

Proposition 47
Criminal Sentences. Misdemeanor Penalties. Initiative Statute.

Yes/No Statement

A **YES** vote on this measure means: Criminal offenders who commit certain nonserious and nonviolent drug and property crimes would be sentenced to reduced penalties (such as shorter terms in jail). State savings resulting from the measure would be used to support school truancy and dropout prevention, victim services, mental health and drug abuse treatment, and other programs designed to keep offenders out of prison and jail.

A **NO** vote on this measure means: Penalties for offenders who commit certain nonserious and nonviolent drug and property crimes would not be reduced.

Summary of Legislative Analyst's Estimate of Net State and Local Government Fiscal Impact

- Net state criminal justice system savings that could reach the low hundreds of millions of dollars annually. These savings would be spent on school truancy and dropout prevention, mental health and substance abuse treatment, and victim services.
- Net county criminal justice system savings that could reach several hundred million dollars annually.

Ballot Label

Fiscal Impact: State and county criminal justice savings potentially in the high hundreds of millions of dollars annually. State savings spent on school truancy and dropout prevention, mental health and substance abuse treatment, and victim services.

BACKGROUND

There are three types of crimes: felonies, misdemeanors, and infractions. A felony is the most serious type of crime. Existing law classifies some felonies as “violent” or “serious,” or both. Examples of felonies currently defined as both violent and serious include murder, robbery, and rape. Felonies that are not classified as violent or serious include grand theft (not involving a gun) and possession of illegal drugs. A misdemeanor is a less serious crime. Misdemeanors include crimes such as assault and public drunkenness. An infraction is the least serious crime and is usually punished with a fine. For example, possession of less than one ounce of marijuana for personal use is an infraction.

Felony Sentencing. In recent years, there has been an average of about 220,000 annual felony convictions in California. Offenders convicted of felonies can be sentenced as follows:

- ***State Prison.*** Felony offenders who have current or prior convictions for serious, violent, or sex crimes can be sentenced to state prison. Offenders who are released from prison after serving a sentence for a serious or violent crime are supervised in the community by state parole agents. Offenders who are released from prison after serving a sentence for a crime that is not a serious or violent crime are usually supervised in the community by county probation officers. Offenders who break the rules that they are required to follow while supervised in the community can be sent to county jail or state prison, depending on their criminal history and the seriousness of the violation.
- ***County Jail and Community Supervision.*** Felony offenders who have no current or prior convictions for serious, violent, or sex offenses are typically sentenced to county

jail or the supervision of a county probation officer in the community, or both. In addition, depending on the discretion of the judge and what crime was committed, some offenders who have current or prior convictions for serious, violent, or sex offenses can receive similar sentences. Offenders who break the rules that they are required to follow while supervised in the community can be sent to county jail or state prison, depending on their criminal history and the seriousness of the violation.

Misdemeanor Sentencing. Under current law, offenders convicted of misdemeanors may be sentenced to county jail, county community supervision, a fine, or some combination of the three. Offenders on county community supervision for a misdemeanor crime may be placed in jail if they break the rules that they are required to follow while supervised in the community.

In general, offenders convicted of misdemeanor crimes are punished less severely than felony offenders. For example, misdemeanor crimes carry a maximum sentence of up to one year in jail while felony offenders can spend much longer periods in prison or jail. In addition, offenders who are convicted of a misdemeanor are usually supervised in the community for fewer years and may not be supervised as closely by probation officers.

Wobbler Sentencing. Under current law, some crimes—such as check forgery and being found in possession of stolen property—can be charged as either a felony or a misdemeanor. These crimes are known as “wobblers.” Courts decide how to charge wobbler crimes based on the details of the crime and the criminal history of the offender.

PROPOSAL

This measure reduces penalties for certain offenders convicted of nonserious and nonviolent property and drug crimes. The measure also allows certain offenders who have been previously

convicted of such crimes to apply for reduced sentences. In addition, the measure requires any state savings that result from the measure be spent to support truancy (unexcused absences) prevention, mental health and substance abuse treatment, and victim services. These changes are described in more detail below.

Reduction of Existing Penalties

This measure reduces certain nonserious and nonviolent property and drug offenses from wobblers or felonies to misdemeanors. The measure limits these reduced penalties to offenders who have not committed certain severe crimes listed in the measure—including murder and certain sex and gun crimes. Specifically, the measure reduces the penalties for the following crimes:

- ***Grand Theft.*** Under current law, theft of property worth \$950 or less is often charged as petty theft, which is a misdemeanor or an infraction. However, such crimes can sometimes be charged as grand theft, which is generally a wobbler. For example, a wobbler charge can occur if the crime involves the theft of certain property (such as cars) or if the offender has previously committed certain theft-related crimes. This measure would limit when theft of property of \$950 or less can be charged as grand theft. Specifically, such crimes would no longer be charged as grand theft solely because of the type of property involved or because the defendant had previously committed certain theft-related crimes.
- ***Shoplifting.*** Under current law, shoplifting property worth \$950 or less (a type of petty theft) is often a misdemeanor. However, such crimes can also be charged as

- burglary, which is a wobbler. Under this measure, shoplifting property worth \$950 or less would always be a misdemeanor and could not be charged as burglary.
- ***Receiving Stolen Property.*** Under current law, individuals found with stolen property may be charged with receiving stolen property, which is a wobbler crime. Under this measure, receiving stolen property worth \$950 or less would always be a misdemeanor.
 - ***Writing Bad Checks.*** Under current law, writing a bad check is generally a misdemeanor. However, if the check is worth more than \$450, or if the offender has previously committed a crime related to forgery, it is a wobbler crime. Under this measure, it would be a misdemeanor to write a bad check unless the check is worth more than \$950 or the offender had previously committed three forgery related crimes, in which case they would remain wobbler crimes.
 - ***Check Forgery.*** Under current law, it is a wobbler crime to forge a check of any amount. Under this measure, forging a check worth \$950 or less would always be a misdemeanor, except that it would remain a wobbler crime if the offender commits identity theft in connection with forging a check.
 - ***Drug Possession.*** Under current law, possession for personal use of most illegal drugs (such as cocaine or heroin) is a misdemeanor, a wobbler, or a felony—depending on the amount and type of drug. Under this measure, such crimes would always be misdemeanors. The measure would not change the penalty for possession of marijuana, which is currently either an infraction or a misdemeanor.

We estimate that about 40,000 offenders annually are convicted of the above crimes and would be affected by the measure. However, this estimate is based on the limited available data and the actual number could be thousands of offenders higher or lower.

Change in Penalties for These Offenders. As the above crimes are nonserious and nonviolent, most offenders are currently being handled at the county level. Under this measure, that would continue to be the case. However, the length of sentences—jail time and/or community supervision—would be less. A relatively small portion—about one-tenth—of offenders of the above crimes are currently sent to state prison (generally, because they had a prior serious or violent conviction). Under this measure, none of these offenders would be sent to state prison. Instead, they would serve lesser sentences at the county level.

Resentencing of Previously Convicted Offenders

This measure allows offenders currently serving felony sentences for the above crimes to apply to have their felony sentences reduced to misdemeanor sentences. In addition, certain offenders who have already completed a sentence for a felony that the measure changes could apply to the court to have their felony conviction changed to a misdemeanor. However, no offender who has committed a specified severe crime could be resentenced or have their conviction changed. In addition, the measure states that a court is not required to resentence an offender currently serving a felony sentence if the court finds it likely that the offender will commit a specified severe crime. Offenders who are resentenced would be required to be on state parole for one year, unless the judge chooses to remove that requirement.

Funding for Truancy Prevention, Treatment, and Victim Services

The measure requires that the annual savings to the state from the measure, as estimated by the Governor's administration, be annually transferred from the General Fund into a new state fund, the Safe Neighborhoods and Schools Fund. Under the measure, monies in the fund would be divided as follows:

- 25 percent for grants aimed at reducing truancy and drop-outs among K-12 students in public schools.
- 10 percent for victim services grants.
- 65 percent to support mental health and drug abuse treatment services that are designed to help keep individuals out of prison and jail.

FISCAL EFFECTS

This measure would have a number of fiscal effects on the state and local governments. The size of these effects would depend on several key factors. In particular, it would depend on the way individuals are currently being sentenced for the felony crimes changed by this measure. Currently, there is limited data available on this, particularly at the county level. The fiscal effects would also depend on how certain provisions in the measure are implemented, including how offenders would be sentenced for crimes changed by the measure. For example, it is uncertain whether such offenders would be sentenced to jail or community supervision and for how long. In addition, the fiscal effects would depend heavily on the number of crimes affected by the measure that are committed in the future. Thus, the fiscal effects of the measure described below are subject to significant uncertainty.

State Effects of Reduced Penalties

The proposed reduction in penalties would affect state prison, parole, and court costs.

State Prison and Parole. This measure makes two changes that would reduce the state prison population and associated costs. First, changing future crimes from felonies and wobblers to misdemeanors would make fewer offenders eligible for state prison sentences. We estimate that this could result in an ongoing reduction to the state prison population of several thousand inmates within a few years. Second, the resentencing of inmates currently in state prison could result in the release of several thousand inmates, temporarily reducing the state prison population for a few years after the measure becomes law.

In addition, the resentencing of individuals currently serving sentences for felonies that are changed to misdemeanors would temporarily increase the state parole population by a couple thousand parolees over a three-year period. The costs associated with this increase in the parole population would temporarily offset a portion of the above prison savings.

State Courts. Under the measure, the courts would experience a one-time increase in costs resulting from the resentencing of offenders and from changing the sentences of those who have already completed their sentences. However, the above costs to the courts would be partly offset by savings in other areas. First, because misdemeanors generally take less court time to process than felonies, the proposed reduction in penalties would reduce the amount of resources needed for such cases. Second, the measure would reduce the amount of time offenders spend on county community supervision, resulting in fewer offenders being supervised at any given time. This would likely reduce the number of court hearings for offenders who break the rules that they are

required to follow while supervised in the community. Overall, we estimate that the measure could result in a net increase in court costs for a few years with net annual savings thereafter.

Summary of State Fiscal Effects. In total, we estimate that the effects described above could eventually result in net state criminal justice system savings in the low hundreds of millions of dollars annually, primarily from an ongoing reduction in the prison population of several thousand inmates. As noted earlier, any state savings would be deposited in the Safe Neighborhoods and Schools Fund to support various purposes.

County Effects of Reduced Penalties

The proposed reduction in penalties would also affect county jail and community supervision operations, as well as those of various other county agencies (such as public defenders and district attorneys' offices).

County Jail and Community Supervision. The proposed reduction in penalties would have various effects on the number of individuals in county jails. Most significantly, the measure would reduce the jail population as most offenders whose sentence currently includes a jail term would stay in jail for a shorter time period. In addition, some offenders currently serving sentences in jail for certain felonies could be eligible for release. These reductions would be slightly offset by an increase in the jail population as offenders who would otherwise have been sentenced to state prison would now be placed in jail. On balance, we estimate that the total number of statewide county jail beds freed up by these changes could reach into the low tens of thousands annually within a few years. We note, however, that this would not necessarily result in a reduction in the county jail population of a similar size. This is because many county jails

are currently overcrowded and therefore release inmates early. Such jails could use the available jail space created by the measure to reduce such early releases.

We also estimate that county community supervision populations would decline. This is because offenders would likely spend less time under such supervision if they were sentenced for a misdemeanor instead of a felony. Thus, county probation departments could experience a reduction in their caseloads of tens of thousands of offenders within a few years after the measure becomes law.

Other County Criminal Justice System Effects. As discussed above, the reduction in penalties would increase workload associated with resentencing in the short run. However, the changes would reduce workload associated with both felony filings and other court hearings (such as for offenders who break the rules of their community supervision) in the long run. As a result, while county district attorneys' and public defenders' offices (who participate in these hearings) and county sheriffs (who provide court security) could experience an increase in workload in the first few years, their workload would be reduced on an ongoing basis in the long run.

Summary of County Fiscal Effects. We estimate that the effects described above could result in net criminal justice system savings to the counties of several hundred million dollars annually, primarily from freeing jail capacity.

Effects of Increased Services Funded by the Measure

Under the measure, the above savings would be used to provide additional funding for truancy prevention, mental health and drug abuse treatment, and other programs designed to keep offenders out of prison and jail. If such funding increased participation in these programs

and made participants less likely to commit future crimes, the measure could result in future additional savings to the state and counties.
