

Implementing Proposition C

Streamlining Advisory Bodies

Supervisor Ahsha Safaí

November's Proposition C established greater accountability for homelessness services:

New Commission to set homelessness policy in a public forum

Mandatory Controller's audits of homelessness services—both city-delivered and non-profit provided

Streamline advisory bodies to improve efficiency and reduce conflict

Prop C requires an ordinance that:

Focuses the Local Homeless Coordinating Board solely on the Continuum of Care and makes clear that the Commission appoints its members

Ensures the Shelter Monitoring Committee will advise the Commission on shelter conditions

Establishes Our City, Our Home as a body that makes recommendations to the Commission on the budget and strategic planning processes

Further Amendments/Duplicate File

- Improves the city's ability to get federal grants by increasing the number of seats on the LHCB and align member qualifications more closely to Continuum of Care requirements
- Provides more comprehensive focus on shelter conditions by empowering the Commission to appoint the Shelter Grievance Advisory Committee and the Shelter Monitoring Committee
- Streamline other reporting requirements to ensure the Commission is the sole policy and fiscal body overseeing the Department of Homelessness and Supportive Housing
