Section 2. Background and Findings.

(a) California faces a severe crisis of housing affordability and availability, prompting
the Legislature to declare, in Section 65589.5 of the Government Code, that the state has "a
housing supply and affordability crisis of historic proportions. The consequences of failing to
effectively and aggressively confront this crisis are hurting millions of Californians, robbing
future generations of a chance to call California home, stifling economic opportunities for
workers and businesses, worsening poverty and homelessness, and undermining the state's
environmental and climate objectives."

(b) This crisis of housing affordability and availability is particularly severe in San
 Francisco. It is characterized by dramatic increases in rent and home sale prices over recent
 years and historic rates of underproduction of new housing units across income levels,
 particularly in the City's western neighborhoods and RH (Residential, House) zoning districts.

(c) According to the Planning Department's 2020 Housing Inventory, the cost of
housing in San Francisco has increased dramatically since the Great Recession of 20082009, with the median sale price for a two-bedroom house more than tripling from 2011 to
2021, from \$493,000 to \$1,580,000. This includes a 9% increase from 2019 to 2020 alone,
even in the face of the COVID-19 pandemic. The median rental price for a two-bedroom
apartment saw similar although slightly smaller increases, nearly doubling from \$2,570 to
\$4,500 per month, from 2011 to 2019, before declining in 2020 due to the pandemic.

(d) These housing cost trends come after decades of underproduction of housing in
San Francisco, with only 600 net new units on average added per year from 1960 to 1990,
compared with 37,000 per year in the Bay Area as a whole, and fewer than 1,000 net new
units on average per year in San Francisco in the 1990s, before increasing to an average of
roughly 2,500 per year from 2000 to 2019, according to the Planning Department's 2019
Housing Affordability Strategies Report.

(e) The City's Chief Economist has estimated that approximately 5,000 new market rate housing units per year would be required to keep housing prices in San Francisco
 constant with inflation generally, rather than greatly exceeding general rates of inflation.

(f) Moreover, San Francisco will be challenged to meet increased Regional Housing
Needs Allocation ("RHNA") goals in the upcoming 2023-2031 Housing Element cycle, which
total 72,000 units over eight years, more than 2.5 times the goal of the previous eight-year
cycle. At the same time, relatively new State laws like Senate Bill 35 (2017) would limit San

Francisco's local zoning control and discretion if the City does not meet these RHNA housing
 production goals.

(g) San Francisco's new housing production in recent years has been heavily
concentrated in the eastern and southeastern parts of the City, with 90% of all new housing
produced in just ten eastside and central neighborhoods, according to the Housing
Affordability Strategies Report. These neighborhoods are home to many of the City's most
established communities of color and communities most vulnerable to displacement
pressures.

9 (h) Roughly 60% of San Francisco's developable land area is in the RH (Residential,
10 House) zoning districts, concentrated primarily on the City's west side, with 38% of the City's
11 developable land area zoned exclusively for single-family homes in RH-1 (Residential, House,
12 One Family) and RH-1(D) (Residential, House, One Family, Detached Dwellings) zoning
13 districts. In spite of the expansive geographic coverage of RH zoning districts throughout the
14 City, only 10% of the total new housing units in 2020 were built in these districts.

(i) Neighborhoods zoned for RH encompass a wide variety of housing and building
 typologies, with a distinct historic pattern of taller, higher-density buildings often located on
 corner lots throughout residential neighborhoods in the City, which predate the advent of RH
 zoning, in the 1970s.

(j) The City's COVID-19 Economic Recovery Task Force included a recommendation
 in its October 2020 report to support construction of small multifamily buildings in low density
 areas to support "missing middle" housing opportunities.

(k) This ordinance allows the development of up to four units, and up to six units in
Corner Lots, in all RH districts throughout the City (as shown on the Zoning Maps ZN 01
through ZN 14), at the heights currently specified in the City's Zoning Maps (Height Maps HT
01 through HT 14). All parcels affected by this ordinance are considered urban infill sites

under California Government Code Section 65913.5(e)(3). This Board therefore declares that
 this ordinance is enacted pursuant to California Government Code Section 65913.5.

- (I) This Board acknowledges that new housing developments approved under this
  ordinance will be subject to the requirements of California Government Code Section
  66300(d), such as the obligation to replace all existing or demolished protected units and
  protections for existing occupants, including, for lower income occupants of protected units,
  relocation benefits and a right of first refusal for a comparable unit available in the new
  housing development at an affordable rent or cost, as provided by state law.
- 9 (m) This Board finds that this ordinance is consistent with San Francisco's obligation to affirmatively further fair housing pursuant to California Government Code Section 8899.50, by 10 increasing density in a manner that meaningfully addresses significant disparities in housing 11 12 needs and access to opportunity. The ordinance achieves the increase in density by 13 increasing the principally permitted residential density in areas subject to historically exclusionary density limits-, by providing an additional density exception for projects that 14 15 comply with the requirements of Section 66300(d) of the California Government Code and enter into regulatory agreements with the City acknowledging that, in consideration for the 16 density exception, the new units shall be subject to local rent control notwithstanding the 17 18 Costa-Hawkins Rental Housing Act (California Civil Code Sections 1954.50 et seq.). 19 20 Section 3. Article 2 of the Planning Code is hereby amended by revising Sections 207 21 and 209.1, to read as follows: 22 23 SEC. 207. DWELLING UNIT DENSITY LIMITS. \* \* 24
- 25

1	(c) Exceptions to Dwelling Unit Density Limits. An exception to the calculations
2	under this Section 207 shall be made in the following circumstances:
3	* * * *
4	(8) Residential Density Exception in RH Districts.
5	(A) <b>Density Exception.</b> Projects located in RH Districts that are not seeking or
6	receiving a density bonus under the provisions of Planning Code Sections 206.5 or 206.6 shall receive
7	an exception from residential density limits for up to four dwelling units per lot, excluding Corner Lots,
8	or up to six dwelling units per lot in Corner Lots, not inclusive of any Accessory Dwelling Units as
9	permitted under this Section 207, provided that the dwelling units meet the requirements set forth in
10	this subsection (c)(8).
11	(B) Eligibility of Historic Resources. To receive the density exception
12	authorized under this subsection (c)(8), a project must demonstrate to the satisfaction of the
13	Environmental Review Officer that it does not cause a substantial adverse change in the significance of
14	an historic resource as defined by California Code of Regulations, Title 14, Section 15064.5, as may be
15	amended from time to time.
16	(C) Applicable Standards. Projects utilizing the density exception of this
17	subsection (c)(8) and that provide at least four dwelling units shall be subject to a minimum Rear Yard
18	requirement of the greater of 30% of lot depth or 15 feet. All other building standards shall apply in
19	accordance with the applicable zoning district as set forth in Section 209.1.
20	(D) Unit Replacement Requirements. Projects utilizing the density exception of
21	this subsection (c)(8) shall comply with the requirements of Section 66300(d) of the California
22	Government Code, as may be amended from time to time, including but not limited to requirements to
23	produce at least as many dwelling units as the projects would demolish; to replace all protected units;
24	and to offer existing occupants of any protected units that are lower income households relocation
25	benefits and a right of first refusal for a comparable unit, as those terms are defined therein.

1	(E) Applicability of Rent Ordinance; Regulatory Agreements. Project
2	sponsors of projects utilizing the density exception of this subsection (c)(8) shall enter into a
3	regulatory agreement with the City, as a condition of approval of the density exception
4	("Regulatory Agreement"). At a minimum, the Regulatory Agreement shall contain the
5	following: (i) a statement that the new units created pursuant to the density exception are not
6	subject to the Costa-Hawkins Rental Housing Act (California Civil Code Sections 1954.50 et
7	seq.) because, under Section 1954.52(b), the property owner has entered into and agreed to
8	the terms of this agreement with the City in consideration of an exception from residential
9	density limits of up to four dwelling units per lot, or up to six units per lot in Corner Lots, or
10	other direct financial contribution or other form of assistance specified in California
11	Government Code Sections 65915 et seq.; (ii) a description of the exception of residential
12	density or other direct financial contribution or form of assistance provided to the property
13	owner; and (iii) a description of the remedies for breach of the agreement and other provisions
14	to ensure implementation and compliance with the agreement. The property owner and the
15	Planning Director (or the Director's designee), on behalf of the City, will execute the
16	Regulatory Agreement, which shall be reviewed and approved by the City Attorney's Office.
17	The Regulatory Agreement shall be executed prior to the City's issuance of the First
18	Construction Document for the project, as defined in Section 107A.13.1 of the San Francisco
19	Building Code. Following execution of the Regulatory Agreement by all parties and approval
20	by the City Attorney, the Regulatory Agreement or a memorandum thereof shall be recorded
21	to the title records in the Office of the Assessor-Recorder against the property and shall be
22	binding on all future owners and successors in interest.

24	SEC. 209.1. RH (RESIDENTIAL, HOUSE) DISTRICTS.
25	

1 These Districts are intended to recognize, protect, conserve, and enhance areas 2 characterized by dwellings in the form of houses and small multi-family buildings, usually with 3 one, two, or three units with separate entrances, and limited scale in terms of building width and height, and characterized by rear yards and a pattern of mid-block open spaces. Such areas 4 5 tend to have similarity of building styles and predominantly contain large units suitable for 6 family occupancy, considerable open space, and limited nonresidential uses. The RH 7 Districts are composed of *five separate* two three classes of districts, as follows: 8 RH-1(D) Districts: One-Family (Detached Dwellings). These Districts are characterized by lots 9 of greater width and area than in other parts of the City, and by single-family houses with side yards. 10 The structures are relatively large, but rarely exceed 35 feet in height. Ground level open space and landscaping at the front and rear are usually abundant. Much of the development has been in sizable 11 12 tracts with similarities of building style and narrow streets following the contours of hills. In some 13 cases private covenants have controlled the nature of development and helped to maintain the street 14 areas. 15 RH-1 Districts: One-Family. These Districts are occupied almost entirely by single-family 16 houses on lots 25 feet in width, without side yards. Floor sizes and building styles vary, but tend to be 17 uniform within tracts developed in distinct time periods. Though built on separate lots, the structures 18 have the appearance of small-scale row housing, rarely exceeding 35 feet in height. Front setbacks are 19 common, and ground level open space is generous. In most cases the single-family character of these 20 Districts has been maintained for a considerable time. 21 RH-1(S) Districts: One-Family with Minor Second Unit. These Districts are similar in character to RH-1 Districts, except that a small second dwelling unit has been installed in many 22 23 structures, usually by conversion of a ground-story space formerly part of the main unit or devoted to 24 storage. The second unit remains subordinate to the owner's unit, and may house one or two persons

25

related to the owner or be rented to others. Despite these conversions, the structures retain the

2 *appearance of single-family dwellings.* 

3 RH-2 (D) Districts: Two-Family (Detached Dwellings). These Districts are characterized by lots of greater width and area than in other parts of the City, and by one or 4 5 two houses with side vards. The structures are relatively large, but rarely exceed 35 feet in height. Ground level open space and landscaping at the front and rear are usually abundant. 6 7 Much of the development has been in sizable tracts with similarities of building style and 8 narrow streets following the contours of hills. In some cases, private covenants have 9 controlled the nature of development and helped to maintain the street areas. **RH-2 Districts: Two-Family.** These Districts are devoted to one-family and two-family 10 houses, with the latter commonly consisting of two large flats, one occupied by the owner and 11 12 the other available for rental. Structures are finely scaled and usually do not exceed 25 feet in

width or 40 feet in height. Building styles are often more varied than in *historically* single-family
areas, but certain streets and tracts are quite uniform. Considerable ground-level open space
is available, and it frequently is private for each unit. The Districts may have easy access to
shopping facilities and transit lines. <u>In</u> some cases, Group Housing and institutions are found
in these areas, although nonresidential uses tend to be quite limited.

18 RH-3 Districts: Three-Family. These Districts have many similarities to RH-2
19 Districts, but structures with three units are common in addition to one-family and two-family
20 houses. The predominant form is large flats rather than apartments, with lots 25 feet wide, a
21 fine or moderate scale, and separate entrances for each unit. Building styles tend to be varied
22 but complementary to one another. Outdoor space is available at ground level, and also on
23 decks and balconies for individual units. Nonresidential uses are more common in these areas
24 than in RH-2 Districts.
