John,

This was for Item 6 as it applies to overdoses as well as other topics that were brought up in other items.

I had other agendas to be at but I was able to give a copy of the document to the media and to the representatives of the police department at the hearing.

I would recommend giving a copy to the members of the committee.

Thanks for clarifying the rules of the committee prior to the meeting to me! I am available to the committee for further discussion if they have questions specific to this technology.

I also wanted to thank you for handling the interruptions professional today. No need fo that type of conduct at these meetings/hearings.

Respectfully,

Chris Ward Kline

What item on today's PSNS agenda does this comment address?

Please note that the PSNS committee doesn't have a general public comment agenda item—general public comment is only conducted at full BOS meetings.

I would like to add this to the public record for today's meeting.

I'm enclosing a Non-Disclosure Agreement with San Francisco Police and the DOJ/FBI in which it was agreed upon purchase of Harris Corporation Technology such as a Stingray; however, it gives a contractual agreement for the DOJ/FBI to investigate all violations of federal law and that SFPD accepts all liabilities to include civil and criminal if federal law was violated.

Clearly, placing a stingray on large swaths of the population of San Francisco has caused and influence the drastic increase in overdoses, violence, homelessness and suicides.

Thank you for adding this to the public record. I will try and be at the meeting today.

Respectfully,

Chris Ward Kline

Hello Supervisors,

My name is Calder Lorenz, I live and work in the Mission District, and I'm part of The Gubbio Project. I urge you to support the implementation of wellness hubs and the Overdose Prevention Plan, expanded program capacity for evidence-based treatment on demand, and ending the arrests and coerced treatment of people who use drugs.

The Gubbio Project's mission is to be in community with and to provide a sacred space and sanctuary for unhoused people in need of safe, compassionate respite during the day. Our program is housed at St. John's in the Mission and currently provides critical services to 100 individuals daily through a highly unique and successful model that combines social justice, peer support, and harm reduction. The Gubbio Project calls for a more just, compassionate and community centered approach by public agencies and policymakers.

Every day that we delay results in the overdose deaths of two San Franciscans or more. Criminalization has not and will not solve the overdose crisis. Please, support the immediate implementation of the Overdose Prevention Plan and best practices grounded in public health.

In Community, Calder
