Re: Acquisition of easements for the SFPUC Regional Groundwater Storage and Recovery Project

Dear Board Members:

Enclosed for your consideration is a Resolution authorizing an agreement for conveyance and acceptance of interests in real property from the Lake Merced Golf Club for a groundwater well site, utilities, access, and maintenance over real property as part of the SFPUC Water System Improvement Program.

The Regional Groundwater Storage and Recovery Project will provide supplemental SFPUC surface water to our participating water agency partners on the Peninsula in normal and wet years, resulting in a corresponding reduction of groundwater pumping, which then allows for in-lieu recharge of the South Westside Groundwater Basin. This will increase the dry year and emergency pumping capacity of the South Westside Groundwater Basin by up to an average annual volume of 7.2 million gallons per day. The project will provide a new dry year groundwater supply for SFPUC customers and increase water supply reliability during the 8.5 year design drought cycle.

Through this proposed legislation, we are asking that the Board of Supervisors to approve and authorize the Agreement for Conveyance and Acceptance of Real Property between the Lake Merced Golf Club and the City and County of San Francisco.

If you have any questions or need additional information, please call Brian Morelli of the SFPUC at 415-554-1545.

Respectfully,

Harlan L. Kelly Jr.
