SUBJECT: Declaration of Emergency: SF Marina Yacht Harbor Dredging

On May 1, 2026, in accordance with Administrative Code Sections 6.60, you in your position of Interim General Manager, Recreation and Park Department (RPD), declared an actual emergency exists at the SF Marina Yacht Harbor due to excessive amount of sand accumulated at the entrance to the harbor.

Each year, RPD dredges the Marina Small Craft Harbor to keep the channel open for boat traffic. In December 2025, RPD solicited bids for early-2026 dredging. Marinship Development Interest, LLC won the lowest bid contract on March 18, 2026, however they failed to complete dredging within the required 30-day window. They were unable to perform due to inadequate and inoperable equipment and unable to execute proper disposal. Therefore, due to the impact on Marina operations and scheduled events, RPD terminated that contract on April 23, 2026. RPD then awarded the work to the second-lowest bidder, The Dutra Group, on April 28, 2026. The Dutra Group mobilized on April 29 to begin clearing the channel.

During the period when Marinship Development Interest, LLC did not complete the job, additional sand accumulated in the channel, making the harbor entrance only accessible during the highest of tides. This emergency contract is intended to remove the newly accumulated sand beyond the original scope of work and any additional sand needed to allow for uninterrupted access to the harbor.

The estimated construction cost for this additional work, including contingency, is \$2,000,000.

Administrative Code Section 6.60 requires that this emergency contract be approved in writing by the Mayor (or the President of the Recreation and Park Commission) and by the Board of Supervisors.

I approve of this Emergency declaration to complete this dredging project and protect the lives and property of the City and County of San Francisco, in the most expeditious manner.
