Current Guidance on Masking for Schools

For this Guidance

- face masks includes cloth face coverings that cover the mouth and nose
- face masks must not have an exhalation valve

Face masks are required indoors for everyone 24 months and older, even if they have been fully vaccinated for COVID-19 with the exemption noted for specific sports and extracurricular activities

About Masks

- A well-fitted mask that can be comfortably worn is most important.
- Double masking is an effective way to improve fit and filtration.
- A close-fitting cloth mask can be worn on top of a surgical/disposable mask to improve the seal of the mask to the face.
- Additional masking resources:
<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Get-the-Most-out-of-Masking.aspx>

School Distribution

For staff:
Surgical, reusable & KN95

For students: Surgical, reusable

Ventilation

Status Update

- All classrooms, cafeterias, and libraries have received PACs
 - 3 cafeterias too large to benefit from PAC: Galileo, Mission, and Lincoln. These cafeterias have windows.
- Capital condition assessment begins week of January 11th
 - Results will guide staff in prioritizing sites for future investment

Thank You
