This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Sue King

There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Amy Gorman

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Dear San Francisco Board of Supervisors,

Set a better example

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Diane Gleason

Dear San Francisco Board of Supervisors,

I am writing today out of concern for the impact this lawsuit will have on the environment. It's disappointing that companies put finances before a healthy environment. It is appalling that these companies opt to dump raw sewage into the bay rather than spend money on an environmentally friendly solution. Please vote to support clean water.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. Dear San Francisco Board of Supervisors,

Although I do not live in the Bay Area, it's unfathomable that raw sewage should be allowed to be dumped into the bay. It's imperative that our waterways, estuaries, and bays are not compromised due to the polluting actions of industry and/or cities, and that municipalities should undertake efforts to weaken their protection.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Karla Castillo

**Subject:** BOS meeting agenda and Supreme Court appeal  
**Date:** Friday, September 20, 2024 4:08:50 PM

---

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

To the Board of Supervisors, and the clerk for public records and commentary.

I am writing to express my opinions regarding agenda item #20 scheduled for your meeting next week, as detailed in [https://sfbos.org/sites/default/files/bag092424\\_agenda.pdf](https://sfbos.org/sites/default/files/bag092424_agenda.pdf). I have a procedural concern in particular, and so I am asking respectfully for further agenda consideration either at this meeting and/or in future meetings, and pursuant to applicable policies and rules.

The agenda item seems to indicate a "Closed Session" to discuss a critical public matter - the status and decisioning of San Francisco's appeal of Clean Water Act regulatory findings to the Supreme Court. I am concerned about a matter which I believe goes far beyond a discussion based just on legal advice, and should be discussed by the full Board in public view, with full transparency into the facts and any previous or ongoing decisioning rendered on the record.

I want some specific answers please, in a public forum, about the guidance and actions undertaken by the city attorney on this matter, and also the non-legal actions by other city employees which has resulted in decisioning that has placed taxpayer funds and public safety into serious jeopardy.

The appeal to the SCOTUS is incredibly misguided. I am utterly shocked and disgusted that San Francisco has chosen to abandon its environmental stewardship standards. It is unconscionable that the city would:

- 1) refuse to comprehensively update its sewage management documents (the last update was in the year 1991. Yes - 1991 !);
- 2) rely on technicalities as an excuse to continue polluting water, while openly fighting with a regulator who has direct and ongoing jurisdiction over city infrastructure;
- 3) dump raw sewage on its citizens with no warning; and,
- 4) ask the SCOTUS to gut our nation's environmental enforcement laws so that items 1 - 3 above can continue indefinitely with no improvement.

Please ask the tough questions IN PUBLIC and enforce some direct accountability. Fix the infrastructure. End the SCOTUS case immediately by working with the EPA. There is a multi-billion dollar time bomb ticking away in the pipes alongside Ocean Beach. It's shameful, and I would like some direct answers please, on the record in a transparent fashion.

Thank you sincerely for your service to the city,  
Sincerely,  
Geoffrey Moore

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

Dear San Francisco Board of Supervisors,

This means so much to all of us who live here in the area. Certainly all my San Francisco friends and acquaintances agree as well. This lawsuit needs to stop now!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Nancy Kurshan

Dear San Francisco Board of Supervisors,

I hope you and your loved ones are safe and healthy with everything you need.

Our Bay is not safe nor healthy when compromised by sewage. Water is a sacred element of our interconnected system of life and we all are responsible for offering our deepest gratitude, protection and respect to Bay waters. We all must work together to keep our Bay waters clean and safe and healthy. Please respect Bay waters and let the EPA do their job. And please yourselves, stay safe and healthy. I endorse the statement below.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

Please heed the call for making our waters cleaner! It means so much to all of us now, and our future generations, like my 5 grandchildren.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Rebecca Todd

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. Dear San Francisco Board of Supervisors,

I'm personally grateful to the EPA. It's protections contribute so much to the Quality of life that we love in the Bay Area as well as unseen health benefits.

Weakening its ability to protect us is the last thing I'd want to see. When I see the allies in this lawsuit, It's clear the city of San Francisco is on the wrong side of this issue.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Scott Grinthal

Dear San Francisco Board of Supervisors,

I swim in the bay. When people learn this about me, they often express disgust and or concern about the water being polluted. So, are we going to perpetuate the idea that the sf bay is dirty? Just because it's an urban area does not mean we can't keep it clean, right?

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Jeanne Crawford

Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

I am surprised and saddened to learn that San Francisco is trying to weaken the Clean Water Act. The rest of the nation looks to California and the SF Bay Area for innovative pathways to protect the environment. With this lawsuit San Francisco is instead sending the message that the environment doesn't matter, health and safety doesn't matter, and following rules set in place to protect future generations don't matter. Updating water treatment facilities to handle sewage is expensive, but it is necessary. Please stop the lawsuit and work with the RWQCB to develop a plan to address pollution, protect our oceans, and show the country how cities and a healthy environment can coexist.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

We need to be able to recreate in clean ocean waters! Animals need clean water so our habitats can thrive! These are not things we can get back once they are gone!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Michael Filice

September 19, 2024  
 1 D. Carlton B. Goodlett Place Room 200  
 San Francisco, CA 94102

To: Mayor London Breed, General Manager Dennis Herrera, and City Attorney David Chiu,

Cc: Supervisor Connie Chan, Supervisor Matt Dorsey, Supervisor Joel Engardio, Supervisor Rafael Mandelman, Supervisor Myrna Melgar, Supervisor Aaron Peskin, Supervisor Dean Preston, Supervisor Hillary Ronen, Supervisor Ahsha Safai, Supervisor Catherine Stefani,

**RE: Urging Mayor London Breed to drop City and County of San Francisco vs. the EPA.**

The undersigned groups urgently demand the City immediately drop its lawsuit against the EPA. As our Mayor and Supervisors, you have the power to make this decision, and we implore you to act swiftly.

The Supreme Court is scheduled to hear the argument in the case on October 16, 2024. The arguments raised by the City, if the case proceeds to a decision, risk eliminating EPA's, States, and citizens' ability to implement a substantial portion of the Clean Water Act, a pillar of US environmental law for over half a century that protects San Francisco and the entire United States. San Francisco would be in the national spotlight this Fall and Spring, playing a central role in polluters' and the right wing's ongoing campaign to eviscerate the nation's bedrock environmental laws.

San Francisco is trying to get away with dumping raw sewage in the Pacific Ocean and the San Francisco Bay—waters that our communities live near and use to recreate. We need to keep these waters clean and safe to protect local ecosystems and our health and safety.

We believe every person has the right to clean water, a belief that the City's insistence on continuing with its suit betrays. It is disheartening to see San Francisco abandon its legacy as an environmental leader and join forces with the National Mining Association, American Gas Association, and the American Fuel and Petrochemical Manufacturers to dismantle the Clean Water Act.

San Francisco's view of the Clean Water Act—that permit conditions must always ignore the condition of the receiving waters—is impractical and non-scientific. Water bodies like the Pacific Ocean and the Bay fluctuate over time; agencies require some flexibility to accommodate those fluctuations to protect water quality effectively and efficiently. Limiting the EPA's ability to protect water quality will not only hinder San Francisco residents' health and outdoor access but also pose a significant threat to water bodies across the country.

Even if San Francisco successfully dismantles EPA's authority, ratepayers will not save significant money. California will retain its authority, which imposes limits similar to those of the EPA. Secondly, the attempt to have the EPA set specific numeric limits on every single pollutant could lead to a complex, cumbersome permitting process that will ultimately cost more money than the current process. Meanwhile, the risk of continued dumping in the waters may harm human health, which comes with its costs.

By its actions here, San Francisco will sharply expand polluters' power to destroy public trust and harm vulnerable communities nationwide. As climate change and the biodiversity crisis wreak havoc on the country, we should look to San Francisco for leadership. We urge you to uphold this responsibility and not contribute to the problem, as the consequences for these communities could be dire.

Witnessing San Francisco team up with polluters to cripple the Clean Water Act would permanently stain our City's reputation as a protector of the public and the environment. We request you do everything you can to rescind the lawsuit and protect the Clean Water Act for San Francisco and the rest of the country.

**Date:** Thursday, September 19, 2024 1:55:07 PM

---

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear San Francisco Board of Supervisors,

San Francisco has a reputation worldwide for its liberality and goodwill toward the climate and the future of our planet. Undermining the EPA directly contradicts this and is antithetical to the values of the city of San Francisco. I urge you to protect the Clean Water Act and continue fighting to protect our planet, rather than contribute to its destruction. Thank you.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Leo Borg

Dear San Francisco Board of Supervisors,

Please don't underestimate the gravity of this situation for the very survival of our children and grandchildren. I beg you to act with conscience and heart

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Dear San Francisco Board of Supervisors,

Why would the SFPUC City Manager be considering stepping back from EPA regulations? That is not a way to solve problems, that is passing the buck to future generations. What don't you all understand about that? If you need to find more money to do things properly, then do it.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

As a longtime resident of District 4 by Ocean Beach, and surfer, swimmer and frequent visitor to the coastline, and as a scientist, I want to see the city I love and care about being treated with respect and the ocean needs protection, not a continuation of pollution! San Francisco has a responsibility to its residents to keep our waters clean. If it's truly a city that believes about climate change and increasing access to nature for all residents it's infrastructure needs to be improved- not trying to change EPA policy!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Dear San Francisco Board of Supervisors,

As a lifetime waterwoman who has been fortunate enough to spend her life playing in, walking near, and cleaning up the seas, I am urging our representatives to take the necessary steps to keep our coasts clean. This is a public health issue, an environmental issue, an equity issue, and mental health issue, and one that needs your time and focus in order to protect our local waters. So much of climate justice begins and ends in the ocean, and by dumping raw sewage into the ocean, we are expediting the global climate crisis.

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Dear San Francisco Board of Supervisors,

as a mom, nurse, surfer and swimmer, this issue is incredibly important to me. my children play in the ocean, i surf and swim in it, and we eat food fished from its waters. protecting the health of our ocean should be your priority!

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate. Clean water is a basic right that everyone deserves. I and my neighbors shouldn't have to worry about pollution disrupting our livelihood or getting sick from spending time in or by the water. This is unacceptable, and San Francisco needs to do better.

The EPA has tried to prevent San Francisco from dumping raw sewage into the ocean. But instead of working to find a solution to control its pollution of our home, the City is asking the Supreme Court to take away the EPA's power to require the City to keep our coastline safe and clean. The Supreme Court whose recent decisions have consistently and dramatically undermined the nation's bedrock environmental laws will hear the case in October, threatening the Clean Water Act and the EPA's ability to regulate water pollution. Pursuing this case will likely produce a dangerous precedent that will weaken the country's ability to protect the public from further water pollution and the pollution of our air and lands in San Francisco, the Bay Area, and the entire nation.

I thought San Francisco was supposed to be a progressive leader. But with this suit, San Francisco is representing the interests of polluters who value profit over people. By continuing to pursue the case the City is hurting residents, the Bay Area, and the country. There are more responsible pathways forward that would cost-effectively keep San Francisco's shores clean without jeopardizing one of the country's most important environmental laws. This disastrous case must be stopped.

As the City's elected leaders, you must stand up to your colleagues to stop this dangerous lawsuit and direct City labor and resources towards cleaning up its messes, instead of wasting our taxpayer money on expensive litigation. It is your duty to use your power as the elected leaders of San Francisco to protect people's right to clean water and a healthy and safe place to live. We only have a short time before the Supreme Court hears this case. Stop this lawsuit now!

Sincerely,

Lisa Johnson

Dear San Francisco Board of Supervisors,

San Francisco used to be an environmentally forward thinking city. This lawsuit, and the ongoing practices of the city to enable polluters to contaminate our water, represents a huge step backwards. Please support the Clean Water Act and not only help our community but avoid setting a dangerous precedent for other communities as well. If this can happen in SF, think what can happen in much less environmentally-friendly cities! We need to be a leader in environmental practices and do the real work to make improvements and build a better future for our children. Thank you

I'm writing to you today as a Bay Area resident grateful to live by the Bay and Pacific Ocean. I'm appalled that the City of San Francisco hasn't put a stop to letting raw sewage be released into the ocean and Bay, alongside where we live, work, and recreate.
