Dear Aaron Peskin and Gordon Mar,
Please hold the big picture in mind, with an eye to the future.
One tree could be part of a urban forest canopy, could be part of an healthy ecosystem that perpetuates condensation/precipitation. Think how ironic it is that Bart's definition of canopy is to exclude trees, that Bart wants to hurt the environment for the sake of protection from rain in San Francisco.
Hold Bart accountable to a 4:1 tree replacement and to the creation of living roofs. Think big and think sustainable.

Thanks, Susannah Meek

Somera, Alisa (BOS)

Please add my voice to the street activists who have been trying, without success, to preserve and enlarge San Francisco's pathetically thin urban canopy. The BLA report spells out why trees have received so little real care in this city, and I hope changes will be implemented at DPW/BUF to rectify the many shortcomings outlined in the report.
