

PUBLIC UTILITIES COMMISSION

City and County of San Francisco

RESOLUTION NO.: 20-0239

WHEREAS, The San Francisco Board of Supervisors established a Community Choice Aggregation (CCA) program in 2004 (Ordinance 86-04) and has implemented the program, called CleanPowerSF, through the work of the SFPUC in consultation with the San Francisco Local Agency Formation Commission (Ordinances 146-07, 147-07, and 232-09); and

WHEREAS, On June 22, 2017 SFPUC issued a Request for Offers for Renewable Energy Supplies, PRO.0077, seeking bids for energy, environmental attributes and capacity from new and existing Eligible Renewable Energy Resources, as defined in California Public Resources Code Section 25741, to support citywide enrollment in the CleanPowerSF program no later than the summer of 2019; and

WHEREAS, PRO.0077 sought renewable energy produced and delivered by new or existing generating facilities with an initial contract delivery date as early as May 2018 and as late as December 2021 for contract terms of one to 25 years, plus optional extensions, including, to the extent available, the Resource Adequacy (“RA”) capacity for any generating facilities that have achieved or are expected to achieve full capacity deliverability status; and

WHEREAS, On April 28, 2018 SFPUC entered into two contracts with Calpine Energy Services, LP (Calpine) for renewable energy and Local RA capacity from the Geysers geothermal plant; and

WHEREAS, In response to a solicitation for RA supplies for 2021 and 2022 issued on October 15, 2020, Calpine submitted offers to sell Local RA capacity and renewable energy to CleanPowerSF from the Geysers geothermal facility and an offer to sell System and Flexible RA capacity from other facilities located in California, pursuant to the Master Power Purchase and Sale Agreement with Calpine (Calpine Agreement), which was approved by the Board of Supervisors in Ordinance No. 223-15; and

WHEREAS, The General Manager executed an amendment to the contract for Local RA capacity from the Calpine Geysers geothermal facility in order to support CleanPowerSF’s November 2, 2020 RA compliance filing deadline; and

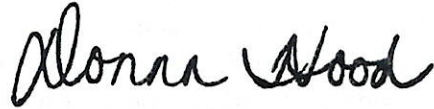

WHEREAS, this approval does not constitute a project under the California Environmental Quality Act (CEQA) Guidelines Section 15378 because there would be no physical change in the environment; now, therefore, be it

RESOLVED, That the Commission retroactively approves the amendment of the Local RA capacity contract with Calpine in the amount of \$27,000,000 for a total amount of \$30,240,000 executed by the General Manager to support CleanPowerSF’s compliance with state regulatory requirements, and authorizes the General Manager to seek Board of Supervisors retroactive approval for the contract; and be it

FURTHER RESOLVED, That the Commission authorizes the General Manager to execute the amendment to the contract with Calpine for the purchase of renewable energy from the Geysers geothermal facility in the amount of \$193,299,120, for a total amount of \$242,979,817, and authorizes the General Manager to seek Board of Supervisors approval for the contract; and be it

FURTHER RESOLVED, That the Commission authorizes the General Manager to execute the contract with Calpine for System and Flexible RA capacity in the amount of \$59,400,000, and seek Board of Supervisors approval for the contract.

I hereby certify that the foregoing resolution was adopted by the Public Utilities Commission at its meeting of December 8, 2020.
