Adding Your Data

HRSA Map Tool

Select and plot health centers, grants, and other agencies' data on the map as separate data layers. Import data from the web or upload a CSV file.

The screenshot displays the HRSA Map Tool interface. On the left side, there is a search bar with the placeholder text "Type here to search data below" and a close button. Below the search bar, a section titled "Or browse all data to map:" contains a list of data layers: "Facilities, Providers, Sites/Areas", "HRSA Grants/Loans/Scholarships", "Population and Public Health Data", and "Your Data". The "Your Data" layer is currently selected, and an "Add Data" button with an upload icon is visible next to it. The main area of the interface is a map of California, showing major cities and highways. Red dots are plotted on the map, representing data points. A search bar at the top right of the map area contains the text "Enter a U.S. location" and includes search and refresh icons. A scale bar at the bottom right indicates distances of 30 km and 20 mi. The map also shows various geographical features like Lake Berryessa and Point Reyes National Seashore.
