

GENERAL PLAN CONSISTENCY DETERMINATION AND CEQA FINDINGS

February 6, 2025

Ms. Carla Short
Director
San Francisco Public Works
49 South Van Ness Avenue, Suite 1600
San Francisco, CA 94103

Ms. Elaine Forbes
Director
Port of San Francisco
Pier 1, The Embarcadero
San Francisco, CA 94111

Project Title:	Mission Rock Project Phase 1 and Phase 1A – Acceptance of Public Improvements; Issuance of Encroachment Permits; Approval of Licenses, Leases, Open Space Management Agreements, and Other Agreements; Approval of Public Works Code Amendments; and Other Actions
Assessor’s Blocks(s)/Lot(s):	8719A/005, 8719C/002, 8719D/001, 8719B/003, 8719A/009, 8719D/001, 8719B/003, 8719A/010, 8719A/004
Design Review Approval No.(s):	2013.0208ENV, DVA, MAP, PCA
Zoning District(s):	Heavy Industrial (M2), Mission Rock Mixed Use (MR-MU) Zoning Districts; 40-Mission Rock, 60-Mission Rock, 90/120-Mission Rock, 90-Mission Rock, 100-Mission Rock, 120-Mission Rock, 190-Mission Rock, 240-Mission Rock, 40-X, and OS Height/Bulk Districts
Staff Contact:	Elizabeth Purl, 628.652.7529, elizabeth.purl@sfgov.org

Dear Director Short and Director Forbes:

This letter addresses numerous proposed actions for consideration by the Port Commission and the Board of Supervisors regarding Phase 1 and Phase 1A of the Mission Rock project (“Project”) on property located on Assessor’s Blocks/Lots 8719A/005, 8719C/002, 8719D/001, 8719B/003, 8719A/009, 8719D/001, 8719B/003, 8719A/010, and 8719A/004.

Regarding Phase 1 and Phase 1A of the Project, the Port Commission and/or the Board of Supervisors will consider taking the following actions:

- Approval of the China Basin Park lease and loan agreement (“CBP Lease”) for the management and operation of China Basin Park, and recommendation that the Board of Supervisors approve the CBP Lease;
- Approval of the license to authorize Pacific Gas and Electric (“PG&E”) to provide power to the 3rd Street Bridge “Pilot House” and the “Absolving Services Agreement” and recommendation that the Board of Supervisors approve the same;
- Approval of the license to authorize PG&E to provide gas service to buildings located on Lot 3 and Lot 4 of the

Project and recommendation that the Board of Supervisors approve the same;

- Approval of a management agreement (“Open Space Management Agreement”) for the management and maintenance of certain Port infrastructure and the Mission Rock open space, and recommendation that the Board of Supervisors approve the Open Space Management Agreement;
- Approval of the license with Mission Rock Utilities (“MRU License”) for the operation and maintenance of private district utilities within China Basin Park and Mission Rock open space, and recommendation that the Board of Supervisors approve the MRU License;
- Approval of the license to place, operate, and maintain electrical lines within Port-owned conduit that facilitates service to mechanical bollards located in the Bridgeview Paseo and Dr. Maya Angelou Paseo (“Bollard License”);
- Approval of a sponsorship agreement between the manager under the Open Space Management Agreement and China Basin Ballpark Company to install special pavers within a portion of the Bay Trail in China Basin Park pursuant to Port Permit Number B-2025-0002;
- Recommendation that the Board of Supervisors approve legislation amending the Public Works Code to memorialize the Port’s exercise of permitting of certain retail activations on City and County of San Francisco (“City”) sidewalks;
- Acceptance of the Offer of Improvements for infrastructure shown in the plans for Street Improvement Permit (“SIP”) No. 20IE-00486, approved by Public Works, Bureau of Street Use and Mapping, on October 1, 2020 (“Plans”) that the City will maintain, including street and utility improvements and as further defined in the latest version of the project’s Maintenance Matrix on file with Public Works as of the date of this letter, and dedication of the same to public use and designation of the same as open public right-of-way for street and roadway purposes subject to specified conditions;
- Approval of the public right-of-way widths, sidewalk widths, and street grades;
- Approval of amendments to the Public Works Code to memorialize the Port’s exercise of permitting authority for certain retail activations on City sidewalks;
- Approval of amendments to the Public Works Code to ensure that any excavation of or in proximity to lightweight cellular concrete (“LCC”) in the Mission Rock Special Use District be performed according to Public Works standards and requirements and according to permits issued by Public Works, including for excavation work that can be completed within 24 hours;
- Authorization of the Public Works Director to execute the Absolving Services Agreement with PG&E;
- Approval of a Master Encroachment Permit for Mission Rock Utilities (“MRU”) to permit MRU to maintain the custom improvements and other encroachments in the public right-of-way including privately-owned district energy lines, non-potable water, and sanitary sewer lines to occupy public rights-of-way and be maintained by MRU;
- Approval of the Port Encroachment Interdepartmental Master Encroachment Permit (“IMEP”), to allow improvements that will be owned and maintained by the Port to be permitted as encroachments to occupy public rights-of-way, as described in the Port IMEP, Maintenance Matrix, and Jurisdictional Memorandum of

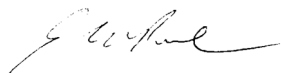

Understanding between the City and the Port; and delegation of authority to the Public Works Director to allow assignment to the maintenance contractor or the owners' association responsibility and liability for compliance with Public Works Code Section 706, provided that the Port also approve such assignment and subject to the condition that if allocated to an Owners' Association, the maintenance responsibilities must be addressed in the CC&Rs as a binding requirement on the Owners' Association and its successors;

- Approval of a major encroachment permit to enable the Developer to maintain LCC monitoring instrument encroachments that will measure the settlement of LCC installed around or below the sidewalks and roadways in the Phase 1A Project area; and
- Other related actions required to implement the Project.

On October 5, 2017, the San Francisco Planning Commission issued a series of approvals for the Mission Rock (i.e., Seawall Lot 337 / Pier 48) Project (Planning Department Records 2013.0208ENV, DVA, MAP, and PCA). These approval actions included certification of the Final Environmental Impact Report ("FEIR") through Motion No. 20017, adoption of California Environmental Quality Act ("CEQA") findings through Motion No. 20018, and adoption of General Plan and Planning Section 101.1 consistency findings through Resolution No. 20019. The Board of Supervisors subsequently adopted the CEQA Findings through Resolution No. 36-18.

Planning Department Staff has reviewed the Plans and considered the Port Commission actions and the Board of Supervisors actions identified in this letter and finds them consistent with the Planning Commission's approvals for the Project. Therefore, the Planning Department Staff finds that the Board of Supervisors actions and the Port Commission actions identified in this letter are covered with the scope of the FEIR and the CEQA findings of Planning Commission Motion Nos. 20017 and 20018 and there is no need for subsequent environmental analysis. In addition, the Planning Department Staff finds that these actions are, on balance, consistent with and covered within the scope of the General Plan and Planning Code Section 101.1 Consistency Findings of Planning Commission Resolution No. 20019. For purposes of the Board of Supervisors actions and Port Commission actions identified in this letter, the Planning Department Staff relies on and incorporates by reference these Planning Commission Motions and their associated findings, copies of which are attached to this letter.

Sincerely,

Elizabeth Purl
Senior Planner

ADOPTING FINDINGS RELATED TO THE CERTIFICATION OF A FINAL ENVIRONMENTAL IMPACT REPORT FOR THE PROPOSED SEAWALL LOT 337 AND PIER 48 MIXED-USE PROJECT.

MOVED, that the San Francisco Planning Commission (hereinafter "Commission") hereby CERTIFIES the final Environmental Impact Report identified as Case No. 2013.0208E, the "Seawall Lot 337 and Pier 48 Mixed-Use Project" (hereinafter "Project"), based upon the following findings:

1. The City and County of San Francisco, acting through the Planning Department (hereinafter "Department") fulfilled all procedural requirements of the California Environmental Quality Act (Cal. Pub. Res. Code Section 21000 *et seq.*) (hereinafter "CEQA"), the State CEQA Guidelines (Cal. Code Regs. Title 14, Section 15000 *et seq.*) (hereinafter "CEQA Guidelines") and Chapter 31 of the San Francisco Administrative Code (hereinafter "Chapter 31").
 - A. The Department determined that an Environmental Impact Report (hereinafter "EIR") was required and provided public notice of that determination by publication in a newspaper of general circulation on December 11, 2013.

- B. The Department held a public scoping meeting on January 13, 2014, in order to solicit public comment on the scope of the Project's environmental review.
 - C. On April 26, 2017, the Department published the Draft Environmental Impact Report (hereinafter "DEIR") and provided public notice in a newspaper of general circulation of the availability of the DEIR for public review and comment and of the date and time of the Commission public hearing on the DEIR; this notice was mailed to the Department's list of persons requesting such notice.
 - D. Notices of availability of the DEIR and of the date and time of the public hearing were posted near the project site on April 26, 2017.
 - E. On April 26, 2017, copies of the DEIR were mailed or otherwise delivered to a list of persons requesting it, to those noted on the distribution list in the DEIR, and to government agencies, the latter both directly and through the State Clearinghouse.
 - F. A Notice of Completion was filed with the State Secretary of Resources via the State Clearinghouse on April 26, 2017.
2. The Commission held a duly advertised public hearing on said DEIR on June 1, 2017, at which opportunity for public comment was given, and public comment was received on the DEIR. The period for acceptance of written comments ended on June 12, 2017.
 3. The Department prepared responses to comments on environmental issues received at the public hearing and in writing during the 47-day public review period for the DEIR, prepared revisions to text of the DEIR in response to comments received or based on additional information that became available during the public review period, and corrected errors in the DEIR. This material was presented in a Comments and Responses document, published on September 20, 2017, distributed to the Commission and all parties who commented on the DEIR, and made available to others upon request at the Department.
 4. A Final Environmental Impact Report (hereinafter "FEIR") has been prepared by the Department, consisting of the DEIR, any consultations and comments received during the review process, any additional information that became available, and the Comments and Responses document, all as required by law.
 5. Project EIR files have been made available for review by the Commission and the public. These files are available for public review at the Department at 1650 Mission Street, Suite 400, and are part of the record before the Commission.

6. On October 5, 2017, the Commission reviewed and considered the information contained in the FEIR and hereby does find that the contents of said report and the procedures through which the FEIR was prepared, publicized, and reviewed comply with the provisions of CEQA, the CEQA Guidelines, and Chapter 31.
7. The Commission hereby does find that the FEIR concerning File No. 2013.0208E reflects the independent judgement and analysis of the City and County of San Francisco, is adequate, accurate and objective, and that the Comments and Responses document contains no significant revisions to the DEIR that would require recirculation of the document pursuant to CEQA Guidelines Section 15088.5, and hereby does CERTIFY THE COMPLETION of said FEIR in compliance with CEQA, the CEQA Guidelines, and Chapter 31.
8. The Commission, in certifying the completion of said FEIR, hereby does find that the project described in the EIR would have the following significant unavoidable environmental impacts, which cannot be mitigated to a level of insignificance:
 - A. **TR-4:** The proposed Project would result in an adverse impact by increasing ridership by more than 5 percent on two individual Muni routes that exceed 85 percent capacity utilization under baseline conditions.
 - B. **TR-6:** The proposed Project would result in an adverse impact related to a substantial increase in transit delays on Third Street between Channel Street and Mission Rock Street.
 - C. **TR-9:** The proposed Project would have significant impacts on pedestrian safety at the unsignalized intersections of Fourth Street/Mission Rock Street and Fourth Street/Long Bridge Street.
 - D. **C-TR-4:** The proposed Project would contribute considerably to a significant cumulative transit impact because it would increase ridership by more than 5 percent on one individual Muni route that would exceed 85 percent capacity utilization.
 - E. **C-TR-6:** The proposed Project would contribute considerably to significant cumulative impacts related to transit delays.
 - F. **C-TR-7:** The proposed Project would contribute considerably to significant cumulative pedestrian impacts.

- G. **NOI-1:** Construction of the proposed Project would generate noise levels in excess of standards or result in substantial temporary increases in noise levels.
- H. **NOI-2:** Operation of the proposed Project could result in the exposure of persons to or generation of noise levels in excess of the San Francisco Noise Ordinance or a substantial temporary, periodic or permanent increase in ambient noise levels in the Project vicinity, above levels existing without the Project.
- I. **NOI-3:** Construction of the proposed Project would expose persons to or generate excessive ground-borne vibration or ground-borne noise levels related to annoyance. Construction of the proposed Project could expose persons to or generate excessive ground-borne vibration or ground-borne noise levels related to damage to buildings.
- J. **C-NOI-1:** Construction activities for the proposed Project, in combination with other past, present, and reasonable future projects in the city, would result in a substantial temporary increase in noise or noise levels in excess of the applicable local standards.
- K. **C-NOI-2:** Construction activities associated with Project-related development, in combination with other past, present, and reasonable future projects in the city, would expose sensitive receptors to excessive ground-borne vibration related to annoyance and could result in similar impacts related to damage to buildings. (Significant and Unavoidable for Annoyance).
- L. **C-NOI-3:** Operation of the proposed Project, in combination with other past, present, and reasonable future projects in the city, would result in the exposure of persons to noise in excess of the applicable local standards or a substantial permanent ambient noise level increase in the Project vicinity.
- M. **AQ-1:** Construction of the proposed Project would generate fugitive dust and criteria air pollutants, which for criteria air pollutants but not fugitive dust, would violate an air quality standard, contribute substantially to an existing or projected air quality violation, or result in a cumulatively considerable net increase in criteria air pollutants. (Significant and Unavoidable with Mitigation for Criteria Air Pollutants).
- N. **AQ-2:** During Project operations, the proposed Project would result in emissions of criteria air pollutants at levels that would violate an air quality standard, contribute to an existing or projected air quality violation, or result in a cumulatively considerable net increase in criteria air pollutants.

- O. **AQ-3:** During combined Project construction and operations, the proposed Project would result in emissions of criteria air pollutants at levels that would violate an air quality standard, contribute to an existing or projected air quality violation, or result in a cumulatively considerable net increase in criteria air pollutants.
 - P. **C-AQ-1:** The proposed Project's construction and operation, in combination with other past, present, and reasonable future projects, would contribute to cumulative regional air quality impacts.
 - Q. **WS-1:** The proposed Project would alter wind in a manner that would substantially affect public areas.
 - R. **C-WS-1:** The proposed Project, in combination with past, present, and reasonably foreseeable future projects, would alter wind in a manner that would substantially affect public areas.
9. The Commission reviewed and considered the information contained in the FEIR prior to approving the proposed Project.

I hereby certify that the foregoing Motion was ADOPTED by the Planning Commission at its regular meeting of October 5, 2017.

Jonas P. Ionin
Commission Secretary

ADOPTING ENVIRONMENTAL FINDINGS PURSUANT TO THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, INCLUDING FINDINGS OF FACT, FINDINGS REGARDING SIGNIFICANT IMPACTS AND SIGNIFICANT AND UNAVOIDABLE IMPACTS, EVALUATION OF MITIGATION MEASURES AND ALTERNATIVES, AND A STATEMENT OF OVERRIDING CONSIDERATIONS RELATED TO APPROVALS FOR THE MISSION ROCK (AKA SEAWALL LOT 337 AND PIER 48 MIXED-USE PROJECT) (“PROJECT”), LOCATED ON ASSESSOR’S BLOCK 8719 LOT 006 AND BLOCK 9900 LOTS 048.

PREAMBLE

The project sponsor, Seawall Lot 337 Associates, LLC, applied for environmental review of a mixed-use phased development at Seawall Lot 337, and rehabilitation and reuse of Pier 48 (“Project”) on May 31, 2013.

The Project is located on an approximately 28-acre project site that consists of the following: the 14.2-acre Seawall Lot 337; the 0.3-acre strip of land on the south side of Seawall Lot 337, referred to as Parcel P20; the 6.0-acre Pier 48; the existing 2.2-acre China Basin Park; and 5.4 acres of streets and access areas within or adjacent to the boundaries of Seawall Lot 337 and Pier 48. The project site is adjacent to the Mission Bay neighborhood of the city and the Mission Bay South Redevelopment Area. The site is currently used for open space (China Basin Park); a surface parking lot (Seawall Lot 337 and P20); and indoor parking, storage, warehouse uses and special events (Pier 48).

The Project would include 2.7 to 2.8 million gross square feet (“gsf”) of mixed-uses on 11 proposed development blocks on Seawall Lot 337, with building heights ranging from 90 feet to a maximum of 240 feet. The mixed use development would comprise approximately 1.1 to 1.6 million gsf of residential uses (estimated at 1,000 to 1,600 units, consisting of both market-rate and affordable housing), approximately 972,000 to 1.4 million gsf of commercial uses, and 241,000 to 244,800 gsf of active/retail uses on the lower floors of each block. Additionally, the Project would include approximately 1.1 million gsf of

aboveground and underground parking (approximately 3,100 parking spaces) and rehabilitation of 242,500 gsf of space within Pier 48 to provide industrial, restaurant, active/retail, tour, exhibition, and meeting space for reuse by an industrial use, specifically analyzed as a proposed brewery. The Project would also include a total of approximately 8.0 acres of open space. The Project is more particularly described in Attachment A.

Pursuant to and in accordance with the requirements of Section 21094 of CEQA and Sections 15063 and 15082 of the CEQA Guidelines, the San Francisco Planning Department, as lead agency, published and circulated a Notice of Preparation ("NOP") on December 11, 2013, that solicited comments regarding the scope of the environmental impact report ("EIR") for the proposed project. The NOP and its 30-day public review comment period were advertised in a newspaper of general circulation in San Francisco and mailed to governmental agencies, organizations and persons interested in the potential impacts of the proposed project. The Planning Department held a public scoping meeting on January 13, 2014, in the Bayside Room at the Port of San Francisco, Pier 1, The Embarcadero.

During the approximately 51-day public scoping period that ended on January 31, 2014, the Planning Department accepted comments from agencies and interested parties who identified environmental issues that should be addressed in the EIR. On the basis of public comments submitted in response to the NOP and at the public scoping meeting, the Planning Department found that potential areas of controversy and unresolved issues for the proposed project included: consistency of the Project with the Mission Bay Plan, the San Francisco Waterfront Plan, and the Mission Bay development guidelines; potential impacts along specific viewpoints, the waterfront and surrounding areas; the scale and height of the proposed project and the future use of Parcel P20; provision of affordable housing and population density; potential impacts on submerged cultural resources in the project area; increases in traffic and traffic congestion, connections to the City's transportation network, lack of public transportation in the area, pedestrian safety, traffic during game days, fair share contributions, and potential impacts of increased traffic on emergency vehicle delay; potential noise impacts from additional residents; potential greenhouse gas ("GHG") impacts, adequate mitigation measures for GHG impacts, and inclusion of a GHG emissions analysis consistent with Assembly Bill 32, the California Global Warming Solutions Act; potential shadow impacts along the waterfront, China Basin Park, and the proposed Mission Rock Square; potential impacts on loss of green space, and preservation of public lands for public and recreational use; adequacy of water and sewer systems with the addition of the proposed project, including a Water Supply Assessment; and potential impacts on the marine environment, as well as state- and federally listed species, and pile-driving impacts on fish, birds, and mammals. Comments received during the scoping process also were considered in preparation of the Draft EIR.

In June 2014, subsequent to the publication of the NOP, the City's voters approved Proposition B (Voter Approval for Waterfront Development Height Increases), which states that voter approval is required for any height increases on property, such as the project site, within the jurisdiction of the Port of San Francisco. Accordingly, on November 3, 2015, the City's voters approved Proposition D (the Mission Rock Affordable Housing, Parks, Jobs, and Historic Preservation Initiative), which amended the height and bulk restrictions for the project site by establishing the Mission Rock Height and Bulk District. Under Proposition D, the proposed heights for buildings on some of the proposed development blocks are lower than originally contemplated in the NOP, and there have been no increases in the height, density or intensity of development for the proposed Project since publication of the NOP.

To allow for flexibility to respond to future market demands and conditions, the project sponsor proposes flexible zoning and land uses on 3 of the 11 proposed development blocks on Seawall Lot 337. Specifically, Blocks H, I, and J are proposed to be designated to allow either residential or commercial as

the predominant use above the lower-floor active/retail uses. The project sponsor would determine the primary land uses of the three flexible zoning blocks above the lower floor (i.e., residential or commercial) at the time of filing for design approvals for block development proposals. These flexible blocks are analyzed in the EIR as ranges and land use assumptions (High Commercial or High Residential).

The San Francisco Planning Department then prepared the Draft EIR, which describes the Project and the environmental setting, analyzes potential impacts, identifies mitigation measures for impacts found to be significant or potentially significant, and evaluates project variants and alternatives to the Draft EIR Project. The Draft EIR assesses the potential construction and operational impacts of the Project on the environment, and the potential cumulative impacts associated with the Project in combination with other past, present, and future actions with potential for impacts on the same resources. The analysis of potential environmental impacts in the Draft EIR utilizes significance criteria that are based on the San Francisco Planning Department Environmental Planning Division guidance regarding the environmental effects to be considered significant. The Environmental Planning Division's guidance is, in turn, based on CEQA Guidelines Appendix G, with some modifications.

The Planning Department published a Draft EIR for the project on April 26, 2017, and circulated the Draft EIR to local, state, and federal agencies and to interested organizations and individuals for public review. On April 26, 2017, the Planning Department also distributed notices of availability of the Draft EIR; published notification of its availability in a newspaper of general circulation in San Francisco; posted the notice of availability at the San Francisco County Clerk's office; and posted notices at locations within the project area. The Planning Commission held a public hearing on June 1, 2017, to solicit testimony on the Draft EIR during the public review period. The Draft EIR public review period ended on June 12, 2017. A court reporter, present at the public hearing, transcribed the oral comments verbatim, and prepared written transcripts. The Planning Department also received written comments on the Draft EIR, which were sent through mail, fax, hand delivery, or email.

The San Francisco Planning Department then prepared the Comments and Responses ("C&R"). The C&R document was published on September 21, 2017, and includes copies of all of the comments received on the Draft EIR and written responses to each comment.

The C&R document provided additional, updated information, clarification and modifications on issues raised by commenters, as well as Planning Department staff-initiated text changes to the Draft EIR. The Final EIR, which includes the Draft EIR, the C&R document, the Appendices to the Draft EIR and C&R document, and all of the supporting information, has been reviewed and considered. The C&R documents and appendices and all supporting information do not add significant new information to the Draft EIR that would individually or collectively constitute significant new information within the meaning of Public Resources Code Section 21092.1 or CEQA Guidelines Section 15088.5 so as to require recirculation of the Final EIR (or any portion thereof) under CEQA. The C&R documents and appendices and all supporting information contain no information revealing (1) any new significant environmental impact that would result from the Project or from a new mitigation measure proposed to be implemented, (2) any substantial increase in the severity of a previously identified environmental impact, (3) any feasible project alternative or mitigation measure considerably different from others previously analyzed that would clearly lessen the environmental impacts of the Project, but that was rejected by the project sponsor, or (4) that the Draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded.

On October 5, 2017, the Planning Commission by Motion No. 20017, found that the Final EIR was adequate, accurate, and objective, reflected the independent judgment of the Planning Commission and that the C&R document contains no significant revisions to the Draft EIR, and adopted findings of significant impact associated with the Project and certified the completion of the Final EIR for the Project in compliance with CEQA, and the CEQA Guidelines and Chapter 31.

The Planning Department prepared proposed Findings, as required by CEQA, regarding the alternatives, mitigation measures and significant impacts analyzed in the Final EIR and overriding considerations for approving the Project and a proposed mitigation monitoring and reporting program ("MMRP"), attached as Exhibit 1 to Attachment A, which material was made available to the public and this Planning Commission for the Planning Commission's review, consideration and actions.

The Commission, in certifying the FEIR, found that the Project described in the FEIR will have the following significant and unavoidable environmental impacts:

- The proposed Project would result in an adverse impact by increasing ridership by more than 5 percent on two individual Muni routes that exceed 85 percent capacity utilization under baseline conditions.
- The proposed Project would result in an adverse impact related to a substantial increase in transit delays on Third Street between Channel Street and Mission Rock Street.
- The proposed Project would have significant impacts on pedestrian safety at the unsignalized intersections of Fourth Street/Mission Rock Street and Fourth Street/Long Bridge Street.
- The proposed Project would contribute considerably to a significant cumulative transit impact because it would increase ridership by more than 5 percent on one individual Muni route that would exceed 85 percent capacity utilization.
- The proposed Project would contribute considerably to significant cumulative impacts related to transit delays.
- The proposed Project would contribute considerably to significant cumulative pedestrian impacts.
- Construction of the proposed Project would generate noise levels in excess of standards or result in substantial temporary increases in noise levels.
- Operation of the proposed Project could result in the exposure of persons to or generation of noise levels in excess of the San Francisco Noise Ordinance or a substantial temporary, periodic or permanent increase in ambient noise levels in the Project vicinity, above levels existing without the Project.
- Construction of the proposed Project would expose persons to or generate excessive ground-borne vibration or ground-borne noise levels related to annoyance. Construction of the proposed Project could expose persons to or generate excessive ground-borne vibration or ground-borne noise levels related to damage to buildings.

- Construction activities for the proposed Project, in combination with other past, present, and reasonable future projects in the city, would result in a substantial temporary increase in noise or noise levels in excess of the applicable local standards.
- Construction activities associated with Project-related development, in combination with other past, present, and reasonable future projects in the city, would expose sensitive receptors to excessive ground-borne vibration related to annoyance and could result in similar impacts related to damage to buildings. (Significant and Unavoidable for Annoyance).
- Operation of the proposed Project, in combination with other past, present, and reasonable future projects in the city, would result in the exposure of persons to noise in excess of the applicable local standards or a substantial permanent ambient noise level increase in the Project vicinity.
- Construction of the proposed Project would generate fugitive dust and criteria air pollutants, which for criteria air pollutants but not fugitive dust, would violate an air quality standard, contribute substantially to an existing or projected air quality violation, or result in a cumulatively considerable net increase in criteria air pollutants. (Significant and Unavoidable with Mitigation for Criteria Air Pollutants).
- During Project operations, the proposed Project would result in emissions of criteria air pollutants at levels that would violate an air quality standard, contribute to an existing or projected air quality violation, or result in a cumulatively considerable net increase in criteria air pollutants.
- During combined Project construction and operations, the proposed Project would result in emissions of criteria air pollutants at levels that would violate an air quality standard, contribute to an existing or projected air quality violation, or result in a cumulatively considerable net increase in criteria air pollutants.
- The proposed Project's construction and operation, in combination with other past, present, and reasonable future projects, would contribute to cumulative regional air quality impacts.
- The proposed Project would alter wind in a manner that would substantially affect public areas.
- The proposed Project, in combination with past, present, and reasonably foreseeable future projects, would alter wind in a manner that would substantially affect public areas.

The Planning Commission Secretary is the custodian of records for the Planning Department materials, located in the File for Case No. 2013.0208ENV, at 1650 Mission Street, Fourth Floor, San Francisco, California.

On October 5, 2017, the Planning Commission conducted a duly noticed public hearing at a regularly scheduled meeting and adopted this Motion No. 20018, adopting CEQA findings, including a Statement of Overriding Considerations, and adopting an MMRP, and adopted other Motions and Resolutions with respect to the Project.

On October 5, 2017, the Planning Commission conducted a duly noticed public hearing at a regularly scheduled meeting on the various approvals necessary to implement the Project, including, but not limited to, Planning Code Text and Zoning Map Amendments, approval of the Mission Rock Design

Motion No. 20018
October 5, 2017

CASE NO. 2013.0208ENV
Mission Rock Mixed-Use Project

Controls document, approval of a Development Agreement and made findings of General Plan consistency. (See Planning Commission Resolution and Motions numbers 20019, 20020, and 20021. The Planning Commission makes these findings and adopts the MMRP as part of each and all of these approval actions.

MOVED, that the Planning Commission has reviewed and considered the Final EIR and the record associated therewith, including the comments and submissions made to this Planning Commission and the Planning Department's responses to those comments and submissions, and based thereon, hereby adopts the Project Findings required by CEQA attached hereto as Attachment A including a statement of overriding considerations, and adopts the MMRP, included as Exhibit 1 to Attachment A, as a condition of approval for each and all of the approval actions set forth in the Resolutions and Motions described above.

I hereby certify that the Planning Commission **ADOPTED** the foregoing Motion on Thursday, October 5, 2017.

Jonas P. Ionin

RESOLUTION RECOMMENDING THAT THE BOARD OF SUPERVISORS APPROVE AMENDMENTS TO THE PLANNING CODE TO ESTABLISH THE MISSION ROCK MIXED-USE DISTRICT, THE MISSION ROCK SPECIAL USE DISTRICT, ALONG WITH OTHER RELATED MINOR CHANGES TO ARTICLE 2 AND ARTICLE 9 OF THE PLANNING CODE; AND BY AMENDING ZONING MAP ZN 08 BY DESIGNATING ASSESSOR’S BLOCK AND LOT: 8719/ 006 AND 9900/-48 AS PART OF THE MISSION ROCK MIXED-USE DISTRICT AND BY AMENDING SPECIAL USE DISTRICT MAP SD 08 BY DESIGNATING ASSESSOR’S BLOCK AND LOTS: 8719/ 006 AND 9900/048 AS PART OF THE MISSION ROCK SPECIAL USE DISTRICT; ADOPT FINDINGS OF CONSISTENCY WITH THE GENERAL PLAN AND PLANNING CODE SECTION 101.1 AND FINDINGS UNDER PLANNING CODE SECTION 302, AND INCORPORATING FINDINGS UNDER THE CALIFORNIA ENVIRONMENTAL QUALITY ACT.

WHEREAS, on September 5, 2017, Mayor Edwin Lee and Supervisor Jane Kim introduced an ordinance (Board File 170940) for Planning Code Text Amendments to establish the Mission Rock Mixed-Use District and the Mission Rock Special Use District (herein “SUD”), and for Planning Code Map Amendments by amending Zoning Map ZN08 by designating Assessor’s Block and Lot: 8719/006 as part of the Mission Rock Mixed-Use District and by amending Special Use District Map SD08 by designating assessor’s block and lots: 8719/ 006 and 9900/048 to the Mission Rock SUD.

WHEREAS, pursuant to Planning Code Section 302(b), on September 5, 2017, the San Francisco Board of Supervisors initiated these Planning Code Text and Map Amendments.

WHEREAS, these Planning Code Text and Map Amendments would enable the Project. The Project includes new market-rate and affordable residential uses, commercial uses, retail, light industrial uses, parking, shoreline improvements, infrastructure development and street improvements, and public open space. Depending on the uses proposed, the Project would include approximately 1.1. to 1.6 million gross square feet (gsf) of residential uses (estimated as between 1,000 to 1,600 residential units) (of which 40% will be below market rate), approximately 972,000 to 1.4 million gsf of commercial-office uses, and a maximum of approximately 245,000 gsf of retail uses. The Project also includes construction of transportation and circulation improvements, new and upgraded utilities and infrastructure, geotechnical

and shoreline improvements, up to 3,000 off-street parking spaces in one or two new garages and 100 spaces elsewhere throughout the site. The Project is more comprehensively described in the Seawall Lot 337 and Pier 48 Mixed-Use Project Draft EIR.

WHEREAS, the Project would construct new buildings that would range in height from 90 to 240 feet, as is consistent with Proposition D which was passed by the voters of San Francisco in November 2015.

WHEREAS, these Planning Code Text Amendments would establish the Mission Rock Mixed Use District and Mission Rock SUD, which would outline the land use controls for the Project site.

WHEREAS, these Planning Code Map Amendments would designate the newly created Mission Rock Mixed-Use District and the Mission Rock Special Use District to the Project Site; the newly created SUD outline the land use controls for the Project site.

WHEREAS, this Resolution approving these Planning Code Text and Map Amendments is a companion to other legislative approvals relating to the Project, including approval of the Mission Rock Design Controls document, and recommendation for approval of the Development Agreement.

WHEREAS, as part of the implementation of the Project, the Office of Community Investment and Infrastructure (OCII) will consider removing certain property identified as Mission Bay Parcel P20 (a 0.3-acre, approximately 20-foot-wide strip of land adjacent to the south side of Seawall Lot 337, along the north side of Mission Rock Street) from the Mission Bay South Redevelopment Plan, and such removal would be part of the Project implementation as described in the Development Agreement. Parcel P20 is currently subject to the Mission Bay South Redevelopment Plan and is designated in that plan as a small open-space buffer. When it adopted AB 2797, the state legislature recognized the need to remove P20 from the Redevelopment Plan, on the basis that "the revitalization of Seawall Lot 337 . . . is of particular importance to the state." As such, AB 2797 calls for the amendment of the Redevelopment Plan to remove P20 without State-level review under Health & Safety Code Sections 34163(c)-(f) and 34164(a) and (b).

WHEREAS, on October 5, 2017, the Planning Commission reviewed and considered the Final EIR for the Mission Rock Project ("FEIR") and found the FEIR to be adequate, accurate and objective, thus reflecting the independent analysis and judgment of the Department and the Commission, and that the summary of comments and responses contained no significant revisions to the Draft EIR, and certified the FEIR for the Project in compliance with the California Environmental Quality Act ("CEQA"), the CEQA Guidelines and Chapter 31 by Motion No. 20017.

WHEREAS, on October 5, the Commission by Motion No. 20018 approved CEQA Findings, including adoption of a Mitigation Monitoring and Reporting Program (MMRP), under Case No. 2013.0208ENV, for approval of the Project, which findings and MMRP are incorporated by reference as though fully set forth herein.

WHEREAS, on October 5, 2017, the Commission conducted a duly noticed public hearing at a regularly scheduled meeting on the proposed Planning Code Text and Map Amendments and has considered the information included in the File for these Amendments, the staff reports and presentations, public testimony and written comments, as well as the information provided about the Project from other City departments.

WHEREAS, a draft ordinance, substantially in the form attached hereto as Exhibit A, approved as to form, including those minor changes to Exhibit A as provided by staff on September 28, 2017, would

establish the Mission Rock Mixed Use District, Mission Rock SUD, and make other related Planning Code Text and Map amendments.

NOW THEREFORE BE IT RESOLVED, that the Planning Commission hereby finds that the Planning Code Text Amendments and Zoning Map Amendments promote the public welfare, convenience and necessity for the following reasons:

1. The Amendments would help implement the Mission Rock Mixed-Use Project development, thereby evolving currently under-utilized surface parking lot for needed housing, commercial space, and parks and open space.
2. The Amendments would help implement the Mission Rock Mixed-Use Project, which in turn will provide employment opportunities for local residents during construction and post-occupancy, as well as community facilities and parks for new and existing residents.
3. The Amendments would help implement the Mission Rock Mixed-Use Project by enabling the creation of a mixed-use and sustainable neighborhood, with fully rebuilt infrastructure. The new neighborhood would improve the site's multi-modal connectivity to and integration with the surrounding City fabric, and connect existing neighborhoods to the City's waterfront.
4. The Amendments would enable the construction of a new vibrant, safe, and connected neighborhood, including new parks and open spaces. The Amendments would help ensure a vibrant neighborhood with active streets and open spaces, high quality and well-designed buildings, and thoughtful relationships between buildings and the public realm, including the waterfront.
5. The Amendments would enable construction of new housing, including new on-site affordable housing, and new retail and manufacturing uses. These new uses would create a new mixed-use neighborhood that would strengthen and complement nearby neighborhoods.
6. The Amendments would facilitate the preservation and rehabilitation of Pier 48 - an important historic resource listed in the National Register of Historic Places.

AND BE IT FURTHER RESOLVED, that the Planning Commission finds the Planning Code Text and Map Amendments are in general conformity with the General Plan and Planning Code Section 101.1 as set forth below.

AND BE IT FURTHER RESOLVED, that the Planning Commission finds the Project and its approvals associated therein, including the amendment to the Mission Bay South Redevelopment Plan to remove Parcel P20 from that Plan, all as more particularly described in Exhibits B and C to the Development Agreement on file with the Planning Department in Case No. 2013.0208DVA, are on balance consistent with the Objectives and Policies of the General Plan, as described herein as follows:

HOUSING ELEMENT

OBJECTIVE 1

IDENTIFY AND MAKE AVAILABLE FOR DEVELOPMENT ADEQUATE SITES TO MEET THE CITY'S HOUSING NEEDS, ESPECIALLY PERMANENTLY AFFORDABLE HOUSING.

POLICY 1.1

Plan for the full range of housing needs in the City and County of San Francisco, especially affordable housing.

POLICY 1.8

Promote mixed use development, and include housing, particularly permanently affordable housing, in new commercial, institutional or other single use development projects.

POLICY 1.10

Support new housing projects, especially affordable housing, where households can easily rely on public transportation, walking and bicycling for the majority of daily trips.

The Project is a mixed-use development with approximately 1.1 to 1.6 million gsf of residential uses (estimated at between 1,100 and 1,600 dwelling units) at full project build-out, which will provide a wide range of housing options. As detailed in the Development Agreement, the Project substantially exceeds the inclusionary affordable housing requirements of the Planning Code, through a partnership between the developer and the City to reach a 40% affordable level.

OBJECTIVE 11

SUPPORT AND RESPECT THE DIVERSE AND DISTINCT CHARACTER OF SAN FRANCISCO'S NEIGHBORHOODS.

POLICY 11.1

Promote the construction and rehabilitation of well-designed housing that emphasizes beauty, flexibility, and innovative design, and respects existing neighborhood character.

POLICY 11.2

Ensure implementation of accepted design standards in project approvals.

POLICY 11.7

Respect San Francisco's historic fabric, by preserving landmark buildings and ensuring consistency with historic districts.

The Project, as described in the Development Agreement and controlled in the Design Controls (DC), includes a program of substantial community benefits and detailed plans designed to create a vibrant new mixed-use amenity-rich neighborhood at the location of an existing surface parking lot. The new neighborhood will feature small blocks and well-articulated buildings with a human scale modeled off of features characteristic of San Francisco neighborhoods. Through the standards and guidelines in the DC and through the Development Agreement (DA), the Project Sponsor has committed to the rehabilitation of Pier 48 pursuant to the Secretary of Interior Standards.

OBJECTIVE 12

BALANCE HOUSING GROWTH WITH ADEQUATE INFRASTRUCTURE THAT SERVES THE CITY'S GROWING POPULATION.

POLICY 12.1

Encourage new housing that relies on transit use and environmentally sustainable patterns of movement.

POLICY 12.2

Consider the proximity of quality of life elements, such as open space, child care, and neighborhood services, when developing new housing units.

The Project appropriately balances housing with new and improved infrastructure and related public benefits.

The project site is located proximate to both major regional and local public transit, including Muni Metro and Caltrain. The Project includes incentives for the use of transit, walking and bicycling through its TDM program. In addition, the Project's streetscape design would enhance vehicular, bicycle and pedestrian access and connectivity through the site. Therefore, new residential and commercial buildings constructed as part of the Project would rely on transit use and environmentally sustainable patterns of movement.

The Project will provide over eight acres of new open space for a variety of activities, including an expanded China Basin Park, a central town square-like space, a waterfront wharf, and other small plazas and pedestrian connections throughout.

The Project includes substantial contributions related to quality of life elements such as open space, affordable housing, transportation improvements, childcare, public art, workforce development, youth development, and historic preservation.

COMMERCE AND INDUSTRY ELEMENT

OBJECTIVE 1

MANAGE ECONOMIC GROWTH AND CHANGE TO ENSURE ENHANCEMENT OF THE TOTAL CITY LIVING AND WORKING ENVIRONMENT.

POLICY 1.1

Encourage development which provides substantial net benefits and minimizes undesirable consequences. Discourage development which has substantial undesirable consequences that cannot be mitigated.

The Project is intended to provide a distinct mixed-use development with residential, office, retail, cultural, and open space uses. The Project would leverage the Project site's location on the waterfront and close proximity to major regional and local public transit by building a dense mixed-use development that allows people to work and live close to transit. The Project would incorporate varying heights, massing and scale, maintaining a strong human-scaled streetwall along streets, and focused attention around public open spaces. The Project would create a balanced commercial center with a continuum of floorplate sizes for a range of users, substantial new on-site open space, and sufficient density to support and activate the new active ground floor uses and open space in the Project.

The Project would help meet the job creation goals established in the City's Economic Development Strategy by generating new employment opportunities and stimulating job creation across all sectors. The Project would also construct high-quality housing with sufficient density to contribute to 24-hour activity on the Project site, while offering a mix of unit types, sizes, and levels of affordability to accommodate a range of potential residents. The Project would facilitate a vibrant, interactive ground plane for Project and neighborhood residents, commercial users, and the public, with public spaces that could accommodate a variety of events and programs, and adjacent ground floor building spaces that include elements such as transparent building frontages and large, direct access points to maximize circulation between, and cross-activation of, interior and exterior spaces.

OBJECTIVE 2

MAINTAIN AND ENHANCE A SOUND AND DIVERSE ECONOMIC BASE AND FISCAL STRUCTURE FOR THE CITY.

POLICY 2.1

Seek to retain existing commercial and industrial activity and to attract new such activity to the city.

See above (Commerce and Industry Element Objective 1 and Policy 1.1) which explain the Project's contribution to the City's overall economic vitality.

OBJECTIVE 3

PROVIDE EXPANDED EMPLOYMENT OPPORTUNITIES FOR CITY RESIDENTS, PARTICULARLY THE UNEMPLOYED AND ECONOMICALLY DISADVANTAGED.

POLICY 3.2

Promote measures designed to increase the number of San Francisco jobs held by San Francisco residents.

The Project would help meet the job creation goals established in the City's Economic Development Strategy by generating new employment opportunities and stimulating job creation across all sectors. The Project will provide expanded employment opportunities for City residents at all employment levels, both during and after construction. The Development Agreement, as part of the extensive community benefit programs, includes a Workforce Development Plan, including a local hire participation level of 30% per trade. Vertical developers will contribute \$1,000,000 to OEWD in 11 parcel-by-parcel installments. Half of the funds will support community-based organizations that provide barrier removal services and job readiness training for individuals within at-risk populations, and half will support city programs that provide job training for local residents.

OBJECTIVE 6

MAINTAIN AND STRENGTHEN VIABLE NEIGHBORHOOD COMMERCIAL AREAS EASILY ACCESSIBLE TO CITY RESIDENTS.

POLICY 6.1 *Ensure and encourage the retention and provision of neighborhood-serving goods and services in the city's neighborhood commercial districts, while recognizing and encouraging diversity among the districts.*

POLICY 6.2

Promote economically vital neighborhood commercial districts which foster small business enterprises and entrepreneurship and which are responsive to economic and technological innovation in the marketplace and society

POLICY 6.4

Encourage the location of neighborhood shopping areas throughout the city so that essential retail goods and personal services are accessible to all residents.

POLICY 6.5

Discourage the creation of major new commercial areas except in conjunction with new supportive residential development and transportation capacity.

POLICY 6.7

Promote high quality urban design on commercial streets.

The Project meets and furthers the Objectives and Policies of the Commerce and Industry Element by reinforcing the typical San Francisco pattern of including resident serving uses along with mixed-use development. The Amendments will generally permit small-scale retail and community-related uses throughout the site by requiring it at key locations along China Basin Park and along the pedestrian-oriented "Shared Public-Way." The Project calls for neighborhood commercial and other retail be established in a pedestrian-oriented active environment typical of San Francisco neighborhoods and specifically called for in the Commerce and Industry Element. The provision of retail space will provide entrepreneurial opportunities for local residents and workers. As noted above, streets will be designed to Better Streets standards with the particular goal of assuring an active and engaging environment for pedestrians.

TRANSPORTATION ELEMENT

OBJECTIVE 2

USE THE TRANSPORTATION SYSTEM AS A MEANS FOR GUIDING DEVELOPMENT AND IMPROVING THE ENVIRONMENT.

POLICY 2.1

Use rapid transit and other transportation improvements in the city and region as the catalyst for desirable development, and coordinate new facilities with public and private development.

POLICY 2.5

Provide incentives for the use of transit, carpools, vanpools, walking and bicycling and reduce the need for new or expanded automobile and automobile parking facilities.

The Project is located along Third Street and the Muni T-Line, whose service will substantially expand in the near future with the opening of the Central Subway. The Project is also in close proximity to the San Francisco Caltrain station along with other major bus lines. The Project includes a detailed TDM program, including various performance measures, physical improvements and monitoring and enforcement measures designed to create incentives for

transit and other alternative to the single occupancy vehicle for both residential and commercial buildings. In addition, the Project's design, including its streetscape elements, is intended to promote and enhance walking and bicycling.

OBJECTIVE 23

IMPROVE THE CITY'S PEDESTRIAN CIRCULATION SYSTEM TO PROVIDE FOR EFFICIENT, PLEASANT, AND SAFE MOVEMENT.

POLICY 23.1

Provide sufficient pedestrian movement space with a minimum of pedestrian congestion in accordance with a pedestrian street classification system.

POLICY 23.2

Widen sidewalks where intensive commercial, recreational, or institutional activity is present, sidewalks are congested, where sidewalks are less than adequately wide to provide appropriate pedestrian amenities, or where residential densities are high.

POLICY 23.6

Ensure convenient and safe pedestrian crossings by minimizing the distance pedestrians must walk to cross a street.

The Project will establish a new tight-knit street network on the project site, and will provide pedestrian improvements and streetscape enhancement measures as described in the DC and reflected in the mitigation measures, the Transportation Plan, and in the Development Agreement. The Project would establish two new north-south rights-of-way and three new east-west rights-of-way through the site, increasing the sites connectivity and access. All streets will be constructed to Better Street standards; the transportation network will include robust bike facilities and will improve and complete a missing link in the Bay Trail and Blue Greenway.

URBAN DESIGN ELEMENT

OBJECTIVE 1

EMPHASIS OF THE CHARACTERISTIC PATTERN WHICH GIVES TO THE CITY AND ITS NEIGHBORHOODS AN IMAGE, A SENSE OF PURPOSE, AND A MEANS OF ORIENTATION.

POLICY 1.1

Recognize and protect major views in the city, with particular attention to those of open space and water.

As explained in the DC, the Project is very carefully designed with particular emphasis on assuring a vibrant and engaging pedestrian realm. Buildings are to be scaled and shaped specific to their immediate context by assuring streetwalls are well proportioned relative to adjacent streets and open spaces. The Project's proposed tallest buildings will be sited at key locations to mark important gateway locations assuring that the buildings taken together create a dynamic skyline. The overall heights of the project are harmonious with and complementary to the overall city skyline when viewed from various distances.

POLICY 1.2

Recognize, protect and reinforce the existing street pattern, especially as it is related to topography.

POLICY 1.3

Recognize that buildings, when seen together, produce a total effect that characterizes the city and its districts.

POLICY 1.5

Emphasize the special nature of each district through distinctive landscaping and other features.

POLICY 1.6

Make centers of activity more prominent through design of street features and by other means.

POLICY 1.7

Recognize the natural boundaries of districts, and promote connections between districts.

POLICY 2.9

Review proposals for the giving up of street areas in terms of all the public values that streets afford.

POLICY 2.10

Permit release of street areas, where such release is warranted, only in the least extensive and least permanent manner appropriate to each case.

The Project will create a new fine-knit street network on the project site where it does not currently exist, increasing public access and circulation through the site. Buildings will be constructed between a maximum height range of 90 and 240 feet, with buildings stepping down to bases of 40 to 65 feet along streets. Building heights and urban design requirements in the DC assure that Pier 48, the site's existing historic Pier, will be respected and retain its predominance along the bayfront. The Project is envisioned as an extension and improvement to the Mission Bay neighborhood

OBJECTIVE 2

CONSERVATION OF RESOURCES WHICH PROVIDE A SENSE OF NATURE, CONTINUITY WITH THE PAST, AND FREEDOM FROM OVERCROWDING.

POLICY 2.4

Preserve notable landmarks and areas of historic, architectural or aesthetic value, and promote the preservation of other buildings and features that provide continuity with past development.

POLICY 2.5

Use care in remodeling of older buildings, in order to enhance rather than weaken the original character of such buildings.

Pier 48 will be rehabilitated to Secretary of Interior's Standards.

OBJECTIVE 3

MODERATION OF MAJOR NEW DEVELOPMENT TO COMPLEMENT THE CITY PATTERN, THE RESOURCES TO BE CONSERVED, AND THE NEIGHBORHOOD ENVIRONMENT.

POLICY 3.3

Promote efforts to achieve high quality of design for buildings to be constructed at prominent locations.

POLICY 3.4

Promote building forms that will respect and improve the integrity of open spaces and other public areas.

POLICY 3.5

Relate the height of buildings to important attributes of the city pattern and to the height and character of existing development.

POLICY 3.7

Recognize the special urban design problems posed in development of large properties.

POLICY 3.8

Discourage accumulation and development of large properties, unless such development is carefully designed with respect to its impact upon the surrounding area and upon the city.

While large in scope, the Project will be constructed in such a way to be an integral part of the San Francisco urban fabric. Blocks are being established at smaller-than-typical sizes to assure buildings are well-scaled, and that the site is permeable and accessible to all. Buildings will be shaped to assure that their fronting streetwalls are well proportioned relative to their adjacent streets and open spaces. The tallest of the site's buildings will be placed at key gateway and central locations and well-spaced to assure they work well together in adding to the City's skyline.

RECREATION AND OPEN SPACE ELEMENT

OBJECTIVE 1

ENSURE A WELL-MAINTAINED, HIGHLY UTILIZED, AND INTEGRATED OPEN SPACE SYSTEM.

POLICY 1.1

Encourage the dynamic and flexible use of existing open spaces and promote a variety of recreation and open space uses, where appropriate.

POLICY 1.7

Support public art as an essential component of open space design.

The Project would build a network of waterfront parks, playgrounds and recreational facilities on the 28-Acre Site that will greatly enhance access to and along the Bay. China Basin Park will be significantly expanded to provide a multi-use Bayfront park that provides both active and

contemplative space, while providing a space for planned community events. A central town square-like space will enable the proposed high-retail corridor to spill into open space creating an active and engaging central civic space. The Project will provide approximately eight acres of new and expanded open space for a variety of activities, including a great lawn, a small ballfield, kayak boat launches, wharf, along with small pedestrian plazas throughout. In addition, the Project would provide new private and/or common open space for the new dwelling units.

POLICY 1.12

Preserve historic and culturally significant landscapes, sites, structures, buildings and objects.

See Discussion in Urban Element Objective 2, Policy 2.4 and 2.5.

OBJECTIVE 3

IMPROVE ACCESS AND CONNECTIVITY TO OPEN SPACE.

POLICY 3.1

Creatively develop existing publicly-owned right-of-ways and streets into open space.

The Project provides approximately eight acres of new and expanded public open space and opens up new connections to the shoreline in the Mission Bay neighborhood. The Project would encourage non-automobile transportation to and from open spaces, and would ensure physical accessibility within these open spaces. The Project features robust bike facilities to both assure continuity of the Bay Trail and Blue Greenway, and improve bike access for its residents, workers, and visitors.

ENVIRONMENTAL PROTECTION ELEMENT

OBJECTIVE 1

ACHIEVE A PROPER BALANCE AMONG THE CONSERVATION, UTILIZATION, AND DEVELOPMENT OF SAN FRANCISCO'S NATURAL RESOURCES.

Policy 1.4

Assure that all new development meets strict environmental quality standards and recognizes human needs.

OBJECTIVE 15

INCREASE THE ENERGY EFFICIENCY OF TRANSPORTATION AND ENCOURAGE LAND USE PATTERNS AND METHODS OF TRANSPORTATION WHICH USE LESS ENERGY.

POLICY 15.3

Encourage an urban design pattern that will minimize travel requirements among working, shopping, recreation, school and childcare areas.

The Project is consistent with and implements the Environmental Protection Element in that it calls for mixed-use, high density, transit-friendly, sustainable development.

The Project's approvals include a Sustainability Plan, that among other things, set goals for the Project Sponsor that include sea level resilience through the year 2100, 100% operational energy from renewable sources, 100% non-potable water met with non-potable sources, and 20% single occupancy vehicle trip reduction.

PUBLIC SAFETY ELEMENT

OBJECTIVE 2 REDUCE STRUCTURAL AND NON-STRUCTURAL HAZARDS TO LIFE SAFETY, MINIMIZE PROPERTY DAMAGE AND RESULTING SOCIAL, CULTURAL AND ECONOMIC DISLOCATIONS RESULTING FROM FUTURE DISASTERS.

POLICY 2.1 Assure that new construction meets current structural and life safety standards.

POLICY 2.3 Consider site soils conditions when reviewing projects in areas subject to liquefaction or slope instability.

POLICY 2.9 Consider information about geologic hazards whenever City decisions that will influence land use, building density, building configurations or infrastructure are made.

POLICY 2.12 Enforce state and local codes that regulate the use, storage and transportation of hazardous materials in order to prevent, contain and effectively respond to accidental releases.

The Project is consistent with and implements the Community Safety Element. All improvements, including infrastructure, buildings and open space improvements will be constructed to local seismic standards, taking into account, among other considerations, the geological condition of the soil.

AIR QUALITY ELEMENT

OBJECTIVE 3 DECREASE THE AIR QUALITY IMPACTS OF DEVELOPMENT BY COORDINATION OF LAND USE AND TRANSPORTATION DECISIONS.

POLICY 3.1 Take advantage of the high density development in San Francisco to improve the transit infrastructure and also encourage high density and compact development where an extensive transportation infrastructure exists.

POLICY 3.2 Encourage mixed land use development near transit lines and provide retail and other types of service oriented uses within walking distance to minimize automobile dependent development.

POLICY 3.6 Link land use decision making policies to the availability of transit and consider the impacts of these policies on the local and regional transportation system.

POLICY 3.9 Encourage and require planting of trees in conjunction with new development to enhance pedestrian environment and select species of trees that optimize achievement of air quality goals

OBJECTIVE 6 LINK THE POSITIVE EFFECTS OF ENERGY CONSERVATION AND WASTE MANAGEMENT TO EMISSION REDUCTIONS.

POLICY 6.2 *Encourage recycling to reduce emissions from manufacturing of new materials in San Francisco and the region.*

The Project is consistent with and implements the Air Quality Element in that it calls for mixed-use, high density, sustainable development that will enable efficient use of land and encourage travel by transit, bicycle and by foot, thereby reducing auto use. The Sustainability Plan and TDM Plan governing development of the Project mandate a 20% single occupancy vehicle trip reduction.

AND BE IT FURTHER RESOLVED, that the Planning Commission finds the Project and its approvals associated therein, all as more particularly described in Exhibits B and C to the Development Agreement on file with the Planning Department in Case No. 2013.0208DVA, are in general conformity with the Planning Code Section 101.1 priority policies, as follows:

1. That existing neighborhood serving retail uses be preserved and enhanced and future opportunities for resident employment in or ownership of such businesses enhanced.

The Project will preserve and enhance existing neighborhood serving retail uses. The Project includes adding roughly 245,000 square feet of new retail uses, that will be focused along a central pedestrian "Shared Public Way" and fronting the site's major parks. The project does not include the removal of any existing neighborhood serving retail.

2. That existing housing and neighborhood character be conserved and protected in order to preserve the cultural and economic diversity of our neighborhoods.

The Project accommodates new development on land currently a surface parking lot. It would not accommodate removing or changing the character of existing residential neighborhoods. The Project includes a robust affordable housing program setting aside 40-percent of the on-site housing for below-market-rate units. The Project lays out requirements to assure the new development has characteristics of mixed-use neighborhoods throughout San Francisco, including but not limited to a fine-grained system of streets, well-modulated buildings with active frontages, and the ability to establish diverse retail and community uses where nothing exists today.

3. That the City's supply of affordable housing be preserved and enhanced.

The Project calls for development that would have a positive effect on the City's affordable housing stock. The Project would accommodate up to 1.6 million gsf of new residential units (estimated at 1,600 new units), of which 40-percent will be designated as Below-Market Rate. There is no housing on the site today; the Project would not accommodate the removal of any existing dwelling units.

4. That commuter traffic not impede MUNI transit service or overburden our streets or neighborhood parking.

The Project anticipates substantial new transit service improvements along Third Street with the opening of the Central Subway in 2019, as well as substantial improvement to nearby Caltrain service through the ongoing electrification project. Streets have been designed to emphasize travel by bicycle or by foot. On-street parking is generally not proposed thereby allowing more street space to be designated for bicyclists, pedestrians, and those arriving by transit, or taxi/TNCs, as well as for deliveries. While a large centralized parking facility (up to 3,000 spaces in one or two centralized garages) is proposed, the total number of spaces site-wide would not represent a substantial net gain of spaces for the site overall from existing conditions. At present, approximately 2,900 parking spaces are on the site between Lot A and Pier 48. Only 100 parking spaces are allowed elsewhere on the site in addition to the centralized garages.

5. That a diverse economic base be maintained by protecting our industrial and service sectors from displacement due to commercial office development, and that future opportunities for resident employment and ownership in these sectors be enhanced.

The Project would not adversely affect the industrial sector or service sectors. No such uses would be displaced by the Project. The Project includes the rehabilitation of Pier 48, which will provide about 250,000 gsf of new or improved space for production uses. Additional small production spaces would also be required along Terry Francois Boulevard, providing industrial space where none exists today.

6. That the City achieves the greatest possible preparedness to protect against injury and loss of life in an earthquake.

All new construction would be subject to the City's Building Code, Fire Code and other applicable safety standards. Thus, the Project would improve preparedness against injury and loss of life in an earthquake by prompting development that would comply with applicable safety standards.

7. That landmarks and historic buildings be preserved.

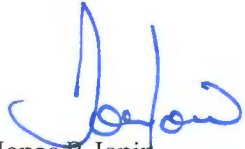

Pier 48 would be rehabilitated pursuant to the Secretary of Interior's Standards.

8. That our parks and open space and their access to sunlight and vistas be protected from development.

The Project would not significantly adversely affect existing open spaces or their access to sunlight and vistas. The Project includes a robust parks and open space program including the substantial expansion of China Basin Park and the establishment of two new additional parks and

other pedestrian plazas throughout. The Project includes a fine-grained network of new streets thereby assuring the site permeability and access through it.

I hereby certify that the Planning Commission ADOPTED the foregoing Motion on Thursday, October 5, 2017.

Jonas P. Ionin

Commission Secretary
