RE: Sidewalk gardens and tree planting

Dear City and County of San Francisco,

Ocean Ave CBD agrees to the estimate provided by SF Public Works Bureau of Urban Forestry (BUF) to plant trees and install sidewalk landscaping that the CBD will maintain and water. These trees and gardens are at properties that front Ocean Ave and include a plant palette agreed upon between the CBD and BUF staff. The CBD agrees to pay \$15,000 by check for the labor and materials. The CBD will further contribute in-kind labor to maintain by removing litter and performing regular landscape maintenance and will water the trees weekly for 3 years to establish them.

At Ocean and Harold, the sidewalk was cut and demolished with the debris hauled away. Three trees were planted, and drought tolerant plants were installed with a boulder to protect the plants from vehicular traffic. At Ocean and Plymouth, a basin was cut in the sidewalk with the debris hauled away. A new tree was planted and staked.

At Ocean and Capitol, one large sidewalk garden was installed after cutting and demolishing the existing sidewalk with the debris hauled away. New trees were planted and staked, and drought tolerant plants were installed with boulders to protect the plants.

Sincerely,

Dan Weaver
Executive Director
Ocean Avenue Association

298 x Harold Ave (PG&E marked all 3 as clear)

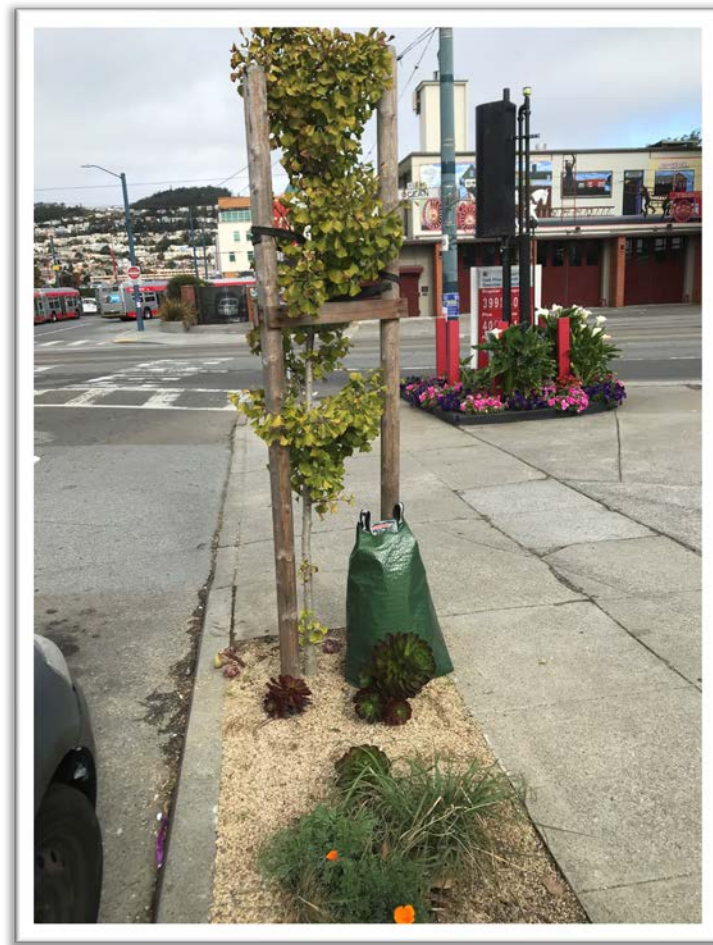

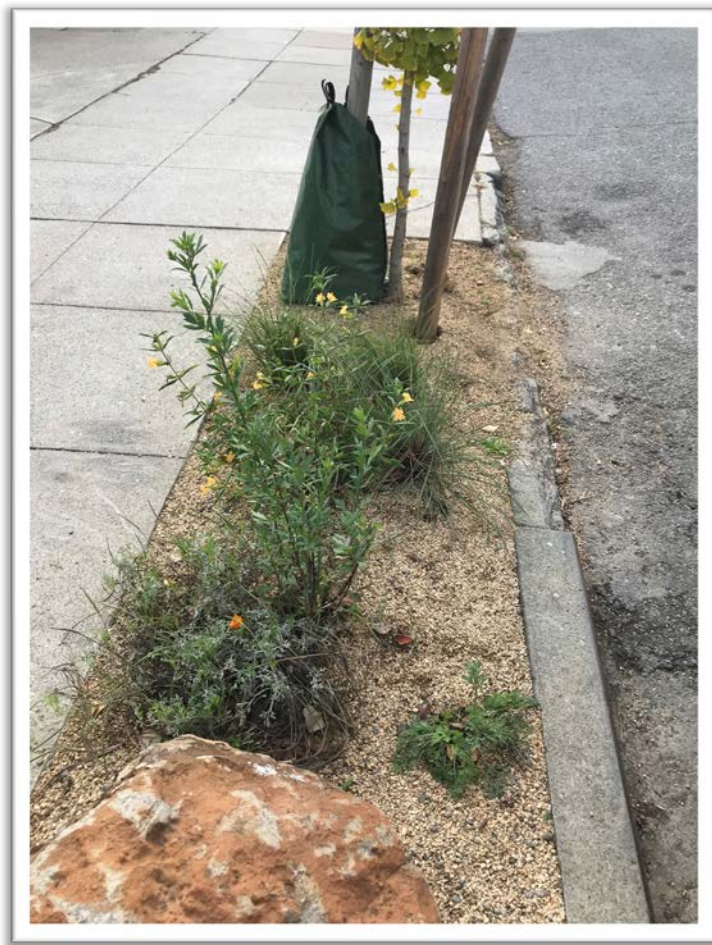

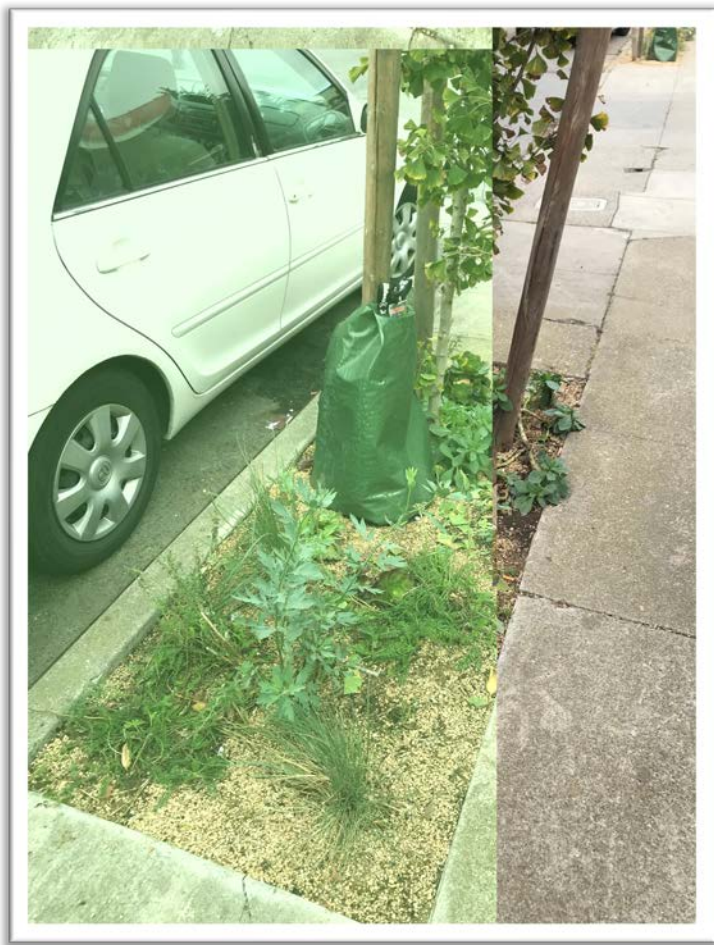

This falls within CBD jurisdiction.

BUF to cut basin for Site 1 and install 1 tree. CBD to water.

BUF to cut a large, connected basin and install 2 trees for Sites 2 and 3. CBD to water.
