Subject: Unauthorized letter of support

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Board of Supervisors,

My name is Jade Zapata, MD and I previously had a psychiatry practice at 3609 Sacramento Street. I closed my practice in November 2018 after moving to the Peninsula.

It has come to my attention that a letter has been circulated that shows my name in support of the 3637-57 Sacramento Street project. I'd like to clarify that I did not sign this letter and am not familiar with the project.

Sincerely,

Jade Zapata, MD

Lew, Lisa (BOS)

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Supervisor Stefani and Clerk of the Board:

We are writing to **challenge the legitimacy of the attached 62 letters** of SUPPORT submitted by the Developer.

We feel it is critical that there is fairness & transparency regarding the Support v. Opposition to this Project at 3637-57 Sacramento.

The attached document includes, to the best of our knowledge:

- **9 Letters that are duplicates** (signed by the same person on 2 different dates),
- **18 people who changed their position** to “Oppose Project”,
- **4 Letters representing businesses no longer in existence** today or people who are no longer employed here,
- **28 Letters dated 2014**, referencing outdated plans and with no verification these people still live or work in the neighborhood,
- **3 Letters by people who did not authorize** their signature, or do not support this project

These letters should not be counted toward “Support” for this project for the above reasons.

Thank You,
Jennifer

To Whom It May Concern,

This letter is to express **support** for the proposed project at 3637-3657 Sacramento Street. I have reviewed the prospective architectural drawings (dated March 17, 2017) and am for the removal of the two structures and construction of one new mixed-use building.

The addition of a new ground floor retail/commercial space will enhance the pedestrian experience of Sacramento Street. The new construction will also bring in new housing and additional parking to this neighborhood. This helps my business and my own experience of working on this block.

Sincerely,

John Schick

RE: 3637-3657 Sacramento Street

Dear Planning Dept:

I am writing this letter in support of 3637-3657 Sacramento
Street project. I am a pediatrician in the building currently.

I very much look forward to being able to carry out my
practice in the new modern mixed use building.

The new building will be wonderful for patients. There will be
better access for handicap patients and for strollers too. We
look forward to more parking too that the building will bring.

Sincerely,

Noah Simons MD FAAP

TO WHOM IT MAY CONCERN:

This letter is to express **support** for the proposed project at 3637-3657 Sacramento Street. I have reviewed the architectural drawings dated March 17, 2017 (with latest revisions dated September 24, 2018) for the demolition of the two structures and construction of one new mixed-use building.

The addition of new ground floor retail/commercial space will enhance the pedestrian experience of Sacramento Street. The new construction will also bring in new housing and additional parking to this neighborhood.

RE: 3637-3657 Sacramento Street - Proposed New Mixed Use Building
San Francisco, CA

TO WHOM IT MAY CONCERN:

This letter is to express **support** for the proposed project at 3637-3657 Sacramento Street. I have reviewed the architectural drawings dated September 19, 2012 for the demolition of the two structures and construction of one new mixed-use building.

The addition of new ground floor retail/commercial space will enhance the pedestrian experience of Sacramento Street. The new construction will also bring in new housing and additional parking to this neighborhood.

Very truly yours,

RE: 3637-57 Appeal of CEQA CatEx & CU

Dear Board of Supervisors:

For over forty years Sacramento Street has been home to an extremely large number of psychotherapists' practices; there are over 150 psychotherapists presently located in this small area. This letter is written on behalf of many of those psychotherapists who will be personally and professionally affected by the proposed project at 3637-57 Sacramento Street.

Our location is in a quiet, safe and pleasant environment, nearby public transportation and close to many schools. It is an easy and comfortable place for children and adults in need of services to access mental health professionals.

While we share many of the concerns that the residents and small business owners have about the project, we have concerns that are unique to our profession. Both therapists and patients will be dramatically impacted by the harsh, noisy, messy environmental changes which will occur to this neighborhood.

We oppose the proposed project as it is currently presented and we hope that you will give our letter serious consideration, and support the appeals before you.

General Concerns:

As it stands, the project is massive in scope and scale. It is out of proportion relative to the surrounding buildings in the neighborhood. The environmental hazards resulting from the traffic congestion of trucks, the dust and pollution from the demolition debris, the inability to access the buildings and shops at times, the noise and seismic effects from jackhammers and heavy equipment will cause residents and businesses to suffer, including psychotherapy practices.

On a daily basis, Sacramento Street sees a large influx of delivery trucks to the restaurants and shops which take up much of the street parking and must often double park causing gridlock. Adding more trucks to the mix to remove excavation debris or deliver construction materials and supplies, together with the workers' trucks will make parking impossible and the street impassable at times.

The fact that the Planning Commission deemed this project exempt from an Environmental Impact Report (EIR) is unconscionable. We believe that an EIR on the potential hazards posed by the project at 3637-57 Sacramento Street is essential.

Psychotherapists Unique Concerns:

Psychotherapy involves doing reflective, emotional work. It can only be conducted in an environment that is quiet, calm and safe for both psychotherapist and patient.

We see patients suffering from a wide range of problems including serious depression, anxiety, loss and trauma.

Patients come to our offices in a fragile emotional state and seek our help by engaging in talk therapy: people such as active duty military returning home from combat with PTSD, women and children who have been victims of sexual assault, or others who may be in such a fragile emotional state that they are contemplating suicide.

You can imagine the difficulties involved in treating patients when there is noise and vibrations, dust and pollution, filling our offices. Our offices will cease to be the kind of place needed to conduct psychotherapy.

We cannot stress enough that these types of intrusive impingements will make our work impossible. Furthermore, it is highly likely that psychotherapy practices will become unsustainable.

Conclusion:

It is crucial that this project not be allowed to move forward as it's currently planned. We urge you to consider how serious this situation is for the psychotherapy community in this neighborhood. We hope you will do everything in your power to protect the people who provide and use our services.

We request you to grant both of these appeals to the CEQA CatEx and CU of the proposed project as requested by the neighborhood residents, shops, businesses and psychotherapists.

We greatly appreciate your time and consideration.

Sincerely,

San Francisco, CA 94102

Re: 3637-57 Sacramento Street

To Supervisor Stefani,

This letter is being submitted on behalf of Olive Grove Capital, LP, owner of the property located at 3640 Sacramento Street currently occupied by Spruce restaurant.

We object to the Planning Department's Categorical Exemption from environmental review under CEQA. The lack of mitigation conducted by the developer allows the neighboring tenants and businesses in the adjacent structures to be negatively impacted by noise, dust, vibration and accessibility during construction. In the absence of an EIR we ask that the developer pay for strict mitigation measures to protect both the surrounding neighbors and businesses.

In addition, it is our position that the height and bulk of the design can be modified to be more compatible with the scale of the surrounding structures and therefore suit the needs of the neighborhood and surrounding tenants.

We thank you for your consideration and ask that you act on behalf of the tenants and businesses as stated.

Best regards,

Haley Gonzaba
Regional Property Manager, Triterra Realty Group, Inc.
Agent for Owner

Dear Supervisor Stefani :

We have met in the past through Melissa Freund White and my mother, Lynn Bunim.

I am a homeowner in your district and live at 310 Spruce Street. I grew up in Lyon Street so have been in the neighborhood my whole life. Like you, I have two small children.

I appreciate the need for more housing in the city and neighborhood. I am for a project at 3637-3657 Sacramento Street, but I would like to see an environmental review completed due to prior use as a garage and a scaled back plan, with only one level for garage parking, no medical and dental and less mass on the top floor to allow for more natural light in the neighborhood. This project seems out of scope in such a small, historic neighborhood. I would like to see strict mitigation measures in place during construction to protect the neighbors and let the neighborhood thrive while construction is taking place. My children love to walk on Sacramento Street to see the train and visit the local businesses. I would hate for this to be disrupted.

I do not believe you and your fellow supervisors would be doing your fiduciary duty if you did not conduct an environmental study. Future ramifications for all could be serious and even life threatening.

Please feel free to reach out to me if you have any further questions about my position.

Lesley Bunim

My name is Courtney Wadsworth and I live at 305 Spruce Street. I am requesting an environmental review for the project at 3637-67 Sacramento Street. I oppose the mass and size of the project in such a small, historic neighborhood.

Thank you!

Best,
Courtney

Re: Opposition to Proposed project at 3637-3657 Sacramento St.

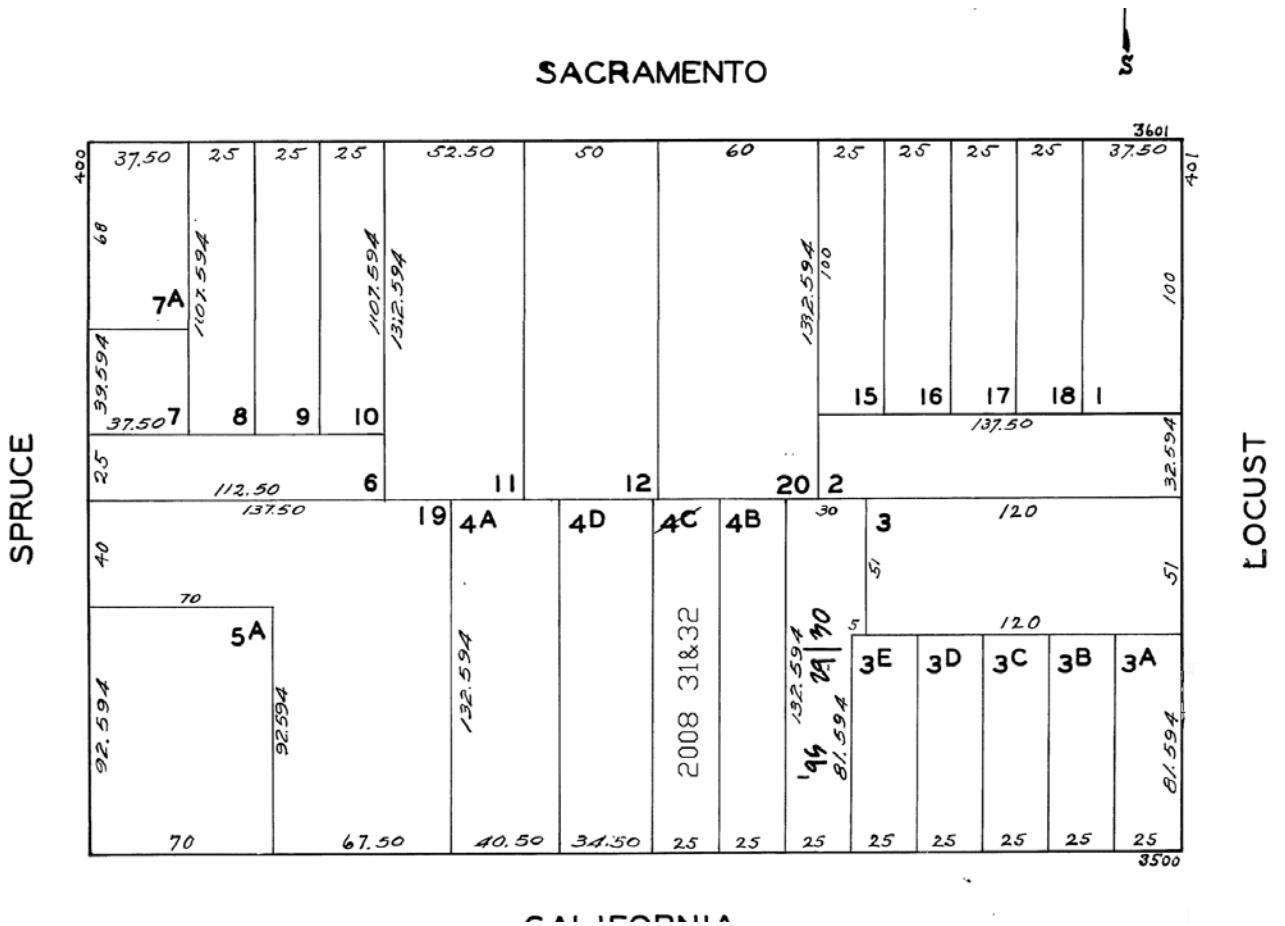

Dear Ms. Woods,

We are the owners of 3625 Sacramento Street, San Francisco, CA. We are writing to outline our deep concerns and strong opposition regarding the proposed project at 3637-3657 Sacramento Street which is two lots to the west of our property. The developer, Litke Properties, is asking for several variances and conditional use permits, which we oppose for the specific reasons set forth herein. Our family has lived and worked in this neighborhood for 65 years. My father, Proctor Jones, ran his Publishing and Photography business out of 3625 for 20 of those years. We have watched these blocks of Sacramento Street mature with boutique businesses and fine dining that respect the existing scale and architecture of the neighborhood. San Francisco and especially this area needs to preserve what the rest of the world comes here to see: unique architecture, boutique shopping, Victorian scale, and diversity.

As owners of Lot 016, our property is impacted by the current proposal.
Please See Exhibit 1

Exhibit 1

Conditional Use Permit (CUP) Requests

The developer is requesting two CUPs related to the size of the project.

- 1. The developer's request for a CUP regarding the size of the lot ("lot area greater than 5000 sq ft") violates the Planning Code because the developer is seeking to combine two over-size lots into one massive parcel, which would be nearly three times the size allowed by the Planning Code.**

We oppose this because the two existing lots they are combining in this development *already each exceed 5,000sf*; 3637-41 Sacramento Street is currently 7956sf and 3657 Sacramento is currently 6630sf.

This greatly exceeds the size recommendations for the Neighborhood Commercial district and its intent of development that is appropriate to the district and compatible with adjacent buildings. Additionally, the massing of the proposed building greatly exceeds every other building on the block of this NC district in height, number of stories and street frontage. (121.2(a) and (b)) *(see Exhibit 3, below)* **The proposed size will dwarf our building, look massive, and block all of the light for our tenants on the west side of our building.**

The Sacramento Street NCD represents a transitional area between a more major thoroughfare, California Street, and a purely residential area, Presidio Heights. Sacramento Street is 68'-9" wide, a two lane street with parallel parking on either side, and stop signs at every intersection. The scale of the proposed development is actually more in line with the NC-S district on California Street, where it is a 104' wide, four-lane street with transit service. The zoning of the two districts represents the very different nature of the two streets and we feel that the intent of retaining the character of small scale development should be maintained in the Sacramento Street NCD by not granting this CUP.

The proposed lot size creates a building that is not necessary or desirable to the neighborhood, and is not compatible with the neighborhood.

The scale of the proposed building is too large in comparison to the existing buildings on both the north and south side of Sacramento Street.

1 3600 BLOCK - SOUTH SIDE, PROPOSED/EXISTING
SCALE: 1:360

2 3600 BLOCK - NORTH SIDE
SCALE: 1:360

2. The developer is also requesting a CUP for “non-residential use size over 2500sf.”

The proposed ground floor retail is 6,555sf and the second floor medical/dental is 9,976sf. This exceeds the size limit for non-residential uses on both the ground floor (retail: 2.6x Use Size Limit) and second floor (medical offices-4x Use Size Limit).

Per Planning Code section 121.2(a) the Use Size Limit is in place to protect and maintain a scale of development appropriate to the district. By greatly exceeding the specified Use Size Limits the developer is creating a building that does not maintain the scale of development of the NC district.

The proposed size of the second floor medical offices even exceeds the Use Size Restriction for the nearby NC-S district on California Street (6000 sf) and is almost that of a Regional Commercial District (10,000 sf). This proves that it clearly does not comply with the recommended criteria (121.2(a)(2)) that the proposed use will serve the neighborhood or that the nature of the use requires a larger size in order to function.

If the developer had not chosen to combine the two large lots into one massive lot (requiring a CUP for lot size exemption) the sizes of the proposed uses would be smaller.

Additionally, the disproportionate size of the non-residential use is the major driver of the excessive size of the underground parking garage. In exceeding 5,000 sf of retail area this triggers the requirement for off street parking, requiring 13 spaces. By exceeding 5,000 sf of health services area this triggers the requirement for off street parking of 32 more spaces. If a CUP is granted for exceeding both of these use size limits it creates the need for 45 additional off street parking spaces which is 71% of the proposed underground parking. This represents approximately 24,500 sf of the proposed garage or two full levels of the three underground parking stories.

Rear Yard Variance Requests

We understand that the developer has made changes in the rear yard variance requests pursuant to letters of objection from the property owners at the rear and side of the proposed project. Notwithstanding, we echo the arguments made below by them:

The developer is requesting three variances for the rear yard, all related to the top of the underground parking garage. By requesting such a large underground parking structure that extends all the way to the rear property line the developer proposes creating a structure with a top floor level that is 4'-8" above existing grade at the Southeast corner and up to 8'-7" above existing grade at the Southwest corner.

Additionally, the developer is asking that *on top of this* they be allowed to have a 6'-0" high solid wall. This creates a structure on the rear and side property lines that varies from 10'-8" high to 14'-7" high above existing grade. All of the needs for these variances are based on decisions of the developer to request Conditional Use Permits for exceeding the non-residential use size limits. **None of these three variances are based on any extraordinary circumstances that do not generally apply to any other property in this district.**

We oppose all of these rear yard variances because it will create a discontinuity in the mid-block rear yard space, and having 10' to 14' high walls on the property lines is a **gross violation of the intent of the rear yard ordinances.**

1. Developer is requesting a variance for “developed top surface of underground parking garage is in rear 15’ of lot.”

We oppose any variance to the garage occupying the rear 15' of the lot.

There are no exceptional or extraordinary circumstances applying to this property that do not generally apply to any other property in the same district (305(c)(1)).

The enforcement of the requirement would not create any unnecessary hardship. The only hardship would be to the size of the underground parking garage which is only required to be as large as shown due to the choice of the developer to request retail and health services that exceed the Non-Residential Use Size Limits for the Neighborhood Commercial District. (305(c)(2)).

This variance is not necessary to preserve or enjoy a substantial property right possessed by any other property in this district. (305(c)(3)).

Granting this variance would be materially detrimental to properties in the vicinity by disrupting the midblock, landscaped open space (134 & 305(c)(4)). [By allowing the developed top surface to be above the existing grade in excess of the allowed height and with a wall that exceeds the allowed height]

2. Developer is requesting a variance for “Deck exceeds 3’ above grade at any point in required open area.”

We oppose any variance to the deck surface exceeding 3' in the required rear yard setback.

There are no exceptional or extraordinary circumstances applying to this property that do not generally apply to any other property in the same district (305(c)(1)).

The enforcement of the requirement would not create any unnecessary hardship. The only hardship would be to the floor locations or size of the underground parking garage which is only required to be as large as shown due to the choice of the developer to request retail and health services that exceed the Non-Residential Use Size Limits for the Neighborhood Commercial District. (305(c)(2)).

This variance is not necessary to preserve or enjoy a substantial property right possessed by any other property in this district. (305(c)(3)).

Granting this variance would be materially detrimental to properties in the vicinity by disrupting the midblock, landscaped open space (134 & 305(c)(4)), by allowing the developed top surface to be above the existing grade in excess of the allowed height and with a wall that exceeds the allowed height.

3. Developer is requesting a variance for “Railing exceeds 3’-6” in required open area.”

We oppose any variance to the railing exceeding 3’-6” in the required rear yard setback.

There are no exceptional or extraordinary circumstances applying to this property that do not generally apply to any other property in the same district (305(c)(1)).

The enforcement of the requirement would not create any unnecessary hardship. The only hardship would be to the floor locations or size of the underground parking garage which is only required to be as large as shown due to the choice of the developer to request retail and health services that exceed the Non-Residential Use Size Limits for the Neighborhood Commercial District. (305(c)(2)).

This variance is not necessary to preserve or enjoy a substantial property right possessed by any other property in this district. (305(c)(3)).

Granting this variance would be materially detrimental to properties in the vicinity by disrupting the midblock, landscaped open space (134 & 305(c)(4)), by allowing the developed top surface to be above the existing grade in excess of the allowed height and with a wall that exceeds the allowed height.

Below Grade Parking

As part of the mass of this project, it includes three stories of below grade parking. Although we agree that parking for the neighborhood is needed and a public parking garage is necessary for this project to replace the lost parking in the existing structures, if the size of the project is reduced, there will not be a need for the developer to excavate **a full 3 stories** below grade.

As adjacent property owners, we are terrified of what this type of **excavation** will do to our existing structure and foundation, not to mention the noise, dirt, time and truck traffic in front of our property. There is no plan or discussion regarding the protection of foundation, subsidence issues with the neighbors or us.

What will be required of the developer to protect our properties? There are tenants in our and adjacent properties who have been there many years, have established reputations and rely upon people coming to their business, offices and salons. As well, we depend upon the income from this property to survive. If we lose our tenants due to length of time of construction, noise of excavation, pile driving, lack of parking during construction, etc., we will most likely be unable to recover. Elderly tenants will be displaced (one adjacent Tenant, Jack Taylor, is in his 90's).

We vigorously oppose the size of the garage and excavation of 3 stories below grade.

In summary,

- **We oppose the CUP regarding size of lot,**
- **We oppose the CUP regarding size of non-residential space,**
- **We oppose all three variance requests regarding the rear yard**
- **We oppose the size of this project regarding its impact upon the structure of our and adjacent properties, impact on existing businesses, impact due to mass and size upon the light onto our property without architectural modification to preserve the light entering the street.**

This project would have a detrimental effect on businesses in our building and others that have been there for 10-20 years, and long-time residents, who live around and adjacent to this project. While we understand the push for more housing in San Francisco, it should not be done without regard to the Planning Codes that are in place to protect our neighborhoods, and certainly not at the expense of long-time residents and families. We understand that neighborhoods change, but the size and scale of this project as proposed will have a large, negative impact on this block and the Sacramento Street corridor. We understand that public policy in San Francisco in this climate supports the construction of multi-family housing. This is high market rate housing, and with approximately 500 + new nearby apartments in the pipeline within 6 blocks, more market rate housing of this size is not worth sacrificing the neighborhood feel and architecture of this block.

We strongly urge you to deny the Conditional Use Permits and Variances for the project as currently shown.

Sincerely,

John Beverly Jones, Atelier Associates

LETTER OF OPPOSITION

San Francisco, CA 94103

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood.

I oppose any variances of allowable construction height in the rear setback because it does not protect rear yards at grade level.

Other: I oppose timing of project with 2
others occurring in neighborhood already
next year of many acres in size.

Thank you for your time and consideration of this letter of opposition.

Sincerely,

Name (please print): Debra Seglund

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood, and is much larger than the Planning guidelines for Sacramento Street.

I oppose the size of this project because of the negative impact it will have on the residents and businesses of Sacramento Street.

Other: _____

Thank you for your time and consideration of this letter of opposition.

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood, and is much larger than the Planning guidelines for Sacramento Street.

I oppose the size of this project because of the negative impact it will have on the residents and businesses of Sacramento Street.

Other: _____

Thank you for your time and consideration of this letter of opposition.

Sincerely, *Christina Bryant*

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood.

I oppose any variances of allowable construction height in the rear setback because it does not protect rear yards at grade level.

Other:

I oppose all of it

Thank you for your time and consideration of this letter of opposition.

Sincerely,

Name (please print):

Mary Woods
Senior Planner
San Francisco Planning Department
1650 Mission Street, Suite 400
San Francisco, CA 94103

Re: Proposed project at 3637-3657 Sacramento Street

Dear Ms. Woods,

We are the owners of 3627-3629 Sacramento Street, San Francisco, CA ("**Sacramento St Adjacent Property**"). We are writing to outline our concerns and opposition regarding the proposed project at 3637-3657 Sacramento Street which is immediately adjacent to our property to the west of our property. The developer, Litke Properties, is asking for several variances and conditional use permits, which we oppose for the specific reasons set forth herein. Our family, by way of background, has owned this property for over 40 years and we are 3rd generation San Franciscans.

As owners of Lot 015, our property is directly impacted by the current proposal (see Exhibits 1 and 2, below). Our property is immediately adjacent to the proposed project on the east side. Currently, the properties are typical of San Francisco properties in our neighborhood and have walls approximately 2 inches apart. See **Exhibit 1** below.

Exhibit 1

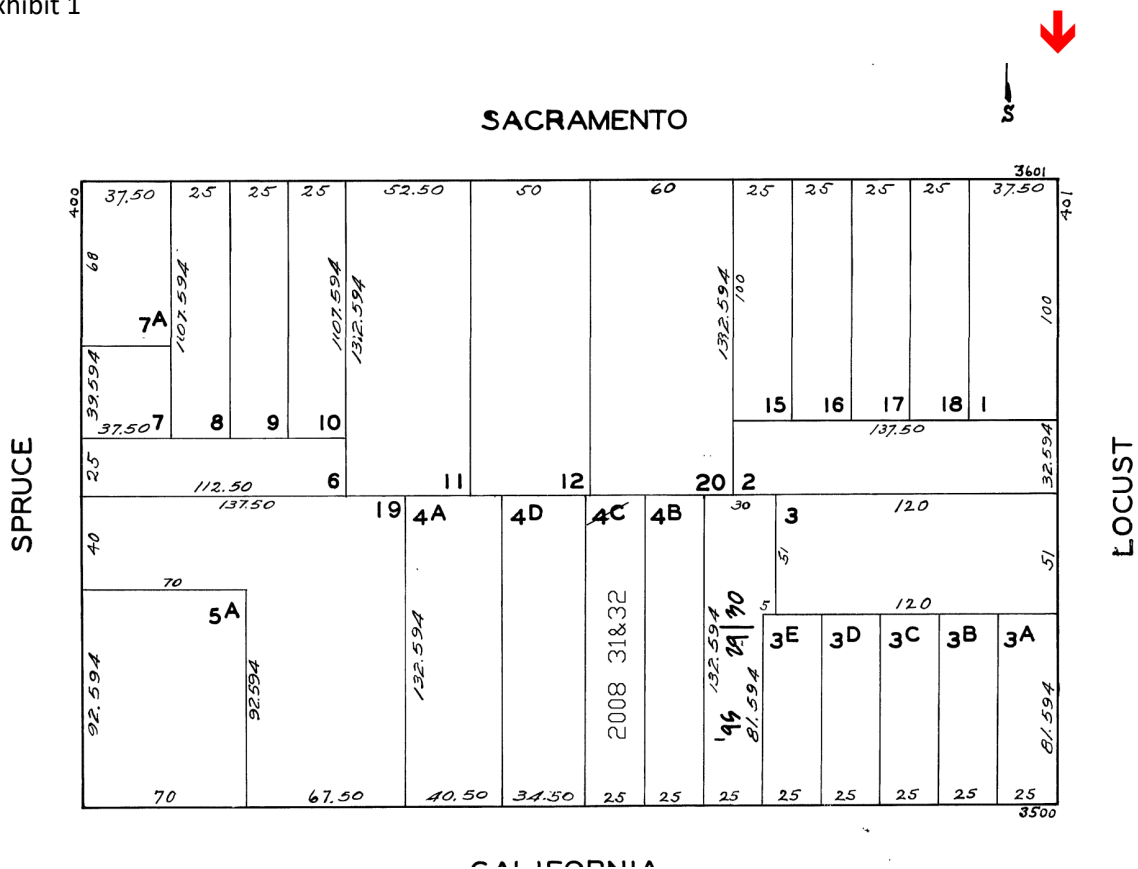

Exhibit 2

Photos to the left show the east existing wall of 3637 Sacramento Street from the 2nd floor rear deck of 3629 Sacramento Street.

Four stories will tower over our building, blocking all light to our building.

Conditional Use Permit (CUP) Requests

The developer is requesting two CUPs related to the size of the project.

1. **The developer's request for a CUP regarding the size of the lot ("lot area greater than 5000 sq ft") violates the Planning Code because the developer is seeking to combine two over-size lots into one massive parcel, which would be nearly three times the size allowed by the Planning Code.**

We oppose this because the two existing lots they are combining in this development *already each exceed 5,000sf*; 3637-41 Sacramento Street is currently 7956sf and 3657 Sacramento is currently 6630sf.

This greatly exceeds the size recommendations for the Neighborhood Commercial district and its intent of development that is appropriate to the district and compatible with adjacent buildings. Additionally, the massing of the proposed building greatly exceeds every other building on the block of this NC district in height, number of stories and street frontage. (121.2(a) and (b)) (see Exhibit 3, below) The proposed size will dwarf our building, look massive, and block all of the light for our tenants on the west side of our building.

The Sacramento Street NCD represents a transitional area between a more major thoroughfare, California Street, and a purely residential area, Presidio Heights. Sacramento Street is 68'-9" wide, a two lane street with parallel parking on either side, and stop signs at every intersection. The scale of the proposed development is actually more in line with the NC-S district on California Street, where it is a 104' wide, four-lane street with transit service. The zoning of the two districts represents the very different nature of the two streets and we feel that the intent of retaining the character of small scale development should be maintained in the Sacramento Street NCD by not granting this CUP.

The proposed lot size creates a building that is not necessary or desirable to the neighborhood, and is not compatible with the neighborhood.

The scale of the proposed building is too large in comparison to the existing buildings on both the north and south side of Sacramento Street.

1 3600 BLOCK - SOUTH SIDE, PROPOSED/EXISTING
SCALE: 1:360

2 3600 BLOCK - NORTH SIDE
SCALE: 1:360

2. The developer is also requesting a CUP for “non-residential use size over 2500sf.”

The proposed ground floor retail is 6,555sf and the second floor medical/dental is 9,976sf. This exceeds the size limit for non-residential uses on both the ground floor (retail: 2.6x Use Size Limit) and second floor (medical offices-4x Use Size Limit).

Per Planning Code section 121.2(a) the Use Size Limit is in place to protect and maintain a scale of development appropriate to the district. By greatly exceeding the specified Use Size Limits the developer is creating a building that does not maintain the scale of development of the NC district.

The proposed size of the second floor medical offices even exceeds the Use Size Restriction for the nearby NC-S district on California Street (6000 sf) and is almost that of a Regional Commercial District (10,000 sf). This proves that it clearly does not comply with the recommended criteria (121.2(a)(2)) that the proposed use will serve the neighborhood or that the nature of the use requires a larger size in order to function.

If the developer had not chosen to combine the two large lots into one massive lot (requiring a CUP for lot size exemption) the sizes of the proposed uses would be smaller.

Additionally, *the disproportionate size of the non-residential use is the major driver of the excessive size of the underground parking garage.* In exceeding 5,000 sf of retail area this triggers the requirement for off street parking, requiring 13 spaces. By exceeding 5,000 sf of health services area this triggers the requirement for off street parking of 32 more spaces. If a CUP is granted for exceeding both of these use size limits it creates the need for 45 additional off street parking spaces which is 71% of the proposed underground parking. This represents approximately 24,500 sf of the proposed garage or two full levels of the three underground parking stories.

Rear Yard Variance Requests

We understand that the developer has made changes in the rear yard variance requests pursuant to letters of objection from the property owners at the rear and side of the proposed project. Notwithstanding, we echo the arguments made below by them:

The developer is requesting three variances for the rear yard, all related to the top of the underground parking garage. By requesting such a large underground parking structure that extends all the way to the rear property line the developer proposes creating a structure with a top floor level that is 4'-8" above existing grade at the Southeast corner and up to 8'-7" above existing grade at the Southwest corner. Additionally, the developer is asking that *on top of this* they be allowed to have a 6'-0" high solid wall. This creates a structure on the rear and side

property lines that varies from 10'-8" high to 14'-7" high above existing grade. All of the needs for these variances are based on decisions of the developer to request Conditional Use Permits for exceeding the non-residential use size limits. **None of these three variances are based on any extraordinary circumstances that do not generally apply to any other property in this district.**

We oppose all of these rear yard variances because it will create a discontinuity in the mid-block rear yard space, and having 10' to 14' high walls on the property lines is a **gross violation of the intent of the rear yard ordinances.**

1. Developer is requesting a variance for "developed top surface of underground parking garage is in rear 15' of lot."

We oppose any variance to the garage occupying the rear 15' of the lot.

There are no exceptional or extraordinary circumstances applying to this property that do not generally apply to any other property in the same district (305(c)(1)).

The enforcement of the requirement would not create any unnecessary hardship. The only hardship would be to the size of the underground parking garage which is only required to be as large as shown due to the choice of the developer to request retail and health services that exceed the Non-Residential Use Size Limits for the Neighborhood Commercial District. (305(c)(2)).

This variance is not necessary to preserve or enjoy a substantial property right possessed by any other property in this district. (305(c)(3)).

Granting this variance would be materially detrimental to properties in the vicinity by disrupting the midblock, landscaped open space (134 & 305(c)(4)). [By allowing the developed top surface to be above the existing grade in excess of the allowed height and with a wall that exceeds the allowed height]

2. Developer is requesting a variance for "Deck exceeds 3' above grade at any point in required open area."

We oppose any variance to the deck surface exceeding 3' in the required rear yard setback.

There are no exceptional or extraordinary circumstances applying to this property that do not generally apply to any other property in the same district (305(c)(1)).

The enforcement of the requirement would not create any unnecessary hardship. The only hardship would be to the floor locations or size of the underground parking garage which is only required to be as large as shown due to the choice of the developer to request retail and health services that exceed the Non-Residential Use Size Limits for the Neighborhood Commercial District. (305(c)(2)).

This variance is not necessary to preserve or enjoy a substantial property right possessed by any other property in this district. (305(c)(3)).

Granting this variance would be materially detrimental to properties in the vicinity by disrupting the midblock, landscaped open space (134 & 305(c)(4)), by allowing the developed top surface to be above the existing grade in excess of the allowed height and with a wall that exceeds the allowed height.

3. Developer is requesting a variance for “Railing exceeds 3’-6” in required open area.”

We oppose any variance to the railing exceeding 3’-6” in the required rear yard setback.

There are no exceptional or extraordinary circumstances applying to this property that do not generally apply to any other property in the same district (305(c)(1)).

The enforcement of the requirement would not create any unnecessary hardship. The only hardship would be to the floor locations or size of the underground parking garage which is only required to be as large as shown due to the choice of the developer to request retail and health services that exceed the Non-Residential Use Size Limits for the Neighborhood Commercial District. (305(c)(2)).

This variance is not necessary to preserve or enjoy a substantial property right possessed by any other property in this district. (305(c)(3)).

Granting this variance would be materially detrimental to properties in the vicinity by disrupting the midblock, landscaped open space (134 & 305(c)(4)), by allowing the developed top surface to be above the existing grade in excess of the allowed height and with a wall that exceeds the allowed height.

Below Grade Parking

As part of the mass of this project, it includes three stories of below grade parking. Although we agree that parking for the neighborhood is needed and a public parking garage is necessary for this project to replace the lost parking in the existing structures, if the size of the project is reduced, there will not be a need for the developer to excavate **a full 3 stories** below grade.

As adjacent property owners, we are terrified of what this type of **excavation** will do to our existing structure and foundation, not to mention the noise, dirt, time and truck traffic in front of our property. There is no plan or discussion regarding the protection of foundation,

subsidence issues with the neighbors or us.

What will be required of the developer to protect our property? We have tenants in our property who have been there many years, have established reputations and rely upon people coming to their business, office and salon. As well, we depend upon the income from this property to survive. If we lose our tenants due to length of time of construction, noise of excavation, pile driving, lack of parking during construction, etc., we will most likely be unable to recover. Elderly tenants will be displaced (one of our Tenants, Jack Taylor, is in his 90's).

We vigorously oppose the size of the garage and excavation of 3 stories below grade.

Light on West Side of Building

Our building has a covered walkway on the west side of the building. Above the walkway is open space. Our structure has diagonal windows and a balcony on the first floor, which allows light and air into the tenants space, and the same with the 2nd floor on the same side. We have a tenant who leases the entire first floor who has just put \$120,000 into interior, non-structural improvements and makes use of their side balcony. We have a new tenant on the second floor who is an art dealer who leased the space because of the natural light into her space.

See photos below:

First floor space:

Second Floor Space:

In summary,

- **We oppose the CUP regarding size of lot,**
- **We oppose the CUP regarding size of non-residential space,**
- **We oppose all three variance requests regarding the rear yard**
- **We oppose the size of this project regarding its impact upon the structure of our adjacent property, impact on existing businesses, impact due to mass and size upon the light onto our property without architectural modification to preserve the light entering our 2nd and 3rd floor space and rear deck.**

This project would have a detrimental effect on businesses in our building that have been there for 10-20 years, and long-time residents, who live around and adjacent to this project. While we understand that the push for more housing in San Francisco, it should not be done without regard to the Planning Codes that are in place to protect our neighborhoods, and certainly not at the expense of long-time residents and families. We understand that neighborhoods change, but the size and scale of this project as proposed will have a large, negative impact on this block and the Sacramento Street corridor. We understand that public policy in San Francisco in this climate supports the construction of multi-family housing. This is market rate housing, and with approximately 500 + new nearby apartments in the pipeline within 6 blocks, more market rate housing of this size is not worth sacrificing the neighborhood feel and architecture of this block.

We strongly urge you to deny the Conditional Use Permits and Variances for the project as currently shown.

Please keep us posted on the date of the hearing.

Sincerely,

Cynthia B. Silverstein, Trustee,
Barbanell Family Administrative Trust and

Gregg S. Barbanell, Trustee,
Barbanell Family Administrative Trust

Subject: RE: 3637-3657 SACRAMENTO ST. - OPPOSITION TO PROPOSED PROJECT 2007.1347E

LETTER OF OPPOSITION

To Whom It May Concern:

This letter is to express OPPOSITION for the proposed project at 3637-3657 Sacramento St. I oppose the demolition of the two structures and the construction of one new mixed-use building for the following reasons:

The size of this project is incompatible with the surrounding low-density residential neighborhood and is much larger than the Planning guidelines for the Sacramento St.

The size of this project will have a very negative impact on the residences and businesses of Sacramento St. For 30+ years I have owned 2 commercial buildings at 3569-3571 Sacramento St. and 3608-3610 Sacramento St. Both have retail spaces on the ground floor. 3569-3571 Sacramento St. has one above floor with 6 medical/psychotherapy offices and 3608-3610 Sacramento St. has two above floors with a total of 11 medical/psychotherapy offices. There have been a total of 8 retail business at 3571 Sacramento St. since the 1980's and 7 of them have failed or closed because of the difficulty sustaining businesses on this street. The current one, CWT Salon, has been open since April, 2018 and seems to be doing okay, but it is early in the game for them. There have been 6 retail businesses in the last 30+ years at 3610A Sacramento St. The first 5 businesses failed for the same reasons and the current one, Acuity Boutique, has been there for about 15 years and has succeeded, in part, because I have reduced her rent at times and kept it significantly under market. Many of the psychiatrists and psychotherapists who rent offices from me have been there for 20-30+ years and all are on a month-to-month, 30 day notice to leave agreement with me. The noise from the demolition and construction, the dirt, the congestion due to the massive amount of trucks going in and out of there over what will probably be 2 + years, regardless of what the contractors say it will be, will cause many to just leave. From all my past experiences with this, I know if my retail tenants go under I have no viable financial recourse with them. I am 73 years old and I count on the income from these two buildings for my retirement. If my retail tenants go under or my psychiatrist and psychotherapist tenants leave I will not be able to replace them while this project is being constructed and it will bankrupt me.

We do not need more retail space in this neighborhood. There are currently 3 empty retail spaces on California St. between Laurel and Spruce Streets and at least one on Sacramento St in this area. This project is one story over the others in the neighborhood and the external design is unattractive and incompatible with the historic character of this block.

I fully support residential use for this site with parking on the ground floor.

Thank you for your consideration of this letter of opposition.

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood, and is much larger than the Planning guidelines for Sacramento Street.

I oppose the size of this project because of the negative impact it will have on the residents and businesses of Sacramento Street.

Other: _____

Thank you for your time and consideration of this letter of opposition.

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood. It is nearly 3x what is allowed for in the Sacramento Street district, per the planning guidelines.

I oppose the size of this project because of the negative impact it will have on the residents and businesses of Sacramento Street.

Other: It is already very difficult for my patients to park in the neighborhood. With the size of this project it will be impossible.

Thank you for your time and consideration of this letter of opposition.

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood, and is much larger than the Planning guidelines for Sacramento Street.

I oppose the size of this project because of the negative impact it will have on the residents and businesses of Sacramento Street.

Other: _____

Thank you for your time and consideration of this letter of opposition.

Sincerely,

RE: 3637-3657 Sacramento Street - Opposition to Proposed Project 2007.1347E

To Whom It May Concern:

This letter is to express **OPPOSITION** for the proposed project at 3637-3657 Sacramento Street. I oppose the demolition of the two structures and construction of one new mixed-use building for the following reason(s):

I oppose the project size because it is incompatible with the surrounding low-density residential neighborhood. It is nearly 3x what is allowed for in the Sacramento Street district, per the planning guidelines.

I oppose the size of this project because of the negative impact it will have on the residents and businesses of Sacramento Street.

Other: _____

Thank you for your time and consideration of this letter of opposition.

Sincerely,

Name (please print): Sarah Townsend

Subject: Letter of opposition - Sacramento Street

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Hi Mary,

Thank you for bringing the proposed Sacramento Street plans to my attention. I live in the 8-unit apartment building at 435 Locust St. between California and Sacramento. I am wholeheartedly against this proposition! The Laurel Village project was terrible enough and it directly impacted me for many months. I felt so bad for the businesses whose front parking spots were temporarily unusable. Please see my letter of opposition attached here.

Thanks,
Jamie

Dear Board of Supervisors:

My name is Stephanie Lim.

I am a psychologist who use to practice at 3676 Sacramento Street, San Francisco, CA as an independent contractor.

It has come to my attention that my name and signature was referenced on a letter that shows I support the project at [3637-57 Sacramento Street](#).

However, I want to clarify that **I DENY EVER SIGNING that letter of support**. I never supported this project and do not support this project currently.

I do not condone the Developer creating the appearance that I am for this project, nor do I allow them to sign on my behalf.

Sincerely,

Stephanie Lim, PhD

San Francisco Board of Supervisors
Attn: Catherine Stefani
1 Dr. Carlton B. Goodlett Place
San Francisco, CA 94102

Re: 3637-57 Sacramento Street

To Supervisor Stefani,

This letter is being submitted on behalf of Olive Grove Capital, LP, owner of the property located at 3640 Sacramento Street currently occupied by Spruce restaurant.

We object to the Planning Department's Categorical Exemption from environmental review under CEQA. The lack of mitigation conducted by the developer allows the neighboring tenants and businesses in the adjacent structures to be negatively impacted by noise, dust, vibration and accessibility during construction. In the absence of an EIR we ask that the developer pay for strict mitigation measures to protect both the surrounding neighbors and businesses.

In addition, it is our position that the height and bulk of the design can be modified to be more compatible with the scale of the surrounding structures and therefore suit the needs of the neighborhood and surrounding tenants.

We thank you for your consideration and ask that you act on behalf of the tenants and businesses as stated.

Best regards,

Haley Gonzabal
Regional Property Manager, Triterra Realty Group, Inc.
Agent for Owner

To: Catherine Stefani, Supervisor
Catherine.Stefani@sfgov.org
January 28th, 2019

Greetings Supervisor Stefani,

I am a business owner and have been a business tenant for the past nineteen years at 3641 Sacramento St., San Francisco, 94118. I attended a neighborhood meeting a few years back when the architect working with Jeff Litke of Litke Properties presented the architectural proposal for demolishing the two office buildings and garage, which are side by side and include the building in which myself and my two suite mates still work in. This past fall, the architectural plans had been modestly revised, but still reveal too large of a footprint for this lovely and beloved Presidio Heights/San Francisco neighborhood. In addition, apparently a waiver has been granted to Litke Properties to forgo the environmental review normally required for building projects.

I am truly dismayed to hear this! I feel an environmental impact review is vital. The impact of the demolition and the building of a large structure that spans three properties will certainly effect the businesses along Sacramento Street between Locust and Spruce Streets, as well as the nearby local residents and residences. To waive the environmental impact review is unfair to the neighborhood community and unwarranted.

I am urging the Board of Supervisors to rescind the waiver and request both an environmental impact review of this project as well as requesting that Litke Properties reduce the scale of the building blueprints. Sacramento Street has a unique and special feel which deserves to be complemented with a new building that nestles in as if it has always been there and has a footprint that integrates gracefully into the scale of the other buildings along Sacramento St. in height, breadth and access.

Thank you.

Respectfully Yours,

Lucy Rush

Dear Supervisor Stefani :

We have met in the past through Melissa Freund White and my mother, Lynn Bunim.

I am a homeowner in your district and live at 310 Spruce Street. I grew up in Lyon Street so have been in the neighborhood my whole life. Like you, I have two small children.

I appreciate the need for more housing in the city and neighborhood. I am for a project at 3637-3657 Sacramento Street, but I would like to see an environmental review completed due to prior use as a garage and a scaled back plan, with only one level for garage parking, no medical and dental and less mass on the top floor to allow for more natural light in the neighborhood. This project seems out of scope in such a small, historic neighborhood. I would like to see strict mitigation measures in place during construction to protect the neighbors and let the neighborhood thrive while construction is taking place. My children love to walk on Sacramento Street to see the train and visit the local businesses. I would hate for this to be disrupted.

I do not believe you and your fellow supervisors would be doing your fiduciary duty if you did not conduct an environmental study. Future ramifications for all could be serious and even life threatening.

Please feel free to reach out to me if you have any further questions about my position.

Lesley Bunim

January 25, 2019

Dear Supervisor Stefani and Board of Supervisors:

Please see the attached letter that has been signed by over 90 mental health professionals in the immediate area of the 3637-57 Sacramento Street project which we are opposing.

Thank you for taking the time to read our letter and consider our unique circumstances prior to the hearing next Tuesday.

To the Clerk: We request this letter to be placed in the administrative record for Case No. 2007.1347E and in conjunction with B. Ponce's letter dated 1-18-19.

Sincerely,

*Sandra Salatich, Psy.D.

January 24, 2019

RE: 3637-57 Appeal of CEQA CatEx & CU

Dear Board of Supervisors:

For over forty years Sacramento Street has been home to an extremely large number of psychotherapists' practices; there are over 150 psychotherapists presently located in this small area. This letter is written on behalf of many of those psychotherapists who will be personally and professionally affected by the proposed project at 3637-57 Sacramento Street.

Our location is in a quiet, safe and pleasant environment, nearby public transportation and close to many schools. It is an easy and comfortable place for children and adults in need of services to access mental health professionals.

While we share many of the concerns that the residents and small business owners have about the project, we have concerns that are unique to our profession. Both therapists and patients will be dramatically impacted by the harsh, noisy, messy environmental changes which will occur to this neighborhood.

We oppose the proposed project as it is currently presented and we hope that you will give our letter serious consideration, and support the appeals before you.

General Concerns:

As it stands, the project is massive in scope and scale. It is out of proportion relative to the surrounding buildings in the neighborhood. The environmental hazards resulting from the traffic congestion of trucks, the dust and pollution from the demolition debris, the inability to access the buildings and shops at times, the noise and seismic effects from jackhammers and heavy equipment will cause residents and businesses to suffer, including psychotherapy practices.

On a daily basis, Sacramento Street sees a large influx of delivery trucks to the restaurants and shops which take up much of the street parking and must often double park causing gridlock. Adding more trucks to the mix to remove excavation debris or deliver construction materials and supplies, together with the workers' trucks will make parking impossible and the street impassable at times.

The fact that the Planning Commission deemed this project exempt from an Environmental Impact Report (EIR) is unconscionable. We believe that an EIR on the potential hazards posed by the project at 3637-57 Sacramento Street is essential.

Psychotherapists Unique Concerns:

Psychotherapy involves doing reflective, emotional work. It can only be conducted in an environment that is quiet, calm and safe for both psychotherapist and patient.

We see patients suffering from a wide range of problems including serious depression, anxiety, loss and trauma.

Patients come to our offices in a fragile emotional state and seek our help by engaging in talk therapy: people such as active duty military returning home from combat with PTSD, women and children who have been victims of sexual assault, or others who may be in such a fragile emotional state that they are contemplating suicide.

You can imagine the difficulties involved in treating patients when there is noise and vibrations, dust and pollution, filling our offices. Our offices will cease to be the kind of place needed to conduct psychotherapy.

We cannot stress enough that these types of intrusive impingements will make our work impossible. Furthermore, it is highly likely that psychotherapy practices will become unsustainable.

Conclusion:

It is crucial that this project not be allowed to move forward as it's currently planned. We urge you to consider how serious this situation is for the psychotherapy community in this neighborhood. We hope you will do everything in your power to protect the people who provide and use our services.

We request you to grant both of these appeals to the CEQA CatEx and CU of the proposed project as requested by the neighborhood residents, shops, businesses and psychotherapists.

We greatly appreciate your time and consideration.

Sincerely,
