What did we hear from the community?

OCOC Outreach Community Input Findings

A resounding call to do more, and to do *better*:

- Parents and youth need to be able to **navigate the system** more easily.
- Providers also struggle to navigate the system, and are unable to **align services** for maximum impact.
- **Equity** remains a central issue.
- Better **in-school and out-of-school** experiences are needed
- The **business community** needs to be strategically engaged as a core stakeholder
- **Critical programmatic gaps** remain

Aligned Recommendations

OCOC Outreach Recommendations (facilitated by LFA)

1. We need to become more intentional and **smarter about how we collaborate** in order to capture more value from existing and future resources.
2. We should adopt a **more-holistic approach to learning** in order to support educational attainment, and college- and career-readiness.
3. **Key support services** should be maintained and strengthened.
4. We need **a long-term plan to increase, diversify, and sustain resources** for children, youth, and families.

Common Themes Across Recommendations*

- Align to a common set of goals across agencies, schools and community
- Increase accountability and evaluation
- Enhance coordination and planning
- Adopt a holistic approach to learning and support in and out of school
- Increase financial certainty/ stability
- Expand services

*Recommendations across five reports: Stakeholder Council, Youth Town Hall, Community Coalition, CPAC, Alliance for Arts Education

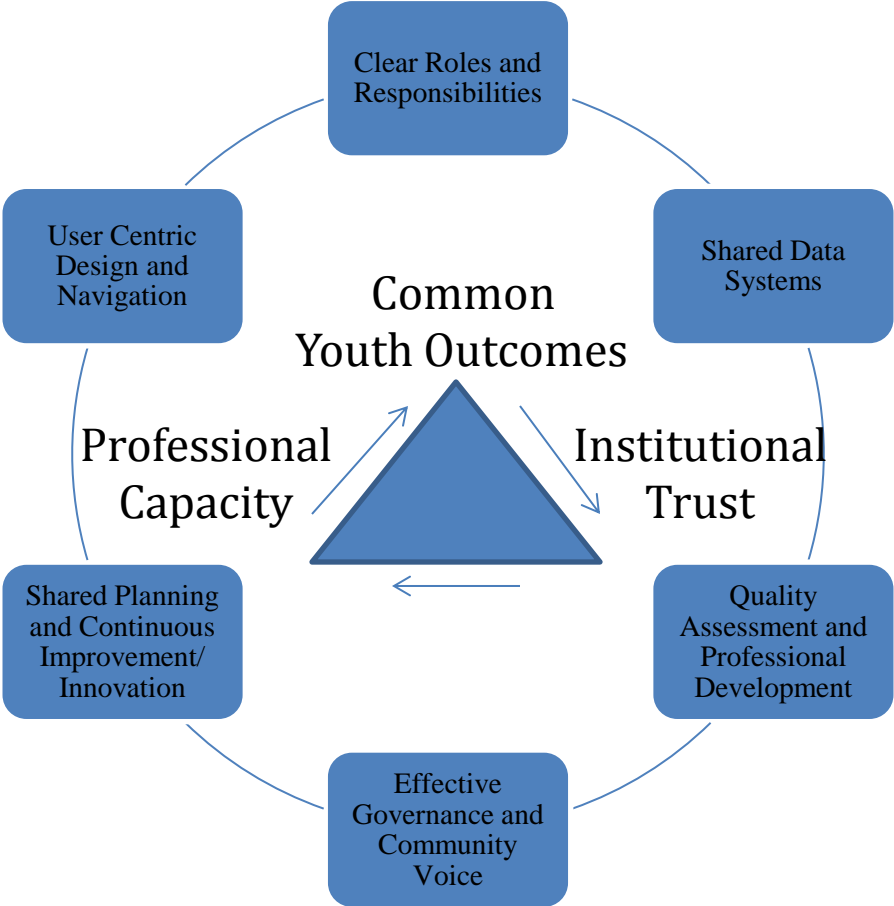

Our Children, Our City: Policy Approach

An approach to renewal and re-imagination that:

- Puts kids first
- Empowers families
- Ensures equity and authentic, shared accountability

Critical Policy Pillars

How could greater collaboration aligned to common goals support our children and youth better?

Opportunities for Alignment to Meet Needs

- A complete picture of services and resources in a community
- A comprehensive needs assessment by school and community
- Information sharing about which youth/students are accessing services; including frequency, focus and effectiveness;
- Better aligned case management to ensure access and quality supports
- Joint accountability

Proposed Policy Solutions

- Renew the Children's Fund and PEEF as independent, separate funds with complementary vision under one ballot
- Create Citywide Outcomes for enhanced impact
- Establish a Children and Family Council for better alignment and coordination
- Establish an Our Children, Our City Collaborative for capacity building and managing the new aligned systems
- Operate on a four-year planning cycle aligned to citywide outcomes
- Ensure data and information sharing
