## **Complete Streets Checklist**

# Implementation of MTC's Complete Streets Policy, Resolution 4493, Adopted 3/25/22

#### **Background**

Since 2006, MTC's Complete Streets (CS) Policy has promoted the development of transportation facilities that can be used by all modes. In March 2022, MTC updated its CS policy (Resolution 4493) with the goal of ensuring that people biking, walking, rolling, and taking transit are safely accommodated within the transportation network. This policy works to advance Plan Bay Area 2050 objectives of achieving mode shift, safety, equity, and vehicle miles traveled and greenhouse gas emission reductions, as well as state & local compliance with applicable CS-related laws, policies, and practices, specifically the California Complete Street Act of 2008 (Gov. Code Sections 65040.2 and 65302) and applicable local policies such as the CS resolutions adopted before January 16, 2016 (as part of MTC's OBAG 2 requirements.)

### Requirements

MTC's CS Policy requires that all projects (with a total project cost of \$250,000 or more) applying for regional discretionary transportation funding – or requesting regional endorsement or approval through MTC – must submit a Complete Streets Checklist (Checklist) to MTC.

Please note that Projects claiming exceptions to CS Policy must complete the Exceptions section on the Checklist and provide a Department Director-level signature.

Additional information and guidance for completing this Checklist can be found at the MTC Administrative Guidance: Complete Streets Policy Guidance for public agency staff implementing MTC Resolution 4493 at

https://mtc.ca.gov/planning/transportation/complete-streets

This form may be downloaded at <a href="https://mtc.ca.gov/planning/transportation/complete-streets">https://mtc.ca.gov/planning/transportation/complete-streets</a>.

#### **Submittal**

Completed Checklists *must be emailed* to completestreets@bayareametro.gov.

# PROJECT INFORMATION Project Name/Title: Public Sidewalk and Curb Repair Project Area/Location(s): Citywide Attach map if available.

## PROJECT DESCRIPTION: (300-word limit) Please indicate project phase (Planning, PE, ENV, ROW, CON, O&M)

Public Works is responsible for repairing sidewalks around City-maintained trees, adjacent to City properties, and at the angular returns of all intersections. The passage of Proposition E in November 2016 resulted in annual funding set-aside to maintain all street trees in the public right-of-way. SFPW currently has a backlog of over 1,000 requested repairs to damaged public sidewalks, curb and gutters, and angular returns not related to street tree damage. Instead, damage at these locations is typically caused by trucks driving up on curbs, old age, heavy equipment, vehicular accidents, poor original construction. **Provided is a list of outstanding repair locations, which will be used to identify work for this funding request.** At an average cost of \$75 per square foot, and \$300 per linear foot, SFPW expects to address approximately 200 sidewalk and curb repair requests on an annual basis with Prop L and TDA funds.

Locations are determined by a combination of SFPW inspection and public complaints, and will be prioritized based on project readiness, community support, and time sensitive urgency. In addition to these locations, SFPW anticipates that emergency response may be required at locations fronting federal, state, school, and housing authority properties, undeveloped lands, roadway structures (i.e. stairways, tunnels, bridges, and retaining walls), as well as locations with special surface sidewalks such as Market Street bricks and Mission Street tiles.

SFPW has the flexibility to prioritize and complete locations on an expedited basis if there is potential significant impact to pedestrian access and/or have the highest likelihood of generating claims against the City and County of San Francisco (CCSF). However, failure to correct sidewalk deficiencies, whether they front public or private properties, increases CCSF's exposure to claims and lawsuits resulting from trip-and-fall injuries.

May attach additional project documents, cross sections, plan view, or other supporting materials.

CONTACT INFORMATION					
Contact Name & Title: Joyce Lee-Yip	Contact Email: Joyce.lee-yip@sfdpw.org	Contact Phone: (628)271-3093			
Senior Budget Analyst	Joyce.lee-yip@siapw.org	(028)27 1-3093			
Agency: City and County of San Francisco, Department of Public Works					

Topic	CS Policy Consideration	YES	NO	Required Description
1. Bicycle, Pedestrian and Transit Planning	Does Project implement relevant Plans, or other locally adopted recommendations?  Plan examples include:  • City/County General + Area Plans  • Bicycle, Pedestrian & Transit Plan			Please provide detail on Plan recommendations affecting Project area, if any, with Plan adoption date.  If Project is inconsistent with adopted Plans, please provide explanation.

	Topic	CS Policy Consideration	YES	NO	Required Description
		<ul> <li>Community-Based Transportation Plan</li> <li>ADA Transition Plan</li> <li>Station Access Plan</li> <li>Short-Range Transit Plan</li> <li>Vision Zero/Systematic Safety Plan</li> </ul>			
2.	Active Transportati on Network	Does the project area contain segments of the regional Active Transportation (AT) Network? [See AT Network map on the MTC Complete Streets webpage.]			If yes, describe how project adheres to the NACTO All Ages and Abilities design principles. See Attachment 1.
3.	Safety and Comfort	A. Is the Project on a known High Injury Network (HIN) or has a local traffic safety analysis found a high incidence of bicyclist/ pedestrian-involved crashes within the project area?			Please summarize the traffic safety conditions and describe Project's traffic safety measures. The Bay Area Vision Zero System may be a resource.
		B. Does the project seek to improve bicyclist and/or pedestrian conditions? If the project includes a bikeway, was a Level of Traffic Stress (LTS), or similar user experience analyses conducted?			Describe how project seeks to provide low-stress transportation facilities or reduce a facility's LTS.
4.	Transit Coordination	A. Are there existing public transit facilities (stop or station) in the project area?			List transit facilities (stop, station, or route) and all affected agencies.
		B. Have all potentially affected transit agencies had the opportunity to review this project?			Please provide confirmation email from transit operator(s).
		C. Is there a MTC Mobility Hub within the project area?			If yes, please describe outreach to mobility providers, and Project's Hub-supportive elements.

	Topic	CS Policy Consideration	YES	NO	Required Description
5.	Design	Does the project meet professional design standards or guidelines appropriate for bicycle and/or pedestrian facilities?			Please provide Class designation for bikeways. Cite design standards used.
6.	Equity	Will Project improve active transportation in an Equity Priority Community?	Yes		Please list EPC(s) affected. Citywide locations asneeded; therefore likely many/multiple EPC(s).
7.	BPAC Review	Has a local (city or county) Bicycle and Pedestrian Advisory Commission (BPAC) reviewed this checklist (or for OBAG 3, this project)?			Please provide meeting date(s) and a summary of comments, if any.

Statement of Compliance	YES
The proposed Project complies with California Complete Street Act of 2008 (Gov. Code Sections 65040.2 and 65302, MTC Complete Streets Policy (Reso. 4493), and locally adopted Complete Streets resolutions (adopted as OBAG 2 (Reso. 4202) requirement, Resolution 4202).	

If no, complete Statement of Exception and obtain necessary signature.

Statement of Exception	YES	Provide Documentation or Explanation
The affected roadway is legally prohibited for use by bicyclists and/or pedestrians.		If yes, please cite language and agency citing prohibited use.
<ol> <li>The costs of providing Complete Streets improvements are excessively disproportionate to the need or probable use (defined as more than 20 percent for Complete Streets elements of the total project cost).</li> </ol>		If claimed, the agency must include proportionate alternatives and still provide safe accommodation of people biking, walking and rolling.
<ol> <li>There is a documented Alternative Plan to implement Complete Streets and/or on a nearby parallel route.</li> </ol>		Describe Alternative Plan/Project
4. Conditions exist in which policy requirements may not be able to be met, such as fire and safety specifications, spatial conflicts on the roadway with transit or environmental concerns, defined as abutting conservation land or severe topological constraints.		Describe condition(s) that prohibit implementation of CS policy requirements

#### SIGNATURES / NOTIFICATIONS

#### **TRANSIT**

The project sponsor shall communicate and coordinate with all transit agencies with operations affected by the proposed project. If a project includes a transit stop/station, or is located along a transit route, the Checklist must include written documentation (e.g. email) with the affected transit agency(ies) to confirm transit agency coordination and acknowledgement of the project. A CS Checklist Transit Agency Contact List is available for reference.

#### DEPARTMENT DIRECTOR-LEVEL SIGNATURE FOR EXCEPTIONS

Exceptions must be signed by a Department Director-level agency representative, or their designee, and not the Project Manager. Insert electronic signature or sign below:

Full Name:		
Title:		
Date:		
Signature:		

#### **ATTACHMENT 1 – All Ages and Abilities and Guidelines**

#### 1. All Ages and Abilities

<u>Designing for All Ages & Abilities, Contextual Guidance for High-Comfort Bicycle Facilities, National Association of Transportation Officials, December 2017</u>

Projects on the AT Network shall incorporate design principles based on designing for "All Ages and Abilities," contextual guidance provided by the National Association of City Transportation Officials (NACTO), and consistent with state and national best practices. A facility that serves "all ages and abilities" is one that effectively serves the mobility needs of children, older adults, and people with disabilities and in doing so, works for everyone else. The all ages and abilities approach also strives to serve all users, regardless of age, ability, ethnicity, race, sex, income, or disability, by embodying national and international best practices related to traffic calming, speed reduction, and roadway design to increase user safety and comfort. This approach also includes the use of traffic calming elements or facilities separated from motor vehicle traffic, both of which can offer a greater feeling of safety and appeal to a wider spectrum of the public.

Design best practices for safe street crossings, pedestrian facilities, and Americans with Disabilities Act (ADA) accessibility at transit stops, and bicycle/micromobility facilities on the AT Network should be incorporated throughout the entirety of the project. The Proposed Public Rights-of-Way Accessibility Guidelines (PROWAG) by the U.S. Access Board should also be referenced during design. (See table on next page for guidelines)

#### 2. Design Guidance

Examples of applicable design guidance documents include (but are not limited to): American Association of State Highway and Transportation Officials (AASHTO) – A Policy on Geometric Design of Highway and Streets, Guide for the Development of Bicycle Facilities, Guide for the Planning, Design, and Operation of Pedestrian Facilities; Public Right-of-Way Accessibility Guide (PROWAG); Manual on Uniform Traffic Control Devices (MUTCD); Americans with Disabilities Act Accessibility Guidelines (ADAAG); National Association of City Transportation Officials (NACTO) – Urban Bikeway Design Guide.

Contextual Guidance for Selecting All Ages & Abilities Bikeways					
	R				
Target Motor Vehicle Speed*			Key Operational Considerations	All Ages & Abilities Bicycle Facility	
Any		Any	Any of the following: high curbside activity, frequent buses, motor vehicle congestion, or turning conflicts‡	Protected Bicycle Lane	
< 10 mph	Less relevant	No centerline,	Pedestrians share the roadway	Shared Street	
≤ 20 mph	≤ 1,000 – 2,000	or single lane one-way	< 50 motor vehicles per hour in	Bicycle Boulevard	
	≤ 500 – 1,500	one way	the peak direction at peak hour	Dicycle Boulevard	
	≤ 1,500 – 3,000	Single lane each direction, or single lane	Low curbside activity, or low congestion pressure	Conventional or Buffered Bicycle Lane, or Protected Bicycle Lane	
≤ 25 mph	≤ 3,000 – 6,000			Buffered or Protected Bicycle Lane	
	Greater than 6,000	one-way		Protected Biomical and	
	Any	Multiple lanes per direction		Protected Bicycle Lane	
		Single lane each direction		Protected Bicycle Lane, or Reduce Speed	
Greater than 26 mph†	≤ 6,000	Multiple lanes per direction	Low curbside activity, or low congestion pressure	Protected Bicycle Lane, or Reduce to Single Lane & Reduce Speed	
	Greater than 6,000	Any	Any	Protected Bicycle Lane, or Bicycle Path	
High-speed limited access roadways, natural corridors, or geographic edge conditions with limited conflicts		Any	High pedestrian volume	Bike Path with Separate Walkway or Protected Bicycle Lane	
		Ally	Low pedestrian volume	Shared-Use Path or Protected Bicycle Lane	

<sup>\*</sup>While posted or 85th percentile motor vehicle speed are commonly used design speed targets, 95th percentile speed captures high-end speeding, which causes greater stress to bicyclists and more frequent passing events. Setting target speed based on this threshold results in a higher level of bicycling comfort for the full range of riders.

Figure 1 Designing for All Ages & Abilities, NACTO https://nacto.org/wp-content/uploads/2017/12/NACTO\_Designing-for-All-Ages-Abilities.pdf

<sup>†</sup> Setting 25 mph as a motor vehicle speed threshold for providing protected bikeways is consistent with many cities' traffic safety and Vision Zero policies. However, some cities use a 30 mph posted speed as a threshold for protected bikeways, consistent with providing Level of Traffic Stress level 2 (LTS 2) that can effectively reduce stress and accommodate more types of riders.<sup>18</sup>

<sup>†</sup>Operational factors that lead to bikeway conflicts are reasons to provide protected bike lanes regardless of motor vehicle speed and volume.
