#### 1. Service Overview

The California Department of Public Health (CDPH), Sexually Transmitted Disease Branch (STDCB) shall provide a grant to and for the benefit of the Grantee. Funded by the <u>2022</u> <u>California State Budget Act</u>, nine million dollars for FY 2022-2023 has been appropriated for the Syphilis and Congenital Syphilis (CS) Outbreak Strategy (SOS) for eight local health jurisdictions (Grantee). Subsequent allocation of nine million each for FY 2023-24 and FY 2024-25 will be made available if funds are appropriated through the California state budget and available for spend down from July 1, 2022 through June 30, 2027.

The Grantee will use this funding to expand existing syphilis and congenital syphilis activities. Funding is intended to support innovative and impactful syphilis and congenital syphilis prevention and control activities, with a focus on disproportionately impacted populations as determined by local or regional syphilis and congenital syphilis epidemiology, which may include, but are not limited to, African American/Black people, Latinx people, American Indians/Alaska Native people, trans women, pregnant people experiencing homelessness or who use drugs, (e.g., people who exchange sex for money, drugs, or a place to stay), and gay, bisexual, and other men who have sex with men (MSM). Grantees will be expected to describe how they have centered priority populations based on local epidemiology. Funds shall be used to supplement, but not supplant, existing financial and resource commitments of the local health jurisdiction for sexually transmitted disease prevention and control activities.

All Grantees must adhere to the Grant Activities and STDCB Terms and Conditions, and any subsequent revisions, along with all instructions, policy memorandums, or directives issued by CDPH/STDCB. CDPH/STDCB will make any changes and/or additions to these guidelines in writing and, whenever possible, notification of such changes shall be made 30 days prior to implementation.

#### 2. Service Location

The services shall be performed at applicable facilities within the Grantee's jurisdiction.

#### 3. Service Hours

The services shall be primarily provided Monday through Friday, from 8:00 a.m. to 5:00 p.m. and include evenings, weekends, and holidays as needed.

#### 4. **Project Representatives**

The project representative for the Syphilis and Congenital Syphilis Outbreak Strategy grants at CDPH/STDCB is Adriana Cervantes at <u>Adriana.Cervantes@cdph.ca.gov</u>.

#### 5. Services to be Performed

See the attached Grant Activities as follows for a description of the services to be performed.

Grantees are encouraged to consider innovative approaches to addressing early syphilis and congenital syphilis prevention and control that may not be specifically listed in the Grant Activities below. Innovative approaches must be described in the narrative portion of each part. The three parts of the Grant Activities are focused on the following key strategic targets:

- Part I: Health Access for All: Syphilis Testing, Treatment, and Other Health Care focuses on syphilis testing, treatment, and postexposure prophylaxis (DoxyPEP) to interrupt ongoing syphilis transmission and prevent adverse outcomes. Linkages to prenatal, preconception or family planning care are also included to prevent unintended pregnancies in people who do not want to become pregnant, and to prevent adverse outcomes for pregnant people, including congenital syphilis.
- Part II: Supportive Services: Housing, Mental Health, and Substance Use focuses on wrap-around services identified as priorities for syphilis and congenital syphilis prevention. Grantees must identify at least one activity from Part II.
- Part III: Core Surveillance and Disease Intervention focuses on core public health functions that may not be met by existing local, state, or federal funding and is considered an optional use of these funds.

## Part I. Health Access for All: Syphilis Testing, Treatment, and Other Health Care.

Grant Activities A - C are required. Grantees may also choose one or more optional activities D - L, but are not required. Provide a description of the proposed approach to the required and selected activities in the area provided under each activity in the table. Describe how the Grantee will center racial equity in their activities under the Part I Narrative section.

#### Please describe proposed approach to this activity:

Similar to other jurisdictions in the United States, San Francisco is experiencing concerning increases in syphilis among cis-women, leading to increases in congenital syphilis. There was a 220% increase in females syphilis cases from 2017 to 2021, with 9% of cases among pregnant people in 2021 and 18% among pregnant people in 2022 to date. While there were no reported CS cases in 2018, 4 cases were reported in 2019 and 5 in 2020, the highest number in 26 years. There were 2 CS cases reported in 2021 and 2 CS cases reported to date in 2022. The San Francisco Department of Public Health (SFDPH) has directed resources to increase syphilis screening, treatment, and linkage to care over the past three years, especially among pregnant people, which may help explain the decrease in CS cases despite the increasing cases of syphilis among females and pregnant people.

San Francisco epidemiology indicates that men who have sex with men (MSM), people experiencing homelessness (PEH), people who use drugs (PWUD), and people with a history of incarceration are disproportionately affected by syphilis. In order to address these disparities, SFDPH strives to prioritize <u>increased syphilis screening</u> in the settings that serve these populations: San Francisco City Clinic (SFCC), Street Medicine, Jail Health Services, and Zuckerberg San Francisco General Hospital (ZSFG). Additional settings will be explored through the proposed Facente Consulting strategic plan (see Part II-A).

We propose to achieve increased syphilis screening in these priority settings by conducting the following activities:

- 1. <u>Increase capacity of the SFDPH Street Medicine team to provide low barrier access to syphilis screening</u>. STI program staff will partner closely with the SFDPH Street Medicine team to provide outreach and clinical support, which will include participating in field visits and encampment health fairs with people experiencing homelessness to increase low barrier access to syphilis screening and pregnancy testing. (P103 Special Nurse)
- 2. <u>Facilitate non-clinician express STI visits at SFCC</u> to ensure access to low barrier, asymptomatic STI screening, pregnancy testing, and PrEP follow-up. SFCC is part of SFDPH and provides sexual health services to all, regardless of immigration or insurance status.
- 3. Ensure that all people diagnosed with syphilis in the settings listed above who could become pregnant are offered pregnancy testing (P103 Special Nurse, 2587 Health Worker III).
- 4. <u>Provide training and technical assistance to clinical sites and CBOs</u> to increase syphilis screening among people experiencing homelessness and people with risk factors for syphilis (2328 Nurse Practitioner).
- 5. <u>Utilize rapid syphilis testing among priority populations</u>, including people experiencing homelessness, people who use drugs, and people in correctional facilities. Rapid syphilis testing using the Syphilis Health Check kits will be offered to PEH during nursing field visits, at encampment health fairs, and in shelters and navigation centers. Rapid syphilis testing will also be offered in the local jails. Rapid syphilis testing allows for timely syphilis results among people with no prior known history of syphilis. Results are available in 10 minutes, which allows for timely linkage to further testing and treatment in a population that is at risk for being lost to follow-up. This requires training clinicians and health workers and ensuring correct implementation, documentation, and follow-up (2328 Nurse Practitioner).

6. Increase syphilis screening in the inpatient setting at ZSFG by partnering with a University of California, San Francisco (UCSF) clinical champion to supervise a resident-led quality improvement project. ZSFG serves many of the most vulnerable patients in SF who are at higher risk for syphilis infection. Inpatient admission presents a valuable opportunity for syphilis testing and linkage to care. Proposed project activities include making improvements in the electronic medical record to notify providers when syphilis screening is indicated, educational outreach, and provider incentives to encourage increased screening. (UCSF Clinical Champion).

| <ul> <li>B. Increase low-barrier access to syphilis treatment and/or DoxyPEP among priority populations, such as through non-340b-purchased medication to reduce administrative restrictions on providers. ## Please describe proposed approach to this activity:

The priority populations identified for low barrier access to syphilis treatment are the same as those identified for increased syphilis screening: men who have sex with men (MSM), people experiencing homelessness (PEH), people who use drugs (PWUD), and people with a history of incarceration. In addition, we will conduct activities (described) below to increase access to and uptake of DoxyPEP for populations who are eligible per current local guidelines.

We propose to achieve **increased access to syphilis treatment and/or doxy-PEP** among these priority populations by conducting the following activities:

- Increase capacity of the SFDPH Street Medicine team to provide low barrier access to syphilis treatment. The RN liaison (P103 Special Nurse) will partner with the SFDPH Street Medicine team, which will include participating in field visits with people experiencing homelessness and encampment health fairs to increase low barrier access to syphilis treatment and linkage to doxy-PEP as indicated.
  - a. Identify people who are requiring syphilis treatment and/or lost to follow-up. This includes the RN liaison administering Bicillin in the field and ensuring Street Medicine has the capacity to provide Bicillin in the field (P103 Special Nurse). Pregnant people will be prioritized, especially those requiring late latent treatment to ensure treatment is completed at least 30 days prior to delivery.

- 2. Increase the number of San Francisco Health Network (SFHN) providers prescribing doxy-PEP.
  - a. Create doxy-PEP provider and patient-facing materials to aid in clinician outreach and education (2328 Nurse Practitioner).
  - b. Provide doxy-PEP public health detailing, including ongoing training and technical assistance, to providers and clinics (2328 Nurse Practitioner)
- 3. <u>Monitor uptake of doxy-PEP within the San Francisco Health Network (SFHN)</u> by tracking doxy-PEP prescriptions to help identify disparities in doxy-PEP prescribing, with the goal of providing equitable access (2803 Epidemiologist).

| C. Link people diagnosed with or at risk for<br>syphilis to clinical services to prevent<br>sexually transmitted infections (STI), HIV,<br>unintended pregnancy, and adverse<br>pregnancy outcomes (e.g., HIV<br>PrEP/PEP, DoxyPEP, family planning,<br>prenatal care). | <ul> <li>Description of linkage protocols</li> <li>Number of linkages to HIV PrEP/PEP, DoxyPEP, family planning, and/or prenatal care</li> </ul> | 7/1/22 – 6/30/27 |

#### Please describe proposed approach to this activity:

- Increase capacity of LINCS team to provide patient-centered counseling and make appropriate referrals to medical and social services as needed by partnering with a certified nurse midwife consultant (CNM). The CNM will provide trainings to the LINCS team with a focus on integrating sexual and reproductive health services for people with substance use disorders, and specifically how to integrate reproductive health services into congenital syphilis prevention programming by providing preconception, contraception, and early pregnancy testing services. Twenty LINCS staff will attend this training twice over 5 years.
- 2. <u>Help link patients diagnosed with syphilis to medical care and social services as needed</u>. This also includes conducting investigations to locate untreated persons infected with syphilis as well as syphilis/HIV contacts (persons exposed to STI's). The staff person will provide outreach to engage PEH and network with other homeless service providers to coordinate care and improve health outcomes for these patients. **(2587 Health Worker III, 2232 Senior Physician Specialist)**.
- 3. <u>Ensure that all people identified as pregnant are referred to prenatal care</u>. The RN Street Medicine liaison will work closely with our UCSF partner Team Lily who offers person-centered, trauma-informed wrap-around care to pregnant people facing significant barriers to care including those experiencing homelessness, substance use disorders and/or significant mental illness. (P103 Special Nurse)

#### **PART I NARRATIVE.** Please describe how the Grantee will center racial equity in implementing the activities listed in Part I.

The San Francisco Department of Public Health (SFDPH) has a Strategic Equity Goal of reducing key health disparities for Black, Indigenous, and People of Color (BIPOC) communities, with a priority on Black/African American (B/AA) communities. Between 2017-2020, syphilis cases among women increased 190% and 2014-2022 syphilis surveillance data showed syphilis disproportionally affecting BIPOC females\*, with 56% of all female syphilis cases among BIPOC. Additionally, homelessness continues to disproportionally affect most BIPOC groups (2022 SF Homeless Count and Survey Report) and the proportion of total syphilis cases (all stages) among homeless females increased from 14% in 2021 to 22% for the first two quarters of 2022 (Syphilis Surveillance Data).

To reduce syphilis-related health disparities among BIPOC, DPH will explore the following activities:

- **Data-driven prioritization** of settings serving priority BIPOC populations with higher syphilis-related health risks and poorer health outcomes.
- Identification of **Congenital Syphilis (CS) Prevention Taskforce Strategic Plan** strategies (Part II. Section A) aimed at addressing factors that contribute to higher syphilis-related health risks and poorer health outcomes among BIPOC populations.
- **Doxy-PEP** uptake prioritization among BIPOC men who have sex with men and trans women, potential sexual partners, and at diagnosing provider and neighborhood locations serving housed and homeless BIPOC populations.
- Addressing access to medical care, discrimination, and stigma through public health **detailing** by working with community partners with a history of serving the BIPOC population, including those experiencing homelessness.

\* Female is defined as people whose sex at birth is female or people whose gender identify is female or trans male if sex at birth was not reported, unknow, or refused),

## Part II. Supportive Services: Housing, Mental Health, and Substance Use.

Grantees must choose at least one optional Grant Activity from Part II. Please provide a description of the proposed approach to selected activities in the area provided under each activity in the table. #### Please describe proposed approach to this activity:

The San Francisco Congenital Syphilis (CS) Prevention Taskforce is an A3 quality improvement collective impact effort to identify improvement opportunities across SFDPH branches and departments to work collaboratively to decrease the burden of syphilis in San Francisco and eliminate CS. The CS Prevention Taskforce is made of up of stakeholders across the SFDPH health system to lead the work, including SF City Clinic (STI/HIV Clinic), Maternal Child and Adolescent Health, public health nurses, disease investigation specialists, ZSFG OB-GYN, ZSFG emergency department, ZSFG urgent care, SFHN primary care, and Street Medicine. The goal of this A3 QI effort is to eliminate CS by increasing syphilis screening, syphilis treatment, and connection to sexual health services for people with syphilis, particularly pregnant people.

The target population for programmatic efforts is healthcare providers and staff within SFDPH's health system who serve the populations at high-risk for CS in San Francisco. This includes providers and staff at ZSFG's ED, UCC, and primary care clinics. High-risk patients include any person that is pregnant or could become pregnant (female or transgender male of childbearing age 15-44 years) and has risk factors for syphilis including experiencing homelessness and/or using methamphetamines and/or opiates.

To achieve the program goals, the CS Prevention Taskforce has prioritized the following activities: 1) Expand pregnancy testing, family planning, and options counseling within the San Francisco Health Network (SFHN); 2) Provide training and technical assistance to Street Medicine and Shelter Health clinicians and staff to increase syphilis screening & treatment among people experiencing homelessness and/or who use drugs; and 3) Develop pregnancy/prenatal referral workflow & handouts to aid in linking patients to appropriate services. Additional goals of the CS Prevention Taskforce include strengthening our relationship with the ZSFG emergency department and urgent care center and non-SFDPH affiliated birthing hospitals to increase syphilis screening, treatment, and linkage to services (including prenatal care, doxy-PEP, HIV PrEP).

Grant funds will be used to fund a consultant (Facente Consulting) to evaluate the work to date of the CS Prevention Taskforce and help develop a strategic plan to direct the taskforce's future efforts. Facente Consulting was established in 2009 and provides a wide range of public health consulting services and is a values-driven organization, with a mission to support their clients to improve health and wellness by helping them understand, implement, and tell their story. Facente Consulting's guiding values include: radical helpfulness, social justice, collective wisdom, and health equity.

Facente Consulting proposes a four-phase approach to strategic planning for the CS Prevention Taskforce.

- 1) Phase 1: Background Research, Planning, Existing Program Assessment Review background materials and conduct interviews with key internal stakeholders
- 2) Phase 2: Landscape Analysis Conduct stakeholder interviews with partners or others working in this same field who are *not* integrally involved in the internal work of SFDPH, to paint a picture of the current landscape of services and identify opportunities and barriers/risks, implications for anti-racism and inclusion (e.g., other similar service providers, county officials, funders, policymakers, key client groups)
- 3) Phase 3: Strategic Plan Development Creation of Mission/Vision/Values statements, strategies for incorporating access to culturally informed and whole person health care and inclusion into all aspects of the taskforce's work, and methods for creating a plan that is operational and realistic for implementation and monitoring.
- 4) Phase 4: Communication Strategy Create a strategy for dissemination of the strategic plan, in coordination with the strategic planning committee.

The **2328 Nurse Practitioner** position will lead the CS Prevention Taskforce, including planning and facilitating monthly meetings. This position will also be the main liaison working with Facente Consulting and ensure the strategic plan is incorporated into the CS Prevention Taskforce's ongoing efforts.

# STD Local Assistance Funds – Standards and Procedures

### 1. Overview

The California Department of Public Health (CDPH) STD Control Branch (STDCB) sets forth the following standards and procedures. These standards and procedures specify the conditions for receipt of CDPH STDCB local assistance funds. This funding is intended to support innovative and impactful syphilis and congenital syphilis (CS) prevention and control activities, with a focus on disproportionately impacted populations as determined by local or regional syphilis and CS epidemiology, which may include, but are not limited to, African American/Black people, Latinx people, American Indians/Alaska Native people, trans women, pregnant people experiencing homelessness or who use drugs, (e.g., people who exchange money for sex, drugs, or a place to stay), and gay, bisexual, and other men who have sex with men (MSM).

All Grantees must adhere to these standards and procedures, and any subsequent revisions, along with all instructions, policy memorandums, or directives issued by CDPH STDCB. CDPH STDCB will make any changes and/or additions to these provisions in writing and, whenever possible, notification of such changes shall be made 30 days prior to implementation.

The local health department has the authority for STD Prevention and Control as outlined in the Summary of Regulations Related to STD Prevention and Control Efforts in California. <u>https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/STD-ForLocalHealthJurisdictions.aspx</u>

# 2. Grantee's Responsibilities

The Grantee agrees to:

- A. Direct activities toward achieving the program objectives set forth by the CDPH STDCB.
- B. Use these funds in accordance with any additional guidance set forth by the CDPH STDCB regarding the granting, use and reimbursement of the STDCB local assistance funds. Additional consideration should be given to other guidance from the CDPH and Centers for Disease Control and Prevention (CDC) intended to highlight successful sexually transmitted disease (STD) prevention and control strategies or outline California specific initiatives, policies and procedures. Please find relevant programmatic guidance documents on the CDPH STDCB website: <a href="https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/STD.aspx">https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/STD.aspx</a>

# STD Local Assistance Funds – Standards and Procedures

- C. Funds shall be used to supplement, but not supplant, existing financial and resource commitments of the LHJs for sexually transmitted disease (STD) prevention and control activities. Supplanting of funds is defined (for the purposes of this agreement) as using local assistance award monies to "replace" or "take the place of" existing local funding. For example, reductions in local funds cannot be offset by the use of any dollars for the same purpose.
- D. Abide by the most recent standards of care for syphilis and CS screening, treatment, control and prevention as promulgated by:
  - 1. California Department of Public Health <u>https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/STDs-</u> <u>ClinicalGuidelines.aspx</u>
  - 2. Centers for Disease Control and Prevention https://www.cdc.gov/std/
- E. Share health advisories, health education materials, outreach, testing and linkage to care and care coordination protocols, and other products created to enhance syphilis and CS awareness, prevention, testing, linkage to care, and care coordination funded with these dollars with CDPH and other LHJs and community-based organizations (CBOs) in California. The intent of this is to allow duplication (where possible) and cross-jurisdictional reach of successful syphilis and CS interventions and activities aimed at the priority populations, clinical providers, and community partners. Source documents should be submitted to CDPH STDCB upon completion and with the annual progress report, and upon request from CDPH, as relevant.
- F. Submit information and reports as requested by the CDPH STDCB.
- G. Ensure the use of a competitive bid process in the selection of all sub grantees. If the sub grantee is one where the LHJ has a current agreement with, indicate the date the agreement was effective. If the CBO is a non-profit agency as defined by Internal Revenue Code 501(c), ensure the LHJ has a current letter on file from the Internal Revenue Service for the CBO.

Before being allowed access to CDPH PCI, all Contractor's workforce members who will be granted access to CDPH PCI must be trained in their security and privacy roles and responsibilities at Contractor's expense and must sign a confidentiality and acceptable CDPH PCI use statement. Training must be on an annual basis. Acknowledgments of completed training and confidentiality statements, which have been signed and dated by workforce members must be retained by the Contractor for a period of three (3) years following contract termination. Contractor shall provide the acknowledgements within five (5) business days to CDPH if so requested.

Contractor shall retain the workforce member's assessment documentation for a period of three (3) years following contract termination.

#### **II. Technical Security Controls**

- A. Encryption. All desktop computers, mobile computing devices, and portable electronic storage media that processes or stores CDPH PCI must be encrypted using a FIPS 140-2 certified 128 bit or higher algorithm. The encryption solution must be full disk unless approved by the CDPH Information Security Office (ISO) and Privacy Office (PO). FIPS 140-2 certified 128 bit or higher algorithm end-to-end, individual file encryption, or ISO approved compensating security controls, shall be used to protect CDPH PCI transmitted or accessed outside the Contractor's secure internal network (e.g., email, remote access, file transfer, internet/website communication tools).
- **B.** Server Security. Servers containing unencrypted CDPH PCI must have sufficient local and network perimeter administrative, physical, and technical controls in place to protect the CDPH information asset, based upon a current risk assessment/system security review.
- **C.** *Minimum Necessary.* Only the minimum amount of CDPH PCI required to complete an authorized task or workflow may be copied, downloaded, or exported to any individual device.
- **D.** *Antivirus software.* Contractor shall employ automatically updated malicious code protection mechanisms (anti-malware programs or other physical or software-based solutions) at its network perimeter and at workstations, servers, or mobile computing devices to continuously monitor and take action against system or device attacks, anomalies, and suspicious or inappropriate activities.
- E. *Patch Management.* All devices that process or store CDPH PCI must have a documented patch management process. Vulnerability patching for Common Vulnerability Scoring System (CVSS)

#### Information Privacy and Security Requirements (For Non-HIPPA/HITECH Act Contracts

"Critical" severity ratings (CVSS 9.0 - 10.0) shall be completed within forty-eight (48) hours of publication or availability of vendor supplied patch; "High" severity rated (CVSS 7.0- 8.9) shall be completed within seven (7) calendar days of publication or availability of vendor supplied patch; all other vulnerability ratings (CVSS 0.1 - 6.9) shall be completed within thirty (30) days of publication or availability of vendor supplied patch, unless prior ISO and PO variance approval is granted.

- F. User Identification and Access Control. All Contractor workforce members must have a unique local and/or network user identification (ID) to access CDPH PCI. The unique ID may be passwords, physical authenticators, or biometrics, or in the case of multi-factor authentication, some combination thereof. Should a workforce member no longer be authorized to access CDPH PCI, or an ID has been compromised, that ID shall be promptly disabled or deleted. User ID's must integrate with user role-based access controls to ensure that individual access to CDPH PCI is commensurate with job-related responsibilities.
- **G.** *CDPH PCI Destruction.* When no longer required for business needs or legal retention periods, all electronic and physical media holding CDPH PCI must be purged from Contractor's systems and facilities using the appropriate guidelines for each media type as described in the prevailing "National Institute of Standards and Technology Special Publication 800-88" "Media Sanitization Decision Matrix."
- **H.** System Inactivity Timeout. Contractor's computing devices holding, or processing CDPH PCI must be configured to automatically log-off an authenticated user or lock the device in a manner where the user must reauthenticate the user session after no more than twenty (20) minutes of user inactivity.
- I. *Warning Banners.* During a user log-on process, all systems providing access to CDPH PCI, must display a warning banner stating that the CDPH PCI is confidential, system and user activities are logged, and system and CDPH PCI use is for authorized business purposes only. User must be directed to log-off the system if they do not agree with these conditions.
- J. System Logging. Contractor shall ensure its information systems and devices that hold or process CDPH PCI are capable of being audited and the events necessary to reconstruct transactions and support after-the-fact investigations are maintained. This includes the auditing necessary to cover related events, such as the various steps in distributed, transaction-based processes and actions in service-oriented architectures. Audit trail information with CDPH PCI must be stored with read-only permissions and be archived for three (3) years after event occurrence. There must also be a documented and routine procedure in place to review system logs for unauthorized access.
- **K.** *Intrusion Detection*. All Contractor systems and devices holding, processing, or transporting CDPH PCI that interact with untrusted devices or systems via the Contractor intranet and/or the internet must be protected by a monitored comprehensive intrusion detection system and/or intrusion prevention system.

SUBJECT: SYPHILIS OUTBREAK STRATEGY GRANT FUNDING

The California Department of Public Health (CDPH), Sexually Transmitted Disease Control Branch (STDCB) is pleased to announce the intent to award State local assistance funds through the Syphilis Outbreak Strategy (SOS) Grant, a one-time appropriation in the 2022 California Budget Act for spend down from July 1, 2022 through June 30, 2027. The new (SOS) funds shall be allocated to eight local health jurisdictions (LHJs) with high rates of early syphilis or CS and to support innovative and impactful syphilis and CS prevention and control activities, with a focus on disproportionately impacted populations as determined by local or regional syphilis and CS epidemiology, which may include, but are not limited to, African American/Black people, Latinx people, American Indians/Alaska Native people, trans women, pregnant people experiencing homelessness or who use drugs, (e.g., people who exchange sex for money, drugs, or a place to stay), and gay, bisexual, and other men who have sex with men (MSM).

The amount of annual funding was determined by a non-competitive formula set forth in the 2022 California Budget Act, allocating 40% of funds based on congenital syphilis and 60% of funds based on early syphilis cases. The below chart is a summary of the SOS funding allocation for the eight identified LHJs.

# SOS FUNDING ALLOCATION

1 - Los Angeles excludes Cities of Long Beach & Pasadena

2 - San Francisco excludes City of Berkeley

In FY 2022-23, the SOS funds were appropriated at nine million for expenditure until June 30, 2027. Subsequent allocation of nine million each for FY 2023-24 and FY 2024-25 will be made available if funds are appropriated through the California state budget. In addition to the availability of appropriated funds, Grantees will need to demonstrate satisfactory performance in previous years to receive funding for subsequent years. Funds shall be used to supplement, but not supplant, existing financial and resource commitments of the LHJs for sexually transmitted disease prevention and control activities.

# **Grant Activities**

Grantees will be responsible for all grant objectives in Exhibit A – Attachment 1 – Grant Activities unless they are marked as "Optional." Grantees are encouraged to consider innovative approaches to addressing early syphilis and congenital syphilis prevention and control that may not be specifically listed in the grant activities. Innovative approaches must be described in the narrative portion of each part. The grant activities are enclosed (Exhibit A – Attachment 1 – Grant Activities) for your information and focused on the following key strategic targets:

- Part I: Health Access for All: Syphilis Testing, Treatment, and Other Health Care focuses on syphilis testing, treatment, and prophylaxis (e.g., DoxyPEP) to interrupt ongoing syphilis transmission and prevent adverse outcomes. Linkages to prenatal, preconception or family planning care are also included to prevent unintended pregnancies in people who do not want to become pregnant, and to prevent adverse outcomes for pregnant people, including congenital syphilis.
- Part II: Supportive Services: Housing, Mental Health, and Substance Use focuses on wrap-around services identified as priorities for syphilis and congenital syphilis prevention. Grantees must identify at least one activity from Part II.
- **Part III: Core Surveillance and Disease Intervention** focuses on core public health functions that may not be met by existing local, state, or federal funding and is considered an optional use of these funds.

All Grantees must adhere to the grant activities and STDCB Terms and Conditions, and any subsequent revisions, along with all instructions, policy memorandums, or directives issued by CDPH/STDCB. CDPH/STDCB will make any changes and/or additions to these guidelines in writing and, whenever possible, notification of such changes shall be made 30 days prior to implementation.

### Travel Costs in Budget

The grant budget may include funds for staff to attend meetings, statewide conferences, and trainings related to addressing early syphilis and congenital syphilis prevention and control. The budget may also include travel expenditures for case investigations or outbreak response. The amount of funds allocated for travel may be adjusted or redirected to another line item on a later date to accurately reflect actual planned trips. For additional information about travel reimbursement, please refer to Exhibit B, section 5.

### **Indirect Costs**

Beginning with FY 2014/2015, the CDPH negotiated the Indirect Cost Rate (ICR) with each LHJ to standardize the rate. This rate is applied to all contracts and grants that CDPH has with your agency. Please see the attached FY 2022-23 ICR for your use in completing your budgets. Please note that most of the LHJs apply the ICR to the total personnel costs only. However, there are a few that apply the rate to the total direct costs (this includes personnel, benefits, operating expenses, travel, and subcontracts line items). Your ICR cannot exceed the negotiated amount, nor can the application of the ICR be changed. However, you may elect to reduce the published Indirect Cost Rate percentage or not include Indirect Costs in the budget

# **Board of Resolution or Minute Order Requirements**

All agreements with LHJs must have a current Board of Resolution or Minute Order. If the grant is amended during the term of the agreement, a new Board of Resolution or Minute Order must be obtained unless the original resolution clearly states the allowance for amendments, extensions, and renewals to be approved without going through the Board of Supervisors.

#### Terms and Conditions and HIV Confidentiality Documents

To enhance coordination across CDPH programs and compliance with CDPH regulations and policies, the STD Control Branch developed guidance documents associated with local assistance funding. Please see the attached STD Terms and Conditions and Exhibit B, Budget Detail and Payment Provision. Additionally, LHJ staff who work with client-level data will be required to sign confidentiality agreements to ensure appropriate handling and data security of STD/HIV data.

The grant agreement documents have been prepared by the STD Control Branch, Business Operation Support Section (BOSS) and approved by CDPH – Contracts Management Unit. In an effort to expedite this grant agreement through the approval process, we request that the following items be returned no later than 12/12/2022 via email at STDLHJContracts@cdph.ca.gov with a cc to Adriana.Cervantes@cdph.ca.gov.

| Re:   | Accept and Expend Syphilis Outbreak Strategy (SOS) Grant |

This Resolution seeks authorization for the Department of Public Health to retroactively accept and expend funds in the amount of \$2,668,251 from the California Department of Public Health (CDPH). Due to the delay in receiving grantor approval for the budget draft, the review and approval from the Controller's office and the Mayor's office, we are requesting the accept and expend to be scheduled for the next Budget and Finance committee.

We humbly request retroactive authorization as we received the notice of award on November 14, 2022, for a project start date of July 1, 2022. When the notice of award was received on November 14, 2022, we had submitted the budget to the grantor on January 9, 2023 for approval. After discussions with CDPH on various budget details, we received budget approval from CDPH on March 8, 2023. After discussions with the Controller's office and the Mayor's office on the nature of the positions, the Controller's office approved the package and forwarded the signed package to the Mayor's office on May 16, 2023. Please contact Greg Wong, grants analyst, at greg.wong@sfdph.org for any questions about this request for retroactive authorization.
