RE: File 180076 – Ordinance providing for a gross receipts tax to fund child care and early education

Dear Ms. Calvillo,

Should the proposed ordinance be approved by the voters, in my opinion, it would generate additional net annual revenue to the City of approximately \$146 million. This amount would grow by the rate of the Consumer Price Index in subsequent years as provided for in the existing business tax structure. Eighty-five percent of the revenues from the tax would be designated for child care and early education, and 15% would be available for any public purpose.

The proposed ordinance would raise the gross receipts tax paid by commercial landlords in San Francisco. The current gross receipts tax was passed by the voters in November 2012 and replaced the former 1.5% payroll tax with a gross receipts tax that varies by the size and type of business. Commercial landlords generally pay a rate between .285% and .3% of gross receipts currently. The proposed ordinance would add a new tax of 3.5% for most commercial spaces and 1% for rents from warehouse spaces, in addition to the current gross receipts tax.

The proposal exempts commercial landlords with less than \$1 million in gross receipts, rents paid from non-profit tenants, government, arts, industrial uses and non-formula retail uses well as other exemptions required under State law. We estimate that these exemptions represent approximately 20% of the tax base, and therefore that 80% of commercial rents paid in the city would be subject to the tax.

As noted above, total tax revenues that would be generated are estimated to be approximately \$146 million annually based on the current tax base, exemptions and rates.

Sincerely,
for *Res* *Steverson*
Ben Rosenfield
Controller
