

Crankstart Before and Aftercare Programs Grant

Background

- Since the re-open of the schools in San Francisco, hundreds of children and youth need access to before, during, and after school programs.
- CBOs are struggling to create enough slots to meet the demands due to the lack of funding to hire qualified staff or full-time staff.
- This has created challenges and barriers for our children, youth and families to access supportive services and helpful resources these agencies and programs provide.

Crankstart Foundation

- Crankstart is a family foundation based in San Francisco.
- It focuses on working with governments and other agencies to address immediate problems and underlying causes.
- Their interests are in education, economic and racial justice, civic engagement, science education, and climate change.
- They were the primary funder for San Francisco Summer Together 2021.

Proposed Funding Plan

- Support the hiring of CBO staff so that agencies can convert part-time staff to full-time or offer a competitive wage to attract qualified staff
- Support the hiring of behavioral health specialists to address the social-emotional and over well-being of children and youth in their programs
- Assist with transportation for youth to get to and from programs
- Address the lack of programming space
