13 subsections or parts of tables.

11

12 Be it ordained by the People of the City and County of San Francisco:

13

14 Section 1. Findings.

15 (a) According to data from the Office of the Medical Examiner, the number of people
16 who have died from drug overdoses in San Francisco has been rising at a staggering rate. In
17 2017, 222 people in San Francisco died from a drug overdose. In 2020, 697 people in San
18 Francisco died from a drug overdose. This represents more than a tripling of the death rate in
19 only three years, such that deaths from drug overdoses now average nearly two a day, and
20 nearly 60 a month.

21 (b) Fentanyl, which is estimated to be 50 to 100 times more potent than morphine,
22 entered the San Francisco market around 2015, causing eleven deaths that year. In 2016,
23 the number of fentanyl overdose deaths in San Francisco doubled, reaching a total of 22. In
24 2020, 502 people were reported to have died in San Francisco as a result of overdose from

25

1 use of fentanyl. Thus, in five years, fentanyl overdose deaths in San Francisco increased by
2 4500%.

3 (c) This is a public health crisis of major proportions that is out of control. The
4 number of people who died from a drug overdose in San Francisco in 2020 was more than
5 three times the number of people who died in San Francisco from COVID-19 that same year.

6 (d) Based on data showing the addresses of fatal drug overdoses in San Francisco
7 over the first eight months of 2020, 111 people died on sidewalks or alleys, or in parks or cars;
8 296 people were found dead in homes or hotels, many in supportive housing in the
9 Tenderloin; and 60 people were pronounced dead at hospitals.

10 (e) Consuming drugs alone while sheltering-in-place during the COVID-19
11 pandemic almost certainly amplified the overdose death risk of strong drugs; more than half of
12 the 561 deaths from accidental overdoses during the period January - October 2020 occurred
13 indoors.

14 (f) A 2019 study published in Drug and Alcohol Dependence surveyed overdose
15 mortality among residents of single room occupancy (SRO) buildings in San Francisco during
16 the period 2010 – 2017, and found that overdose mortality was substantially higher among
17 SRO residents as compared to non-SRO residents, and that SRO residents were also more
18 likely to die from overdosing at home than elsewhere.

19 (g) A 2019 study published in the Journal of Urban Health examined the
20 acceptability, feasibility, and implementation of the Tenant Overdose Response Organizers
21 (TORO) program facilitated in ten SROs in Canada. That study concluded that the overdose
22 response interventions used by the TORO program, including peer-led overdose prevention
23 and response trainings, wall-mounted naloxone for emergency response, and peer-led
24 support groups, are effective tools in addressing overdose risk in SROs. The study also
25 concluded that tenants who had participated in the program and were taught about opioid

1 overdoses were better able to respond to overdoses and contribute to wider community
2 responses. This study helped inform the DOPE (Drug Overdose Prevention and Education)
3 Project’s SRO initiative in San Francisco.

4
5 Section 2. Chapter 15 of the Administrative Code is hereby amended by adding
6 Section 15.17, to read as follows:

7
8 **SEC. 15.17. DEPARTMENTAL OVERDOSE PREVENTION POLICIES.**

9 By no later than December 31, 2021, and every year thereafter, the Department of Public
10 Health, the Department of Homelessness and Supportive Housing, the Healthy Streets Operation
11 Center through the Department of Emergency Management, and the Human Services Agency shall
12 each submit to the Board of Supervisors a departmental policy describing how the department and its
13 grantees that provide direct services to clients who use drugs will promote strategies to reduce drug
14 overdoses (“Overdose Prevention Policy”), along with a resolution to accept transmission of the
15 policy. Each departmental Overdose Prevention Policy shall, to the extent applicable to the
16 department’s activities:

17 (a) Address how departmental programs will provide drug treatment and harm reduction
18 programs and services;

19 (b) Describe where the department will post the following materials to ensure that they are
20 available and accessible to all clients:

21 (1) Up-to-date information about the location and schedule of syringe access and
22 disposal services; and

23 (2) Up-to-date referral information about naloxone access and the schedule of
24 overdose prevention and naloxone distribution services;

1 (c) Include an onsite overdose response policy that describes the steps the department will
2 take in the event that an individual overdoses on property managed by the department or in the
3 presence of department personnel;

4 (d) Ensure that department staff who work with people who use drugs receive training in
5 overdose prevention strategies; and

6 (e) Describe the process by which the department will ensure that grantees that manage
7 property on behalf of the department and/or provide direct services to people who use drugs implement
8 overdose prevention policies that contain the information required in subsections (a)-(d) of this Section
9 15.17 as applied to the grantee.

10
11 Section 3. Effective Date. This ordinance shall become effective 30 days after
12 enactment. Enactment occurs when the Mayor signs the ordinance, the Mayor returns the
13 ordinance unsigned or does not sign the ordinance within ten days of receiving it, or the Board
14 of Supervisors overrides the Mayor’s veto of the ordinance.

LEGISLATIVE DIGEST

[Administrative Code - Departmental Overdose Prevention Policies]

Ordinance amending the Administrative Code to require the Department of Public Health, Department of Homelessness and Supportive Housing, Human Services Agency, and Department of Emergency Management to develop and submit to the Board of Supervisors departmental overdose prevention policies.

Existing Law

Currently, there is no law requiring that any City department prepare and submit to the Board of Supervisors a departmental overdose prevention policy.

Amendments to Current Law

The proposed ordinance would require the Department of Public Health, the Department of Homelessness and Supportive Housing, the Healthy Streets Operation Center through the Department of Emergency Management, and the Human Services Agency to each submit to the Board of Supervisors annually a departmental policy describing how the department and its grantees that provide direct services to clients who use drugs will promote strategies to reduce drug overdoses. Each departmental Overdose Prevention Policy must:

- Address how departmental programs will provide drug treatment and harm reduction programs and services;
- Describe where the department will post information about syringe access and disposal and the schedule of naloxone distribution services;
- Include an onsite overdose response policy that describes the steps the department will take in the event that an individual overdoses on property managed by the department or in the presence of department personnel;
- Ensure that department staff who work with people who use drugs receive training in overdose prevention strategies; and
- Describe the process by which the department will ensure that grantees that manage property on behalf of the department and/or provide direct services to people who use drugs implement overdose prevention policies.

Background Information

According to data from the Office of the Medical Examiner, the number of people who have died from drug overdoses in San Francisco has been rising at a staggering rate. In 2017, 222 people in San Francisco died from a drug overdose. In 2020, 697 people in San Francisco

FILE NO. 210304

died from a drug overdose. This represents more than a tripling of the death rate in only three years, such that deaths from drug overdoses now average nearly two a day, and nearly 60 a month.

Departmental Overdose Prevention Policies

Public Safety & Neighborhood Services

May 27, 2021

Collaborative Approach

Building from the Department of Public Health's longstanding policy of harm reduction as an effective strategy for overdose prevention and lessons learned during the COVID response, DPH, HSA, HSOC, and HSH are committed to a collective and collaborative approach to overdose prevention.

All City Departments who interact with persons who use drugs have a shared responsibility to respond to the rise in overdoses in a way that will have the most impact.

Overdose Prevention Policy Components

A plan for how departmental programs will provide drug treatment and harm reduction programs and services

A description of where the department will post and make accessible:

- syringe access and disposal services;
- Up to date referral information about naloxone access and the schedule of overdose prevention and naloxone distribution services

An onsite overdose response policy that describes the steps the department will take in the event that an individual overdoses on property managed by the department or in the presence of department personnel

Assurance that department staff who work with people who use drugs receive training in overdose prevention strategies

The process by which the department will ensure that grantees that manage property on behalf of the department and/or provide direct services to people who use drugs implement overdose prevention policies

DPH's Commitment to Overdose Prevention

- Existing Contractual Requirements
 - Mandatory annual harm reduction trainings for all staff
 - Mandatory posting of syringe access and Drug Overdose Prevention and Education Program (DOPE) Project schedules
 - Documented agency-wide overdose response policies
- Health Commission Resolution 100-10 – Adopting a Harm Reduction Policy for Substance Abuse, STD and HIV (2000)
- Provides expertise, technical assistance, and connection to people who use drugs

Shared Vision

Process

Summer
2021

- DPH knowledge & resource share
- Develop workplan

Summer –
Fall 2021

- Adopt a shared vision
- Engage with stakeholders
- Departments plan implementation
- Identify resource needs

Winter 2021

- Report back to Board of Supervisors on Overdose Prevention Plan
