Street Improvement Permit

Address : Multiple Locations

Cost: \$1,504.00

Block: Lot: Zip:

Pursuant to article 2.4 of the Public Works Code in conjunction to DPW Order 187,005, permission, revocable at the will of the Director of Public Works, to construct improvements within the public right-of-way is granted to Permittee.

Mission Rock Horizontal Sub (Phase 1), LLC

Name: Mission Rock Horizontal Sub (Phase 1), LLC

Conditions

Mission Rock Phase IA Permit Conditions:

GENERAL:

No Construction work shall commence under the Street Improvement Permit (SIP) until
i) the Port has determined that all applicable prerequisites to construction in the Development Agreement, Disposition and Development Agreement, or other project approvals have been satisfied, and
ii) any PIA amendments have been finalized and recorded

SFPW and SFMTA:

- At least 90 days prior to any construction on 3rd Street, a separate Instructional Bulletin (IB) shall be submitted for SFPW's and SFMTA's review and approval design issues (e.g., signage and striping, bicycle improvements and interconnect of signals) regarding the 3rd Street corridor and the proposed new traffic signal and signal modifications.
- A separate Major/Street Encroachment permit is required for the private heat and chill water exchanges system in Mission Rock. This Encroachment permit shall be finalized and approved by the Board prior to acceptance.

Port:

- Within 90 days from the issuance of the SIP, the applicant will revise grades at and around the intersection of Exposition Street and Terry A. Francois Boulevard (TAFB) to reduce the roadway profile across TAFB in excess of 5% that creates a cross slope and inverted crown along TAFB. Port satisfaction with this re-design is required.
- The portion of the District Energy System within Port proprietary property requires 3rd party inspection,

verification, and a final affidavit prior to Notice of Completion (NOC). Applicant shall provide a letter to the Chief Harbor Engineer within 30 days of SIP issuance providing the name and qualifications of the proposed firm providing these services.

- The sanitary sewer system upstream of SSMH 102 requires 3 business days advance notice to the Port for hold point inspections and approvals.
- The trench drain system requires 3 business days advance notice for hold point inspections and approvals.
- Within 180 days from SIP issuance, unless satisfied otherwise, applicant must obtain a Port issued license and Utilities Condition Permit for each telecommunications company and PG&E gas within Port proprietary property.
- Applicant must ensure that the proposed centralized bioretention treatment facility located within China Basin Park must be constructed and fully operational prior to any acceptance of the horizontal improvement, and per the requirements of the Stormwater Management Ordinance, prior to Issuance of the Certificate of Final Completion (CFC) for any vertical parcel relying on the treatment facilities for compliance.
- Security for the stormwater treatment facility must be provided within 12 months from the issuance of the SIP with the bonded amount based upon an approved design.
- The non-potable water system within Port proprietary property requires 3rd party inspection, verification, and a final affidavit prior to NOC. Applicant shall provide a letter to the Chief Harbor Engineer within 30 days of SIP permit issuance providing the name and qualifications of the proposed firm providing these services.

SFPUC:

Unless otherwise noted, within 90 days from the approval of the SIP one or more Instructional Bulletin (IB) shall be submitted for SFPUC's review and approval for each item listed below:

- Streetlight Plan. SFPUC has not approved the streetlight plan. The streetlight plan and streetscape design shall be revised to meet pole protection and working clearance requirements around each streetlight pole as discussed by SFPUC and MRP on July 28, 2020.
- Photometrics. SFPUC has not approved the photometrics. The photometric calculations shall be reformatted in a comprehensive table distinguishing between specific sidewalk, road, and intersection areas as discussed by SFPUC and MRP on July 28,

2020.

- Water Meters in Basements. Placement of water meters on private property (e.g., Building B, F, and G basements) has not been approved by SFPUC and is still under review by SFPUC-CDD. Should CDD reject the request for basement meters, the meters shall be placed in the sidewalk. A preliminary layout showing the water meters in the streets was provided by the Subdivider, Schematic Water Meter Layout, Exhibit dated September 4, 2020. The plans shall be formally revised and resubmitted as an Instructional Bulletin within 90 days of SIP issuance or within 30 days from the rejection of placement of meters on private property, whichever is later.

- Water Service to 3rd Street Bridge Control Building. During site preparation, SFPUC was notified that the 3rd Street Bridge control building lost water service. It was determined that the building was served off the main on Terry Francois Boulevard, which was connected to the 3rd Street main, but the permitted make-ready plans did not show the lateral to the building. Water to the building will need to be restored by connecting to the closest available main, to be determined. The relocated lateral and main connection shall be submitted to the SFPUC as a Request for Information to the make-ready plans, and submitted as an Instructional Bulletin.

- Clearance between Water Lateral and Electrical Vault. The fire service lateral (Station 14+21.65) and electrical vault on Exposition Street serving Block G are in close proximity and do not meet the required 3-ft horizontal clearance. SFPUC does not object to the 1.4-ft separation as shown in the SIP slip sheet submittal dated September 14, 2020 and the attached Block G – FS Lateral Coordination Exhibit dated August 26, 2020 provided that conduit entry into the vault are not impacted by the vault's proximity to the lateral. Should the conduit be affected, the design shall be revised to provide adequate clearance and submitted as a Request for Information or an Instructional Bulletin during construction for final SFPUC approval.

- Water Line Crossings. SFPUC conditionally approves the exception request for the crossing of the new LPW main under the existing NPW main at intersection of Third Street and Exposition Street. SFPUC's conditional approval of this exception is subject to approval by the Water Resources Control Board and compliance by the applicant with any revisions or mitigations required by the Water Resources Control Board. Should the Water Resources Control Board reject the request, MRP shall submit an IB showing standard crossing for SFPUC approval prior to installation of water facilities.

- Additional Settlement Monitoring Points in Gravity System. MRP shall provide one (1) additional utility monitoring point for each block between manholes for Sanitary or Storm Drain. Drawing details shall be finalized and submitted as an Instructional Bulletin.
- Settlement Monitoring of Deep Sewers. SFPUC does not object to the sewer settlement monitoring details (i.e., metal rod affixed to pipe via saddle) shown in the SIP slip sheet submittal dated September 14, 2020. However, should further review by the City necessitate changes to the monitoring details, revised details shall be resubmitted as an Instructional Bulletin.
- Settlement Monitoring of Pressurized Water Systems. SFPUC does not object to the NPW and AWSS settlement monitoring details shown in the SIP slip sheet submittal dated September 14, 2020. However, should further review by the City necessitate changes to the monitoring details, revised details shall be resubmitted as an Instructional Bulletin.
- LPW Pressure Monitoring. SFPUC is considering the installation of monitoring caps on select LPW hydrants to enable leak detection, which would also support the settlement monitoring program. Drawing details and specifications shall be submitted as an Instructional Bulletin within 6 months of SIP permit issuance for final SFPUC approval or SFPUC specification of monitoring caps, whichever is later.
- Filter Fabric in Utility Trench. Per discussion between SFPUC, SFPW, and MRP on August 26, 2020, the decision to proceed with LCC may no longer necessitate the

DPW Resolution #

Inspection

Work shall not commence until this permit has been activated by Public Works. The permittee shall contact Public Works at dpw-bsminspeacts@sfdpw.org or (628) 271-2000 to activate the permit and schedule inspection at least 72 hours prior to work. Failure to follow the activation process prior to commencing work may result in a correction notice and possible notice of violation.

The undersigned Permittee hereby agrees to comply with all requirements and conditions noted on this permit

Excavation and grading of subject area for street reconstruction shall be in accordance with approved plans and City specifications. Damaged areas adjacent to this construction shall be properly patched per City Inspector. Also, the permittee shall be responsible for any ponding due to the permitted work.

STREET EXCAVATION REQUIREMENTS

1. The permittee shall call Underground Service Alert (U.S.A.), telephone number 811, 48 hours prior to any excavation.
2. All work including sidewalk and pavement cutting and removal, lagging, excavation, backfill, and sidewalk and pavement restoration shall be done by a licensed paving contractor and in accordance with the requirements of the Current Standard Specifications of Public Works.
3. All work including sidewalk and pavement cutting and removal, lagging, excavation, backfill, and sidewalk and pavement restoration shall be done by a licensed contractor and in accordance with the requirements of the latest edition of Standard Specifications and Plans of San Francisco Public Works, and Department of Public Works Order Nos. 187,005.
4. Sidewalk and pavement restoration shall include the replacement of traffic lane and crosswalk striping, parking stall markings, and curb painting that might have been obliterated during street excavation. The permittee shall perform their work under on the following options:
 - a. Have the City forces do the striping and painting work at the permittees expense. The permittee shall make a deposit with the Department of Parking & Traffic for this purpose in an amount estimated by the Municipal Transportation Agency (MTA) 7th Floor 1 South Van Ness Ave telephone 701-4500, and notify the MTA at least 48 hours in advance of the time the work is to be done.
 - b. Perform the work themselves following instructions available at the Department of Parking & Traffic and MTA.
5. The permittee shall submit a non-refundable fee to Bureau of Street-Use and Mapping to pay for City Inspection of the backfill and pavement restoration. At least 48 hours in advance, the permittee shall make arrangements with the Street Improvement Section Inspectors, (628) 271-2000, for an inspection schedule.
6. The permittee shall file and maintain an excavation bond in the sum of \$25,000.00 with the Department of Public Works, to guarantee the maintenance of the pavement in the excavation area for a period of 3 years following the completion of the backfill and pavement restoration pursuant to Article 2.4.40 of the Public Works Code.
7. The permittee shall conduct construction operations in accordance with the requirements of Article 900 Section 903(a) and (b) of the Traffic Code. The permittee shall contact the MTA 7th Floor 1 South Van Ness Ave telephone 701-4500, for specific restrictions before starting work.
8. The permittee shall obtain the required permits, if any, from regulating agencies of the State of California.
9. The permittee shall verify the locations of any City or public service utility company facilities that may be affected by the work authorized by this permit and shall assume all responsibility for any damage to such facilities. The permittee shall make satisfactory arrangements and payments for any necessary temporary relocation of City or public utility company facilities.
10. The permittee shall pay the required fee for sewer installation permit at the Plumbing Inspection Division, Department of Building Inspection, 1660 Mission Street and arrange for inspection of this work, telephone 558-6054.
11. Planting of trees and performance of any work in the right-of-way which may affect a tree and/or landscaping shall not be performed prior to obtaining a permit and/or another form of approval from Bureau of Urban Forestry (BUF), telephone: (628) 652-8733.
12. Per DPW Order 201,954, the recycling of Cobble Stones and Granit Curb shall follow as:
 - a. Cobblestones shall be clean of dirt prior to transporting. Extreme care shall be taken during the transporting the cobblestones to minimize damage before delivery to City. The cobblestones shall be neatly and securely placed on pallets so they can be moved about safely after the delivery. The Minimum size of cobblestone shall be 4 inches square (16 square inches). The cobblestones shall be delivered, including off loading, to 701 14th Street on Treasure Island or at alternative location directed by the Department within the City of San Francisco. Contact the Department forty-eight hours (48 hours) prior to delivery. The Department can be reached at (415) 641-2627.
 - b. Granite Curb shall be neatly and securely placed on pallets so they can be moved about safely after delivery. The Contractor shall exercise care in transporting the granite curb to minimize damage. The length limit of recyclable granite curbs shall be no less than four feet. The granite curb shall be delivered, including off loading, to 701 14th Street on Treasure Island or at an alternative location directed by the Department within the City of San Francisco. Contact Bureau of Street and Sewer Repair (BSSR) at least forty-eight hours (48 hours) prior to delivery. BSSR can be reached at (415) 695-2087.
13. In consideration of this Permit being issued for the work described in the application, Permittee on its behalf and that of any successor or assign, and on behalf of any lessee, promises and agrees to perform all the terms of this Permit and to comply with all applicable laws, ordinances and regulations.
14. Permittee agrees on its behalf and that of any successor or assign to hold harmless, defend, and indemnify the City and County of San Francisco, including, without limitation, each of its commissions, departments, officers, agents and employees (hereinafter collectively referred to as the "City") from and against any and all losses, liabilities, expenses, claims, demands, injuries, damages, fines, penalties, costs or judgments including, without limitation, attorneys' fees and costs (collectively, "claims") of any kind allegedly arising directly or indirectly from (i) any act by, omission by, or negligence of, Permittee or its subcontractors, or the officers, agents, or employees of either, while engaged in the performance of the work authorized by this Permit, or while in or about the property subject to this Permit for any reason connected in any way whatsoever with the performance of the work authorized by this Permit, or allegedly resulting directly or indirectly from the maintenance or installation of any equipment, facilities or structures authorized under this Permit, (ii) any accident or injury to any contractor or subcontractor, or any officer, agent, or employee of either of them, while engaged in the performance of the work authorized by this Permit, or while in or about the property, for any reason connected with the performance of the work authorized by this Permit, or arising from liens or claims for services rendered or labor or materials furnished in or for the performance of the work authorized by this Permit, (iii) injuries or damages to real or personal property, good will, and persons in, upon or in any way allegedly connected with the work authorized by this Permit from any cause or claims arising at any time, and (iv) any release or discharge, or threatened release or discharge, of any hazardous material caused or allowed by Permittee in, under, on or about the property subject to this Permit or into the environment. As used herein, "hazardous material" means any substance, waste or material which, because of its quantity, concentration of physical or chemical characteristics is deemed by any federal, state, or local governmental authority to pose a present or potential hazard to human health or safety or to the environment.
15. Permittee must hold harmless, indemnify and defend the City regardless of the alleged negligence of the City or any other party, except only for claims resulting directly from the sole negligence or willful misconduct of the City. Permittee specifically acknowledges and agrees that it has an immediate and independent obligation to defend the City from any claim which actually or potentially falls within this indemnity provision, even if the allegations are or may be groundless, false or fraudulent, which obligation arises at the time such claim is tendered to Permittee by the City and continues at all times thereafter. Permittee agrees that the indemnification obligations assumed under this Permit shall survive expiration of the Permit or completion of work.
16. Permittee shall obtain and maintain through the terms of this Permit general liability, automobile liability or workers' compensation insurance as the City deems necessary to protect the City against claims for damages for personal injury, accidental death and property damage allegedly arising from any work done under this Permit. Such insurance shall in no way limit Permittee's indemnity hereunder. Certificates of insurance, in form and with insurers satisfactory to the City, evidencing all coverages above shall be furnished to the City before commencing any operations under this Permit, with complete copies of policies furnished promptly upon City request.
17. The permittee and any permitted successor or assign recognize and understand that this permit may create a possessory interest.
18. Separate permit is required for excavation of side sewers. Installation authorized only by Class "A" or "C-42" Licensed Contractor or "C-12" with "C-36" Licensed Contractor. Authorization requires the filing of a \$25,000 excavation bond to cover the cost of City inspection and having obtained authorization to excavate in the roadway. The contractor shall obtain the proper permits and arrange for an inspection, for the section of pipe from the trap to the property, with the Plumbing Inspection Division at 1660 Mission Street, telephone 558-6054.
19. Pursuant to state law, all survey monuments must be preserved. No work (including saw cutting) may commence within 20' of a survey monument until an application for Monument Referencing has been approved and notification of monument referencing has occurred. Prior to construction, all CCSF survey monuments shall be referenced by a licensed Land Surveyor on a Corner Record or Record of Survey if any construction will take place within 20 ft. of a monument. For any questions please email Monument.Preservation@sfdpw.org or call 415-554-5827. Note, all survey monuments shall be preserved per state law and disturbance of a survey monument is a crime.

Not all survey monuments are visible.
