On July 16, 2012, the Alameda County Planning Commission certified the Final Environmental Impact Report (FEIR) for the Revised SMP-30 Sunol Valley Aggregate Quarry Project, and adopted findings and a Mitigation Monitoring and Reporting Program for the project in accordance with the requirements of the California Environmental Quality Act (CEQA). The San Francisco Planning Department concurs with the conclusions set forth in the FEIR as certified by Alameda County and has determined that no further environmental review is required under CEQA for the project described in the FEIR prior to any actions or approvals required for the project by the City and County of San Francisco, including the San Francisco Public Utilities Commission and the San Francisco Board of Supervisors.
