

REVISED LEGISLATIVE DIGEST

(6/4/2013, Substituted)

[Changing the Official Sidewalk Widths - Portions of Cesar Chavez Street, Valencia Street and 27th Street - California Pacific Medical Center: St. Luke's Campus]

Ordinance amending Ordinance No. 1061, entitled "Regulating the Width of Sidewalks," by adding thereto Section 1591, to change the official sidewalk width of the southerly side of Cesar Chavez Street, starting at the southeast intersection with Guerrero Street, continuing east to the southwest intersection with Valencia Street; the westerly side of Valencia Street, starting at the southwest intersection with Cesar Chavez Street, continuing south to the northwest intersection with Duncan Street; and the northern portion of 27th Street, starting at the intersection of 27th Street and San Jose Avenue, continuing west for 44.24 feet; making environmental findings, and findings pursuant to the General Plan and Planning Code, Section 101.1; and requiring relocation, modification, or both, of facilities affected by the sidewalk width change.

Existing Law

Board of Supervisors' ordinance No. 1061 established the official sidewalk widths throughout San Francisco.

Amendments to Current Law

This legislation would amend Ordinance No. 1061 to change the official sidewalk width of the sidewalk on the south side Cesar Chavez Street, between Guerrero Street and Valencia Street; the west side of Valencia Street, between Cesar Chavez Street and Duncan Street; and the north side of 27th Street, from San Jose Avenue and west for 44.24 feet. This legislation also requires that any necessary relocation, modification, or both, of any utility facilities shall be at the cost of California Pacific Medical Center.

Background Information

This Ordinance is substitute legislation concerning California Pacific Medical Center's (CPMC) Long Range Development Plan ("LRDP"). This Ordinance substitutes for legislation originally introduced in April 2012. After introduction of the original legislation, CPMC revised its LRDP. The revised LRDP is described generally below. The proposed revisions from April 2012 include an increase in the size of the new hospital at the St. Luke's Campus (from 80 beds to 120 beds) and a decrease in the size of the new hospital at the Cathedral Hill Campus (from 555 beds to 274 – 304 beds).

CPMC currently operates four acute care medical centers in San Francisco: the California Campus, the Pacific Campus, the St. Luke's Campus, and the Davies Campus. As part of its

program to meet state seismic readiness deadlines, CPMC's proposes a five campus system with three acute care hospitals – at Davies, St. Luke's, and a new hospital at the proposed Cathedral Hill Campus – providing approximately 692 licensed beds and three full-service emergency departments (one at each of the acute care hospitals). Once the proposed hospital is constructed at the Cathedral Hill Campus, the acute care services at the California and Pacific campuses will be transferred to the Cathedral Hill Hospital. The Pacific Campus's existing acute care hospital would undergo renovation and reuse as an ambulatory care center. CPMC would sell the California Campus after the transfer of acute care and non-acute care services to the Cathedral Hill and/or the Pacific Campus. In the near term, CPMC would also construct a new medical office building at Cathedral Hill, a new medical office building at Davies, and at St. Luke's, replace the existing hospital with a new 142-foot, 120 bed hospital and construct a new medical office building. More details regarding the LRDP, including plans and renderings, can be found on the Planning Department's website at cpmc.sfplanning.org.

This ordinance concerns the proposed St. Luke's Campus. At St. Luke's, CPMC will construct a new 214,061 gross square foot, seven-story, approximately 142' tall, 120-bed acute care hospital, sited on an existing surface parking lot and over a portion of the to-be-vacated San Jose Avenue.

After the hospital is constructed, the existing hospital will be demolished and CPMC will construct a new 98,959 gross square foot, five-story, approximately 100' tall medical office building. The medical office building will include medical office space and retail, educational, and conference space, along with a four level underground garage with approximately 220 parking spaces.

Among other approvals, construction of the St. Luke's Campus hospital and medical office building will also require ordinances to amend the San Francisco Planning Code and General Plan. CPMC also seeks approval of a development agreement with the City.
