Master Outdoor Distributed Antenna System Pole License Agreement

The San Francisco Municipal Transportation Agency (SFMTA) seeks approval by the SFMTA Board of Directors to recommend that the City and County of San Francisco Board of Supervisors retroactively approve the "Master Outdoor Distributed Antenna System Pole License Agreement," a revenue contract between the SFMTA and New Cingular Wireless, LLC dba AT&T Mobility, for the installation of wireless telecommunications antennae and equipment on SFMTA poles, for a term of nine years and anticipated revenues of \$1,000,000 or more. Charter section 9.118(a) requires that the Board of Supervisors approve any contract that produces revenues of \$1,000,000 or more.

Upon approval of the Master Outdoor Distributed Antenna System Pole License Agreement, the placement of wireless equipment on poles and facilities will be considered a project under CEQA Guidelines Section 15378 and each individual installation proposal is subject to review under CEQA.

Not a project under CEQA Guidelines Sections 15060(c) because the action would not result in a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment.
