I live in an area of high graffiti report counts. The interest of people where there is lots of graffiti could be assumed to be higher than districts with low graffiti. The high graffiti have 6-10 times the graffiti reports as low impacted areas. My appointment would provide more voice to the people who live where the most graffiti is. Secondly, I encourage a GIS / data science approach. Over 50,000 graffiti reports will be made this year to SF311. 80% of the reports by the public will be made with the cell phone app, with pictures, GPS and timestamps. This is from zero a few years ago. The rich data census makes new possible to identify the the problems.
