This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Megan Cowdell

Dear San Francisco Board of Supervisors,

San Francisco has to be willing to back up its environmental image with real action. If the Bay Area is not willing to protect its own Bay, how can we ask other people to do the same? This is the worst kind of not in my backyard thinking, and making the whole country worse just because we don't want to clean up our own mess!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

I'm a member of St. Gregory of Nyssa Episcopal Church, 500 DeHaro Street, in SF. We believe in clean air, clean water, and good stewardship of our city. The suit against the EPA is ill-considered and not good for the part of God's Creation called San Francisco, the City of St. Francis. Please drop the lawsuit and comply with the EPA's rulings.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Jon Rosenfield

Dear San Francisco Board of Supervisors,

This is terrible. Put pressure on City Attorney David Chiu who's running for office. He'll harm his future career.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

My relatives living in the Bay Area enjoy recreating around the Bay. I'm amazed that the City of San Francisco hasn't put a stop to letting raw sewage be released into the Pacific Ocean and the Bay...used by my relatives and their neighbors. Clean water is a basic right that everyone deserves. They shouldn't have to worry about pollution disrupting their leisure activities or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean.

As elected leaders of San Francisco it is your duty to protect people's right to clean water and a healthy, safe place to live.

Please take action to stop the City's lawsuit now!

Dear San Francisco Board of Supervisors,

San Francisco already enjoys a carve-out for treatment of drinking water from Hetch Hetchy, now they want carve-outs for wastewater treatment too? Sacramento just completed upgrades to one of their wastewater treatment plants to reduce nitrogen discharge to the Delta, yet SF is saying they lack what it takes to rise to the same standard in response to our environmental challenges? Absurd.

White Sturgeon are being considered for listing under the California Endangered Species Act, partly due to mass sturgeon die-offs in recent years from harmful algal blooms in SF Bay. Blooms occur when warm waters have an abundance of nitrogen - nitrogen that comes from wastewater discharge. As a water provider, SFPUC has a responsibility of stewardship towards the waters they use and the environments they discharge into. Rather than shirk this responsibility, the City needs to improve their wastewater treatment to reduce nutrient load and the likelihood of blooms that cause mass die-offs.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Katherine Osborn

It is embarrassing to think that a lawsuit on behalf of SanFranciscans would be brought to allow poorer water quality. would allow

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Mara Duncan

Dear San Francisco Board of Supervisors,

Not only does this pollute our beaches with raw sewage, the chlorine chemicals are found to be directly attributed to the endangers species of the King and Silver Salmon runs which now are nearing extinction as it reduces the anadromous fish ability to navigate to complete their life cycle. Its time for San Francisco to clean up their act!

Dear San Francisco Board of Supervisors,

San Francisco is supposed to be an environmental leader, NOT siding with polluters and mining interests. It's shameful that the City is dumping sewage, and it's even more shameful that it's taking action to court in a way that could jeopardize clean water across the country. This is unacceptable. Drop the lawsuit now and make sure our Bay Area residents have clean and safe water to swim in. (And that the City is not contributing to harmful algal blooms that are already taking off across the Bay, devastating fish populations and harming local fisherman!)

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Jamie LeDent

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Dear San Francisco Board of Supervisors,

I thought San Francisco was a leader for environmental causes. This lawsuit to exempt San Francisco from discharging sewage waste-water in violation of the limits proscribed by the EPA is extremely disappointing and sets a dangerous precedent. Many times I have enjoyed bathing in the ocean waters around San Francisco; I would not want to do so were they polluted by raw sewage.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

L Bathgate

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

Dear San Francisco Board of Supervisors,

San Francisco should not be given a free pass!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Lorenzo Bavoso

Dear San Francisco Board of Supervisors,

Dumping raw sewage into the ocean is a terrible idea. Setting a precedent of undermining the EPA is an even worse idea especially at a time where many Red states are looking to undermine environmental rules that California supports.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

michael passoff

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

N.Daye

But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

jennifer lawson

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. Dear San Francisco Board of Supervisors,

SF is supposed to be a leader in environmental stewardship. My experience volunteering for non profits here has made me more focused than ever on a clean, healthy natural environment. I am appalled by this. It is embarrassing, cheap, and frankly pathetic. You should be ashamed of yourselves and you are looking at the recently appointed sacks of shit on the Supreme Court for guidance? I would not let them guide me to an open bar.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Samuel Dimond

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. Dear San Francisco Board of Supervisors,

I am deeply disappointed and pretty disgusted that SF does not have health of people and the larger environment in mind. Be a leader and an advocate for the environment. The last think we need is more undermining.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

This is embarrassing.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Craig Segall

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

This is appalling and embarrassing. Drop this suit now!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Patrick Schmitz

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Mark Looney

Dear San Francisco Board of Supervisors,

Shame! I volunteer to take your families to the ocean near where the city's pipe line is dumping raw sewage just to prove to everyone that there is no danger. Are you willing to put on your swim gear and join us? If you and your family do OK then I guess that means it's fine to fish there, great for seals, otters, clams and abalone!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. Dear San Francisco Board of Supervisors,

Mayor: I can't understand why you would go against the long history of environmental stewardship that makes Northern California a great place to raise a family. This is NOT some third world country where deadly pollution is accepted as the norm. We demand more, from our elected officials, and specifically from you. Step up and do what is right!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Julie Dull

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

Subject: Stop the lawsuit to protect our local waters and the Clean Water Act
Date: Thursday, September 12, 2024 11:03:10 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Roberta Stern

Dear San Francisco Board of Supervisors,

It's fucked up that San Francisco is joining forces with the National Mining Association, American Gas Association, and the American Fuel and Petrochemical Manufacturers to hand this corrupt Supreme Court another excuse to gut environmental regulations.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

I can't believe SF thinks it's ok to dump seerage into our clean water!! That's disgusting. The EPA was started to protect consumers against powerful cities/corporations illegal actions. How dare SF tries to take any of the EPA's power to protect consumers away!!!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Jonathan Loran

Dear San Francisco Board of Supervisors,

Surely I am just one of millions of Americans who demand that local governments act to improve and maintain our natural environment to the best we can and care for and preserve all of our natural environment. Allowing such callous disregard as evidenced by the government of San Francisco toward the ocean and raw sewage discharge there cannot be allowed to happen. We must bring all efforts to expose their awful actions and end the pollution and the lawsuit that would permit it, knowing costs would be paid with our public monies!!!! SHAME SHAME SHAME~

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Kevin Schader

Dear San Francisco Board of Supervisors,

I also maintain property in San Francisco wherein my son is a landholder; we have a vested interest while also paying taxes to the County and City of San Francisco. It is known Advanced water treatment facilities can effectively treat waste especially in combination with bio-remediate native plant species found within our wetlands. Please look into these other solutions as well:
https://url.avanan.click/v2/r01/___https://www.engineeringforchange.org/news/ten-low-cost-ways-to-treat-water/___YXAzOnNmZHQyOmE6bzo3MThlMDk3NmViMWU0ZTdjYzVINmJhMWZlZDkNzc0Mzo3OjESMzk6NGU1NjM0ZjNmN2NINzJlYWY1YmQ2ZDRlZTY3N2ZjMWYxZTA0YzQzNGFjZjIiMjg0NWZhNTQ1MmVkZmVhMThlYzpwOIQ6TG

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Barbara Newman

Dear San Francisco Board of Supervisors,

I can't believe that SF wants to take advantage of the current mess of a supreme court in order to avoid doing the right thing. Cities are responsible for cleaning up their sewage, not dumping it raw jn the nearest body of water.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Reina Robinson

Dear San Francisco Board of Supervisors,

San Francisco needs to be a leader in honoring our precious environment not polluting it. Please protect and keep our water clean.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. Dear San Francisco Board of Supervisors,

I'm ashamed that my own City leaders are teaming up with fossil fuel interests to weaken the regulatory power of the EPA in a move that has the potential to harm thousands, perhaps millions, of people in need of environmental protection, the majority of them in vulnerable minority communities. Our Mayor purports to be an environmental justice and equity leader. This suit demonstrates quite the opposite. It must be dropped now.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

San Francisco is supposed to be one of the most progressive places in the US. I appalled that this case is being brought forward. Now more than ever we need to take the lead on holding polluters accountable and changing our ways to make a livable future possible.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Inger Acking

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. Dear San Francisco Board of Supervisors,

This lawsuit is not about helping people its about refusing to take responsibility and action for cleaning local waters, this is not going. To help people live in a environment that is safe or clean, you must stop this lawsuit and comply to the environmental laws that are preventing more pollution and destruction.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Isaac Ramirez

Subject: Stop the lawsuit to protect our local waters and the Clean Water Act
Date: Thursday, September 12, 2024 4:33:28 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

It's OUTRAGEOUS to think that there is anybody - let alone our public officials who represent us - who would knowingly pollute our waters. Exactly what do you think you're doing? It will have major consequences for the ecosystem, our health, and put your elected positions at risk.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. Subject: Stop the lawsuit to protect our local waters and the Clean Water Act
Date: Monday, September 16, 2024 12:18:41 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Abram Blackwood

Subject: Please stop SF from pursuing this damaging SCOTUS appeal
Date: Monday, September 16, 2024 12:05:53 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Supervisor Stefani:

I have lived in San Francisco for nearly 40 years, and in that period we have repeatedly seen that SF's combined sewage and storm water system is not capable of handling normal expected high rainfall events.

With climate change, we know that the situation will get even worse - just look at the recent and current flooding in Europe, Africa and Southeast Asia if you doubt that. And perhaps we should pay attention to "Experts surprised at intensity of extreme weather but say damage wreaked shows how unprepared world is." (https://url.avanan.click/v2/r01/___https://www.theguardian.com/world/2024/sep/16/climate-scientists-troubled-by-damage-from-floods-ravaging-central-europe___YXAzOnNmZHQyOmE0bzpkYzE2MTRkZTdjNmVjZWlwMzUyOGQxMTY1YzI4OTZlNj03OmNmNjg6OTY1OWI0NGQzMGM3Mml4YzI2YWZlNmYyY2VhMTcwMGRkOTkzZDljNzA1NDNhMzkzZDI0NjYzYTQyYzk0NjFIMjpwOIQ6Tg)

And yet San Francisco has failed to address this storm water problem. This is a failure of SF governance, a failure of a supposedly environmentally friendly local government to take appropriate action. We are not an innocent party - and we certainly have not taken the ethical and responsible path to resolve the problem.

So why has SF appealed to SCOTUS to overturn a ruling calling SF out for its failure to act responsibly? Especially when we know a SCOTUS ruling could devastate environmental protection in the whole country.

- 1) We need to address the problem of our outdated sewage and storm water system. The cost of not doing so in the face of likely rain events will far exceed the cost of addressing the problem now. Continuing this lawsuit rather than addressing the actual physical problem is irresponsible and wasteful.
- 2) We must NOT give SCOTUS the opportunity to further gut critical environmental protections. Significant effort has gone into implementing the Clean Air Act, the Clean Water Act and related regulations. Threatening these policies is threatening lives and livelihoods nationwide.
- 3) Excusing SF's violations by saying "well, others are doing it too" completely ignores the harm - and does nothing to solve problems. I am dismayed to see the SF is using that type of argument. Is SF a leader? or is that just marketing PR?

Sincerely,
Paul Wermer
2309 California St
San Francisco, CA 94115

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

San Francisco (and the SFPUC) should be ashamed of itself! It's long past time for the City to join the 21st century, separate its sewage from storm runoff, and develop the sewage treatment capacity needed to fully protect SF's ocean shoreline from pollution. Instead, the City is attempting to unravel over fifty years of progress on improving water quality. I speak as a former East Bay MUD Board President and an environmental attorney.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. Dear San Francisco Board of Supervisors,

Think of our children!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Andrew MacBlane

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Peter Guerrero

Subject: EPA LAWSUITS
Date: Saturday, September 14, 2024 6:13:32 AM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

San Francisco has quietly gotten ready to dismantle parts of the Clean Water Act in its lawsuit to avoid cleaning up its pollution of our waters. The EPA has sought to prevent San Francisco from releasing raw sewage into the ocean. Instead of changing its ways, San Francisco is asking the Supreme Court to take away EPA's power to require the City to keep its coastline safe and clean. We need San Francisco to stop the lawsuit immediately and clean up its mess!

Despite San Francisco's reputation as an environmental leader in the country, the SFPUC General Manager and the City Attorney—both appointed by the Mayor—are continuing to carry forward a lawsuit that would harm our local waters and could have serious ramifications for how the EPA is able to regulate water quality across the country. Instead of leading with environmental and environmental justice organizations, San Francisco has joined forces with the National Mining Association, American Gas Association, and the American Fuel and Petrochemical Manufacturers—the leading trade associations of polluting industries. We need your help to urge the Supervisors to put a stop to this and protect San Francisco's environment.

Send a letter to the Board of Supervisors now asking them to protect the Clean Water Act and work with the EPA to end the dumping of raw sewage into the San Francisco Bay and Pacific Ocean where our communities live and play.

If San Francisco wants to remain a leader in justice and environmental protection, it needs to stop this lawsuit that would lead to irreparable harm to communities in San Francisco, in the Bay Area, and across the country.

This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

James Webb

Subject: Stop the lawsuit to protect our local waters and the Clean Water Act
Date: Friday, September 13, 2024 10:10:44 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

It is outrageous that SF is attacking the Clean Water Act instead of complying with it.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Dear Board of Supervisors,

Please work with the EPA to protect the Clean Water Act and end the dumping of raw sewage into the San Francisco Bay and Pacific Ocean. I live at Ocean Beach and in addition to residents in the area, thousands of other San Franciscans come to the area to enjoy the spectacular ocean views and opportunities for recreation.

Respectfully,

Donna Canali

There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Jim Diamond

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

This is very disappointing!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Michele Bernal

Dear San Francisco Board of Supervisors,

It is unthinkable that the City of SF would sue to stop EPA regulations from kicking in. You're supposed to be protecting the residents of your city, both 4 legged and 2-legged and the marine life that surrounds it as well. The raw sewage being released into the bay has a spiraling effect on everything associated with the bay, including contaminating the bay where those with the least amongst us recreate and fish to maintain our families. This is where we go to cool off when the temp is 90 degrees and we have no AC.

Do the right thing and invest in cleaning up the bay and upgrading the sewer system to direct potable reuse, so there is minimal discharge of toxics into the bay.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

Water is the most valuable resource on our planet as well as in our arid state of California. Dismantling the Clean Water Act and allowing the release of raw sewage is a threat to our human and natural existence here in the San Francisco Bay area and beyond. There is no excuse for this egregious offense.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

I'm ashamed of you, San Francisco! You need to be the leader in environmental causes and justice that most people, apparently mistakenly, believe you to be. Shame on you!! Clean up your own messes. The Supreme Court has already reduced the power of the EPA- don't help them.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

I swim in the Bay and am very concerned about raw sewage. I am pleased that the Regional Water Quality Board has tightened up the nutrients allowed in the Bay, but concerned that San Francisco is suing to lessen EPA regulation of water safety.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

I'm an elderly, 3rd generation Californian who has lived near SF Bay almost my entire life. My mother worked to Save the Bay when I was a teenager and I got my BS in Geology and Meteorology from the CSU system in the 1980's after attending SF State to do the same. We both fought to get EPA protections. We saved the Bay once but not to have political agendas dirty the waters 40 years later. The powers that be in the City now need to rethink their attempt to remove EPA clean water protections. You may have the name, but it is not your Bay.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Edward Mechem

Dear San Francisco Board of Supervisors,

My kids grew up here. We swim, we play at the beach and we eat food grown on these lands and fish and crab caught in these waters. How dare you threaten not only the health and welfare of my family and my community, but as a kid who grew up in NC without the protections of labor unions or folks who care about EPA rules --- how dare you make it possible for polluters to destroy those families live or impact their ability to work. SF seems to feel no responsibility for folks across the country. SF seems to feel no empathy or compassion for others. Apparently you can't be bothered to charge companies the cost to upgrade the sewer storm water system when they put up buildings. You feel like making 100 new Flint Michigan water disasters possible across the country is a better plan. That's unacceptable behavior. You should be ashamed. All of us deserve environmental protections from polluters and corporate greed. Take a stand for people.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. Dear San Francisco Board of Supervisors,

San Francisco Bay is continuous with the Delta which includes the deep water channel in Stockton where I live. The impacts of raw sewage in terms of nutrient pollution and other contaminants chemical and biological are well known. We must do better to protect our natural resources.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

As an SF homeowner, native to SF since the 1880s AND part Native Californian from HERE, I am disheartened, heartbroken, beyond appalled to learn that SF could Take DOWN the Clean Water Act.

WHAT ARE YOU THINKING?????

I do everything to lighten my impact, vegan since 1995, no water local native plant garden. WHAT ARE YOU DOING????

SF must take responsibility for itself.

Stop this lawsuit.

Anything less is morally bankrupt, unethical and when I move home, I will be active in campaigning against you.

'O

Subject: Stop the lawsuit to protect our local waters and the Clean Water Act
Date: Friday, September 13, 2024 9:58:47 AM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I heartily endorse this message. Josephine Coffey

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Josephine Coffey

Dear San Francisco Board of Supervisors,

I am very angry and disappointed to have learned that San Francisco has been allowing billions of gallons of sewage to be discharged into the bay and attempting to avoid cleaning up its mess, protecting our environment and striving to join big polluters and get permission from the Supreme Court to keep allowing this disaster instead of taking the high road. It egregiously paves the way for environmental injustice everywhere during a climate emergency. It is long overdue that clean water be seen as a human right by those in power instead of a privilege and I dare San Francisco turn this around by being a true leader and invest the funds to, greatly reduce the amount of toxic sewage going into the bay that continues to polluting our waters and killing marine life! Enough is enough!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

as a native San Franciscan I am most especially in support

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Dear San Francisco Board of Supervisors,

The harm done by taking away protections will outweigh and outlast any potential benefits of removing protections. San Francisco, and all of California's, reputation will be damaged as well. This is an expensive place to live but people still visit it because of the natural beauty and world class cities to be found. Our water systems need more protecting, if anything. Thank you for reading.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. Subject: Stop the lawsuit to protect our local waters and the Clean Water Act
Date: Wednesday, September 18, 2024 9:49:06 AM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Marinell Daniel

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Myron Walters

The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Ernie Walters

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. Dear San Francisco Board of Supervisors,

I was shocked to find out the City of San Francisco would even consider joining with other polluters to continue in a law suite to weaken the EPA to give themselves the right to pollute our Bay and Ocean. No city or industry has the right to release raw sewage into the ocean. Make it a priority to tax and spend the money of better waste management.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. Dear San Francisco Board of Supervisors,

With the most recent revelation of sewage from septic tanks leaking into Bolinas Bay, all Bay Area residents should be concerned about removing the EPA's ability to monitor water quality in our bays and shorelines. With our massive Bay Area population it is a difficult task to keep California as clean and unpolluted as possible. Don't add to the ease in which corporations skirt the law and pollute our earth and water. Please do not allow the EPA to be removed from monitoring tasks and responsibilities.

Thank You

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Helen Hays

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court?whose recent decisions have consistently and dramatically undermined the nation?s bedrock environmental laws?will hear the case in October, threatening the Clean Water Act and the EPA?s ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country?s ability to protect the public from further water pollution?and the pollution of our air and lands?in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco?s shores clean without jeopardizing one of the country?s most important environmental laws. This disastrous case must be stopped.

As the City?s elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Dear San Francisco Board of Supervisors,

I'm a 3rd generation Californian and have lived in the Bay Area most of my life. We must do all we can to protect the beauty and safety of our glorious coasts and local waters. Drop your lawsuit!
NOT only does it endanger our waters and coast. It also opens the door for similar evasions of the Clean Water Act.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Laurie Kossoff

Subject: Stop the lawsuit to protect our local waters and the Clean Water Act
Date: Monday, September 16, 2024 8:54:38 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.
