

REVISED LEGISLATIVE DIGEST

(6/4/2013, Substituted)

[Planning Code, Zoning Map - California Pacific Medical Center: Cathedral Hill Campus]

Ordinance amending the Planning Code, Zoning Map, Sectional Maps SU02 and HT02, to reflect the creation of the Van Ness Medical Use Subdistrict (Assessor's Block No. 0695, Lot Nos. 005 and 006, and Assessor's Block No. 0694, Lot Nos. 005, 006, 007, 008, 009, 009A, and 010); to allow an increase in height at Assessor's Block No. 0695, Lot Nos. 005 and 006, in order to allow for a new seismically safe hospital; and adopting findings, including environmental findings, Section 302, findings, and findings of consistency with the General Plan and the priority policies of Planning Code, Section 101.1.

Existing Law

Currently, zoning maps in the San Francisco Planning Code do not reflect the Van Ness Medical Use Subdistrict, and proscribe a height limit of 130 feet for the block bounded by Van Ness Avenue, Geary Boulevard, Franklin and Post Streets, which is proposed for development as the California Pacific Medical Center's ("CPMC") Cathedral Hill Hospital.

Amendments to Current Law

This ordinance would amend San Francisco Planning Code Sectional Map HT02 to allow a height of 230 feet for the block proposed for development as the CPMC's Cathedral Hill Hospital. The ordinance also would amend Sectional Map SU02 to reflect the creation of the Van Ness Medical Use Subdistrict, added by separate legislation amending the San Francisco Planning Code.

Background Information

This Ordinance is substitute legislation concerning California Pacific Medical Center's (CPMC) Long Range Development Plan ("LRDP"). This Ordinance substitutes for legislation originally introduced in April 2012. After introduction of the original legislation, CPMC revised its LRDP. The revised LRDP is described generally below. The proposed revisions from April 2012 include an increase in the size of the new hospital at the St. Luke's Campus (from 80 beds to 120 beds) and a decrease in the size of the new hospital at the Cathedral Hill Campus (from 555 beds to 274 – 304 beds).

CPMC currently operates four acute care medical centers in San Francisco: the California Campus, the Pacific Campus, the St. Luke's Campus, and the Davies Campus. As part of its program to meet state seismic readiness deadlines, CPMC's proposes a five campus system with three acute care hospitals – at Davies, St. Luke's, and a new hospital at the proposed

Cathedral Hill Campus – providing approximately 692 licensed beds and three full-service emergency departments (one at each of the acute care hospitals). Once the proposed hospital is constructed at the Cathedral Hill Campus, the acute care services at the California and Pacific campuses will be transferred to the Cathedral Hill Hospital. The Pacific Campus's existing acute care hospital would undergo renovation and reuse as an ambulatory care center. CPMC would sell the California Campus after the transfer of acute care and non-acute care services to the Cathedral Hill and/or the Pacific Campus. In the near term, CPMC would also construct a new medical office building at Cathedral Hill, a new medical office building at Davies, and at St. Luke's, replace the existing hospital with a new 142-foot, 120 bed hospital and construct a new medical office building. More details regarding the LRDP, including plans and renderings, can be found on the Planning Department's website at cpmc.sfplanning.org.

This ordinance concerns the proposed Cathedral Hill Campus at Van Ness Avenue and Geary Boulevard/Street. The Cathedral Hill Campus includes a new acute care hospital on the block bounded by Van Ness, Geary, Franklin and Post Streets, a new medical office building on the block bounded by Van Ness, Geary, Cedar and Polk Streets, and a pedestrian tunnel underneath Van Ness Avenue connecting the two facilities. Additional medical office space for the campus will be provided within the existing building at 1375 Sutter Street.

The proposed Cathedral Hill Hospital will be a 274 to 304-bed, 226' tall, 12-story, approximately 730,888 gross square foot acute care hospital with related hospital space, including 276 parking spaces on three underground levels. The proposed medical office building, across Van Ness Avenue, will be nine stories, approximately 130' tall, and will contain approximately 261,691 gross square feet of floor area and 542 off-street parking spaces on seven underground levels.

Among other approvals, the Cathedral Hill Campus will require ordinances to amend the San Francisco General Plan and Planning Code. CPMC also seeks approval of a development agreement with the City.
