The City and County of San Francisco has an extremely diverse, multi-national population of 884,363, comprised of 49 square miles with 29 miles of coastline. It is ranked as the second most densely populated major city in the United States, yielding over 18,000 persons/square mile with its resident population alone. In 2016, 25 million tourists visited San Francisco and with hundreds of thousands of commuters entering the City every day, the average daily population swells to over 1.5 million during the week. The City, surrounded by water on 3 sides, has two major bridges, the Golden Gate Bridge and the Bay Bridge, and together these two bridges will see 83 million vehicles per year. San Francisco is ranked as one of the top seven Tier 1 Urban Area Cities and the Port of San Francisco, which has ferry and cruise ship terminals, is identified as a Group 1 Port at highest risk for terrorist attack. The cruise ship terminal will see 80 cruise ship port calls per year. San Francisco is experiencing a commercial boom with new high rises currently under construction that will add to the existing inventory of high rises. In addition, two major construction projects are underway in San Francisco, for its version of the "Big Dig". The central subway/underground is under construction with a 1.7-mile extension that will provide underground rail access to additional neighborhoods. Secondly, a new Transbay Transit Center opened to replace the old train/bus station, extend the current train line, and accommodate California's new high-speed rail project. The SFFD's approximately 1,650 Firefighting and Emergency Medical personnel are part of the Metropolitan Medical Response System (MMRS), Urban Search and Rescue (USAR), and Regional Task Force (RTF) response for Chemical, Biological, Radiological Nuclear, Explosive (CBRNE) incidents. The SFFD, the California Office of Emergency Services (Cal-OES), and the surrounding eight Bay Area Counties have developed the first Regional Disaster Response Plan for responding to a catastrophic man-made or natural disaster, such as a paralyzing major earthquake or pandemic. In 2017, the SFFD responded to over 145,000 calls for service. All SFFD Firefighters are 100% compliant in NFPA 1001/1002 Standards (FFI & FFII). For 2015, Firehouse Magazine ranked the SFFD's Engine 3 as the busiest Engine in the country with 10,853 runs and Truck 3 also ranked as the 3rd busiest Ladder Truck with 5,246 runs. The City has approximately 380,971 housing units; 67% of those units are multi-unit structures. With 14,000 Victorian houses, much of the City's housing stock is old and primarily constructed of wood; 50% of the City's residential housing was built before 1940 and 25% was built between 1940 and 1959. SFFD responds to this community with 44 Engines and 20 Trucks divided into two Divisions, with ten Battalion Districts. Specialty units of the SFFD include: 2 Heavy Rescue Squads, 2 Coastal Rescue units (Cliff & Surf), 1 Rescue Boat, 2 Rescue Water Craft, 3 Fireboats, a Mobile Command Vehicle, 2 Multi-Casualty Units, a Hazardous Materials Unit, a CO2 unit, and a Mobile Air Unit. The SFFD has been a contributor to the State of California Master Mutual Aid Agreement since its inception in 1950, providing mutual aid to 49 counties within the State, as well as parts of southern Oregon and western Nevada. The SFFD also provides water response mutual aid under the same agreement to the Counties of Alameda, San Mateo, Contra Costa, Marin, Solano and Sonoma Counties.

* Applicants should describe their financial need and how consistent it is with the intent of the AFG Program. This statement should include details describing the applicant's financial distress, including summarizing budget constraints, unsuccessful attempts to obtain vehicle and outside funding, and proving the trouble is out of their control.

The SFFD's Fiscal Year 2018-19 Operating budget is approximately \$400 million. 64% derived from the City's General Fund. The remaining 36% is funded through State sales tax revenue (13%), EMS Ambulance revenue (7%), Fire Prevention fees (3%), and other fees for services (13%). Of the total operating budget, 88% is for personnel costs, including salaries, overtime, and fringe benefits. That leaves only 12% to cover all the non-personnel costs for the Department. While the SFFD's total budget has increased each of the past three fiscal years, this is due primarily to costs beyond the SFFD's controls, such as MOU changes and increases to health benefit costs and the City's contribution to the retirement and pension system. The scarcity of general fund dollars has led to the reality of competing interests in the City for funding. At first glance, the health of the City's economy in recent years seems robust. The City's general fund, however, has seen a large negative impact to its ability to fund City Departments and programs due to the cost of expenditures outpacing revenues. It has been extremely difficult to fund needed projects for equipment, especially for the fire department where equipment costs are already very high for the City. At the onset of the most recent budget process, the City of San Francisco was looking at a fiscal year with a projected shortfall of approximately \$88 million for Fiscal Year 2018-19 and \$173 million for Fiscal Year 2019-20. Without major changes, the City was looking at a budget deficit of approximately \$709 million in FY2021-22. Last fiscal year (FY2017-18), the Department was requested to reduce its general fund support by 2.5%. This was in addition to mandated reductions in prior years, and is anticipated to occur again in the upcoming years. The Department is also prepared for the potential of mid-year cuts this fiscal year given current projections as well as the impacts of the local, State and national policy changes. Given the realities of this fiscal environment, the SFFD is not able to procure sufficient funds for equipment such as hand tools and cordless tools. As the City of San Francisco attempts to grapple with structural issues such as rising personnel and benefit costs, the City's economic outlook presents many challenges for a Department such as the SFFD that relies on support from the City's general fund to make up its operating budget. While still amid a healthy local economy, the City's economic growth factors have slowed considerably, while projected personnel costs are anticipated to grow at accelerated rates, resulting in a larger and larger deficit. The City, like many other jurisdictions, is dealing with large future pension obligations along with rising health benefit costs for its employees. With

these constraints, requests for increases to non-personnel items, such as equipment, is nearly impossible. While fortunate to not have laid off any members during the most recent economic downturn, the Department was unable to properly fund infrastructure needs, including equipment, training, and contract services. The Department has requested funding for equipment in its annual operating budget request for the past few years, but funding that was allocated has been mainly designated to address an aging fleet that has not been refreshed in years. We are aggressively seeking alternative funding sources such as grants with mixed results. Presently, the AFG appears to be our only viable option. If given the opportunity, SFFD is committed to the necessary matching funds (15%) next fiscal year for this project to come to fruition.

* In cases of demonstrated economic hardship, and upon the request of the grant recipient, the FEMA Administrator may waive or reduce an AFG grant recipient's cost share requirement. Is it your department's intent to apply for cost share waiver?

Firefighting Equipment - Narrative

* Section # 1 Project Description: In the space provided below, include clear and concise details regarding your organization's project's description and budget. This includes providing local statistics to justify the needs of your department and a detailed plan for how your department will implement the proposed project. Further, please describe what you are requesting funding for, including budget descriptions of the major budget items, i.e., personnel, equipment, contracts, etc. *4000 characters

The SFFD has done a needs assessment of equipment and has identified 1) hand tools and 2) electric tools as the highest equipment priorities for the Department. We believe this equipment will have the highest impact on firefighter safety and operations on a daily basis. The Department's current inventory of these tools is all over 12 years old and are in need of an upgrade. These projects align with the highest priority equipment categories in the AFG guidance.

HAND TOOLS/SAWS

The San Francisco Fire Department seeks \$212,600 to purchase new hand tool sets for its truck and specialty units, a total of 28 sets in all. These tool sets consist of the following: chain saw (2 @ \$800), partner saw (2 @ \$1,250), and bullet saw (2 @ \$1,600) for a total of \$7,300 per set before tax.

In 2017, the Department responded to over 145,000 calls for service. These tools are used everyday by members in emergency situations (fire ventilation and overhaul) as well as non-emergency situations (such as tree/debris removal). The Department currently has sets of tools on its apparatus, but these are all over ten years old and are subject to constant maintenance and repair issues due to their age, usage, and condition. In addition, current tools making use of updated technologies offer a lighter, more efficient tool for members to use in response.

ELECTRIC TOOLS

The San Francisco Fire Department is requesting \$451,569 to purchase electrical tools to replace its current inventory of outdated gasoline powered tools. The Department is requesting to purchase 28 sets of the following to deploy on Department truck and specialty rescue companies: ventilation fans (1 @ \$4,500), electric power tools (1 each of a grinder, reciprocating saw, hammer drill, and rotary hammer for a total of \$1,864), and USAR concrete crusher (1 @ \$8,500) for a total of \$14,864 per set before tax. This request has both operational as well as health/safety benefits for our members.

Truck companies are a crucial aspect of the Department's response to extrications. These tools would assist the Department's response to incidents with trapped victims, incidents involving response to industrial sites, and other incidents where crews are needed to cut through hard surfaces such as concrete or marble.

SFFD has a strong history of administrating federal grants and is committed to the guidelines set in the AFG NOFO. Included in our request is an additional 8.5% for sales tax. If awarded, SFFD will ensure the necessary matching funds (15%) are set aside next fiscal year.

PROJECT DETAILS:

28X Sets of Hand Tools and Saws (\$7,300/set) \$204,400
 28X Sets of Cordless Electrical Tools and Fans (\$14,864/set) \$416,192
 CA Sales Tax (8.5%): \$52,750

TOTAL: \$664,229
 SFFD Share (15%): \$99,634
 FEMA Share: \$564,595

* Section # 2 Cost/Benefit: In the space provided below please explain, as clearly as possible, what will be the benefits your department or your community will realize if the project described is funded (i.e. anticipated savings and/or efficiencies)? Is there a high benefit for the cost incurred? Are the costs reasonable? Provide justification for the budget items relating to the cost of the requested items. *4000 characters

The cost-benefit of this project aligns with the priorities of the AFG to address and enhance response capabilities, safety, and operations. SFFD serves one of the most populated and bustling cities in the world. We respond to over 145,000 calls for service each year. We are already negatively impacted by the age of some of our current equipment and cannot afford to let old equipment impact our services.

HAND TOOLS/SAWS

New tools for the Department's truck companies and specialty rescue units would create numerous advantages, and would offset the costs of repair and down time that the Department currently experiences. New tools come with newer technologies, drastically improving performance over the Department's current aged inventory. The newer models are lighter than current model, and would be safer as well by not leaking fuel as many of our current units do. The newer tools are more efficient, and have higher standards of performance than our existing units.

ELECTRIC TOOLS

If awarded, the Department's replacement of old gas-powered and corded tools with electrical cordless tools would result in improved operational functionality and efficiency. Given technology upgrades, the capabilities of electrical units on the market today far exceed the corded/gasoline tools the Department currently deploys. The battery-powered tools would allow for crews to instantly deploy the various rescue tools, not having crews wait for generators or corded connections to power up.

In addition, the electrical tools provide numerous health and safety benefits for the members that are using them daily. By eliminating these corded and gas-powered tools carried by the Department's truck companies and moving toward electric battery-powered replacements, the Department reduces dramatically the fumes and toxins that members are exposed to as a result of the gasoline-powered engine exhaust of the Department's current tools. These new tools, due to their reduced noise and not having a reliance on a loud generator, can further protect the hearing of members, and can also reduce the physical weight of the tools. These changes are also environmentally friendly, reducing the impact to the environment as a result of some of the improvements over time to the tools.

* Section # 3 Statement of Effect: How would this award impact the daily operations of your department? How would this award impact your department's ability to protect lives and property in your community? *4000 characters

By approving this project for award, the SFFD will be able to completely update the hand tools and heavy-duty corded tools on all of its truck companies and specialty rescue units. This is important for both improving daily front-line operations given the high volume of calls the Department responds to, but at the same time protecting the health and safety of Department members. The overall impact to the surrounding community would be overwhelmingly positive.

HAND TOOLS/SAWS

New tools and saws for our truck and specialty rescue companies would have extremely positive impacts on daily operations, especially given the Department's high (and annually increasing) call volume levels. These tools are used on pretty much all fire suppression calls, be it residential or commercial structures, for such things as making cuts for ventilation as well as overhaul operations. In addition, the Department uses these tools in efforts to improve general public safety for the general community, such as removing downed trees or clearing debris. New tools would absolutely improve the reliability and efficiency of Departmental response.

ELECTRIC TOOLS

As the Department has not replaced its tools in over twelve years, it has missed out on some of the technological improvements in tools. Department crews will be able to make use of some of the more recent advances in these tools, such as the overall lighter weight as well as the higher performance levels. For example, new tools would allow the Department to breach thicker walls, given the capabilities of new units over the Department's current units.

In addition, as mentioned in section 2, these tools, when upgraded to electrical, will provide great health benefits and reduce the pollution that enters the air locally.

We hope that you find our grant request worthy of funding. Thank you for your consideration.
