

San Francisco Board of Supervisors: Land Use & Transportation Committee

January 31, 2022

PG&E Priorities in San Francisco

SAFETY

- Safety is at the core of the utility business and is PG&E’s most important responsibility

RELIABILITY

- Best operations of our 19 divisions in the service territory

INVESTMENT

- \$3 billion recent investment in electric & gas infrastructure

PARTNERSHIP

- Working together to serve residents of San Francisco

Commitment to Safety

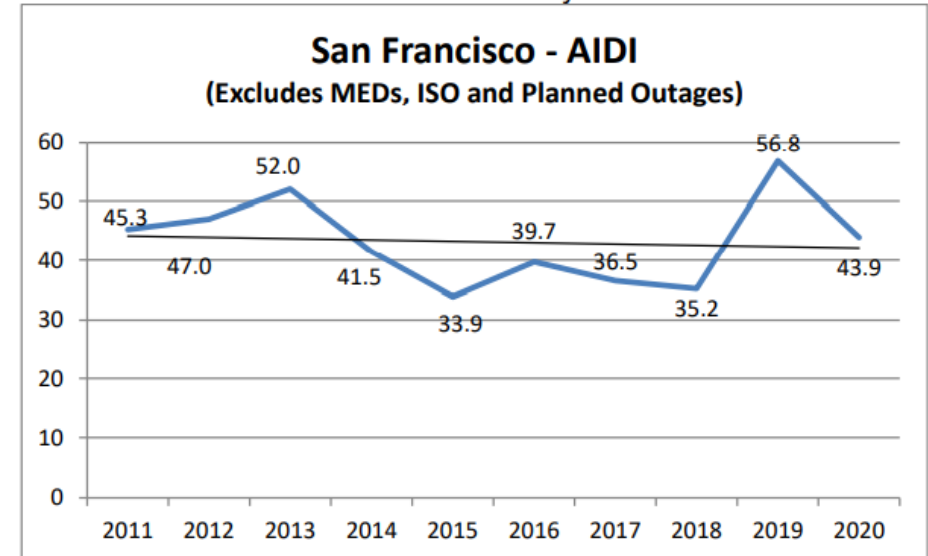

- **PG&E's most important stand: everyone and everything is always safe**
- **Consistency benefits all parties**
 - **One set of rules**
 - **Standards are critical to safety**

Reliability

- In 2005, PG&E committed to 100 reliability projects in San Francisco to close power plants
- San Francisco has lowest average frequency and shortest duration of outages in the PG&E service territory

Chart 100: Division Reliability - AIDI Indices

Minutes out of power for average SF customer for entire calendar year

Investment

- **\$2 billion in the last 15 years into the electric & gas systems**
- **Investing \$1 billion in the next five years**
 - **Transmission projects and substation rebuilds kicking off this year to increase reliability, redundancy and emergency preparedness**

San Francisco Partnership

- **PG&E prioritizes critical CCSF projects**
 - Affordable housing, schools, hospitals, parks
- **Weekly meeting between PG&E and SFPUC engineers**
- **Monthly meetings with PG&E and City Department teams to coordinate on priorities**

Wholesale vs Retail

- **PG&E respects San Francisco's right to provide service**
- **With rights comes obligations - a commitment to safety**
- **Wholesale service - more limited options than retail**
