1 [Acceptance of streets and roadway structures for maintenance and liability purposes.]

2
3 **Ordinance accepting for maintenance and liability purposes the streets and roadway**
4 **structures listed herein, subject to specified limitations and conditions, pursuant to**
5 **California Streets and Highways Code Section 1806 and San Francisco Administrative**
6 **Code Sections 1.51 et seq.; and approving Department of Public Works Order No.**
7 **178,355.**

8 NOTE: Additions are single-underline italics Times New Roman;
9 deletions are ~~strike-through italics Times New Roman~~.
10 Board amendment additions are double-underlined;
11 Board amendment deletions are ~~strikethrough normal~~.

11 Be it ordained by the People of the City and County of San Francisco:

12 Section 1. **Findings.** (a) The Board of Supervisors has reviewed and approves the
13 certification and recommendation of the City Engineer and Director of the Department of
14 Public Works concerning the acceptance for maintenance and liability purposes of the street
15 segments and roadway structures listed herein and as contained in Department of Public
16 Works Order No. 178,355, dated October 29, 2009, a copy of which is in Clerk of the Board of
17 Supervisors File No. 100009 and is incorporated herein by reference.

18 Section 2. **Acceptance of Streets for Maintenance and Liability Purposes.**

19 (a) Pursuant to California Streets and Highways Code Section 1806, San Francisco
20 Administrative Code Sections 1.51 et seq., and Department of Public Works Order No.
21 178,355, dated October 29, 2009, the Board of Supervisors hereby accepts the following
22 street segments for maintenance and liability purposes, subject to the limitations and
23 conditions set forth in Subsection (b).

(b) The Board accepts the street segments listed above subject to the following limitations: (1) acceptance is only for that portion of the street which is improved to City standards from back of curb to back of curb; (2) privately maintained sewers are excluded from acceptance, (3) encroachments that are permitted, unpermitted, or both are excluded from acceptance; and (4) the acceptance of the street does not obviate, amend, alter, or in any other way affect existing maintenance agreements between the City and parties to such maintenance agreements.

(c) The Department of Public Works is hereby directed to add the street segments identified herein onto its official list of City-maintained streets.

Section 3. Acceptance of Roadway Structures for Maintenance and Liability

Purposes. (a) Pursuant to California Streets and Highways Code Section 1806, San Francisco Administrative Code Sections 1.51 et seq., and the Department of Public Works Order No. 178,355, dated October 29, 2009, the Board of Supervisors hereby accepts the following roadway structures for maintenance and liability purposes, subject to the limitations and conditions set forth in Subsection (b).

LEGISLATIVE DIGEST

[Acceptance of streets and roadway structures for maintenance and liability purposes.]

Ordinance accepting for maintenance and liability purposes the streets and roadway structures listed herein, subject to specified limitations and conditions, pursuant to California Streets and Highways Code Section 1806 and San Francisco Administrative Code Sections 1.51 et seq.; and approving Department of Public Works Order No.

178,355

Existing Law

In accordance with State and local law, the Board of Supervisors via legislation accepted for City maintenance and liability purposes most of the public street segments in San Francisco that meet the City's specifications and plans for street design. Other public streets that do not meet these requirements are unaccepted public right-of-way, which remains the responsibility of the fronting property owner. The City follows a similar process to accept roadway structures, such as retaining walls and stairways, for City maintenance and liability purposes.

Amendments to Current Law

The legislation would constitute formal acceptance of the listed street segments and roadway structures for maintenance purposes pursuant to the California Streets and Highways Code section 1806, San Francisco Administrative Code section 1.52 and DPW Order No. 178,355. Approval of this Ordinance would allow the City to expend its financial resources, including gas tax and road fund revenues, to improve and maintain the specified street segments and roadway structures. The street acceptance would be subject to certain limitations specified in the legislation.

ORDER NO. 178,355

TRANSMITTING ORDINANCE TO THE BOARD OF SUPERVISORS RECOMMENDING ACCEPTANCE FOR MAINTENANCE AND LIABILITY PURPOSES OF 354 STREET SEGMENTS AS NOTED IN ATTACHED APPENDIX "A"; AND RECOMMENDING ACCEPTANCE FOR MAINTENANCE AND LIABILITY PURPOSES OF 17 ROADWAY STRUCTURES AS NOTED IN ATTACHED APPENDIX "B".

ACCEPTANCE FOR MAINTENANCE AND LIABILITY PURPOSES OF STREET SEGMENTS

The Department of Public Works (DPW) identified, conducted, and completed a survey of 3,635 unaccepted street segments for compliance with the City's Street Acceptance Standards as follows:

- A. Minimum street width of 40 feet including sidewalks.
- B. Minimum paved width of 26 feet (one lane).
- C. Curbs on both sides of the street
- D. At least one four-foot sidewalk
- E. Minimum pavement thickness of 6 inches for residential streets

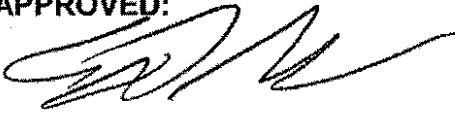

Using a checklist of visual features that indicate the extent to which street segments meet the Street Acceptance Standards, DPW determined that 354 street segments could be accepted for maintenance and liability purposes. Refer to Appendix "A" for a detailed report and a list of the 346 street segments.

ACCEPTANCE FOR MAINTENANCE AND LIABILITY PURPOSES OF ROADWAY STRUCTURES

The Department of Public Works (DPW) identified, conducted, and completed an assessment of 17 street structures for compliance with Street Structures Acceptance Procedures/Criteria. Refer to Appendix "B" for the Street Structures Acceptance Procedures/Criteria report and a list of the 17 street of structures. DPW has determined that the 17 street structures conform to the Street Structures Acceptance Procedures/Criteria.

This DPW Order hereby transmits the attached Ordinance, Appendix "A", and Appendix "B" to the Board of Supervisors recommending acceptance for maintenance and liability purposes of the 355 street segments and 17 street structures attached hereto.

TABLE OF CONTENTS

Accepted Streets of San Francisco	3
Street Acceptance Standards	3
Unaccepted Streets Survey Project	3
Recommendation	4
Table A	6

Accepted Streets of San Francisco

The Department of Public Works (DPW) of the City and County of San Francisco assumes responsibility only for those streets that were built to its standards, inspected by the City Engineer, and formally accepted for maintenance by Ordinance of the Board of Supervisors.

Board of Supervisor Ordinance # 138-98 adopted the Official Record of Accepted Streets in the City and County of San Francisco, the publication entitled "City Maintained Streets", dated October 31, 1997. In addition, Board of Supervisors accepted 1,191 street segments listed in DPW Order #170,357 and 169 street segments listed in DPW Order #170,657. The "City Maintained Streets" publication dated October 31, 1997 was updated in May 1998 to include the street segments in DPW Orders #170,357 and #170,657. Street segments not listed in said publication on the effective date are deemed unaccepted for street maintenance purposes.

Street Acceptance Standards

In order for a street to be accepted for maintenance, it must be built to City standards. These standards include:

- A. Minimum street width of 40 feet including sidewalks;
- B. Minimum paved width of 26 feet (one lane);
- C. Curbs on both sides of the street;
- D. At least one four-foot wide sidewalk;
- E. Minimum pavement thickness of 6-inches for residential streets or 8 inches for arterials.

Additional streets or street segments may be accepted for street maintenance purposes only if the City Engineer certifies that such street or street segments are constructed to City standards pursuant to San Francisco Administrative Code Section 1.52 or a successor ordinance and the Board of Supervisors accepted such streets or segments pursuant to applicable local and state law.

Unaccepted Streets Survey Project

DPW identified 3,635 Unaccepted Street Segments. During the summers of 2004 and 2005, interns completed field surveying the 3,635 Unaccepted Street Segments using a checklist of visual features that indicated the extent to which those streets met Street Acceptance Standards. Teams of between two and four members collected visual data,

took photographs, measured street widths, identified existing utilities, access information, and other notes. The data was input into an Access database. The survey team could not collect information on Standard E – “Minimum pavement thickness of 6-inches for residential streets or 8 inches for arterials” because it required core drilling the street pavement.

The information was input into an Access database. From this database, analysis was performed to determine how many DPW segments met the Street Acceptance Standards A, B, C, D and E. Although standard E was not verified, it was assumed that the pavement thicknesses met the standard. From the list of 3,635 Unaccepted Street Segments, 334 street segments met the Street Acceptance Standards. An additional 20 segments which included street segments along The Great Highway and streets that were previously under the old Central Freeway have been recommended for acceptance even though they did not meet the Street Acceptance Standards. The following is a list of the 20 street segments:

Recommendation

The list of 354 street segments in Table A represents those street segments that either meet Street Acceptance Standard's A, B, C and D or have been certified by the City Engineer to be accepted. Although Standard E was not verified for the 354 street

segments, the Director of Public Works is recommending that the Board of Supervisors accepts the list of 354 street segments for maintenance.

Acceptance of Street Structures of San Francisco

The Department of Public Works (DPW) of the City and County of San Francisco assumes responsibility only for those street structures that were built to its standards, inspected by the City Engineer, and formally accepted for maintenance by Ordinance of the Board of Supervisors.

Street Structures Acceptance Procedures/Criteria

Street structures in the City's right-of-way and constructed by the City are considered to be City-owned structures and maintained by the City.

For street structures in the City's right-of-way and constructed by private entities, property owner(s) may request that the City accept the structures for City maintenance only if the structure meets or exceeds engineering standards and the Board of Supervisors adopts legislation (via Ordinance) accepting the structures based on a recommendation from the Director of Public Works and certification of the City Engineer.

In order for a street structure to be accepted for maintenance, private entities must submit an individual request for each structure in writing. The City will evaluate the structure and determine whether it meets engineering standards for acceptance using the following procedure:

1. DPW–Bureau of Engineering will identify if a particular street structure is City-owned from available resources which include, but not are limited to, the Roadway Structures Information System (RSIS) database, DPW archives, and Bureau of Street Use and Mapping's (BSM) Records.
2. If there is no documentation that the structure was accepted by the City, the structure may be accepted if all of the following requirements are met:
 - The structure is in the City's right-of-way;
 - The structure meets the latest edition of the San Francisco Building Code, Occupational Safety and Health Administration Regulations (29 CFR Parts 1910-1926), and Americans with Disabilities Act Standards for Accessible Design;
 - Field condition assessment performed by an authorized City inspector(s) determines that the structure is in good condition with a condition assessment score of 70 or above (100 being a perfect score for a structure with no observable deficiency);
OR
 - If the structure is in poor condition with a condition assessment score of 69 or below, the structure's owner(s) will be required to make necessary

repairs and/or improvements to improve the structure's condition assessment score to 90 or above before the City will consider accepting the structure for maintenance.

3. If the structure meets all the requirements listed in item 2 above, the City Engineer will prepare a DPW Order which lists each structure that has been recommended for acceptance for review and approval by the Director of Public Works. Then, the Director of Public Works will transmit legislation to the Board of Supervisors. Upon review of the ordinance, the Board of Supervisors approves the list of structures for maintenance by the Department of Public Works.

Background

Bernal Heights Street Improvement Project

The Bernal Heights Street Improvement Project involved constructing the streets and infrastructure of portions of the Bernal Heights area up to City standards so that emergency vehicles and other public services can be safely provided to the community. The improvements included upgrading substandard streets and enhancing public access to open space, public stairs, and other rights-of-way.

In 1988, the Board of Supervisors designated the Bernal Heights East and South Slope as Survey Areas for the purpose of developing redevelopment projects in these areas (Res. 906-88). The Redevelopment Agency identified three sub-areas for initial improvements (Figure 1): The Brewster/Joy Area on the East Slope (Figure 2); the Banks/Chapman Area on the South Slope (Figure 3); and the Bradford/Jarboe Area on the Southeast Slope. The Finance Committee of the Board of Supervisors approved funds for the Planning Department to coordinate the infrastructure improvement process.

Under two construction contracts, improvements were made at the Bernal Heights Area.

Coso Avenue Rockfall Emergency Remediation

In November 2004, it was reported that the slope within the public right-of-way between the curbside of Coso Avenue and the property of 2-4 Winfield Street was failing. As a result, an emergency was declared (DPW Order No. 175,107), and the City issued a contract to build a permanent retaining wall at that location to mitigate the hazardous condition. Figure 4 shows the Coso Ave. Retaining Wall on the North Slope of the Bernal Heights Park.

The construction was completed on March 29, 2006 in accordance with the plans and specifications, and to the satisfaction of the Director of Public Works. The Certification

of Completion (Order No. 176,409) was signed by the Director of Public Works on October 11, 2006.

Discussion

DPW has determined that the list of 17 street structures in Tables A and B conform to Street Structures Acceptance Procedures/Criteria.

Recommendation

We recommend that all 17 street structures listed in Tables A and B be accepted and the improvements to railings/guardrails made upon approval of acceptance.

Table A – Bernal Heights Street Improvement Project

Brewster/Joy Area on the East Slope			
Structure Name	Location of Structure (Nearest Cross Streets)	Structure Type	Assigned Structure ID
Rutledge Street Wall and Stairs	Between Brewster Street and Holladay Ave.	Retaining Wall /Stairs	366A
Rutledge Street Wall and Stairs	Between Brewster Street and Holladay Ave.	Retaining Wall /Stairs	366B
Brewster Street Wall and Stairs	Between Costa Street and Rutledge Street	Retaining Wall /Stairs	367
Faith Street Wall and Stairs	Between Brewster Street and Holladay Ave.	Retaining Wall /Stairs	368
Joy Street Wall and Stairs	Between Brewster Street and Holladay Ave.	Retaining Wall /Stairs	369
Brewster Street Guardrail	Between Joy Street and Faith Street	Guardrail/wall	370
Mayflower Street Stair	Between Franconia Street and Holladay Ave.	Stairs	371
Banks/Chapman Area on the South Slope			
Nevada Street Stairway	Between Chapman Street and Powhattan Ave.	Retaining Wall /Stairs	372

Rosenkranz Street Stairway	Between Chapman Street and Bernal Heights Blvd	Retaining Wall /Stairs	373A
Rosenkranz Street Stairway	Between Chapman Street and Bernal Heights Blvd	Retaining Wall /Stairs	373B
Upper Prentiss Stairway	Between Chapman Street and Bernal Heights Blvd	Retaining Wall /Stairs	374A
Upper Prentiss Stairway	Between Chapman Street and Bernal Heights Blvd	Retaining Wall /Stairs	374B
Gates Street Stairway	Between Powhattan Ave. and Bernal Heights Blvd	Retaining Wall /Stairs	375
Powhattan Ave. (East) Wall	Between Prentiss Street and Nevada Street	Retaining Wall	376
Powhattan Ave. (West) Wall	Between Gates Street and Prentiss Street	Retaining Wall	377
Powhattan Ave. Wall	Between Nevada Street and Bradford Street	Retaining Wall	378

Table B – Coso Avenue Rockfall Emergency Remediation

Coso Ave. Retaining Wall			
Coso Ave. Retaining Wall	Between Winfield Street and Prospect Ave	Retaining Wall	379
