

**LEGISLATIVE DIGEST**

[Labor and Employment Code - Prevailing Wages for Street Cleaning Services]

**Ordinance amending the Labor and Employment Code to require prevailing wages in City contracts and grants for street cleaning services.**

Existing Law

The Labor and Employment Code requires that certain contracts issued by the City require the payment of prevailing wages to individuals performing services under that contract.

Amendments to Current Law

This ordinance would add a prevailing wages requirement to City contracts and grants awarded primarily for street cleaning services including contracts for power washing, steam cleaning, and litter abatement in the public right of way. This ordinance would apply to City agreements with community benefit districts paid through City funds, but would not apply to agreements with community benefit districts that are funded through parcel assessments.
