

CITY AND COUNTY OF SAN FRANCISCO
DEPARTMENT OF ELECTIONS

John Arntz, Director

Honorable Members
Board of Supervisors
City and County of San Francisco
1 Dr. Carlton B. Goodlett Place, Room 244
San Francisco, California 94102

Statement of the Results
City and County of San Francisco
Special Recall Election – September 16, 2025

I, John Arntz, Director of Elections, certify that I have canvassed the ballots cast in the Special Recall Election held on Tuesday, September 16, 2025, in the City and County of San Francisco (City), in the manner required by Division 15 of the California Elections Code.

I certify that I began the canvass immediately upon the close of the polls and, as a result of the tabulation of all votes recorded, present a complete record entitled "Statement of the Results of the San Francisco Special Recall Election – September 16, 2025." I also certify that 21,542 voters cast ballots; therefore, 42.85% of San Francisco's 50,273 voters registered in Supervisorial District 4 participated in this election.

In accordance with California Elections Code section 15374, I certify that this Statement of the Results provides the total number of votes cast for and against the local ballot recall measure. The precinct detail of all votes cast appears in the Statement of the Vote, which is posted on the Department of Elections' website at sfelections.gov/results and is incorporated by reference into this Statement of the Results.

This Statement of the Results includes a table in Attachment 1 that lists the total votes cast for and against the local ballot recall measure, and is organized as follows:

City Ballot Recall Measure

1. A, "Recall Measure Regarding Joel Engardio"

For the September 2025, Special Recall Election, voters in Supervisorial District 4 received a one-card ballot.

All ballots included the following measure:

Card 1: City Ballot Recall Measure A.

SHA-512 Cryptographic Hash Algorithm

The Department of Elections applied a SHA-512 cryptographic function to reports associated with this election to establish the integrity of the results in a verifiable manner. Attachment 2 provides information regarding the SHA-512 hash values for all electronic files associated with the final, certified results reports.

Voting System and Election Transparency

The City's voting system allows for increased election transparency through the posting of images of voted ballots, equipment logs, and other election reports, all of which have been posted with the final election results on the Department's website, *sfelections.gov*.

Voted ballot images

The City's voting system captures images of each voted ballot cast in an election. This creates a visual history of how ballots were marked. After each election, the Department posts the ballot images on its website, allowing members of the public to view each voted ballot cast in the City. Prior to posting the ballot images, the Department reviews the images and redacts identifying information that voters may have placed on ballot cards.

AuditMark

In addition to the voting system capturing images of voted ballot cards, the system also adds an explanation at the bottom of each ballot image indicating how the voting equipment interpreted and tallied each vote mark. These explanations, or AuditMarks, provide the public with information on how the voting system operates in relation to the recording and reporting of every vote cast in this election. This means that for every oval with a mark inside the voting target, even for partial marks, the voting system adds an explanation to the images of voted ballots of how the system understood and registered the markings within each oval.

Cast Vote Record

The Department posted a "Cast Vote Record" that lists each vote recorded on each ballot card. The data provided in the Cast Vote Record is captured as the ballots are scanned by the voting equipment and before vote tabulation occurs, allowing members of the public to tabulate votes from specific precincts, districts, etc., and to compare with the official election results.

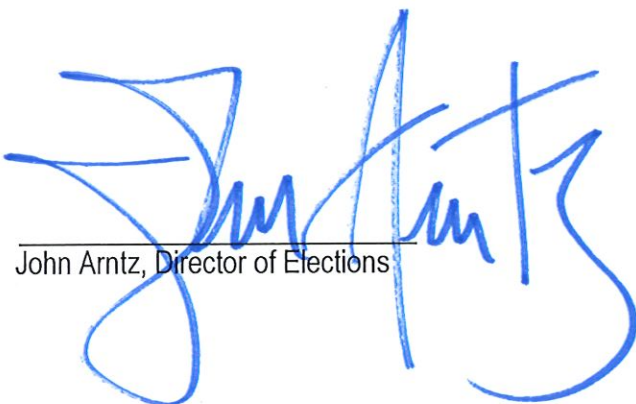

Attachments

Attachment 1 provides a table that lists the votes cast for or against the local ballot recall measure.

Attachment 2 is the list of SHA-512 hashes associated with each final election results report.

Attachment 3 is the report from the manual tallies that the Department conducted on randomly selected polling place, vote-by-mail, and provisional ballots to confirm the voting equipment operated properly, and accurately counted and reported election results.

In witness whereof, I hereby affix my hand and seal this 25th day of September in 2025.

John Arntz, Director of Elections

CITY BALLOT MEASURE

I certify the results for the following CITY BALLOT RECALL MEASURE:

1. MEASURE A - Recall Measure Regarding Joel Engardio

This measure required 50% + 1 affirmative votes to pass.

	Ballots Counted	Percentage
YES	13,474	62.72%
NO	8,009	37.28%
Total	21,483	
Under Votes	58	
Over Votes	1	

**List of SHA-512 Hash Values for Certified Results Reports
Special Recall Election, September 16, 2025**

This list represents the various certified results reports the Department of Elections issued for the September 16, 2025, Special Recall Election. The file names for each report are listed numerically, and underneath each file name is the SHA-512 cryptographic hash value applicable to each file. All reports are posted on the Department's website: www.sfelections.gov/results

1. **"Summary – PDF,"** lists a summary of votes cast by contest, using a PDF format.

**Special Recall Election
September 16, 2025,
Results of 1% Post-Election Manual Tallies**

Pursuant to state elections law, the San Francisco Department of Elections (Department) is required to conduct a manual tally of all ballots cast in 1% of San Francisco's polling places and 1% of the vote-by-mail ballots cast, and may also manually tally 1% of provisional ballots cast, as part of the Official Canvass of the election. The Department compares the results of the manual tallies to the results reports generated by the voting equipment used to tabulate ballot cards. The purpose of the manual tallies is to verify the accuracy of the voting equipment used in the election. Upon completion of the 1% manual tallies, the Department prepares a report on the results of the manual tallies and includes the report in the certification of the Official Canvass for the election.

The following is a report on the results of the manual tallies of ballots cast at 1% of the polling places and 1% of the vote-by-mail ballots cast, as well as all of the provisional ballots voted in San Francisco's Special Recall Election held on September 16, 2025,

Random Selection of Precincts

On September 24, 2025, the Department conducted a random selection of the precinct and batch for the manual tallies in accordance with California Elections Code section 15360.

Five days prior to selecting the precinct and the batch for the manual tallies, the Department issued a press release and posted a public notice on its website, [sfelections.gov](https://www.sfelections.gov), and outside its office, announcing the date, time, and place of the random selection of precincts and batches. Additionally, the Department webcast the random selection process and posted the recording on its website.

For this Special Recall Election, the Department was required to conduct a manual tally of ballots cast in a minimum of one precinct, to represent 1% of San Francisco's 20 polling places included in the election, one batch of vote-by-mail ballots to represent 1% of 47 batches processed. The Department also selected all of the provisional ballots cast for manual tallying.

The random selection was divided into two categories. The first category was for selecting the one precinct. The second category was for selecting one batch (or box) of vote-by-mail ballots. For the provisional ballots, since only one batch was accumulated, the whole batch was manually tallied without needing a random selection process. Using two 10-sided dice, the Department randomly selected the precinct and using the same two 10-sided dice, randomly selected the vote-by-mail batch to be tallied in full. The list of the randomly selected precinct and batch is listed in Part I at the end of this report.

Conducting the 1% Manual Tallies

The 1% manual tallies of the randomly selected precinct and batch were conducted on Wednesday, September 24, 2025, and was completed on the same day. The manual tallies were conducted in the Department's main office in San Francisco's City Hall, which is located at 1 Dr. Carlton B. Goodlett Place. The manual tallies were open to public observation both in person and via live streaming on the Department's website at sfelections.gov/live.

For each selected precinct and batch, Department personnel manually tallied votes cast on the ballots, including polling place ballots cast using the Ballot Scanning Machines (BSM), and accepted vote-by-mail and provisional ballots, including those issued at the Department's City Hall Voting Center. Vote-by-mail and provisional ballots, and paper duplications of ballots through the remake process using the Ballot Marking Device are tabulated using the Image Cast Central (ICC) machines. The manual counts were then compared against the results reports generated from the voting system. If there were any discrepancies between the two tallies, Department personnel sought resolution or explanations for these discrepancies and documented the resolutions using Manual Tally Incident forms.

Department personnel were assembled into one team of four people to manually tally votes on the polling place ballots, vote-by-mail, and provisional ballots. The team was assigned one precinct or one batch to count at a time. After all the votes for the contest had been counted, a supervisor verified whether the manual counts matched the machine counts. Normally for a regular election with multiple contests on the ballot, once the team finished the count for a contest, they would proceed to the next contest. Since there is only one contest on the ballot for this election, once the team completed the precinct ballots, they proceeded to tally the VBM ballots, and then finally the PV ballots.

Results of the 1% Manual Tallies

In accordance with the Post-Election Manual Tally Emergency Regulations, a "variance" means any difference between the manual tally and the machine tally for a contest, including, but not limited to, differences due to machine malfunction, operator error, or voter error in marking a ballot. Upon completion of the manual tallies associated with ballots cast in the September 16, 2025, Special Recall Election, the Department found no discrepancies between the manual tallies and the results issued by the voting system.

The results of the 1% manual tallies confirmed that the voting equipment used in the September 16, 2025, Special Recall Election accurately tabulated and reported votes cast for and against the one recall measure appearing on the official ballot for voters registered in Supervisorial District 4.

The following tables summarize the manual tallies.

Part I. Randomly Selected Precinct and Batches Tallied for the 1% Manual Tally

Part II. Summary of Results of the 1% Manual Tally

Part I: Randomly Selected Precinct and Batch for the 1% Manual Tallies
