

1 [City Policy Restricting Payment to Twitter for Blue Checkmark Verification]

2

3 **Resolution setting forth official City policy regarding restricting payment to Twitter for**  
4 **blue checkmark verification (Twitter Blue Service).**

5

6 WHEREAS, Twitter is a popular social media platform with millions of active users who  
7 rely on it for news, entertainment, and engagement with their followers; and

8 WHEREAS, Twitter badge verification is a feature that helps users to distinguish  
9 verified authentic accounts and imposter accounts, and it is commonly used by high-profile  
10 individuals and businesses to build trust with their audience; and

11 WHEREAS, Twitter badge verification is primarily used as a tool to curb  
12 misinformation, cut down accounts impersonating public figures, and build trust in the service;  
13 and

14 WHEREAS, Twitter announced effective April 1, 2023, they will end their legacy  
15 verified program and remove legacy verified checkmarks; in order for accounts to keep their  
16 blue checkmark on Twitter, individuals must pay for Twitter Blue; and

17 WHEREAS, As of March 27, 2023, Twitter Chief Executive, Elon Musk (Musk) tweeted  
18 that beginning April 15, 2023, only tweets by verified users will show up in Twitter's default  
19 main feed of "For You" recommendations; erification, formerly a service Twitter offered public  
20 figures, is now available only to \$8-a-month subscribers to Twitter Blue which infuriated users;  
21 and

22 WHEREAS, Charging users for a badge verification service goes against the spirit of  
23 social media, which is meant to be an open and accessible platform for everyone to use; and

24

25

1           WHEREAS, Business accounts, which include governmental accounts, are also  
2 subject to the charge to subscribe to Twitter’s verified organizations service, which are subject  
3 to \$1,000 a month charges and an additional \$50 per month for each affiliated account; and

4           WHEREAS, The new fee calls into question whether businesses and government  
5 entities can afford to pay a minimum of \$12,000 a year to maintain a verification badge on a  
6 single one of their business accounts; and

7           WHEREAS, Musk has given April 1, 2023, as the deadline for public figures,  
8 journalists, government agencies and others currently verified for free to pay up or lose their  
9 verification badges; and

10          WHEREAS, This mandate is concerning as government agencies rely on their verified  
11 accounts to inform the public on behalf of the administration; verification, combined with the  
12 designated Twitter profiles, helped to ensure the public could trust those messages; and

13          WHEREAS, Many, including most newsrooms, vowed not to pay for accreditation,  
14 arguing that it no longer signals authority if any user can purchase a check mark; and

15          WHEREAS, The White House of the U.S. President will not pay to have its staff's  
16 official Twitter profiles continue to be verified; and

17          WHEREAS, On March 31, 2023, White House director of digital strategy Rob Flaherty  
18 told staffers, “It is our understanding that Twitter Blue does not provide person-level  
19 verification as a service. Thus, a blue checkmark will now simply serve as a verification that  
20 the account is a paid user.”; and

21          WHEREAS, On April 1, 2023, Twitter removed the “verified” badge from the New York  
22 Times’ main account, a move that billionaire owner Musk pushed for overnight after learning  
23 that the news organization would not pay for its Twitter Blue service; and

1           WHEREAS, On March 30, 2023, The Washington Post spokesperson announced that  
2 they will not pay for Twitter Blue service as an institution or on behalf of their journalists as it's  
3 evident that verified checkmarks no longer represent authority and expertise; and

4           WHEREAS, On March 30, 2023, The Los Angeles Times spokesperson announced  
5 that they too do not plan on paying; firstly, verification no longer establishes authority or  
6 credibility, instead it will only mean that someone has paid for a Twitter Blue subscription;  
7 secondly, while Twitter remains an important tool for newsgathering, it is not as reliable as it  
8 once was; and

9           WHEREAS, Musk should not charge users for badge verification; by doing so, Twitter  
10 is going against its mission to promote authenticity and transparency on its platform; and

11           WHEREAS, As a social media platform, Twitter should prioritize authenticity and  
12 transparency; charging users for badge verification undermines this mission by creating a  
13 system where only those who can afford to pay are more likely to be verified; this system goes  
14 against the principles of a fair and transparent platform; now, therefore, be it

15           RESOLVED, That the Board of Supervisors declares that it is the official policy of the  
16 City and County of San Francisco not pay for Twitter Blue service as an institution or on  
17 behalf of their staff's official Twitter profiles; and, be it

18           FURTHER RESOLVED, That the Board of Supervisors of the City and County of San  
19 Francisco urges Twitter to develop a fair and transparent process for verifying accounts based  
20 on merit and not financial means; and, be it

21           FINALLY RESOLVED, That the Board of Supervisors of the City and County of San  
22 Francisco directs the Clerk of the Board of Supervisors to transmit a copy of this Resolution to  
23 Twitter Chief Executive, Elon Musk, local state legislative representatives and Governor Gavin  
24 Newsom.
