fountain twisted in the background.

“Epicenter” is presented by Adidas Skateboarding and GCS Agency, and co-curated by art historian Ted Barrow, who also worked with Rosenberg on the book. Although Barrow grew up in central Texas, he spent every winter and summer break during 1990-99 traveling to San Francisco to skate the plaza. His essay for “Epicenter” specifically addresses the intersection of architectural and skateboarding history at Embarcadero Plaza.

“For me, that fountain, even though it wasn’t skateable, it was the most radical thing to have as a backdrop,” said Barrow. “As an outsider, this was everything that was cool about San Francisco — not just the intensity of its skate scene and the talent of its skaters, but the radical forms of public art that surrounded this world class skate spot.”

“Jovontae Turner” by Jacob Rosenberg (1990).
Courtesy of Jacob Rosenberg

One of my favorite images in the exhibition shows Turner in July 1990 skating across the plaza with the Vaillancourt Fountain in the background. He's not doing some extraordinary trick, but the way he's holding his arms mimics the fountain's outstretched limbs. It's a perfect piece of real world choreography matching its surroundings.

Relationships like those in Rosenberg's images are part of what makes the show feel so essential right now.

"Imagery and skateboarding go hand in hand. It's a visual culture," said Rosenberg. "The fact that we're here at a time when they want to demolish it and not celebrate that history feels counter to what the heart of San Francisco is."

“Vaillancourt Fountain + The Seven” by Jacob Rosenberg.

EMBARCADERO PLAZA & SUE BIERMAN PARK

RENOVATION PROJECT

PROJECT OVERVIEW

Embarcadero Plaza & Sue Bierman Park Renovation Project Highlights:

- Transforms the 5-acre site into a vibrant, multi-purpose destination for gatherings, events, and recreation.
- Introduces new amenities including a performance stage, open lawn, outdoor fitness area and dog park
- Enhances accessibility and connectivity with upgraded streetscapes along Embarcadero, Drumm, and Washington streets.
- Reflects extensive community engagement to ensure the design meets the needs of residents, workers, and visitors.

PROJECT TEAM

Partnership:
