13 **Board amendment deletions** are in ~~strikethrough Arial font~~.
14 **Asterisks (* * * *)** indicate the omission of unchanged Code
15 subsections or parts of tables.

13

14 Be it ordained by the People of the City and County of San Francisco:

15

16 Section 1. Findings.

17 (a) Decades of scientific research have demonstrated the toxic and carcinogenic
18 nature of perfluoroalkyl and polyfluoroalkyl substances known as PFAS, which are a family of
19 synthetic chemicals known as "forever chemicals" due to their persistent presence in both the
20 environment and the human body. Research has linked exposure to PFAS and accumulation
21 of PFAS in the human body to the development of tumors in the liver, reproductive organs,
22 and pancreas.

23 (b) In November 2023, the International Association for Research on Cancer (IARC)
24 declared perfluorooctanoic acid (PFOA), a polyfluoroalkyl substance found in firefighter
25 personal protective equipment, to be a Group 1 known human carcinogen.

1 (c) In addition to other industrial and commercial uses, PFAS have been utilized in
2 personal protective equipment of firefighters. Specifically, PFAS have been used within the
3 inner moisture barrier layer of the three-layer fabric of firefighter turnout gear in order to satisfy
4 an ultraviolet light degradation test under Section 8.62 of the National Fire Protection
5 Association (NFPA) Standard 1971.

6 (d) Firefighting is an inherently dangerous profession that brings repeated exposures
7 to numerous toxic substances, including benzene, asbestos, and hexavalent chromium.
8 These exposures lead to a higher rate of cancer among firefighters than among the general
9 population. The cancer risk for firefighters is so high that in July 2022, IARC declared
10 firefighter occupational exposure itself to be a Group 1 carcinogen that is known to cause
11 cancer and harm to human health.

12 (e) Fire agencies throughout the country have worked to reduce levels of occupational
13 exposure to harmful substances, including PFAS, through policies including requiring the
14 cleaning of apparatus cabs regularly and after every fire, requiring the cleaning of personal
15 protective equipment, requiring the use of Self-Contained Breathing Apparatus (SCBA) during
16 fire overhaul, and eliminating the use of aqueous film forming foam (AFFF) that contains
17 PFAS. California restricted the use of AFFF, also known as Class B firefighting foam,
18 containing PFAS, in favor of non-PFAS alternatives, through the enactment of SB 1044 in
19 September 2021.

20 (f) The Fire Department has received a \$2.3 million grant from the Federal Emergency
21 Management Agency (FEMA) to purchase new personal protective equipment (PPE), and is
22 preparing to submit a resolution for the Board of Supervisors' approval of the acceptance and
23 expenditure of this grant. The FEMA funds will assist the Fire Department in replacing current
24 PPE with new PPE that does not contain intentionally-added PFAS.

1 Section 2. Chapter 64 of the Administrative Code is hereby amended by adding
2 Section 64.2, to read as follows:

3 **SEC. 64.2. PROHIBITION ON FIRE DEPARTMENT PROVISION OR USE OF**
4 **PERSONAL PROTECTIVE EQUIPMENT CONTAINING PFAS.**

5 (a) Definitions. For purposes of this Section 64.2, the following definitions apply:

6 “Firefighter Personal Protective Equipment” means personal protective clothing and
7 equipment covered by the General Industry Safety Orders in Sections 3403 to 3407, inclusive, of Title 8
8 of the California Code of Regulations, as may be amended from time to time.

9 “PFAS” means perfluoroalkyl and polyfluoroalkyl substances, a class of fluorinated organic
10 compounds containing at least one fully fluorinated carbon atom.

11 (b) Prohibition. By no later than June 30, 2026, the Fire Department shall no longer provide
12 or use Firefighter Personal Protective Equipment containing intentionally-added PFAS.

13 (c) Progress Meetings. The Chief of the Fire Department, or the Chief’s designee, shall meet
14 with labor representatives at least every three months until June 30, 2026, to discuss and evaluate
15 progress toward phasing out Firefighter Personal Protective Equipment containing intentionally-added
16 PFAS, including with respect to the availability of, and securing funding for, Firefighter Personal
17 Protective Equipment that does not contain intentionally-added PFAS.

18 (d) Progress Reports. The Fire Department shall provide a report to the Board of Supervisors
19 and the Fire Commission on its progress toward meeting the deadline in subsection (b) every six
20 months until June 30, 2026. Following consultation with labor representatives, if the Fire Department
21 determines that factors beyond the Fire Department’s control will impede the Fire Department’s ability
22 to meet the June 30, 2026 deadline, the Fire Department shall recommend to the Board of Supervisors
23 by no later than March 1, 2026 to extend the June 30, 2026 deadline.

LEGISLATIVE DIGEST

[Administrative Code - Firefighter Personal Protective Equipment Containing PFAS]

Ordinance amending the Administrative Code to prohibit the Fire Department from providing or using personal protective equipment containing intentionally-added PFAS (perfluoroalkyl and polyfluoroalkyl substances) by June 30, 2026; and requiring the Fire Department to conduct regular meetings with labor representatives, and submit regular reports to the Board of Supervisors and Fire Commission, regarding its progress toward meeting the June 30, 2026, deadline.

Existing Law

Existing local law does not address firefighter personal protective equipment (“PPE”). Under California law, General Industry Safety Orders in Sections 3403 to 3407 of Title 8 of the California Code of Regulations set forth certain standards for firefighter PPE, but California law does not address the presence of perfluoroalkyl and polyfluoroalkyl substances (“PFAS”) in firefighter PPE.

Amendments to Current Law

The proposed legislation would require that, by no later than June 30, 2026, the Fire Department shall no longer provide or use firefighter PPE containing intentionally-added PFAS. The proposed ordinance would also require the Fire Department to meet with labor representatives at least every three months until June 30, 2026 to discuss and evaluate progress toward phasing out PPE containing intentionally-added PFAS, and submit regular reports to the Board of Supervisors and the Fire Commission on the Department’s progress toward meeting the June 30, 2026 deadline. The proposed ordinance would allow the Fire Department to recommend to the Board of Supervisors an extension of the deadline if the Department is unable to meet the deadline based on factors beyond the Department’s control.

Background Information

Scientific research has demonstrated the toxic and carcinogenic nature of PFAS, which are known as “forever chemicals” due to their persistent presence in the environment and human body. In addition to other industrial and commercial uses, PFAS have been utilized in firefighter PPE. Fire agencies throughout the country have worked to reduce levels of firefighter occupational exposure to harmful substances, including PFAS.

<p>Item 1 File 24-0299 <i>(Continued from 4/24/24 meeting)</i></p>	<p>Department: Fire Department (FIR)</p>
<p>EXECUTIVE SUMMARY</p>	
<p>Legislative Objectives</p> <ul style="list-style-type: none"> The proposed ordinance would establish Chapter 64.2 of the Administrative Code to prohibit the Fire Department from using personal protective equipment (PPE) containing intentionally added PFAs (perfluoroalkyl and polyfluoroalkyl substances) after June 2026. <p>Key Points</p> <ul style="list-style-type: none"> PFAs (perfluoroalkyl and polyfluoroalkyl substances) are “forever” chemicals considered hazardous to human health, some of which may cause cancer. According to Mark Corso, Deputy Director of Finance and Administration at the Fire Department, all firefighting personal protective equipment (PPE) on the market has PFAs, though manufacturers are currently testing PFA-free prototypes. Firefighting PPE consists primarily of a coat and pants and PFAs are used to make them water repellent. <p>Fiscal Impact</p> <ul style="list-style-type: none"> The total cost to replace all fire fighting PPE is likely \$10.1 million. Cost would likely be mostly funded by the General Fund. The Fire Department budgets \$850,000 for uniform replacement every year and has proposed to do so in the FY 2024-25 – FY 2025-26 budget. To meet the June 2026 deadline of phasing out PFAs, the Department would have to increase its uniform replacement budget by \$4.2 million each year to \$5 million. <p>Policy Consideration</p> <ul style="list-style-type: none"> The National Institute of Standards and Technology released a report in May 2023 that tested twenty textiles of firefighting PPE. The report found that the concentration varied widely between the different textiles, which suggests that certain gear currently on the market is safer than others. As noted above, PFA-free firefighting PPE does not currently exist. In the meantime, the City could work with other governments to identify and jointly purchase PPE that has minimal PFAs. <p>Recommendation</p> <ul style="list-style-type: none"> Approval of the proposed ordinance is a policy matter for the Board of Supervisors. 	

MANDATE STATEMENT

City Charter Section 2.105 states that all legislative acts shall be by ordinance, approved by a majority of the members of the Board of Supervisors.

BACKGROUND

PFAs (perfluoroalkyl and polyfluoroalkyl substances) are “forever” chemicals considered hazardous to human health, some of which may cause cancer. According to Mark Corso, Deputy Director of Finance and Administration at the Fire Department, all firefighting personal protective equipment (PPE) on the market has PFAs, though manufacturers are currently testing PFA-free prototypes. Firefighting PPE consists primarily of a coat and pants and PFAs are used to make them water repellent.

DETAILS OF PROPOSED LEGISLATION

The proposed ordinance would establish Chapter 64.2 of the Administrative Code to prohibit the Fire Department from using PPE containing intentionally added PFAs.

The prohibition would take effect on June 30, 2026.

The ordinance also requires the Fire Chief to meet with labor representatives at least every three months to assess the availability and funding for such PPE.

In addition, the Fire Department is required to submit progress reports to the Board of Supervisors and the Fire Commission every six months and may recommend an extension of the June 2026 deadline.

FISCAL IMPACT

The Fire Department has 1,482 positions that use PPE with PFAs. Assuming each position requires two sets of PPE and the cost of PFA-free gear is \$3,400, the total cost to replace all firefighting is \$10.1 million.

The Fire Department budgets \$1.7 million for uniform replacement every year and has proposed to do so in the FY 2024-25 – FY 2025-26 budget. According to Deputy Director Corso, approximately half of this budget is spent on coats and pants for firefighters. To meet the June 2026 deadline of phasing out PFAs, the Department would have to increase its uniform replacement budget by \$4.2 million each year to \$5 million.

Exhibit 1: Estimated Cost

Uniform Replacement	FY 2024-25	FY 2025-26	Total
Budget	850,000	850,000	1,700,000
Required by Proposed Ordinance	5,038,800	5,038,800	10,077,600
Change	4,188,800	4,188,800	8,377,600

Source: BLA and FIR

Because no PFA-free gear is available for sale, we used the current cost of firefighting PPE (\$3,400). Actual costs will be different and likely higher, given that the product will be new, possibly unique, and in high demand due to its lifesaving potential.

Funding Sources

Most Fire Department costs are funded by the General Fund. According to the proposed ordinance, the Department has received a \$2.3 million grant from the Federal Emergency Management Agency (FEMA) to purchase new personal protective equipment.

Long-Term Liability for Worker’s Compensation

The City is self-insured for workers compensation. For fire suppression workers, State law provides a presumption of workers' compensation eligibility for cancer (Labor Code Section 3212.1). Over the past ten years (Jan 2014 – April 2024), the City has had 80 cancer claims from firefighters totaling \$9.9 million, or \$123,000 per claim. There also have been nine death claims totaling \$2.5 million, or \$281,500 per claim, over the same period. Over the long term, reducing exposure to PFAs may reduce the incidence of these illnesses and related claims.

POLICY CONSIDERATION

The National Institute of Standards and Technology released a report in May 2023 that tested twenty textiles of firefighting PPE.¹ The report found that the concentration varied widely between the different textiles, which suggests that certain gear currently on the market is safer than others. As noted above, no PFA-free fire-fighting PPE currently exists. In the meantime, the City could work with other governments to identify and jointly purchase PPE that has minimal PFAs.

RECOMMENDATION

Approval of the proposed ordinance is a policy matter for the Board of Supervisors.

¹ NIST TN 2248

Firefighter Personal Protective Equipment Containing PFAS

San Francisco Fire Department

Budget & Finance Committee – May 1, 2024

PFAS Background

- PFAS forever chemicals: cause cancer, disrupt hormones
- PFAS chemicals in moisture barrier of firefighting turnouts (TO), repel water and oil
- Department and SFFCPF pushing industry for 6+ years for PFAS-free PPE, research and testing
- Commitment: reduce health risks; multiple public/private partnerships

Health and Wellness Initiatives

- #1 Priority – Health, Safety, Wellness
 - PPE use/cleaning policy
 - Decontamination Policy
 - Air Monitoring Policy
 - Overhaul Policy
 - Transcendental Meditation
 - SF Firefighters Cancer Prevention Foundation Sulforaphane Study
 - SFFCPF-funded Blood Test Screen
 - Wash Extractors
 - Nutrition Study
 - 30 In/30 Out
 - PTSI Sleep Disorder Study
 - Overhaul and Respiratory Protection Study
 - Transcendental Meditation

Transition to PFAS-free Turnouts

- 4/24 – 6/24 - Wear Test 2 PFAS Free Products
- Compile findings
- Currently, 1 vendor available – 3 months lead time
- Operational Requirements remain – heat, water, oil

Ordinance /Legislation

- Proposed ordinance states “By no later than June 30, 2026”, neither provide nor use PFAS PPE
- In full support, rowing as fast as we can
- Logistical and fiscal challenges

Logistical Challenges

- Only 1 vendor available
- Estimated availability for other vendors late 2024, no guarantee
- Supply chain, demand, regulatory approvals, unforeseen circumstances
- Durability and performance?
- Buy first model of car? Caution

Budget Challenges

- 3000 TO sets needed by June 2026 (1500 x 2 sets)
- Current contract \$3,404 per set
- PFAS free more expensive
- \$10.2 – 11.5 million
- 8/23 - \$2.3 million FEMA grant for PPE replacement
- On-going annual \$ support – cleaning, replacement 8 years vs 10 years
- Replace all in 8 years
- Other PPE costs increase – gloves and hoods PFAS free
- Current budget for all TO purchases \$900,000
- Does not include other uniform needs and costs
