[Management Services Agreement - Sewer System Improvement Program - Not to Exceed \$150,000,000]

Resolution approving and authorizing the General Manager of the San Francisco Public Utilities Commission to execute Sewer System Improvement Program-Funded Agreement No. CS-165, Program Management Services, with AECOM-Parsons Joint Venture, for an amount not to exceed \$150,000,000 with a term of up to 15 years, under Charter Section 9.118.

WHEREAS, The San Francisco Public Utilities Commission ("SFPUC") has developed the proposed Sewer System Improvement Program ("SSIP"), following extensive public meetings, focus groups, and Commission workshops over an 18-month period regarding the condition of the City's wastewater system. Assessments revealed that the City's major stormwater/treatment and collection systems are aging and lack redundancy. The last major capital work and master planning effort for the sewer system took place in the 1970's, forty years ago. A new master planning process was initiated in 2004 that included extensive public meetings, focus groups, and detailed Commission workshops to evaluate the City's wastewater system condition, identify appropriate levels of service and improvements to better serve the public; and

WHEREAS, This process resulted in Commission endorsement of specific goals and levels of service to bring the sewer system to a state of good repair to ensure continued regulatory compliance, reliability, and redundancy; and to meet the known, and foreseeable challenges of today and the future. The identified challenges include: Aging infrastructure and poor condition of existing facilities with little remaining useful life; Seismic deficiencies and lack of structural integrity; Limited operating flexibility and lack of redundancy; The ongoing

need to protect the environment and public health, meet regulatory challenges, and conserve resources; Adaptation to climate change; and Improved stormwater management; and

WHEREAS, The Commission identified approximately 20 proposed capital improvement projects, to address and mitigate these challenges and to meet the Commission endorsed goals and levels of service. The Commission estimated the cost to complete all of the proposed improvements to be approximately \$6.9 billion for the proposed capital improvement projects that ultimately would comprise the SSIP; and

WHEREAS, The evaluation of the proposed capital improvement projects will include further engineering and environmental review, as well as financial analysis, prior to any action by the Commission to approve or this Board of Supervisors to fund these proposed projects. The implementation of the SSIP, beginning with the evaluation process, is being led by City staff and is structured to function as a matrix organization that will be managed by the Infrastructure Wastewater Enterprise Capital Improvement Program Director (Program Director) and will include staff and resources from SFPUC's Infrastructure Division, Wastewater Enterprise, and the Department of Public Works. In addition, there will be support from other SFPUC departments including External Affairs and Business Services, as well as various other City departments. Consultants with extensive experience on wastewater capital programs similar in scope and size of the SSIP, however, will play a key role in the implementation of the Program; and

WHEREAS, For management purposes, the implementation of the SSIP is divided into 2 major phases – pre-construction and construction. Pre-construction efforts include all planning, design, environmental review, right-of-way and contracting activities. The construction phase will begin following the award of a construction contract and extend through start-up, testing and close-out of that contract; and

WHEREAS, The services of the Program Management Consultant will be used to support the SSIP management team on programmatic functions, on a task order basis, throughout the duration of the Program. The SFPUC's management team will draw upon the Program Management consultant team to supplement existing internal resources to validate the SSIP proposed projects and scope, schedule and budget, provide programmatic functions, and provide specialized technical services and resources; and

WHEREAS, Use of a single Program Management team though the entire capital improvement program will ensure that the SFPUC receives the benefits of continuity of specialized wastewater program consultant services, captures the consultant team's institutional knowledge gained through the contract work, and avoids the time delays, additional operational risks, and the expense of replacing and mobilizing consultant teams during the SSIP; and

WHEREAS, Through the Program Management contract, the SFPUC will obtain highly specialized and state of the art resources to complement the work of City staff in the areas of climate change, watershed management, regulatory compliance, energy recovery, seismic design, treatment plant technologies, sustainability, program controls and wastewater program management; and

WHEREAS, The estimated cost of services is not to exceed \$150,000,000, funds have been appropriated and will be available at the time of award of the agreement only for the first year's task orders from Project CENMSCSP06 - SSIP Planning, and various proposed SSIP capital project planning and design funds; and

WHEREAS, To ensure continuity of consultant services and to capture the Consultant team's institutional knowledge accumulated through the contract work, the contract's duration of services is up to 15 years, with services anticipated to begin in September 2011 and end in September 2026; and

RFP; and

WHEREAS, The SFPUC advertised a request for proposals ("RFP") for Program Management Services for the SSIP on March 14, 2011. The RFP solicited proposals from highly qualified firms to support the SSIP management team on a number of programmatic functions such as: strategic program development; risk management; optimization and project validation; labor and contract relations; asset management integration; scheduling; cost estimates; staff training; and analysis of alternative delivery mechanisms. The Program Management Consultant will also provide specialized technical services and resources, such as: preliminary design, engineering, watershed hydraulics, regulatory, real time controls, and City staff augmentation when appropriate on an as-needed or project-specific basis; and

WHEREAS, AECOM-Parsons Joint Venture ("AECOM-Parsons") was the highest-ranking proposer; and

WHEREAS, On May 5, 2011, the SFPUC received three proposals in response to the

WHEREAS, A sub-consulting goal of 10% Local Business Enterprise ("LBE") participation (of the total value of services to be provided) has been established and approved for this agreement by the Human Rights Commission; and

WHEREAS, AECOM-Parsons exceeded the LBE goal by 6.1%, for a total of 16.1% LBE participation; and

WHEREAS, SFPUC Resolution No. 11-0101 approved the selection of AECOM-Parsons; awarded SSIP-funded Agreement No. CS-165, Program Management Services, to provide program management services for the SSIP; authorized the General Manager of the SFPUC to negotiate a professional services agreement with AECOM-Parsons for an amount not to exceed \$150,000,000, and with a duration of up to 15 years, or, in the event negotiations are not successful or City requirements are not satisfied, to negotiate a professional services agreement with the next highest-ranked proposer; and authorized the

General Manager to execute the agreement, subject to Board of Supervisors' approval under Charter Section 9.118; and

WHEREAS, The agreement with AECOM-Parsons is on file with the Clerk of the Board of Supervisors in File No. 110586, which is hereby declared to be a part of this resolution as if set forth fully herein; now, therefore, be it

RESOLVED, That the Board of Supervisors hereby approves and authorizes the General Manager of the SFPUC to execute SSIP-funded Agreement No. CS-165, Program Management Services, with AECOM-Parsons for an amount not to exceed \$150,000,000 and with a duration of up to 15 years, under Charter Section 9.118, in substantially the form on file with the Clerk of the Board, and in such final form as approved by the General Manager and the City Attorney.

Item 6 Department:
File 11-0586 Public Utilities Commission (PUC)

EXECUTIVE SUMMARY

Legislative Objectives

• The proposed resolution would authorize the General Manager of the San Francisco Public Utilities Commission (PUC), based on a competitive Request for Proposals (RFP) process, to execute a new Sewer System Improvement Program (SSIP) Agreement, for providing Program Management Services, with AECOM-Parsons Joint Venture (AECOM-Parsons), in an amount not to exceed \$150,000,000 with a term of up to 15 years.

Key Points

- The PUC's new Sewer System Improvement Program (SSIP) consists of approximately 20 sewer system capital improvement projects to be constructed by 2040.
- The planning process for SSIP started in January 2009. On July 27, 2010, based on 18 months of internal planning and public hearings, the PUC established program goals for the SSIP. In February 2011, the Commission requested that PUC staff issue a Request for Proposals (RFP) for a Program Management (PM) consultant for the SSIP.
- Due to the complex and specialized nature of the SSIP, the PUC is requesting approval of the new Program Management (PM) agreement with AECOM-Parsons, for services including program planning and administration, program implementation, project technical support, program controls, and pre-construction management and planning.
- The proposed agreement extends for up to 15 years, from 2011 to 2026, with no option to extend. However, the PUC anticipates that completion of the SSIP will take approximately 29 years, from 2011 to 2040, or approximately 14 years more than the subject Program Management agreement.
- According to Ms. Karen Kubick, PUC Wastewater Enterprise Capital Program Director, at the conclusion of the proposed 15-year agreement, the PUC would evaluate whether to bring Program Management services in-house or rescope and reissue an RFP for PM services.
- According to Ms Kubick, delays in approving the proposed PM agreement could result in the City's sewer system becoming noncompliant with State and Federal environmental regulations.

Fiscal Impacts

- The proposed agreement has a not-to-exceed amount of \$150,000,000, or an average not-to-exceed amount of \$10,000,000 per year for the 15 year term of the agreement. According to the agreement, the AECOM-Parsons would be compensated on a task-order basis. The agreement would be funded using PUC Commercial Paper and Wastewater Revenue Bond proceeds.
- The proposed \$150,000,000 agreement is projected to impact monthly sewer rates for the average San Francisco single family home by an average of \$1.74 per month, up to a maximum of \$2.62 per month, between FY 2011-12 and FY 2055-56.
- According to Ms. Kubick, total Program Management costs, including the proposed contract and PUC staffing costs, represent 4.0 percent of the projected 15 year capital costs, which, while at the high end, is within the industry standard of 2.0 to 4.0 percent range for Program Management costs.

Recommendations

• Approve the proposed resolution.

MANDATE STATEMENT AND BACKGROUND

Mandate Statement

In accordance with City Charter Section 9.118(b), any contract or agreement that exceeds \$10,000,000 in anticipated expenditures or has a term in excess of ten years is subject to Board of Supervisors approval.

Background

The San Francisco Public Utilities Commission (PUC) will be completing the Water System Improvement Program (WSIP) in five years, the purpose of which has been to seismically upgrade and reconstruct San Francisco's entire water delivery systems, from Hetch Hetchy in Tuolumne County to San Francisco and to the peninsula.

With WSIP nearing completion, in January 2009, the PUC began planning for an overhaul of San Francisco's municipal sewer and stormwater treatment and collection systems (together, "the sewer system"). This overhaul is known as the Sewer System Improvement Project (SSIP).

According to Ms. Karen Kubick, PUC Wastewater Enterprise Capital Program Director, San Francisco's sewer system is aged and in need of significant capital improvements. The most recent major capital work and master planning effort for the sewer system took place in the 1970s. According to the PUC, the current challenges include:

- Aging infrastructure and poor conditions in existing facilities;
- Seismic deficiencies and lack of structural integrity;
- A lack of system redundancy;
- The risk of system failure or sewerage overflow to the environment and public health;
- Adaptation to climate change and sea level rise; and
- Improved stormwater management.

From January 2009 until July 2010, the PUC conducted 18 months of internal program planning and a series of public hearings. As a result of this planning and outreach process, on July 27, 2010 the PUC established the following five sewer system service goals to be achieved by SSIP:

- 1.Provide a compliant, reliable, resilient, and flexible sewer system that can respond to catastrophic events;
- 2.Minim ize flooding;
- 3. Provide be nefits to impacted communities;
- 4. Modify the system to adapt to climate change; and
- 5.Ac hieve economic and environmental sustainability.

The SSIP consists of approximately 20 sewer system capital improvement projects to be constructed from 2011 through 2040 at an estimated cost of \$6.9 billion. According to Ms. Kubick, the PUC expects to complete or commence 17 of the 20 sewer system capital improvements and expend or encumber \$6.0 billion in costs in the first 15 years of the SSIP, from 2011 to 2026. The implementation of the SSIP is being led by City staff, including the PUC and the City's Department of Public Works (DPW). Due to the complex and specialized nature of the SSIP, the PUC is also seeking the assistance of consultants and construction contractors with experience working on extensive sewer system capital programs.

The SSIP was included in the City's Ten Year Capital Expenditure Plan, previously approved by the Board of Supervisors on March 29, 2011 (File 11-0284). The Board of Supervisors also previously approved an ordinance appropriating a total of \$348,064,054 to fund capital improvements for the PUC's sewer system in FY 2010-11 and FY 2011-12 (File 10-0339) and granted the PUC with authority to issue \$297,756,235 in Wastewater Revenue Bonds for SSIP (File 10-0340). The debt issued on the Wastewater Revenue Bonds are financed from sewer fees charged by the PUC to San Francisco's residents and businesses.

The SSIP is divided into two major phases: pre-construction and construction. According to the PUC, "Pre-construction efforts include all planning, design, environmental review, right-of-way and contracting activities." These pre-construction efforts began with the SSIP preliminary planning process in January 2009. The PUC is now seeking the services of a Program Management Consultant to support the PUC's SSIP management team on programmatic functions throughout both the pre-construction and construction phases of the Program.

Competitive Selection Process

On March 14, 2011, the PUC issued a competitive Request for Proposals (RFP) for a SSIP Program Management (PM) Consultant. The PUC received three qualified proposals from (a) AECOM-Parsons Joint Venture (AECOM-Parsons), (b) CDM, and (c) Jacobs Engineering, Inc.

The PUC created a five-member selection panel consisting of (1) a current PUC operations and maintenance manager; (2) a retired PUC senior project manager; and three high-level managers representing (3) the Central Contra Costa Sanitary District; (4) the City of San Jose Wastewater Capital Program; and (5) the New York Department of Environment Water and Wastewater Capital Program. The selection panel scored the three proposals according to the following 100-point criteria:

Total	100 points
Overhead & Profit Schedule (OPS)	10 points
Oral Interviews	45 points
Written Proposal (including references)	45 points

The selection panel selected AECOM-Parsons as the top-ranked proposal. A summary of the scoring is shown in Table 1, below.

Table 1. Scoring Summary of SSIP Program Management Proposals

Qualifying Firms	Written Proposal Score (45)	Oral Score (45)	OPS Score (10)	Total Score
AECOM-Parsons	39.72	37.62	10.00	87.34
CDM	36.50	34.82	10.00	81.32
Jacobs Engineering Inc.	32.89	31.07	10.00	73.96

Parsons Water and Infrastructure, Inc., is a joint-venture partner in AECOM-Parsons. The Budget and Legislative Analyst notes that Parsons Water and Infrastructure, Inc., is currently in the sixth year of a ten year, \$64,000,000 agreement with the PUC to provide engineering services, including program management services, for the PUC's Water System Improvement Program (WSIP).

DETAILS OF PROPOSED LEGISLATION

Based on a Competitive RFP process, the proposed resolution would authorize the General Manager of the San Francisco Public Utilities Commission (PUC) to execute a new agreement with AECOM-Parsons Joint Venture (AECOM-Parsons), in an amount not to exceed \$150,000,000 for a term of up to 15 years, from September 26, 2011 through September 25, 2026. Under the proposed agreement, AECOM-Parsons would provide the PUC with Program Management (PM) services for the pre-construction phase of the Sewer System Improvement Program (SSIP). Services to be provided by AECOM-Parsons under the proposed agreement would include assisting PUC staff in the areas of program planning and administration, program implementation, project technical support, program controls, and pre-construction management and planning. Since January 2009, the PUC has conducted preliminary program planning using existing staff.

An expanded summary of services that AECOM-Parsons would provide to the PUC under the agreement, from Appendix A to the proposed agreement, is shown in Attachment I to this report.

Under the proposed Program Management agreement, the work to be performed by AECOM-Parsons would be in direct response to task orders issued by the PUC Program Director or Bureau Managers, subject to the approval of the PUC Assistant General Manager of Infrastructure. The PUC would not issue any work orders before first certifying with the City Controller that funding is available, after which the PUC would issue a Notice to Proceed to AECOM-Parsons. Under the subject agreement, the PUC is not responsible for reimbursing AECOM-Parsons for any work conducted without a Notice to Proceed.

Under the proposed agreement, AECOM-Parsons will provide the following six key/lead personnel to PUC's SSIP management team:

- Program Management Advisor, reporting to the SSIP Director;
- Program Controls Manager;
- Pre-Construction Technical Advisor:

- Process Engineering/Utility Manager;
- Program Quality Assurance Manager; and
- Lead Cost Estimator.

AECOM-Parsons will also provide additional assistance to PUC's SSIP management team in the areas of communications, engineering, project controls, and climate change. According to Ms. Kubick, the PUC staff does not have sufficient internal expertise in these areas to complete the SSIP.

Under the proposed agreement, AECOM-Parsons is required to allocate Local Business Enterprise (LBE) subcontracting participation of 16.1 percent, which is equal to approximately \$24,150,000 of the proposed \$150,000,000 agreement. Attachment II, provided by the PUC, is a list of the LBEs and the percentage they would contribute to the proposed \$150,000,000 agreement.

According to Ms. Kubick, while the proposed agreement is for a period of up to 15 years, from 2011 through 2026, with no option to extend, the PUC projects that completion of the SSIP will take approximately 29 years, from 2011 through 2040 (see Policy Considerations section, below). Ms. Kubick stated that at the conclusion of the proposed agreement, the PUC would evaluate whether to bring Program Management services in-house or rescope and reissue an RFP for PM services.

FISCAL IMPACTS

The proposed agreement has a not-to-exceed authorized amount of \$150,000,000, or an average of \$10,000,000 per year, for the 15 year term of the agreement. According to the proposed agreement, payments will be administered on a task order basis. Table 2, below, provides a summary breakdown of the proposed \$150,000,000 budget. Attachment III, provided by the PUC, is a 15-year spending plan for the proposed agreement.

Table 2: Program Management Agreement Cost Summary

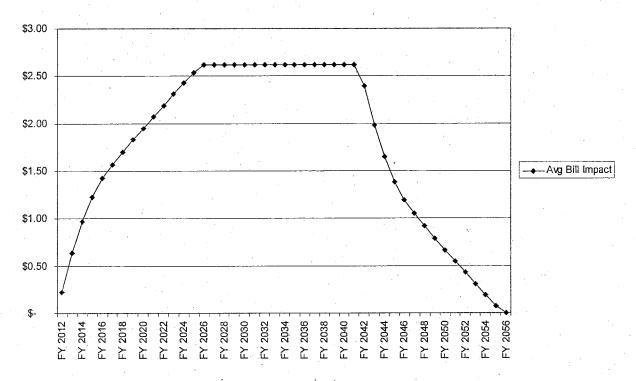

Total Labor Costs	\$134,259,370
Total Other Direct Costs	3,000,000
Escalation (assumes 3.5% annual escalation)	11,043,870
Markup on Subconsultant Labor Cost	1,696,760
(Maximum allowable: 5% of subconsultant labor costs)	
Total	\$150,000,000

According to the proposed agreement, Parsons-AECOM would provide approximately 650,500 hours of service over the 15 year period and a total labor cost of \$134,259,370, or an average hourly rate of approximately \$206.39 per hour. As shown in Table 2 above, the balance \$15,740,630 would be allocated to Total Other Direct Costs (\$3,000,000), Escalation, at an assumed annual rate of 3.5 percent (\$11,043,870), and allowable markup on subconsultant labor costs (\$1,696,760).

To date, the Board of Supervisors has appropriated \$21,925,000 for SSIP PM services out of the previously authorized \$297,756,235 in Wastewater Revenue Bond proceeds (File 10-0339). According to Mr. Frank McPartland of the PUC, this \$21,925,000 would be used to fund a portion of the proposed \$150,000,000 agreement, and the remaining \$128,075,000 or 85.4 percent would be funded using a combination of Commercial Paper and PUC Wastewater Revenue Bond proceeds.

The PUC anticipates that the total cost of the debt funding for issuing the Commercial Paper and Wastewater Revenue Bonds to fund the proposed \$150,000,000 agreement, including \$191,205,927 in principal, debt service, and interest payments, is estimated to be \$341,205,927, which is based on an annual interest rate of 5.5 percent. The PUC would pay for the costs of the Commercial Paper and PUC Wastewater Revenue Bonds with increased revenues received from wastewater customers by increasing existing sewer rates. The PUC estimates that the impact of the proposed agreement on sewer rates for the average San Francisco family's monthly sewer bill is shown in Figure 1 below.

Figure 1: Projected Impact of the Proposed Program Management Agreement on the Average San Francisco Single Family's Monthly Sewer Bill, FY 2011-12 to FY 2055-56

According to the PUC, the minimum monthly impact of the proposed \$150,000,000 agreement on the average San Francisco single family's monthly sewer bill would be \$0.08 per month the maximum would be \$2.62 per month, and the average impact would be \$1.74.

POLICY CONSIDERATIONS

The Proposed Agreement Is for a Shorter Duration than the Anticipated Time Needed to Complete the Sewer System Improvement Program

If approved, the proposed agreement would extend up to 15 years, from September 26, 2011 through September 25, 2026. However, the PUC expects that the Sewer System Improvement Project (SSIP) will not be completed until approximately 2040, or approximately 14 years after the proposed agreement would terminate.

According to Ms. Kubick, program management will be needed following the anticipated completion of the proposed agreement. However, Ms. Kubick notes "we are focused on training staff to assume program management responsibilities by that time where possible." Furthermore, according to Ms. Kubick, if the PUC continued to require the Program Management services of an outside contractor after September 25, 2026, the PUC would rescope and reissue an RFP for PM services.

Delaying the Award of the Proposed Agreement Could Result in Sewer System Performance Problems

According to a June 28, 2011 PUC memorandum, "A delay in awarding this agreement will further defer much needed capital improvements to the City's wastewater system; which, if unaddressed, will result in regulatory non-compliance, loss of system reliability, and increased public and worker safety risks."

According to Mr. McPartland, the City's sewer system is currently in regulatory compliance. However, delays in approving the proposed PM agreement could result in the City's sewer system becoming noncompliant with State and Federal environmental regulations.

The Cost of the Proposed Program Management Agreement Is Within a Normal Range for Extensive Capital Projects

As Ms. Kubick reports in Attachment IV to this report, the industry standard for Program Management services for capital improvement programs for utilities is 2 to 4 percent of total program costs, depending on the nature of the program management services and the complexity of the capital program. As shown in Attachment IV, in addition to the \$150,000,000 cost of the proposed 15-year agreement, the PUC is assuming internal Program Management costs totaling \$90,000,000 for the first 15 years of the SSIP. Therefore, total PM costs for the SSIP are projected to be \$240,000,000, including the proposed agreement and City staff costs. This \$240,000,000 is 4.0 percent of the estimated \$6,000,000,000 that the PUC estimates will be expended or encumbered in the first 15 years of the SSIP. Therefore, while at the high end of the industry standard, the proposed \$150,000,000 agreement is within the 2.0 to 4.0 percent industry standard for PM costs.

RECOMMENDATION

Approve the proposed resolution.

Appendix A Services to be provided by Contractor

Contractor agrees to perform services under this Agreement in accordance with the terms of this Agreement, the RFP, and its proposal dated May 12, 2011. The RFP and Contractor's proposal are incorporated by reference into this Agreement as though fully set forth herein. In the event of an inconsistency or conflict between the RFP and Contractor's proposal, the RFP shall take precedence. This Agreement shall take precedence over the RFP and Contractor's proposal.

1. Description of Services

Contractor will be required to assist the SFPUC Infrastructure Division and Wastewater Enterprise (WWE) in implementing the Sewer System Improvement Program (SSIP).

The Contractor shall provide qualified personnel to assist the SFPUC in five areas: Program Planning and Administration; Program Implementation; Project Technical Support; Program Controls; and Pre-Construction Management and Planning. The following is a summary of the tasks involved:

1. Program Planning and Administration (P)

- o Program Manager Lead Advisor
- o Program Contract Manager
- o Program Technical Support
- o Procedures Review and Update
- o Program Management Plan
- o Program Review, Optimization, and Validation
- o Asset Management Integration
- o Triple Bottom Line
- o Operational Permit Support
- o Document Management

2. Program Implementation (I)

- Risk Management
- o Facilities Integration Plan
- o Project Labor Agreement Support
- o Quality Assurance (Procedures)
- o Quality Control (Design)
- o Communications and Reporting Support

3. Project Technical Support (T)

- o Preliminary Project Scoping and Development
- o Project Alternatives Analysis Support
- o Seismic Evaluation/Standards
- o Collection System and Treatment Plant Systemic Hydraulic Modeling/Systems Engineering
- o Hydraulic Model Refinement and Modeling Support

o Watershed Assessments

- o Evaluation of the Effect of Climate Change on the System, Development of an Adaptation Plan, and Update the Bayside Operations Plan
- o Design Standards Review and Recommendations
- o Staff Training
- o Condition Assessment Support
- o Emerging Technologies Review and Utility Expertise
- o Value Engineering
- o Independent Technical Reviews and Input

4. Program Controls (PC)

- o Schedules and Budget
- o Reports
- o Cost Estimates
- o Change Management
- o Cost Controls
- o Life Cycle Costs
- o Quarterly Reporting and Monitoring

5. Pre-Construction Management and Planning (PCMP)

- o Program Pre-Construction Management
- o Pre-Construction Optimization
- o Pre-Construction Final Review
- o Pre-Construction Management Policies and Procedures for SSIP
- o Pre-Construction Supplier Quality Surveillance for the SSIP

SFPUC/P-590 (5-10) OCA/P-590 (5-10)

TO: Ian Hart, Budget Analyst Office

DATE: 7-14-11

FM: Karen Kubick, Wastewater Enterprise Capital Program Director, SSIP

The industry standard for Program Management services for capital improvement programs for Utility Companies is 2-4% of the Total Program Cost; however, this percentage depends upon the program management services included and the complexity of the program involved. We believe the SSIP is not only technically complex but community and regulatory agencies issues are also very challenging. Furthermore, a significant amount of the upfront work including needs assessment and program assessment and verification is needed before the implementation details of the program can be developed.

The following table gives you a breakdown for the anticipated program management costs during the first 15 years of the program.

Table: Estimated SSIP Program Management Cost for the first Fifteen Years

Fifteen Year Cost of SSIP	\$6,000,000,000	
Fifteen Year Program	\$150,000,000	2.5%
Management Contract		
Fifteen Year City Program	\$90,000,000	1.5%
Management Staff Costs

SUBJECT:

Resolution approving Agreement No CS-165

Please find the original and 4 copies of a Board of Supervisors resolution approving and authorizing the General Manager of the San Francisco Public Utilities Commission to execute Sewer System Improvement Program-funded Agreement No. CS-165, Program Management Services with AECOM-Parsons Joint Venture, for an amount not to exceed \$150,000,000 with a term of up to 15 years.

Included in this packet are an original and four copies of:

- 1. BOS Resolution:
- 2. SFPUC Agenda Item and Resolution
- 3. Human Rights Commission Memorandum
- 4. Agreement between CCSF and AECOM/Parsons

This item is requested to be heard at the earliest possible meeting of the Budget and Finance Committee.

Please contact us if you need any additional information.

Departmental representative to receive a copy of the adopted resolution:

AGENDA ITEM Public Utilities Commission

DEPARTMENT	Infrastructure Division	AGENDA NO.	10	·.
•		MEETING DATE	June 28, 2011	
•				

Professional Services Award: Regular Calendar

Project Manager: Karen Kubick

<u>Agreement No. CS-165, Award, Sewer System Improvement Program, Program Management Services</u>

Management Services	
Summary of	Approve the selection and award of Wasterwater Enterprise, Sewer System
Proposed	Improvement Program (SSIP)-funded SSIP Program Management Services
Commission Action:	(CS-165) to AECOM-Parsons Joint Venture (AECOM-Parsons), to provide
	program management services including providing qualified personnel to assist
•	the SFPUC in the areas of program planning and administration, program
	implementation, project technical support, program controls and pre-
	construction management and planning; and authorize the General Manager
	of the San Francisco Public Utilities Commission to negotiate and execute a
	professional services agreement with AECOM-Parsons Joint Venture for an
	amount not-to-exceed \$150,000,000 and with a duration of fifteen (15) years,
The same of the sa	subject to the Board of Supervisors approval pursuant to Charter Section 9.118.
Background &	Background:
Description of Scope	The City's major stormwater/treatment and collection systems are aging and
of Services:	lack redundancy. The last major capital work and master planning effort for the
	sewer system took place in the 1970's, forty years ago. A new master planning
No.	process was initiated in 2004 that included extensive public meetings, focus
	groups, and 18 months of detailed Commission workshops which concentrated
	on the City's wastewater system condition. This process resulted in Commission
	endorsement of specific goals and levels of service, and the approval of \$4.9
	billion dollars as part of the ten year capital plan for the proposed capital
	improvement projects that ultimately comprise the Sewer System Improvement
	Program (SSIP). The goal of the SSIP is to bring the sewer system to a state of
	good repair to ensure continued regulatory compliance, reliability, and
	redundancy; and to meet the known, and foreseeable challenges of today and the
	future. The identified challenges include:
100, 100	Aging infrastructure and poor condition of existing facilities with little

remaining useful life;

- Seismic deficiencies and lack of structural integrity;
- Limited operating flexibility and lack of redundancy;
- The ongoing need to protect the environment and public health, meet regulatory challenges, and conserve resources;
- Adaptation to climate change; and
- Improved stormwater management.

Approximately 20 capital improvement projects are proposed for construction by 2040, to address and mitigate these challenges and to meet the Commission endorsed goals and levels of service.

The implementation of the SSIP is being led by City staff and is structured to function as a matrix organization that will be managed by the Infrastructure Wastewater Enterprise Capital Improvement Program Director (Program Director) and will include staff and resources from SFPUC's Infrastructure Division, Wastewater Enterprise, and the Department of Public Works. In addition, there will be support from other SFPUC departments including External Affairs and Business Services, as well as various other City departments. Consultants with extensive experience on wastewater capital programs similar in scope and size of the SSIP, however, will play a key role in the implementation of the Program.

For management purposes, the implementation of the SSIP is divided into 2 major phases — pre-construction and construction. Pre-construction efforts include all planning, design, environmental review, right-of-way and contracting activities. The construction phase will begin following the award of a construction contract and extend through start-up, testing and close-out of that contract. The services of the Program Management Consultant will be used to support the SSIP management team on programmatic functions throughout the duration of the Program.

Description of Scope of Services:

The primary role of the Program Management Consultant (PMC) under this agreement will consist of:

- Program Planning and Administration
- Program Implementation
- Project Technical Support
- Program Controls
- Pre-Construction Management and Planning

The detailed scope of work identifies 41 tasks which stipulate the specific expectations and deliverables. Services provided by the PMC are intended to augment the City's workforce through the provision of expertise in the development and management of this large-scale capital improvement program; and where needed, through supplementary services to meet peak workload demands. Task orders will be issued by the Program Director, or Bureau Managers, and approved by the Assistant General Manager, Infrastructure. The Program Director, retains the authority and discretion to initiate, augment, alter, or terminate specific services and tasks provided through this agreement.

The services of the PMC are needed to work with City staff to validate the SSIP scope, schedule, and budget. The PMC will support the SSIP management team on a number of programmatic functions such as: strategic program development; risk management; optimization and project validation; labor and contract relations; asset management integration; scheduling; cost estimates; staff training; and analysis of alternative delivery mechanisms. The PMC will also provide specialized technical services and resources, such as: preliminary design, engineering, watershed hydraulics, regulatory, real time controls, and City staff augmentation when appropriate on an as-needed or project-specific basis.

In addition, the PMC will provide dedicated, professional staff and experts to work on an integrated City/consultant team led by City staff to implement the SSIP, adhere to the City's Environmental Justice and Community Benefits Policies, Sustainability Plan and Program, and San Francisco's Local Hire Policy for Construction. The SFPUC Infrastructure Division and Wastewater Enterprise have developed a detailed scope of services, functional roles, and estimates of work hours required for each, that were included in the RFP for Agreement No. CS-165. The scope includes six key/lead personnel and additional support specialists:

Key/Lead Positions:

- Program Management Advisor (PMA)
- Program Controls Manager (PCM)
- Pre-Construction Technical Advisor (PCTA)
- Process Engineering/Utility Manager (PEUM)
- Program Quality Assurance Manager (PQAM)
- Lead Cost Estimator (LCE)

Additional Specialists:

- Communications Coordinator (CC)
- Engineering Specialists
- Project Controls Specialists
- Climate Change Specialist

Result of Inaction:

A delay in awarding this agreement will further defer much needed capital improvements to the City's wastewater system; which, if unaddressed, will result in regulatory non-compliance, loss of system reliability, and increased public and worker safety risks.

Budget & Costs:	Funding: will be available at the time of award of the agreement for the first year's task orders from Project CENMSCSP06 - SSIP Planning (also known as Sewer System Master Plan project, and various SSIP projects to be determined.
	Not-To-Exceed Amount: \$150,000,000. The contract will be administered on a task order basis.
Schedule:	Advertised: March 14, 2011
Solitoria	Estimated Start Date: September 2011
	Estimated End Date: September 2026
	Duration: 15 years
Evaluation and Selection Criteria:	Minimum Qualifications Deliver Description And IV Posteron Qualification Possition Po
	Prime Proposer/Lead JV Partner Qualification Requirements To qualify as a Prime Proposer or Lead JV Partner for this Agreement, the
	Proposers must have demonstrated substantial financial capability, reliability, strength, and corporate depth as well as significant knowledge, capability, and breadth of experience in program management; to successfully perform its role and responsibilities in supporting the implementation of the SSIP. At a minimum, the Prime Proposer (or Lead JV Partner) must possess the following: • The Prime Proposer or Lead JV Partner must either (i) have been in
	business for a minimum of twenty (20) years providing Program Management, Planning, Design, and Pre-Construction Management services for large water or wastewater infrastructure capital programs; OR (ii) have been in business for ten (10) years providing water or wastewater Program Management Services AND have an owner, partner, or principal officer responsible for making significant administrative and business decisions on behalf of the firm, with a minimum of twenty (20) years experience providing Program Management, Planning, Design, and Pre-Construction Management
	services for large water or wastewater infrastructure capital programs; AND
	• The Prime Proposer or Lead JV Partner must have experience as the Prime, or Lead JV, Program Manager where it was responsible for management of a programmatic team on at least two (2) complex water or wastewater infrastructure programs, with a value of \$1 Billion or more, within the last fifteen (15) years, that are similar in complexity to the SSIP; AND
	The Prime Proposer and Lead JV Partner must possess a strong knowledge and understanding of current California wastewater and stormwater issues, regulations, and stakeholder concerns.

Non-Lead JV Partner Qualification Requirements

To qualify as a Non-Lead JV Partner for this RFP, the Proposer must have demonstrated the Non-Lead JV Partner's substantial financial capability, reliability, strength, and corporate depth as well as significant knowledge, capability, and breadth of experience in program management to successfully perform its role and responsibilities in supporting the implementation of the SSIP. At a minimum, the Non-Lead JV Partner must posses the following:

- The Non-Leading JV Partner must either (i) have been in business for a minimum of fifteen (15) years providing Program Management, Planning, Design, and Pre-Construction Management for large water or wastewater infrastructure capital programs; OR (ii) have been in business for five (5) years providing water or wastewater Program Management Services AND have an owner, partner, or principal officer responsible for making significant administrative and business decisions on behalf of the firm with a minimum of fifteen (15) years experience providing Program Management, Planning, Design, and Pre-Construction Management services for large water or wastewater infrastructure capital programs; AND
- The Non-Lead JV Partner must have experience as a Prime or JV Partner who has managed a programmatic team on at least two (2) complex water or wastewater infrastructure programs, with a value of \$500 Million or more, within the last fifteen (15) years, that are similar in complexity to the SSIP; AND

The Non-Leading JV Partner must also possess a strong knowledge and understanding of current California wastewater and stormwater issues, regulations, and stakeholder concerns.

Evaluation and Selection

The highly qualified selection panel consisted of two individuals with SFPUC wastewater expertise, an operations and maintenance manager and a retired senior project manager, and three high level managers representing Central Contra Costa Sanitary District, the City of San Jose Wastewater Capital Program and the New York Department of Environment Water and Wastewater Capital Program. All members have extensive wastewater program/technical experience.

The evaluation and selection process consisted of three components: i) written proposals, including responses from references, ii) oral interview process, and iii) overhead and profit schedule. The scores from the written evaluation, references, oral interviews, and overhead and profit schedule were combined and tabulated according to the following scoring breakdown:

Written Proposal (including references) 45 points
Oral Interviews 45 points
Overhead & Profit Schedule 10 points

Total 100 points

The top ranked consultant team, AECOM-Parsons, is being recommended for

PUBLIC UTILITIES COMMISSION

City and County of San Francisco

RESOLUTION NO.	

WHEREAS, There has been a seven year master planning process that included extensive public meetings, focus groups, and 18 months of detailed Commission workshops that focused on the City's wastewater system condition. The process resulted in specific goals, levels of service, and proposed projects which ultimately comprise the collection of capital improvements known as the Sewer System Improvement Program (SSIP). The Program Management Consultant (PMC) is needed to work with City staff to validate the SSIP scope, schedule, and budget; support SFPUC management team on programmatic functions; and to provide specialized technical services and resources; and

WHEREAS, It is necessary to procure the services of a qualified program management team to provide specialized Program Planning and Administration, Project Technical Support, Program Controls and Pre-Construction Management and Planning to supplement SFPUC staff; and

WHEREAS, The estimated cost of services is \$150,000,000; and

WHEREAS, The proposal was advertised on March 14, 2011; and

WHEREAS, Services are anticipated to begin in September 2011 and end in September 2026 and the duration of this agreement is 15 years; and

WHEREAS, SFPUC staff and Human Rights Commission (HRC) review of the selection panel evaluations and the proposals resulted in the establishment of AECOM-Parsons Joint Venture as the highest ranked consulting firm; and

WHEREAS, An HRC subconsulting goal of 10% Local Business Enterprise (LBE) participation (of the total value of services to be provided) has been established for this agreement; and

WHEREAS, Failure to reach successful agreement on contract terms and conditions within 30 days of the date of the Commission award may result in award of the contract to the next highest ranked proposer, or re-advertising and re-selecting consultants at the discretion of the City; and

WHEREAS, The firms being awarded a contract by the SFPUC must be in compliance with the Equal Benefits Provisions of Chapter 12B of the City's Administrative Code either at the time of the award, or within 2 weeks of the date of the Commission award; failure of the bidder to obtain compliance certification from HRC may, in the General Manager's sole discretion, result in award of the agreement to the next highest ranked proposer, or re-advertising and re-selecting consultants at the discretion of the City; and

WHEREAS, Funds for this agreement will be available at for the first year's task orders, at the time of award of the agreement, from Project CENMSCSP06 - SSIP Planning (also known as the Sewer System Master Plan project, and various SSIP projects, to be determined; now, therefore, be it

RESOLVED, That this Commission hereby approves the selection of AECOM-Parsons Joint Venture; awards Wastewater Enterprise, Sewer System Improvement Program Program Funded, Agreement No. CS-165, Sewer System Improvement Program, Program Management Services, to provide program management services and authorizes the General Manager of the San Francisco Public Utilities Commission to negotiate and execute a professional services agreement with AECOM-Parsons Joint Venture for an amount not-to-exceed \$150,000,000 and with a duration of 15 years, or, in the event negotiations are not successful or City requirements are not satisfied, to negotiate and execute a professional services agreement with the next highest ranked proposer subject to Board of Supervisors approval pursuant to Charter Section 9.118.

MEMORANDUM

Date:

June 17, 2011

To:

Karen Kubick, Program Manager, PUC

Kofo Domingo, Principle Contract Analyst, PUC

From:

Mindy Lee, Contract Compliance Representative, HRC

Subject:

CS-165 Program Management Services, Sewer System Improvement Program (SSIP)

The Human Rights Commission ("HRC") has reviewed the consultant proposals and supporting documentation, applied the appropriate rating bonuses, and determined responsiveness to the preaward Chapter 14B requirements for the above referenced project. A LBE subconsulting goal of 10% was established for this project. Three firms submitted proposals: AECOM/Parsons Joint Venture ("AECOM/Parsons JV"); Camp Dresser & McKee, Inc. ("CDM"); and Jacobs Engineering Group ("Jacobs").

Rating Bonus

The rating bonus is not applicable to this project because the estimated contract amount is over \$20 Million.

Score Sheets and Score Tabulations

HRC has reviewed the score sheets submitted by the panelists, the overhead profit schedule and the final score tabulations from the Department. Based on this information, the proposers are ranked as follows:

	FIRM		RANK
AECOM/Par	sons JV		1
CDM		1	2
Jacobs	_		3

LBE Subconsulting Goal

AECOM/Parsons JV met the 10% LBE subconsulting goal by listing the following LBE firms:

Based on the foregoing, HRC has determined that AECOM/Parsons JV has complied with the preaward HRC Chapter 14B requirements. Should you have any additional questions and/or concerns, please feel free to contact me at (415) 554-3136.

PUBLIC UTILITIES COMMISSION

City and County of San Francisco

RESO		

11-0101

WHEREAS, There has been a seven year master planning process that included extensive public meetings, focus groups, and 18 months of detailed Commission workshops that focused on the City's wastewater system condition. The process resulted in specific goals, levels of service, and proposed projects which ultimately comprise the collection of capital improvements known as the Sewer System Improvement Program (SSIP). The Program Management Consultant (PMC) is needed to work with City staff to validate the SSIP scope, schedule, and budget; support SFPUC management team on programmatic functions; and to provide specialized technical services and resources; and

WHEREAS, It is necessary to procure the services of a qualified program management team to provide specialized Program Planning and Administration, Program Implementation, Project Technical Support, Program Controls and Pre-Construction Management and Planning to supplement SFPUC staff; and

WHEREAS, The estimated cost of services is \$150,000,000; and

WHEREAS, The proposal was advertised on March 14, 2011; and

WHEREAS, Services are anticipated to begin in September 2011 and end in September 2026 and the duration of this agreement is 15 years; and

WHEREAS, SFPUC staff and Human Rights Commission (HRC) review of the selection panel evaluations and the proposals resulted in the establishment of AECOM-Parsons Joint Venture as the highest ranked consulting firm; and

WHEREAS, An HRC subconsulting goal of 10% Local Business Enterprise (LBE) participation (of the total value of services to be provided) has been established for this agreement; and

WHEREAS, Failure to reach successful agreement on contract terms and conditions within 30 days of the date of the Commission award may result in award of the contract to the next highest ranked proposer, or re-advertising and re-selecting consultants at the discretion of the City; and

WHEREAS, The firms being awarded a contract by the SFPUC must be in compliance with the Equal Benefits Provisions of Chapter 12B of the City's Administrative Code either at the time of the award, or within 2 weeks of the date of the Commission award; failure of the bidder to obtain compliance certification from HRC may, in the General Manager's sole discretion, result in award of the agreement to the next highest ranked proposer, or re-advertising and re-selecting consultants at the discretion of the City; and

WHEREAS, Funds for this agreement will be available at for the first year's task orders, at the time of award of the agreement, from Project CENMSCSP06 - SSIP Planning (also known as the Sewer System Master Plan project, and various SSIP projects, to be determined; now, therefore, be it

RESOLVED, That this Commission hereby approves the selection of AECOM-Parsons Joint Venture; awards Wastewater Enterprise, Sewer System Improvement Program Program Funded, Agreement No. CS-165, Sewer System Improvement Program, Program Management Services, to provide program management services and authorizes the General Manager of the San Francisco Public Utilities Commission to negotiate and execute a professional services agreement with AECOM-Parsons Joint Venture for an amount not-to-exceed \$150,000,000 and with a duration of 15 years, or, in the event negotiations are not successful or City requirements are not satisfied, to negotiate and execute a professional services agreement with the next highest ranked proposer subject to Board of Supervisors approval pursuant to Charter Section 9.118.

I hereby certify that the foregoing Commission at its meeting of	resolution was adopted by the Public Utilities June 28, 2011
	Secretary, Public Utilities Commission

City and County of San Francisco San Francisco Public Utilities Commission 1155 Market Street, 11th Floor San Francisco, California 94103

Agreement between the City and County of San Francisco and

AECOM/Parsons JV

This Agreement is made this 28th day of June, 2011, in the City and County of San Francisco, State of California, by and between: AECOM/Parsons JV, 405 Howard Street, Suite 400, San Francisco, CA 94105, hereinafter referred to as "Contractor," and the City and County of San Francisco, a municipal corporation, hereinafter referred to as "City," acting by and through the San Francisco Public Utilities Commission.

Recitals

WHEREAS, the San Francisco Public Utilities Commission ("Department") wishes to retain the services of **AECOM/Parsons JV** to provide Program Management Services for the Sewer System Improvement Program; and

WHEREAS, a Request for Proposal ("RFP") was issued on March 14, 2011, and City selected Contractor as the highest qualified scorer pursuant to the RFP; and

WHEREAS, Contractor represents and warrants that it is qualified to perform the services required by City as set forth under this Agreement; and

WHEREAS, approval for this Agreement was obtained when the Civil Service Commission approved Contract number 4100-10/11 on April 18, 2011; and

WHEREAS, approval for this Agreement was obtained from the San Francisco Public Utilities Commission Resolution Number [insert resolution number] on June 28, 2011; and

WHEREAS, approval for this Agreement was obtained from the San Francisco Board of Supervisors by Resolution Number [insert resolution number] on [insert date of Board of Supervisors' action], and

Now, THEREFORE, the parties agree as follows:

1. Certification of Funds; Budget and Fiscal Provisions; Termination in the Event of Non-Appropriation. This Agreement is subject to the budget and fiscal provisions of the City's Charter. Charges will accrue only after prior written authorization certified by the Controller, and the amount of City's obligation hereunder shall not at any time exceed the amount certified for the purpose and period stated in such advance authorization. This Agreement will terminate without penalty, liability or expense of any kind to City at the end of any fiscal year if funds are not appropriated for the next succeeding fiscal year. If funds are appropriated for a portion of the fiscal year, this Agreement will terminate, without penalty, liability or expense of any kind at the end of the term for which funds are appropriated. City has

no obligation to make appropriations for this Agreement in lieu of appropriations for new or other agreements. City budget decisions are subject to the discretion of the Mayor and the Board of Supervisors. Contractor's assumption of risk of possible non-appropriation is part of the consideration for this Agreement.

THIS SECTION CONTROLS AGAINST ANY AND ALL OTHER PROVISIONS OF THIS AGREEMENT.

- 2. Term of the Agreement. Subject to Section 1, the term of this Agreement shall be fifteen (15) years from September 26, 2011 to September 25, 2026.
- 3. Effective Date of Agreement. This Agreement shall become effective when the Controller has certified to the availability of funds and Contractor has been notified in writing.
- 4. Services Contractor Agrees to Perform. The Contractor agrees to perform the services provided for in Appendix A, "Description of Services," attached hereto and incorporated by reference as though fully set forth herein.
- 5. Compensation. Compensation shall be made in monthly payments on or before the thirtieth day of each month for work, as set forth in Section 4 of this Agreement, that the General Manager of the Public Utilities Commission, in his or her sole discretion, concludes has been performed as of the last day of the immediately preceding month. In no event shall the amount of this Agreement exceed One Hundred Fifty Million Dollars (\$150,000,000). The breakdown of costs associated with this Agreement appears in Appendix B, "Calculation of Charges," attached hereto and incorporated by reference as though fully set forth herein. No charges shall be incurred under this Agreement nor shall any payments become due to Contractor until reports, services, or both, required under this Agreement are received from Contractor and approved by the San Francisco Public Utilities Commission as being in accordance with this Agreement. City may withhold payment to Contractor in any instance in which Contractor has failed or refused to satisfy any material obligation provided for under this Agreement.

In no event shall City be liable for interest or late charges for any late payments.

The Controller is not authorized to pay invoices submitted by Contractor prior to Contractor's submission of HRC Progress Payment Form. If Progress Payment Form is not submitted with Contractor's invoice, the Controller will notify the department, the Director of HRC and Contractor of the omission. If Contractor's failure to provide HRC Progress Payment Form is not explained to the Controller's satisfaction, the Controller will withhold 20% of the payment due pursuant to that invoice until HRC Progress Payment Form is provided. Following City's payment of an invoice, Contractor has ten days to file an affidavit using HRC Payment Affidavit verifying that all subcontractors have been paid and specifying the amount.

6. Guaranteed Maximum Costs. The City's obligation hereunder shall not at any time exceed the amount certified by the Controller for the purpose and period stated in such certification. Except as may be provided by laws governing emergency procedures, officers and employees of the City are not authorized to request, and the City is not required to reimburse the Contractor for, Commodities or Services beyond the agreed upon contract scope unless the changed scope is authorized by amendment and approved as required by law. Officers and employees of the City are not authorized to offer or promise, nor is the City required to honor, any offered or promised additional funding in excess of the maximum amount of funding for which the contract is certified without certification of the additional amount by the Controller. The Controller is not authorized to make payments on any contract for which funds have not been certified as available in the budget or by supplemental appropriation.
