Dear Supervisor Ronen,

I would not trust any data reported by SFPD as they have been known to not report or to skew reported data to support increased annual staffing budgets and overtime pay. There must be an objective third party overseeing law enforcement data gathering, reporting and analysis, most especially data that emerges from 911 calls.

By design, annual law enforcement budgets MUST be decreased at the same rate that alternative street response teams are scaled-up. Again, SFPD annual budgets would absolutely be expected to decrease year-on-year going forward with 9 (NINE!!) alternative street outreach teams.

Community policing does not mean groups of cops standing together on corners chatting, drinking coffee and staring at their cell phones. As community members have reported, the character of neighborhoods such the Tenderloin change upon nightfall. For this reason, SFPD foot patrols MUST be staffed 24/7 to walk the blocks and engage with community overnight. Every night. Tonight.

Finally, please resolve the Urban Alchemy training controversy. These 'practitioners' are hired for security and neighborhood de-escalation but do not have CA state security licensing. It can no longer be ignored that Mayor Breed has been behind and supported \$41,000,000.00+ of funding for her old friend and Nuru intimate, Urban Alchemy's founder.
