Section 19B.2.(e) also stipulates that Departments report any accidental receipt of data obtained from face recognition technology data. Departments are asked to note any receipt of face recognition as a part of their Annual Surveillance Report process.

#### **Background on the Reporting Process**

This is the second year that departments have completed the Annual Surveillance Report process. Twenty-three city departments issued 44 reports. Forty-three reports were due by November 1, 2023 and one was due by September 27, 2023. COIT is submitting all reports on behalf of the departments.

Departments submitted 41 reports to the Clerk of the Board on or before the November 1 deadline. The San Francisco Police Department (SFPD) had one report due on September 27, 2023 and two reports due on November 1, 2023. COIT staff issued two extensions for the report due on September 27, 2023 – to October 6, 2023 and then to December 22, 2023. COIT also issued SFPD an extension for the two reports due on November 1, 2023 to December 22, 2023. All three Police Department reports were submitted for COIT staff review on December 22, 2023. The Police Department submitted three reports to the Clerk of the Board of Supervisors on January 23, 2024.

As required by Administrative Code Chapter 19B, COIT posted all Annual Surveillance Reports submitted on its website and directed departments to link to these reports on their own websites. Departments also emailed their submissions to the Clerk of the Board of Supervisors.

The following sections provide a summary of the submitted Annual Surveillance Reports, including whether Departments requested a change to their Board-approved Surveillance Technology Policy, and whether there were any violations of the policy or complaints received from the public. All submitted Annual Surveillance Reports are also attached to this document.

If you have questions on the reporting process, please direct them to Katharine Petrucione, Deputy City Administrator and Interim Director of COIT.

#### Surveillance Technology Goals ~

**8.1** Has the surveillance technology been effective at achieving its identified purpose? Yes

SFO Landside Operations; SFO GTU Ground Transportation Unit; Contractors - IBI and Transcore.

#### 8.2 In 3-5 sentences, please explain how the technology has or has not been effective

The ALPR – GTMS has been effective as a fail-safe should the Automated Vehicle Identification (AVI) readers malfunction and fail to read the transponder which the Airport affixes to certain types of permitted vehicles. The technology assists in dispute resolution in the event that the operator challenges the transponder data (i.e., number of trips the operator has made to the Airport) collected from the AVI.

The technology is also effective in tracking permitted operators that are not issued transponders, such as TNC vehicles and long distance bus carriers; tracking unpermitted operators who solicit passengers for rides; and assisting public safety agencies in investigations.

The technology enables the Airport to assess trip fees on permitted Commercial ground transportation operators. Specifically, in 2021, the Airport collected a total of \$ 22,373,523 in trip fees from ground transportation operators.

Partially 8.2 In 3-5 sentences, please explain how the technology has or has not been effective The library asserts that using passive low-frequency RFID technology for inventory control is not considered surveillance technology because it doesn't collect or process patron information. Instead, it enhances customer service by expediting self-checkout and circulation tasks, allowing both patrons and staff to handle multiple items simultaneously. Additionally, RFID security gates enhance security and streamline the alarm response process, reducing the need to manually check each item against patron records.

The Director of Security and Principal IS Business Analyst both spend about 20 hours a week working on the camera security system, more than the hours previously listed on the Impact Report. Since the Impact Report was approved, SFPUC has added additional cameras to our system as new facilities were added to the SFPUC portfolio. The increased quantity of cameras in our security system has also led our software costs to increase.
