Unchanged Code text and uncodified text are in plain Arial font.

Additions to Codes are in single-underline italics Times New Roman font.

Deletions to Codes are in strikethrough italics Times New Roman font.

Board amendment additions are in double-underlined Arial font.

Board amendment deletions are in strikethrough Arial font.

Asterisks (* * * *) indicate the omission of unchanged Code subsections or parts of tables.

(a) In March 2024, San Francisco voters approved Proposition E, which facilitated the

ability of the Police Department to use technology to fulfill its mission to enhance public safety,

11

12

10

Be it ordained by the People of the City and County of San Francisco:

13

14

Section 1. Background and General Findings.

17

18

19

protect life and property, and prevent crime. Among other things, Proposition E established that the Police Department shall use technology to the maximum extent possible to improve efficiency and effectiveness in combatting crime, and reduce dangers to the public, subject to

20 th

the City's policies to protect privacy and civil liberties. (Admin. Code § 96I.2(e)). Subject to these principles and limitations, Administrative Code Section 96I.2(d), authorizes police

21

22

officers to use unassisted aerial vehicles ("UAVs," also known as "drones") along with or in

23

lieu of vehicle pursuits. Proposition E also authorizes the use of drones to assist in criminal

investigations and exempts the Police Department's use of drones under Administrative Code

25

- Section 96I.2(e) from the requirements of the City's Surveillance Technology Ordinance (Administrative Code Chapter 19B).
- (b) With the passage of Proposition E, the Police Department has sought to expand its use of technology to enhance community safety, combat crime, and more efficiently utilize personnel in the midst of an ongoing staffing shortage. In March 2024, the Police Department launched the Real Time Investigation Center (RTIC), a real-time intelligence hub where officers simultaneously use technology including drones, Automated License Plate Readers, public safety cameras and other crime-fighting tools to help protect the community. The RTIC allows the Police Department to leverage technology, data, and collaboration to provide real-time intelligence to law enforcement officers in the field, enabling them to more effectively respond to incidents, prevent crimes, and apprehend suspects. Using technology like drones, the Police Department can rapidly respond to crimes in progress, with officers in the community directly communicating with teams at the RTIC.
- (c) The RTIC team has been successful in preventing numerous police pursuits by following suspects at a distance and making strategic arrests that reduce risks to the public. Officers in the RTIC have assisted in over 500 arrests. Notable cases involving the RTIC include an arrest made in the first homicide of 2025. On January 1, 2025, dispatch broadcasted that a shooting occurred on 17th Street and South Van Ness Avenue and provided a suspect vehicle description. RTIC located a matching vehicle and alerted officers in the area, who ultimately tracked the vehicle to a neighboring city and successfully took the suspect into custody. In another notable case, in December 2024, suspects pistol-whipped and stabbed a victim in the Stockton Tunnel. Dispatch provided officers with the direction the suspects fled, and RTIC alerted plainclothes units in the area. Officers observed the suspects walking toward the Montgomery BART Station, where they were taken into custody.

- (d) The RTIC is currently located in the Hall of Justice at 850 Bryant Street. Critical deficiencies render this location unsuitable for hosting a modern, high-tech crime center. The building, constructed in 1958, lacks suitable electrical capacity and internet infrastructure to support high-speed, reliable internet for real-time data analytics, video download capabilities and inter-agency communication. The outdated infrastructure at 850 Bryant Street, reliant on 1960s-era wiring, cannot meet these demands, risking system failures that could delay emergency responses or compromise critical operations. In its current location, the RTIC has experienced power and internet outages, and plumbing leaks from the ceiling. The RTIC is in a windowless room in a concrete structure, which limits cell phone and emergency radio transmission capabilities. Retrofitting the RTIC's current location for modern power and internet needs would be prohibitively expensive, time-consuming and disruptive.
- (e) The San Francisco Police Community Foundation (SFPCF) is a 501(c)(3) non-profit corporation that is dedicated to supporting the Police Department. The SFPCF's vision is to provide the Police Department resources to create a best-in-class RTIC. SFPCF's gifts are intended to help the Police Department procure state-of-the-art equipment and technology to support and expand the capabilities of the RTIC. SFPCF is supported by Chris Larsen, a San Francisco native who co-founded the company Ripple Labs, Inc.
- (f) Through a separate Accept and Expend Resolution (File No. ________), the Police Department is seeking Board of Supervisors' authorization to retroactively accept an in-kind gift from Ripple Labs, Inc. of a sublease for office space for the RTIC located at 315 Montgomery Street through December 2026, valued at approximately \$2,131,543. Ripple Labs paid-in-full for the lease through December 2026, but is no longer using the office space, and offered to sublease the property to the Police Department as a temporary location for the RTIC. The sublease was approved as to form by the City Attorney and executed by the Director of Real Estate and the Police Chief. The sublease and master landlord's consent to

1	the sublease, effective May 22, 2025, are on file with the Clerk of the Board of Supervisors in
2	File No
3	(g) SFPCF has proposed to make a gift of funds totaling up to \$5,600,107 in support of
4	the RTIC, which are estimated to consist of the following: \$57,000 to support the installation of
5	fiber internet service at 315 Montgomery Street; \$5,277,107 for the purchase of 12 docks and
6	12 drones, related software and services, and data integration software for the RTIC; and
7	\$266,000 for Police Department employee parking fees near 315 Montgomery Street at the
8	St. Mary's Square Garage owned by the San Francisco Municipal Transportation Authority.
9	(h) In addition, SFPCF has proposed to give the Police Department in-kind gifts
10	totaling approximately \$1,649,921, comprised of installation of a video wall and related
11	services for the RTIC, valued at approximately \$1,194,770; IT professional services for the
12	RTIC, valued at approximately \$50,000; network connectivity and related services for the
13	RTIC, valued at approximately \$294,156; and computer equipment for Police Department
14	employee use at the RTIC, valued at approximately \$110,995.
15	(i) SFPCF has also proposed to make an additional gift of funds to the Police
16	Department to cover other incidental costs, such as the installation of card readers at 315
17	Montgomery, internet services, moving expenses, and potential additional facilities costs.
18	These costs are currently undetermined.
19	(j) Through a separate Accept and Expend Resolution (File No), the Police
20	Department is seeking Board of Supervisors' approval to accept and expend SFPCF's gifts of
21	equipment, services, and funds totaling approximately \$7,250,028, and future gifts to support
22	the RTIC.
23	(k) The Police Commission authorized the acceptance of the gifts from SFPCF and
24	Ripple Labs, Inc. at its meeting on June 4, 2025. The Police Commission's approval is on file
25	with the Clerk of the Board of Supervisors in File No

1 (I) Given the availability of the SFPCF gift funds to support expansion of the RTIC, the 2 limited term of the sublease, and the findings above, it is essential and in the public interest to 3 allow the Police Department to promptly use the gift funds to acquire and begin using the 4 technology and equipment for the RTIC. The Police Department must procure license and 5 maintenance services for the gifted software and equipment, and the City's normal solicitation 6 process would consume additional resources and time. The time required to conduct a 7 solicitation process will jeopardize the Police Department's ability to utilize the gifted sublease 8 for the RTIC. 9 Section 2. Waiver of Competitive Solicitation Requirements. 10 The competitive solicitation requirements of Administrative Code Chapters 14B and 21 11 12 shall not apply to the Police Department's purchase of equipment, technology, or services to 13 support the RTIC using the funds gifted by SFPCF, including but not limited to the Police 14 Department's purchase of docks and drones, data integration software, and related services for the RTIC. 15 16 // 17

1	Section 3. Effective Date.
2	This ordinance shall become effective 30 days after enactment. Enactment occurs
3	when the Mayor signs the ordinance, the Mayor returns the ordinance unsigned or does not
4	sign the ordinance within ten days of receiving it, or the Board of Supervisors overrides the
5	Mayor's veto of the ordinance.
