Safety & Facility Issues at Buena Vista Horace Mann

BVHM's Campus Was Built over 100 Years Ago

Renovation

- Electrical system
- Pipes
- Roof

Redesign

- Built for middle school students, not elementary
- Built for ~300 students, there are almost 600 in it now

Heat - It is burning up!

The average temperature in Server Room is 90°F and that heat travels in to the Computer Room

“My child’s eczema has intensified since attending BVHM. The classrooms he has been are hot, stuffy & have made his learning even more difficult.”

- Parent of a BVHM 2nd grader

“These pictures show the difference in the temperature outside and in my classroom, with windows open, and four fans on.”

- Elementary School Teacher in Rm 305

Leaking Roofs and Falling Tiles

On March 12, 2019, ceiling tiles, dirt, dust and debris fell on a teacher's desk and near students. Our ceilings are falling but the core issue is we need a new roof. You can see water damage through the new tiles.

Deteriorating Facilities Causing Injury

Last month, a 6th grader fell on this crack in PE and had to go to the emergency room to get 12 stitches.

Funded Unfunded

What are we asking for?

1. A complete **renovation** of BVHM with funds allocated that either match or surpass the 2016 Prop A bond
2. Within thirty calendar days, an **inspection** by a non-SFUSD inspector of the BVHM campus for safety, utilities, wiring, seismic and environmental health code adherence. Any violation would need to be repaired immediately
3. Provide monthly **reports** to the BVHM community and the larger public on every aspect of the renovation process

By BVHM UBC and PTA
