Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

This is an illogical approach to a complex problem. Perhaps consider the approach Seattle is taking to trying to keep prices more affordable...use development restrictions and build more units. Yes. It is ok to Manhattanize

little ole San Francisco.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our

existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

The city's housing crisis has been a disaster in slow motion, and we've had many years to develop a strategy. We don't need more delays to study the problem. Doing nothing is the problem.

I would support significant restrictions on no-fault evictions.

I would support a tax on vacant units

I would support restrictions on AirBnB rentals

I would support strong incentives for developers to build more affordable housing. Double height limits. Reduce mandatory parking minimums. Fast-track approval process. If they're building 50% BMR on-site there's not much I would object to. People are more important than skylines.

There are a lot of things you can do that make sense. This is not one of them. Blocking construction over a Walgreens or a torn-down KFC is nonsensical when people need places to live, and if we don't build "luxury" housing (a disingenuous label when you can't buy anything in the neighborhood for under half a million dollars), we'll just have more wealthy people competing for older houses to remodel.

Please, do better than this.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

Every million dollar condo built is one less millionaire out-bidding an existing neighbor for their apartment. This is especially true for developments that replace warehouses, or abandoned buildings.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing more expensive.

This is exactly the type of policy that got us to be such an expensive city to live in. San Francisco is growing rapidly and we need to expend housing in areas that are dense, have transit, and have access to jobs.

Thank you.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

I would add that this "solution" will just move "gentrification" into the existing housing stock because the market forces have a high demand for any kind of housing new or old. The Mission District has great weather and is close to jobs and well served by MUNI. A better approach public policy approach to preventing "gentrification" is to promote more violent crime, eliminate public transit services and stop spending on public infrastructure. That way individuals with higher incomes will choose to live in other neighborhood so problem solved.

Thank you

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

I am a renter in San Francisco, and have been for 25 years. Please reject the utterly misguided Mission Moratorium legislation introduced by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing

housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

As a San Francisco native, I believe that we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. Simple supply and demand economics are at play in the city and have always been. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Please open a book and learn about the market forces that impact the cost of housing in this region. This affordability crisis is the result of supply shortage in the face of high demand and limiting new housing stock while continuing to create new jobs in the five county bay region is boneheaded populism that ensures this decades-old problem persists for future generations.

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

As the owner of two properties in the moratorium area, I would selfishly love nothing more than for this to pass, as increased demand and lack of supply would drive up property prices even further.

I love San Francisco though, and would like to see it grow with intelligent residential in-fill, as most of the plans for new housing in the Mission are. I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. It's misguided, and I am shocked that he's pushing something so obviously disadvantageous to his own constituents. For his own good please stop him from harming more people.

Thank you.

-Brad

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

The reason we are in the current housing crisis is that there are (and historically have been) extremely high barriers to new housing development. Adding additional barriers will only exacerbate the issue. We don't have enough housing for the number of people that wish to call San Francisco home. It's simple math. Please reject the Moratorium.

I agree with HAC's statements below:

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Just remember, only people with money can gentrify real estate, if you want to slow down gentrification you must build more market rate housing. Moratoriums will not stop, they only pent up the demand.

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

The last thing we need in the Mission is to stop, or even pause, building housing. Thousands of people have moved to the Mission in the past few years; but we have built very little to house them. We need housing for the

many kinds of people who want to live in the Mission.

There are plenty of parking lots, underused parcels, several gas stations, and even public sites. Let's build some housing.

I'd be happy to take you on a tour of sites, on foot or by bike.

Thank you.

Gillian Gillett

Mission resident since 1997

Parent of two public school kids born at St. Luke's Hospital

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

I'm an immigrant and refugee. I came to this country when I was 6 years old. My family didn't speak English. We lived in a section 8 apartment and my parents each worked three jobs to make ends meet.

I'm writing because David Campos's proposed moratorium on market-rate housing in the Mission isn't for immigrants or the working class. The only people it protects and enriches are the landlords and existing property owners.

8,000 people have been displaced from the Mission in the last decade. And yet, nowhere near 8,000 new units have been built. Newer residents are mostly taking over existing buildings. Failure to build for the rich doesn't mean the rich won't come; they'll just come for your apartment instead of a shiny new one. Landlords will squeeze out existing renters even harder to take advantage of the skyrocketing prices. Meanwhile, a further exacerbated housing shortage will incrementally raise rents for everyone in the Bay Area.

Doubling down on a decades-long housing shortage is not a solution. The entire Bay Area needs more housing: low-income, moderate-income, and market-rate. Let's build communities for a wide range of people instead of just entrenched landlords and multimillionaires.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our

existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

I have already had to move out of San Francisco (to Daly City) due to the increasing cost of housing caused by government interference in the economy.

Thank you.

ID: 14d53ec1dd19b603

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

I'm a resident of Oakland. Partially that's because I enjoy the sunshine and the flatness, but partially it's because I can't afford to live in San Francisco. My hope is that you'll listen to me not because I can vote for or against you, but because I'm a resident of the Bay Area, a victim of the affordability crisis, and I want more than anything to help build an affordable Bay Area for my community and all of our futures.

I understand the motivation for a moratorium on new market rate housing in the Mission. It's a neighborhood that has undergone radical change in the last 10 years, with displacement and cultural degradation at every turn. Why would we build new units for rich people when residents can't afford to live here now?

The answer is that market rate housing lowers costs for everyone else. I'll say that again: New Market rate housing lowers housing costs for everyone, from the poor to the rich to everyone in between. Every rich person living in a new apartment in the Mission is one less rich person out in the community bidding up my housing costs. If we had built enough market rate housing in the last 30 years, we wouldn't be in the mess we're in today.

The reason I'm writing to you, even though I'm not an SF resident, is twofold.

First, we're making local decisions that add up to a regional problem. The choices you make in the mission affect me in Oakland.

Second, and most importantly, you are the only ones who will decide if we have affordable housing in this region. It's not the governor, or the president, or Congress that decides - it's the housing boards, the zoning commissions, the historical preservation committees, the city councils, making decisions day in and day out about who can and who cannot build what and where that add up to the devastating crisis we find ourselves in.

I beg of you, please support the only solution that will lead to a truly affordable Bay Area: housing, housing, and

more housing. Moratoriums, height limits, and parking mandates benefit no one but incumbent property owners, and do nothing but violence to the lives and livelihoods of the at-risk populations we are trying to serve. We need more building, in every city and in every region of the Bay. We need dense development, served by transit, and we need a lot of it, for decades. Otherwise, San Francisco will be nothing but an office park, a museum, and playground for overpaid techies (like myself). The art, and culture, and diversity that every resident of the Bay Area treasures will wither and die without adequate - which means massive - development of new housing.

Please reject the mission moratorium.

Best,

David Shere

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

There are good reason that San Francisco is a damn great place to live We haven't made it easy for developers

here. They wanted to build houses all along the coast, but there were some good politicians who said "NO", preserve the great things that we have. Please help to keep San Francisco great. Not every space, every beach, needs to satisfy the bubble's demands.

Its time to recognize that development is going too fast, the breakneck speed of building is creating error that will be around for a long time. Please SUPPORT THE MISSION MORATORIUM proposed by David Campos.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

The road to ending the housing crisis involves strong tenant protections and DRAMATICALLY MORE housing construction, not moratoriums. We need to figure out how to build tens thousands of units each year.

I oppose the Mission Moratorium legislation introduced on May 5th by Supervisor Campos, and I urge you to reject it. Stopping market-rate housing production in the Mission is the opposite of what we should be doing to solve the housing crisis.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement.

A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I lived in San Francisco for nearly 13 years - 4 of which were in the Mission - and found I had to move Oakland due to increasing rent costs. I argue that if there was more development in San Francisco - including the Mission - rather than putting a moratorium on development, it would reduce the pressures currently being felt. While they wouldn't help so much now, they would, I contend, help over the long-term. Please reject the shortsightedness of the proposal being put forth by Campos.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Lets focus on finding positive solutions for affordable housing that don't deplete our already tiny amount of housing stock. We can start by finding real solutions to replacing Redevelopment, and ensure a sustainable and productive program for the development of affordable housing.

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our

existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Demagogue Campos. A moratorium will only make existing housing even more scarce and expensive.

We are tens of thousands of units short. Saying that more building didn't work when we've built only a few hundred is either deceitful or willfully ignorant.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

I believe that we should require all developers to set aside 1/4 of all units for affordable house. That is a much more sane response to this problem and is an approach used in some European countries.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

We must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I oppose the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District will not stop rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco. BUT the way to do that is not to STOP market rate housing from being build. That's the complete opposite of what we need because it will increase the price pressure on existing housing stock. We must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

I live in the Mission (14th and Valencia) and think the moratorium is a terrible idea. Our problem is there's not enough supply of housing (for all San Franciscans, even those who don't qualify for "affordable") to meet demand. We need MORE housing, not less.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement.

A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Supply and demand is a simple concept. Delaying/slowing housing does nothing in the long term, and exacerbates the high cost of housing in the short term. As a resident of the Mission and an advocate of its unique flavor, I still must ask the city develop more housing, and urge we do so in a thoughtful manner that is respectful of this neighborhood's heritage. But build we must.

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock. Lack of housing stock affects the entire bay area, I don't want San Francisco to become even more affordable and unreachable for people.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing

stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

I live downtown and work in the Mission. I'd love to live near my office, and reduce my commute, but I can't because the Mission is too expensive. If Supervisor Campos' illogical proposal is adopted, it's going to get even more expensive.

We need more housing in this city, not less. And we need more housing at all levels. I've looked for affordable housing, and it's a three-year wait. THREE YEARS. So I'm stuck with market rate housing. Market rate housing is important, and it's where most people will live. We need more of it, and we need more of it in the mission.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement.

A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you

Zach.

A moratorium will only make existing housing even more scarce and expensive. Economics 101 of supply and demand. No supply + high demand = higher prices. This is not a fix. It's a silly bandaid to stop the rhetoric about development. And that's it.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

I am a renter for over 15 years in the Mission, and a mom of two raising my kids in the Mission. The housing moratorium is a very bad idea and will have the opposite effect it claims to want.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Perhaps if Supervisor Campos is so enamoured with bureaucratically planned economies, he could transport himself in time to the Soviet Union in the 1950s. (I suspect he really isn't; that like most "progressive" pandering, he's just posturing himself to look good to uneducated and paranoid voters.

Thank you.

If you really want to keep working families in San Francisco and to create opportunity for them to purchase homes in SF you need to restructure the DALP at the Mayor's Office of Housing. As it is set up now it makes it impossible for working families to compete for homes. The timeline and time periods are antiquated and unrealistic. This program is set up to help families with their down payments and allow them to participate in the American dream to own a home. However, under the current structure all it does is kill that dream and set up a situation where their application is rejected because the seller will not wait for the Mayor's Office of Housing to act.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

There is plenty of room for new housing in SF and in the Bay Area. The housing shortage is artificial, a result of decades of government anti-development policies. Let people build new housing including high-rises on their land, without this crazy permitting process, and virtually everyone who wants a permanent residence will be able to afford one. We

We also need to legalize urban camping and people living in their vehicles. Criminalizing people for these activities is nothing but anti-poverty NIMBYism. Stop prioritizing the "quality of life" issue concerns of the wealthy over basic human rights!

Allow Jim Reid "Shelter One" style tiny homes to be built on unused government land in the city. There are lots of small parcels all over town which could be used for this purpose. Take the current budget for homeless programs and services -- most of which goes to overhead and nice salaries for the people running the programs -- and use it to actually build these tiny homes for the homeless.

And stop twisting the meaning of "affordable" -- a TRULY affordable home should cost under \$50,000, and would not require all kinds of government or non-profit assistance or taking on many years worth of debt for a person to afford!

Without zoning laws, occupancy limits, rent control, building codes, union work requirements, and the whole expensive, time-consuming, NIMBY-enabling planning process, prices like that could be a reality again.

Reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

My own comments aside from the form letter:

Board of Supervisors - you are insane if you let this happen. Urban Planning should be done by Urban Planners. Not voters who vote based on a pretty picture or a clever slogan. This is a serious crisis and preventing housing from being built is not the solution. Preventing market-rate housing from being developed does not mean that suddenly affordable or BMR housing will take its place. If anything all that will happen is areas will remain undeveloped until the moratorium is over.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Ed Lee,

I've lived in the Mission for 5 years under a master tenant, and know that if she moves, or something happens that requires me to move, I'll be looking for housing in East Oakland, Portland, or anywhere but San Francisco. SF political leadership has behaved irresponsibly and unethically for 40+ years by kow-towing to NIMBY residents who are perfectly happy to transform San Francisco into a boutique village for the rich by refusing to build meaningful amounts of housing. I urge you to vote against Campos' ill-conceived and cynical ploy to appear to be for affordable housing. His proposal will increase housing costs and eviction pressure. I also urge you to liberalize density restrictions everywhere and start building massive amounts of publicly-funded housing. We're in a housing crisis, please act like it.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

I have left my beautiful apartment temporarily for graduate school, and I have sublet it because it is the only way to ensure that I have a home to return to. At current market rate, I would be priced out, and I live in fear of somehow losing my home. Something has to change, and this is not the answer.

Thank you.

Dear All:

I'm a tech attorney who moved to San Francisco in 2013. A one bedroom apartment was about \$1750/month at that time. Today, rent approaches \$3000+/month for an identical unit. SF is booming because of your hard work to make us the innovation and technology capital. We need to build housing to accommodate growth in our region, stop displacement, and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District will only make existing housing even more scarce and expensive.

San Francisco has an opportunity to lead and show the world that growth is not incompatible with community character and affordability. I hope you will reject this measure, and take future action to expand, not contract, our housing supply.

Thank you,

Adam Sieff

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

The proposed housing moratorium in the Mission is not only divisive, but it will do the most harm to those it purports to serve--those who cannot keep up with increasing rents in San Francisco. Without new market rate housing, there will be much less new affordable housing, and prices will rise for everyone.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Maura Garcia

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Hello!

Thanks so much for reading this.

We need more housing. That much is obvious. But what if we changed how we built it?

A lot of the housing going up is contemporary crap, to be honest. Has anyone thought about requiring old school San Francisco look and feel? Take the traditional San Francisco home types, increase the density by making them taller and using interior building standards of 2015. Here's a great post on the types and history of our architecture: <http://www.thebolditalic.com/articles/3427-a-guide-to-san-francisco-architecture>

Use the building code to shape the growth we need, require a reasonable mix of affordable, mid market, and

premium housing, decrease unit size requirements, remove mandatory parking requirements, and create a code that makes the city MORE funky, fun and amazing, not less. Be bold. But BUILD MORE, not less.

Campos' moratorium legislation doesn't make any sense. I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the WRONG ANSWER to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors, Director Olson Lee, Planning Commission and Mayor Lee,

Yes, we need to build more affordable housing in San Francisco AND we must continue to build new housing at all levels of affordability to increase our housing supply, stop displacement and reduce the demand on our existing stock.

I ask you to reject the Mission Moratorium legislation introduced on May 5th by Supervisor Campos. Stopping market-rate housing production in the Mission District is the **WRONG ANSWER** to rising rents and displacement. A moratorium will only make existing housing even more scarce and expensive.

Thank you.

Dear Board of Supervisors,

I just signed a petition addressed to you titled *Save the San Francisco Mission.* So far, 54 people have signed the petition.

You can reach me directly by replying to this email. **Or, post a response for MoveOn.org to pass along to all petition signers by clicking here:** http://petitions.moveon.org/target_talkback.html?tt=tt-93420-custom-58344-20250602-EWnf2F

The petition states:

"As residents and taxpayers of San Francisco we respectfully request that you support David Campos Ordinance #150461 - Declaration of an emergency and a request for a temporary moratorium on market rate housing and PDR conversions in the designated area of District Nine. We support: 1. A temporary moratorium on market rate development 2. A temporary moratorium on PDR demolition and conversions 3. Development of 100% affordable units during the moratorium"

My additional comments are:

I suppor this petition. I do not like the direction the city is going in and we need to think about it.

Subject: Moratorium in the Mission: support

Madam Chair, Supervisors:

On behalf of **Potrero Hill Democratic Club**, I urge you to support our neighbors in the Mission as they try to save the heart and soul of their community. I'm also speaking on behalf of **San Francisco Tomorrow**.

It's time to step back and hit "pause" on market-rate development. These days market-rate really does mean "luxury," since it's only available to the wealthy. Please give yourselves a little time to re-think the City's policies, before this development completely steamrolls the neighborhood.

There is an extremely limited amount of land left that the City can buy, where below-market housing can be built with federal aid. Once that land is gone, it's gone forever.

Please vote Yes on the moratorium.

Thank you for your consideration.

Sincerely,

Joni Eisen

June 2, 2015

Mayor Ed Lee and Board of Supervisors:

Re: Campos Ordinance # 510461– Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

We implore you to support this ordinance. It is the only solution that has been suggested to address the problems we are having with the too much too soon development. Change may be inevitable, but the pace of change should be controlled to protect our citizens.

We need time to work out a solution to the displacement problem, and this ordinance will buy us the time we need to protect our homes and the PDRs that house the artists and small businesses being pushed out of the city by raising rents and illegal PDR conversions.

There are possible solutions to this problem, but all of them depend on a new enforcement strategy. As we know, the laws are not being enforced now.

How can we depend on the Planning and Building Departments to enforce laws that limit their revenue? Who else can be authorized to enforce these rules? We could start the process at the Tax Assessor's office, since the tax assessor should be notified when there is a change in revenue anyway.

We could require all PDR rent increases and changes of use be registered with the Tax Assessor's office and tenants and neighbors be notified when these changes are proposed. Tenants of PDRs could appeal the changes, and file a complaint if the landlord fails to register. This would slow the process down and make it more difficult for landlords to break the law. This could apply to the SROs as well, and the Airbnb's.

Another possible solution may be found in the Eastern Neighborhoods plan and nexus study on the housing mix. What kind of housing is needed to meet the goals? How far behind are we on affordable housing in the Mission?

Everyone acknowledges that we have problem that needs to be fixed. As with most political disagreements, the argument is over method, not goals.

Please support this Ordinance to buy us time to solve the problems.

Subject: Campos Emergency Ordinance

Dear Mayor Lee and Supervisors:

I am a concerned San Francisco resident and I agree with Supervisor Campos that we need to take emergency actions to stop displacements.

I have lived here for nearly 30 years and have never seen a period of development such as this in all of my years of living here.

On Saturday evening I attended a 30th anniversary of a small business on Valencia Street that some how has managed to thrive in this era of uber gentrification. The attendees were all long time residents, and was a crowd of ethnically diverse, gay / straight people of all ages. We were all here when SF had lots of empty lots that sat vacant, for years. When some areas of the city were not so safe. And now that SF is the darling of the world, and everyone wants to own a piece of RE here, we are treated like second class citizens. WE ALL MATTER, not just the wealthy foreign investors, not just the Techies.

The moratorium is needed to allow a more balanced approach to housing development, to perhaps even bid some time and let the housing market cool down a bit. No one but the very rich can weather a economic climate as the one we are currently in.

The 30th anniversary of Back to the Picture on Valencia Street stands as a rare sighting these days, in the Mission especially. It is one of the small businesses that the mayors office talks about fostering but in reality does very little to support a climate that will allow business such as this one to survive or even get off the ground,

If you're listening, this is a chance to really help small businesses and long time residents to stay in San Francisco.

Please support Campos Ordinance #150461 - Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

Thank you

WE ARE THE PLAZA 16 COALITION

WE ARE A UNIFIED MISSION DISTRICT

OUR VISION

After years of market rate developments creeping into almost every block of our neighborhood, the Plaza 16 Coalition came together in the fall of 2013 to oppose the largest market rate development in the history of the Mission District. Since our founding we have grown to a coalition of over 100 community, labor, environmental, faith-based, and merchant organizations from the Mission and across the City.

The Monster in the Mission, the 350-unit project proposed for the site at 1979 Mission at 16th Street would further accelerate the already rapid gentrification of our neighborhood and city. We refuse to see more of our neighbors displaced and we refuse to lose any more of our neighborhood culture.

The Plaza 16 Coalition advocates for 1979 Mission to be used for much needed affordable housing and community serving businesses. The Mission is our home and we plan to support development and plans that are for the people of this neighborhood and not merely for profit.

OUR DEMANDS

- **We demand the planning commission and the City of San Francisco reject all market rate housing developments in the Mission until housing needs for the poor and working class are fully met.** Additionally, we demand that the San Francisco Planning Department abide by the community planning and land-use process outlined in the Plan Popular*, specifically the guidelines outlining community planning for "people not profit," for any future developments.
- We demand that Maximus Real Estate Partners abandon their current project at 1979 Mission.
- We demand that the owning partners of 1979 Mission (Maximus Real Estate Partners and the Jang Family Trust) transfer the land to community hands.
- We demand a stop to the harassment and criminalizing of low-income people and people of color that use the Plaza as public space by the SFPD under the guise of "cleaning up the plaza."

Recipient: Mayor Ed Lee, Board of Supervisors, Planning Commissioners, and Planning Director John Rahim

Letter: Greetings,

Support and uphold our community process, and help create truly affordable housing for all, and to protect the cultural and historic assets of the Latino Cultural District.

We ask:

1. Prioritize and fast track genuinely affordable housing projects in the Mission District, including the 17th and Folsom, Shotwell and Cesar Chavez, and 1950 Mission Street sites.
2. Slow the South Mission land grab by enacting interim controls that stop luxury development in the Latino Cultural District to provide a window of time to study and develop new approaches that allow for genuinely affordable housing. The Eastern Neighborhoods plan isn't adequate for today's housing climate. As market rate housing climbs to \$1000 per square foot, mandated "Affordable Housing" is no longer affordable for the majority of current residents.
3. Protect current small business by enacting interim controls on high end restaurants and the merging of retail commercial space.

Calle 24 Latino Cultural District began in 1999 as a grass roots organization formed by community members of Calle 24 in the Mission District. We are an all-volunteer organization with diverse community council members representing merchants, residents, landlords, service non-profits, arts organizations, youth, renters, homeowners, families and artist. We have deep roots in the Mission District going back many generations. Many of our current legacy businesses are responsible for the rich social fabric and cultural richness created on 24th Street. We have grown from the bottom up to advocate for the needs of Calle 24 and the Latino Cultural District.

In May 2014, the San Francisco Board of Supervisors and the Mayor officially established the Latino Cultural District. Our task since then has been to determine the neighborhood's vision for the Latino Cultural District. Our vision, mission, goals, governance, and programs were established through this public and inclusive process.

We are proud of our community-driven process to determine the future of our community.

But we are saddened and disturbed that the ability to determine our future is disrespected by real estate and investment interests that do not understand or care about the issues of our community, especially at a time when many families, residents, artist, non-profits and small businesses are being displaced by unchecked development in our community and sky-rocketing rents.

We ask the city family to hear the voices of our community, those who have been negatively impacted, and those who bring a vision to the table to help stop the displacement and create housing that is truly for all.

Through our community process: focus groups, stakeholder interviews, and public meetings, the top priority from our forums is housing. Hundreds have seen their neighbors become displaced or homeless. Families who have lived here for decades, workers who built this city, artists, teachers, and community leaders who have contributed to making this a safe, desirable neighborhood live in fear of displacement. It is a community priority that we exist as a living cultural district, not just a colorful tourist destination.

The Latino Cultural District process was funded and supported by Mayor Ed Lee and the City and County's Office of Economic and Workforce Development.

Earlier this month, the Calle 24 Latino Cultural District finished this official community process. As a result of what we learned, we now ask the board of Supervisors and the Mayor to do the following: (see above)

While initially seems counter intuitive to seek interim controls on development of new housing, existing development projects do not supply the actual demand of existing and new residents for affordable family homes. We see the current climate of development driven purely by the market as a threat to our very existence. We are not seeking to keep people out; rather, we are trying to keep essential economic and cultural diversity in the Latino Cultural District. We must look at new alternatives that will bring economic and social justice to housing, stabilize our community and maintain the vibrancy of the Mission District.

Calle 24 Latino Cultural District Council
Mission District

Each year we loose working class families who have been in the neighborhood for 20+ years because they have been evicted.</p> <p>Additionally I find it very disheartening that as a government employee I cannot afford to invest in buying a house in the community I work in. We are loosing good teachers for our children each year as well since they cannot afford to buy a house or pay high rent prices.</p> <p>Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!</p> <p>Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low , middle- and moderate-income households. Without a pause on market-rate development, we won't be able to guarantee the affordable housing we need.</p> <p>We need to plan. We need to find new sources of revenue for truly affordable housing.</p> <p>But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary moratorium on the construction of new luxury housing in our neighborhood!!</p> <p>We desperately need affordable housing and developers are quickly buying up the tiny amount of property left. These units will be turned into luxury housing that the majority of residents here can't afford.</p> <p>This is insane.</p> <p>We need to plan.</p> <p>Support the community's demand for a temporary moratorium.</p> |

Yohanna roldan roldanwhy@yahoo.com

Precita Ave.

6/2/15 10:02 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood. As a teacher in SFUSD that works and lives in the Mission district, I have seen first hand how this crisis has effected our students, their families, and our educators.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission

6/2/15 8:34 Please please please!

I've lived in the Mission for 22 years. My kids and in-laws were born and raised here. Growth is good-- but what's been happening in our neighborhood is like an uncontrolled wildfire. It does necessarily please me that our home could list for twice what it's worth.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates.

6/2/15 2:05 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

There are only 13 sites left where affordable housing can be developed through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, VOTERS STATED LOUDLY AND CLEARLY that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing VOTERS REQUESTED.

We need to plan. We need to find new sources of revenue for truly affordable housing.

The moratorium also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have.

Don't let the continuing onslaught of market rate development stifle our

| Elsa | Burger | e_burger@sbcglobal.net | Ivy St | 6/1/15 18:48 | Hi- I am a native San Franciscan who lives each day in fear of being evicted. I recently went back to school to become a Licensed Social Worker, after decades of working in non-profits. In some of my jobs, I try to find people housing. It's a cruel system of housing lotteries and vouchers no-one will accept. All of my friends and the families I grew up with are gone. If developers have the choice, they are of course going to build luxury housing unless protections are in the market to equalize that. We know what happens when there isn't: what is happening now. Please don't allow the Mission to become a theme park representation of what the Mission is and always has been- vital, full of families and shops catering to local people, and amazing food, art and events. I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood. Support the community's demand for a temporary moratorium. Support the Campos legislation on June 2! |

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates. We need our locally owned small businesses. We need our nonprofit organizations to be stable. We thrive in a diverse community. What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have.

Amarida Hamed muxierose@gmail.com:

6/1/15 18:23 Please stop destroying my city and making it unaffordable for me to live in my neighborhood. I love my hometown and do not want to see it become a resort city for wealthy out-of-towners who displace us with vacant condos that they use on holiday. Please. You are pushing out all the hardworking people, people of color, and long-time residents who are key to making SF the wonderful city that it is. Change is good but decimation is not.

| Zachary | Segal | zac@illproductions.com | 924 Treat Avenue | 6/1/15 16:37 | As a native San Franciscan who was raised in the Castro/Mission, got married in city hall, and continues to live in the Mission, please stop paving it over with Luxury and market rate housing. I work in tech, am young, and for the most part don't seem like someone who would vote for this moratorium on luxury housing. Well I will, and these real estate developers are destroying a community, replacing it with a playground for a young over-privileged workforce that can easily be described as transient. They will eventually leave the 400 square foot apartment they so desperately want right now to have families. So let's ask ourselves, is uprooting a long running community that is heralded for its history, culture and food worth a few more thousand Manhattan style apartments. I say no. |

I insist that you support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (IDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission. How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have.

I love SF and have lived here for many years. I would love to buy a place here someday, however I am not a millionaire. I am just an average guy with an average tech job. The cost of living in the city is raising at a rate that I can't keep up with. I feel this type of growth is changing the city too fast and not in a good way. Let's keep the european feel and culture of some of the city's neighborhoods in tact. Keep the luxury billionaire condos downtown and mid market areas. This is so sad what is happening, words can't even express...

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. This proposal is a practical measure to stop the Black and Latino displacement (& displacement of middle class & poor people) in our city. I urge you to support it. Supply and demand as it's traditionally framed is destroying our city. There is huge demand for housing that costs less than \$4,000/month, but no one is building it. The city should be ashamed. I have a friend who is a neuroscience PhD who used to live in SF & is coming back for her residency at the VA & she can't find a place to stay. \$4,000/mo is what she is able to spend. If she can't find a place to live, what does that say about what we are shutting out of our city? Some friends of mine in Western Addition got a divorce, but are still living in the same building because they can't afford to go anywhere else. We've already lost half of the Black population in SF and 7,000 Latino families in our city. It's time to protect the last 13 parcels where affordable housing could be built before it's too late. There is more that needs to be done, but this is an important first step. I don't breed, please think of all the people you already know who have been pushed out of our city & support this moratorium.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

5/31/15 8:28 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates. We need our locally owned small businesses. We need our nonprofit organizations to be stable. We thrive in a diverse community. What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have.

5/30/15 10:13 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

I was born and raised in the city to immigrant parents. SF will always be home. My mother is 83 and still proudly lives in the city. She relies on the affordability in all ways: like the bus system and the access to fresh produce in her neighborhood. Please retain the integrity of the city's charm by making policies that keep this town diverse and unique. If we go the direction of the posh and wealthy we will lose what we all know to be the heart of a world class city.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.
We need affordable housing!

5/30/15 8:57 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

12% (or less, with loopholes) is NOT a diverse community!

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission:

Amy Zehring amy_zehring@att.net

5/30/15 7:23 I urge you to support the Mission District's urgent need for a temporary moratorium on the construction of new luxury housing. Too many people who make this city great are being separated from their communities. Those who leave are certain never to be able to return because rents are too high.

San Francisco is a world class city because it is a diverse community. In order for San Francisco to remain a world class city:
San Francisco needs affordable housing.
San Francisco needs job opportunities for local graduates.
San Francisco needs locally owned small businesses.
San Francisco needs nonprofit organizations to be stable.
San Francisco needs a land use and economic plan that guarantees San Francisco will continue to be a diverse and thriving community. This is not what we currently have.

Don't let the continuing onslaught of market rate development stifle San Francisco!

Data from the Planning Department shows there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

Jill Roberts j.michele.roberts@gmail.com

1386 Guerrero Street #3

5/29/15 13:48 The people have already spoken - voted, even. 50% of San Francisco's new housing has already been mandated to be affordable. But as long as luxury development continues unchecked, there is no hope for the diversity of San Francisco to survive. We need to act now to ensure that the interests of wealth do not trump the needs of the many. We need to save the Mission - and San Francisco - and *everywhere* from being nothing but a battleground. Hopefully it's not too late.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

There are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of - and!

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

Please support the Campos legislation on June 2!

All best,

Jill Roberts

Something needs to be done to keep middle class renters in San Francisco. The only reason my husband and I can stay in that we're protected tenants with rent control.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in the Mission neighborhood. It is one step you can take right now. Also, something has to be done to enforce Air bnb restrictions. As long as people can make more money with vacation rentals they will keep their units off the rental market.

Support the Campos legislation on June 2!

Thank you - Linda Marks

I urge you to support the people of the Mission District's demand for a temporary moratorium on the construction of new luxury housing.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates. We need our locally owned small businesses. We need our nonprofit organizations to be stable. We thrive in a diverse community. What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have.

5/28/15 21:16 I urge you to support the Mission Community's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

I'm old enough to remember the urban removal of the black community from the Fillmore. The image of an elder sitting in the window of her home standing her ground refusing to move is forever etched in my memory as are the bulldozers that systematically destroyed the homes of so many community members. Let's not repeat history. There are only 13 parcels of land left in the Mission where affordable housing can be built. We need this moratorium so the entire community can come together to create a housing plan, one that addresses the housing affordability crisis in the Mission.

We have 478 units of housing in the pipeline in the Mission, however ONLY 34 are BMR units which amount to 7%. We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

5/28/15 15:48 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures.

MY SUGGESTION: INVEST IN AFFORDABLE HOUSING ON THESE SITES NOW. THE SUPPLY OF LAND AND HOUSING SHOULD SERVE THE LOCAL DEMAND, WHICH IS FOR PERMANENT, AFFORDABLE HOUSING.

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

Support the community's demand for a temporary moratorium on LUXURY housing.

Support the Campos legislation on June 21

The San Francisco Interfaith Coalition on Immigration realizes that housing and the ability for the low income immigrant community to stay in San Francisco is of the highest priority. Together we have helped to build a SF that values the contributions of the immigrant community. But if they can't live here, we have much to lose.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates.

Laurie Coyle lauriecoyle@sbcglobal.net

122 Valley Street

5/28/15 7:29 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood. As a resident of the neighborhood for 31 years at my current address, and six years at another location in the Mission, I have witnessed the transformation of my neighborhood from a mixed-income, ethnically and generationally diverse community to one affordable only to the affluent. What makes a city great is the dynamic balance of class, ethnicity, generations and businesses. We do not want to become the bedroom community for Silicon Valley! You at the Board of Supervisors can act to protect and nurture our social ecosystem.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

I strongly urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood. The issue of gentrification has caused an enormous human rights issue in furthering socioeconomic inequalities and denying Indigenous/Latino, people with low/moderate income, and other marginalized peoples the right to live in the communities where they've established their livelihoods and families - communities that they built in which they could afford to live and wherein their culture is rooted.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community:

I insist you stop bowing down to money and support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates. We need our locally owned small businesses. We need our nonprofit organizations to be stable. We thrive in a diverse community. What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we

5/27/15 11:57 We need more public housing, for the love of God. Think about working people. Think about the poor. Think about the people of color and minorities that live in this city. Help make this city affordable. Not for individuals who make \$100,000 a year or \$70,000 a year. Think about the working class who need TRULY affordable housing. Why would we need LUXURY housing in the mission? These are OUR NEIGHBORHOODS. You care about the working poor? BUILD AND MAINTAIN PUBLIC HOUSING NOW! Cities know how to do it best. Make it fucking happen. For the future of our city.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

5/27/15 10:38 San Francisco's rent situation is beyond crisis -- it's a major disaster.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission

5/27/15 7:36 I urge you to support the Mission District's demand for a temporary moratorium on new LUXURY housing in our neighborhood.

Last year, voters stated loudly and clearly that at least half of all new units in SF need to be affordable to low , middle- and moderate income households. Without a pause on LUXURY rate development, we won't be able to guarantee the affordable housing we need.

As a contractor who spends over \$50K annually in the Mission for building materials at Central Builders Supply, E.E Electric, Excel Plumbing, etc. we need to protect Mission businesses and blue collar jobs. Real estate market pressure will destroy these businesses and their jobs. Gentrification will also price out my \$20-\$30 hour skilled worker crews.

A moratorium also protects workers, artists, the poor and the activist-nondroit communities that give SF its special flavor.

PROTECT A DIVERSE MISSION DISTRICT.

NO MORE LUXURY DEVELOPMENT.

SUPPORT THE TEMPORARY MORATORIUM.

SUPPORT THE CAMPOS LEGISLATION ON JUNE 2

Victoria Scott vscott@artic.edu 23rd St & Bartlett 5/26/15 15:38 As a long-time resident and home owner in the Mission, I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates. We need our locally owned small businesses. We need our nonprofit organizations to be stable. We thrive in a diverse community. What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we

5/26/15 15:30 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

I was driving in The Mission one morning, and I did a double take. What on earth is that?!!" It was a multicolored, oddly shaped edifice of a new building, on a major Mission thoroughfare. I kept looking, my mouth was open, my eyes disbelieving. Really, I could not believe what I was seeing. The building has no relevance or relationship to the neighborhood. I have since labeled it "The Clown Building". Anyone can deliver an architectural rendering of a proposed new building. I blame the SF Planning Commission for approving this travesty. San Francisco is more than a destination; it is a composite of neighborhoods, each with it's own characteristics and personality - none of which is reflected in "The Clown Building" located in the Mission. We as citizens of San Francisco can do and expect better.

This is what the Mission needs for our community.
We need affordable housing!
We need job opportunities for high school graduates.
We need our locally owned small businesses.
We need our nonprofit organizations to be stable.
We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have. Don't let the continuing onslaught of market rate development stifle our dreams! Support the community's demand for a temporary moratorium. Support the Campos legislation on June 21!"

Please put a stop to all the luxury housing developments in the Mission. The arguments have been articulated so I will just add my plea to please do everything you can do to keep working class people in the Mission. My old neighborhood does little more than make me feel sad and angry these days. This is an emergency. San Francisco is being destroyed and ruined day by day. Stand up to the developers and speculators.

5/26/15 12:25 I lived in the Mission from 1971 to 1986 when we moved to Bernal. Our daughter was born in the Mission. We couldn't afford to move there now.

I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

It needs affordable housing! And by affordable mean affordable to low income

5/25/15 19:36 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates. We need our locally owned small businesses. We need our nonprofit organizations to be stable. We thrive in a diverse community. What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have.

5/25/15 18:20 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

We thrive in a diverse community.

What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have.

Thank you for your leadership and support of the Mission District!

5/25/15 17:54 I work with homeless families in San Francisco and I would like you to show some sensitivity for those who are more vulnerable people in this city. Victims of domestic violence, young people without parental support, seniors, single mothers and fathers, and immigrants. It is basically impossible to find housing when you're raising kids by yourself, landlords are so selective in almost a criminal way, they deny people the right to housing. I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates.

5/24/15 11:28 A moratorium should be on all foreclosure now being conducted in California that involve any transactions that were originated between 2006 and 2009. Mortgage Electronic Registration Systems Inc. and their associates were allowed to generate mortgages for companies that had been ordered to shut down by the FDIC. Jerry Brown was the Attorney General from 2007 until 2011. He refused to take the banks to court. All of the mortgages that Camala Harris found fraudulent during her investigation of the robo-signing issue should be voided. But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces. This is what the Mission needs for our community. We need affordable housing! We need job opportunities for high school graduates. We need our locally owned small businesses. We need our nonprofit organizations to be stable. We thrive in a diverse community. What we need is a land use and economic plan that guarantees that the Mission will continue to be a diverse, thriving community, and that is not what we currently have. Don't let the continuing onslaught of market rate development stifle our dreams! Support the community's demand for a temporary moratorium. Support the Campos legislation on June 2!

Dear Elected Officials,
I urge you to support a temporary moratorium on the construction of new luxury housing in the Mission.

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

Don't let the continuing onslaught of development destroy our city.
Support the community's demand for a temporary moratorium.
Support the Campos legislation on June 2!

|------------|------------|-----------------------------|---------------------------------|---------------|--|
| Pam | Grady | pamg1019@yahoo.com | Capp St. | 5/24/15 10:16 | I am leaving the boilerplate, but to that I'll add that I've lived in the Mission for over 20 years. What's happening to the neighborhood (and the city in general) is heartbreaking. The soul is being ripped out, one gentrifying block and one luxury condo at a time. A city needs to welcome all: rich, middle class, working class, and poor. Black, white, Latino, Asian. Native-born and immigrant. All occupations (artists and techies, bus boys and teachers, all make a contribution and all should be valued and respected). Without that diversity, the city dies. Not only that, if the city keeps up its inane march to building nothing but luxury housing instead of meeting the city's true housing needs, all but the rich will be priced out. Who then is going to do the work of the city? There are articles every week about worker shortages: teachers, kitchen staff, retail workers. It's expensive to commute into this city. Price people out and many will elect to find work elsewhere rather than pay a small fortune to do the work of a city that has made them unwelcome. |
| | | | | | I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood. |
| | | | | | Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land! Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need. |

SARAH BRANT ms.brant.sf@gmail.com

94114

5/23/15 22:41 This is the 11th hour. It is more than time to match *your* actions with your words. We are watching your actions, not your lips. So I urge you to listen to those who serve your coffee and attend your schools, those who've made the art you have stood in front for photo ops, those who pay and have been paying their taxes for generations for people such as yourselves to represent the interests of a diverse San Francisco, the people who live here, not the national developers who wash in and out with the tide. Why would you want your name tied to empty second homes and luxury coffins holding the death of a I that makes the Mission District what you brag about?

I hope you will heed the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR)

| carla | leshne | cleshne@yahoo.com | exiled | 5/23/15 20:21 | I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood. |

The last two decades have been an enormous failure of policy, and the Mission District community has been ravished by profiteering, speculation, non-enforcement of laws, and catering to special interests. While this temporary moratorium is too little too late to save many of our displaced community members, it is a step in responding to the deeply harassed residents of San Francisco and this district.

Support the community's demand for a temporary moratorium.
Support the Campos legislation on June 2!

5/23/15 13:02 I urge you to support the Mission District's demand for a temporary moratorium on the construction of new luxury housing in our neighborhood, and support similar solutions in your own neighborhood.

Data from the Planning Department show that there are only 13 sites left where we can develop affordable housing through traditional financing structures in the Mission. There were only 18 until recently, but five have been purchased by developers. We're quickly running out of land!

Last year, voters stated loudly and clearly that at least half of all new units need to be affordable to low-, middle- and moderate-income households. Without a pause on market rate development, we won't be able to guarantee the affordable housing we need.

We need to plan. We need to find new sources of revenue for truly affordable housing.

But the moratorium doesn't stop there. It also protects blue collar jobs and arts and cultural uses, which are so important for the Mission! How? By putting a temporary stop to all the demolition and conversion of light industrial (PDR) spaces.

This is what the Mission needs for our community, and what San Francisco needs as a whole.

We need affordable housing!

We need job opportunities for high school graduates.

We need our locally owned small businesses.

We need our nonprofit organizations to be stable.

SUPPORT THE LUXURY HOUSING MORATORIUM:

No More Housing for the Rich until There's Enough Housing for the Rest of Us!

To : Sups. Wiener, Cohen, Breed and Christensen:

We, the undersigned, support the efforts of Sup. David Campos and the Mission community to stop luxury housing until there is a community-driven plan in place to create enough affordable housing to preserve and protect our communities. Instead of siding with real estate developers by preventing the Mission from dealing with its affordability crisis, we demand you extend the luxury housing moratorium to your neighborhood, and address the crisis in your own District.

Recipient: The Archdiocese plans to evict St. Peter's Books and G.G. Tukay

Letter: Greetings,

San Francisco Archdiocese
San Francisco Board of Supervisors

The community of the Mission District and 24th St. strongly oppose any plans to evict St. Peter's Bookstore and G.G. Tukay after years of being on 24th St. and convert the space to a high end restaurant. The plans will not only destroy the social and cultural fabric of 24th St. but displace 2 community serving businesses and heir families. We are shocked that the San Francisco Archdiocese would even consider such a move. We are opposed to the change of use from combining 2 retail to restaurant and will boycott them from forcing themselves on our community. Stop Urban Deportation.

June 2, 2015

Members of the San Francisco Board of Supervisors,

My name is Thomas Ray. I am a native San Franciscan. I live in the Mission District. My neighborhood and culture is being destabilized by speculation and evictions. A moratorium on the building of luxury housing in the Mission is crucial to creating affordable housing in the Mission, and stabilizing the Mission. Currently, there are over 1,900 proposed new units in various stages of development in the Mission —some from projects with just preliminary plans, some are under construction now. Of those, only about 15 percent are for affordable housing. At present, there are only 13 available parcels the City can develop for below-market housing in the Mission; on May 4, there was 18. In 4 or 5 months, there may be no more parcels in the Mission to build affordable housing; these parcels would just be developed into luxury housing, which is the going trend these days with the Planning Commission, even though at present, there are twice as many luxury housing units being built as needed. And, the affordable housing credit from the building of these luxury units would go to some other neighborhood besides the Mission, because there will be no more parcels in the Mission available to even build affordable housing.

Calling a moratorium on the building of luxury housing in the Mission would do the following:

- Give time for the City to figure out how to fast track the purchase of parcels in the Mission for affordable housing before they disappear.
- Give time to Develop with Mission Community Organizations a comprehensive and “balanced” Mission Housing Development Plan with Tools that would create a minimum of 33 percent affordable housing as the “will of the people” stated with the passage of Proposition K.
- Stop the conversion of current low & middle income units into high-priced luxury apartments by real estate speculators. The City could increase its Mission “affordable housing” stock by helping MEDA and the San Francisco Community Land Trust purchase large apartment buildings that house low & middle income people – taking them out of the speculative real estate market forever.

Thank you for listening. I hope you vote to preserve the Mission District culture & neighborhood, and develop housing for the “workforce” of San Francisco.

Thomas Ray
742 Treat Ave., San Francisco, CA 94110

Housing Strategies to Address

- Displacement of low and moderate-income SF residents-

- ***Enactment of the City Planning Departments: Element 2/Association of Bay Area Governments (ABAG) official affordable housing proposals to impact all current and future housing developments:***
- ***Includes 2 billion dollars in housing subsidies - creation of affordable housing for 60% low, very low and moderate-income households.***
- ***Development of citizen's affordable housing initiative based on the official Element 2/ABAG recommendations.***
- ***Creation of affordable housing zones***
- ***Moratorium on foreclosures***
- ***The Re-population of the African American Community***

The Center for Strategic Planning

***Jim Queen, CEO
Jim_Queen@msn.com
(415-515-9987)***

Issue:

Lack of affordable rental and family owned housing (3-4 bedrooms)

No plans to meet Planning Department Element 2/ABAG projections for the needs of affordable housing for 60% low, very low and moderate-income households.

Foreclosures/ evictions, predatory lenders

Displacement (50%) of the African American population in San Francisco

Actions:

Declare a moratorium on foreclosures/evictions

Declare imminent domain on foreclosed housing

Create citizens affordable housing initiative based on Dept. of City Planning (element part 2) and ABAG'S affordable housing standards. 30,000 new units, 60% for families with low, very low and moderate income.

Ensure that the 39,000 already approved housing units in S.F. meet Dept of City Planning (element part 2) and ABAG'S affordable housing recommendations. Make an analysis of the number of affordable family 3-4 bedrooms units that are included in each development.

Declare imminent domain over land and vacant properties to create affordable housing sites.

Create affordable rental/ownership housing zones.

Commit city owned surplus buildings and property sites for affordable rental and family owned housing (3-4 bed rooms) for median and below median income residents

Develop affordable housing bond / tax initiatives.

Expand housing sites beyond San Francisco

Re -populate the African American community.

Responsible Body: Housing Provider Cluster Group - Mayor's Office of Housing, Office of Community Investment and Infrastructure, private and non-profit housing corporations, faith based organizations.

Why is housing an issue: The City's official policy. *(Excerpt from SF Planning dept. Housing Element Part 2)*

"Affordably housing is the most salient housing issue in San Francisco and the Bay Area. The Association of Bay Area Governments (ABAG) projects that at least **39%** of housing demands will be for low and very low income affordable households **(households earning under 80% of area median income)** and another **22%** affordable from households of moderate income (earning between **80-120 % of area median income**).

ABAG estimates that San Francisco must plan for the capacity for roughly 31,000 new units, 60% of which should be suitable for the extremely low, very low, low and moderate income housing. Because of the high cost of housing subsidies to provide units to low, and very low income households range from \$170,000 to \$200,000 thousand. Total costs to meet total needs exceed 2 billion dollars. Given current conditions the level of funding is far more than can be realistically expected in the short term."

There are currently 39,600 housing units, in 11 designated project areas, which have approved plans. None of the projects meet ABAGS stated standards of affordability, and none have significant numbers of 3-4 bedroom family housing.

San Francisco city policy makers affordable housing plans, proposed funding strategies, and the longevity of build outs do not meet current or projected needs as outlined in the SF Planning Department's housing element 2 and ABAG.

Action Plan to for city policy makers , based on ABAG/City official projections for need of affordable housing :

Establish a two billion dollar fund for housing: as part of a total of 4 billion dollars needed to address overall social and economic disparities. Funds will be developed through: philanthropy, leveraging of city, regional, state, federal funds.; create affordable housing bonds and tax initiatives; engage Chinese development banks, lending institutions, and other foreign financial entities.

Develop citizen's affordable housing initiative: based on the official ABAG/ City planning Departments estimates of the need for 60% low, very low, moderate-income units. The initiative would make that public policy for all of the city's current and future developments be subsidized to meet the 60% standard.

Create special affordable housing zones: Make it city policy to create affordable housing zones in underserved communities 5,6,9,10,11 such as the Fillmore St. and surrounding areas in district (5) 24th St corridor and surrounding areas in (9). 3rd St and surrounding areas in the Bay View Hunters Point district / and the Southeast Industrial Water Front development (10). .

Protect ownership of Existing housing

Eminent domain: San Francisco should consult with Richmond Ca., which is instituting a plan to use eminent domain to seize mortgages on underwater homes and restructure them to be more affordable. To be eligible, homeowners would have to be current on their payments and not have a government-backed mortgage. Homeowners behind on their payments could be eligible in the future.

Foreclosures: Develop a comprehensive program to protect residents from foreclosures due to unfair loan policies. Establish a foreclosure financial support fund from the SF investment bank and the proposed social and economic equality fund. Become part of and support ACCE in its organizing and legislative strategies dealing with foreclosures/ affordable housing. **Allow Freddie Mack/Fannie Mae to perform principle reductions and loan modifications for distressed homeowners-** See Center for Global Policy Solutions - Executive summary page 12

Support existing Cooperatives: Make a commitment to provide public/ private funds to ensure that residents *in existing low-income cooperatives obtain full ownership of their residences*. Provide resources for the San Francisco Community Land Trust to target the Affordable Housing Trust fund to create family housing units with three to four bedrooms under ABAGS extremely low, very low, low and moderate income guidelines.

Establish Neighborhood Stabilization Trust: Trust would acquire small and large apartment buildings to take them out of the speculative market and make them available as affordable housing. Proposed by the SFCCHO. **Develop Rent/Lease Subsidy Program:** The city should develop a rent/lease subsidy program for owners who agree not to raise rents for a ten-year period. The city would pay the difference between the current rent/lease and the proposed rent/lease based on a fair market evaluation.

Evaluate Spur recommendations for creating affordable housing: Diverting a portion of tax revenue derived from new developments from the City's fund to set- aside a neighborhood improvement fund./ Acquisition rehabilitation program - buying and rehabbing older, run-down housing, instead of relying purely on new construction to increase the supply of affordable housing.

Enact the following legislative initiatives: BOS President David Chiu approved

Legislation: That brings San Francisco's estimated 30-50 thousand illegal in-law units into compliance with City law/ **BOS David Campos - Legislation:** Would require *San Francisco landlords* to pay rent up to two years for tenants who are being evicted under the Ellis Act./

Reintroduce Sen. Mark Leno - Bill 1439: Authorizes *San Francisco* to prohibit new owners from invoking the Ellis Act to evict tenants for five years after acquisition of a property, ensures that landlords can only activate their Ellis Act rights once, and creates penalties for the violation of these new provisions / **Assemblyman Tom Ammiano - Bill 2405:** The bill enables *California Jurisdictions* to put a moratorium on Ellis Act if they have not met their housing needs, which most cities have not. Board of Supervisors – or a public vote could put in place such a moratorium.

Provide major affordable housing and commercial space subsidies through the city/regional/state/ federal governments and private sector. For the following development sites:

These housing, commercial space developments should meet: planning element2, and ABAG projections for low, very low and moderate income housing.(3-4 bedrooms) and include subsidized lease/ purchase opportunities for small and minority owned businesses

- Southeast Industrial Water Front**
- Bay View Hunters Point Ship Yard**
- Candlestick Point Development**

Public/Hope Housing Developments: Turn the existing public housing and Hope San Francisco developments into cooperatives with tenant ownership of low, moderate, market rate units; ensure a significant number of units are 3-4 bedrooms. Make special provisions to give priority to city workers, teachers, for moderate priced units. Set aside a percentage of units to remain as rentals.

Form tenant section 8 LLC'S: Form tenant association LLC'S to purchase properties for use as Section Eight housing. The City should provide direct grants and small interest loans.

Use Vacant City Owned Land and Buildings: Target vacant city owned land/ buildings to develop affordable cooperative rental/ ownership of family housing (3-4 bedrooms), for median and below median income residents, space for individual and cooperative owned small and minority owned businesses. Develop city/state bond measures to leverage the City general fund to assist residents and small businesses to purchase sites for affordable family housing and commercial space.

Expand Beyond San Francisco:(Charles Higgins the Executive Director of the Richmond District Neighborhood Center in San Francisco) proposes the City partner with Oakland in targeting land area around the Oakland army base, Coliseum, and Airport, as a place to develop thousands of units of affordable housing. There is more available land, lower prices and perhaps less opposition and benefit from San Francisco's with a vibrant economy. **Note:** The International Blvd. corridor is also a potentially viable area for affordable housing acquisition and development sites.

Develop Multi Unit Modular buildings: Explore New York City's affordable housing strategy – the Stack- a modular seven-story building with 28 units. modules are pre-fabricated, brought to the site and immediately erected, this saves time and construction costs.

The Homeless: Minority community members make up a disproportionate number of the homeless populations. The City should: Establish permanent housing facilities - support the right to a roof campaign proposed by the Coalition on Homelessness (COH) - R2AR. Support the Coalition on Homelessness campaign for families and Immigrants (FAIM). Replicate the Salt City, Utah's highly successful homeless program that emphasizes a well-coordinated system that involves the public, private and community sector, and provides the homeless with attractive housing facilities with comprehensive on-site supportive services.

Re - Population of African Americans in San Francisco:

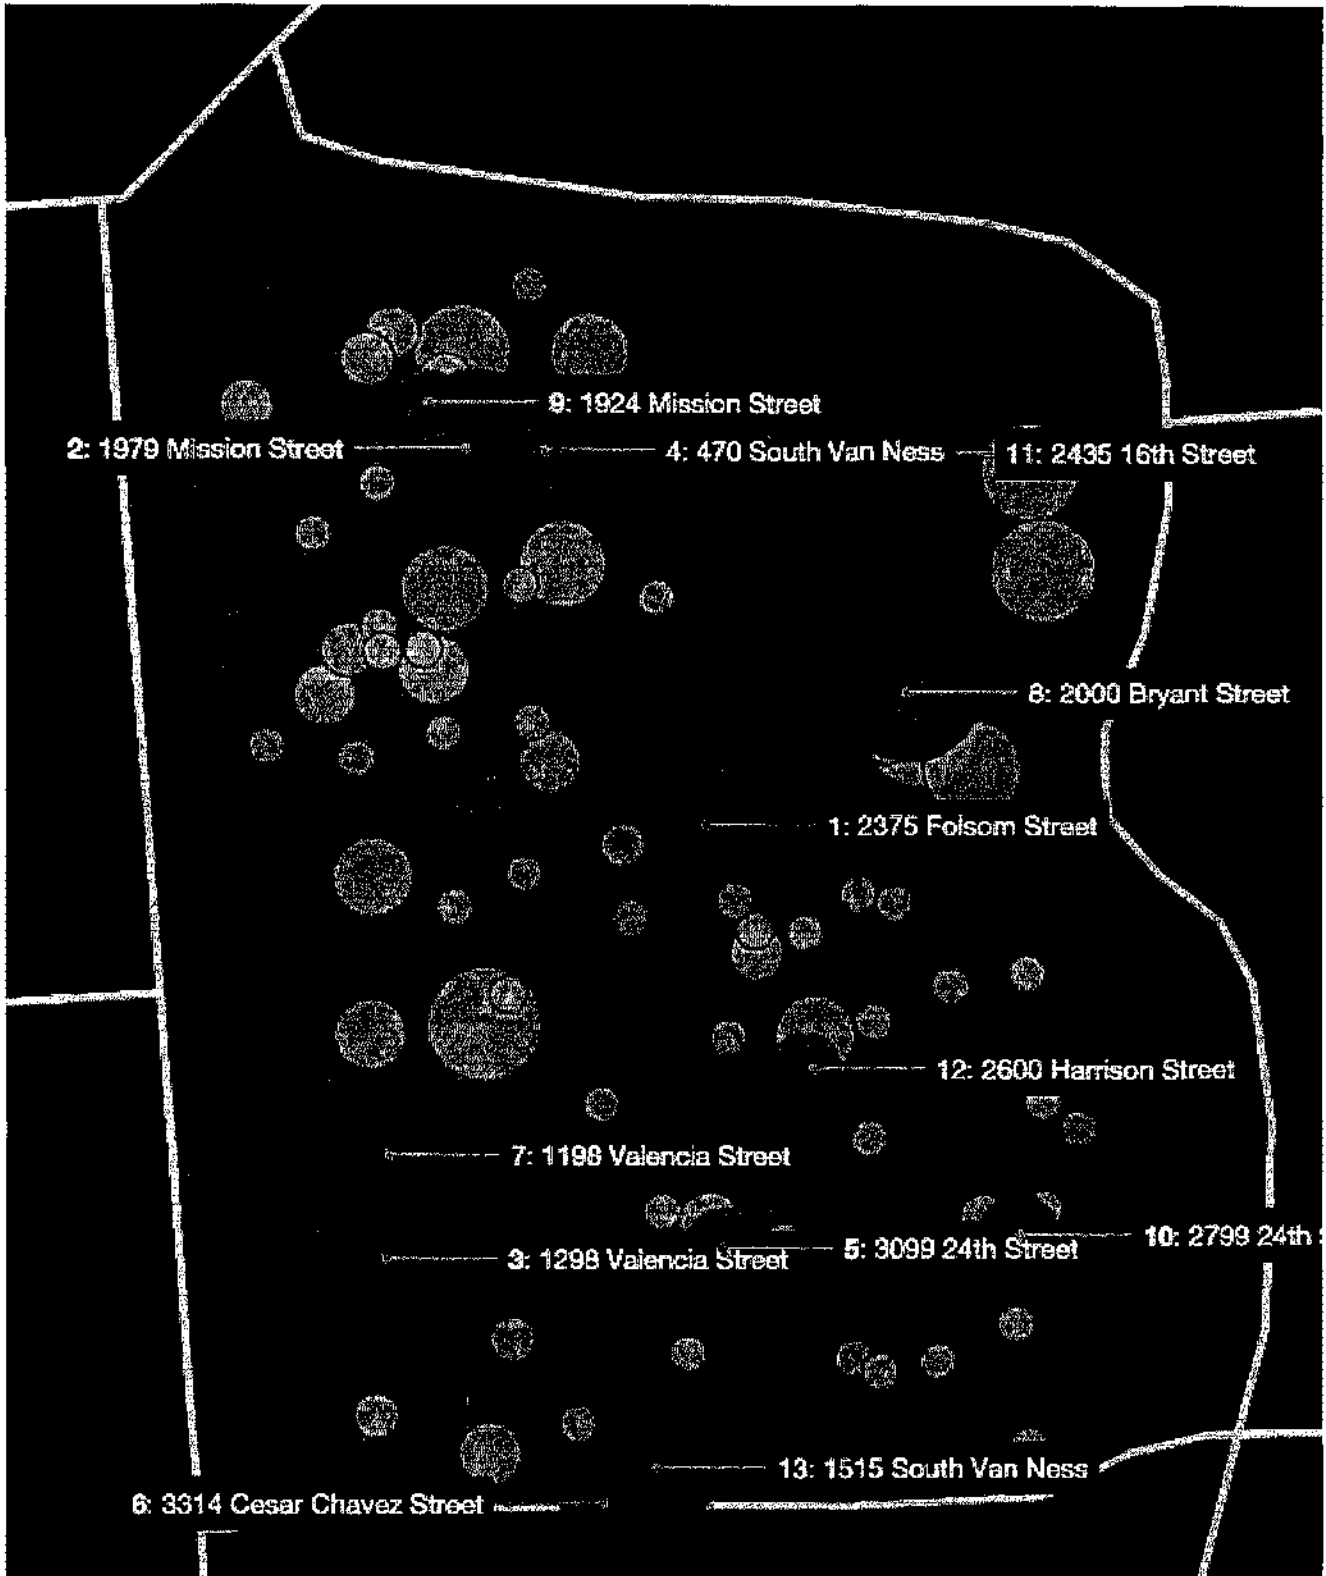

At one time African Americans made up 16% of the population in San Francisco, it is now approximately 4%. **This depopulation was caused by official public policy** - the Redevelopment Agency tore down and decimated the black community in the Western Addition, mass incarceration, (wholesale removal of black males), predatory lending, foreclosures, unaffordable housing and business rentals, the highest rate of unemployment, inferior education, unsafe, blighted neighborhoods, extreme income and wealth inequality. This has been well documented in several official studies on the crisis in the black community, i.e., "The Black Agenda" which made specific recommendations to address the crisis. None of the recommendations were implemented.

If San Francisco is to be truly a diverse community, it must enact public policies - executive orders, legislation, including reparations - to redress the official public policies that cause the systematic removal of blacks. The city/regional/federal government must join with the community and private sector to launch an aggressive campaign to increase the in-migration of African Americans. The objective must be to have African Americans be at least 15% of the population (120,785) this would mean an in-migration of 70,000 persons - adults and children.

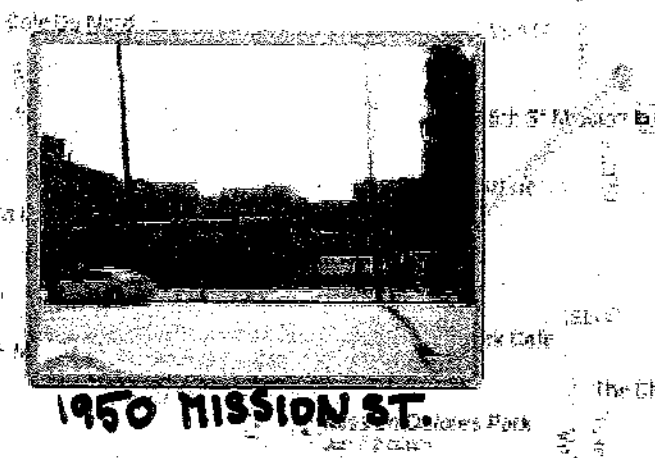

The city must make it public policy to provide special financial incentives- down payment assistance grants, low interest loans, subsidies for individuals that work in the city but cannot afford to rent or purchase a home or maintain a business - teachers, police, city workers, muni workers, health workers, entrepreneurs etc.

The city must launch a national campaign to attract African Americans to the city. The city, community and private sector should also reach out internationally to target Africa and Africans from throughout the Diaspora. Most immigrant communities have a pipeline from their mother countries. African Americans came here not as immigrants, need to form a pipeline to the homeland and throughout the Diaspora- to encourage immigration to San Francisco and bring their rich and beautiful cultures, and entrepreneurial skills (Africa has the fastest growing economies in the world). Bay View Hunters Point, 3rd St. and proposed developments in the area should be a cultural and commercial destination point that exhibits African businesses and Culture.

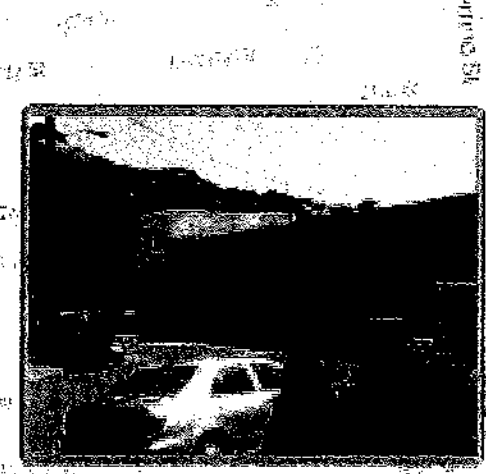

This must be a primary objective in all current and future housing and commercial developments in the city, **The Shipyard, Candlestick Point and South Eastern Industrial Waterfront Developments in particular should be targeted to attract African Americans. See page 54**

From 2003 to today there have been 90 market rate residential projects built or in the pipeline.

Subject: Moratorium is needed, for discussion and solutions.....

A reminder that in order to plan for the future, you need to think about and create the designs for the future.

One groups solution, (real estate/banks/developers/lobbyists/private interests) does not always equate good government and the real support of communities and the general public.

The consistent growth promoted by SFBARF, GROW SF, SFHAC, SPUR and other private monied interests ignores the premise of sound policy and infrastructure development built prior to or alongside the growth created.

Louise Renne submitted a key opinion piece in the SF Chronicle that highlighted a number of projects in the D10 BVHP and mission bay, mission areas, out to Vistacion Valley.

Those projects don't even discuss or include all of the recent proposed projects, pipeline projects, and soon developer creep in terms of new projects identified along the already problematic traffic and transit issues in the city TODAY!

In order to get ahead of the curve and impacts, and address the needs. We need to buy land as a public entity (government) and look seriously at solutions on transit the link and loop and connect both bi-county and internally.

The infrastructure needs are not just housing, or transit even, but schools, parks, libraries, public pools, and community facilities, supportive services, and green infrastructure.

Please put a hold on the development and follow Supervisor Campos's lead on this issue. There are solutions, but it will take serious effort on all sides to develop a sound solution for all of our futures! It will take an ear, some time, conversation, and planning, lets open the door at the planning department to a more community based urban planning process, or even invite some outside planners/architects to take a stab at the alternative more far-reaching solutions. SPUR could once again help on this note, if they include the design international community, the local neighborhood community organizations and lists of issues communities feel are real concerns needing address. Lets plan the bay area and the city for all of us, and not just the investor groups salivating at the next round of high-end housing....

Sincerely

Aaron Goodman

Subject: Moratorium

Dear Mayor Lee and Supervisors:

I am a five generation San Francisco. My daughter is near getting her paralegal degree she works full time, a widow with a 10 year old son and homeless. She simply can not afford \$300 for a studio. Her son has a work permit and still they can't afford to live near their family. He had to give up his dog, his school, his friends, his room.

You probably are thinking just go somewhere else. I suggest you just go somewhere else. I'm embarrassed to call myself a San Franciscan. There are 2000 homeless children here. How do you sleep at nights? All of you. You have made our beloved city an international embarrassment.

We are in a crisis and desperately need affordable housing. There is no excuse for homeless families in this city.

Please support Campos Ordinance #150461 - Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

This is a PAUSE for reflection that ultimately affects the entire City. Let's take some time to assess where we are at (horrible situation) and figure out where we all want to be not just those with resources but all San Franciscans.

Thank You,
Susan Suval

Please support Campos Ordinance.

in fact, please go further and support a general halt to market rate housing construction, which is code for luxury housing construction. There is more than enough of that already. Let's talk about a tax on empty units that radically escalates the longer they are left empty, culminating in an eminent domain procedure whereby the City takes control of "abandoned" units and makes them available to victims of Ellis and OMI evictions at 1/4 of their income. In cities such as Amsterdam such laws have gone a long way to stop the "safety deposit box in the sky" logic that finances our current speculative building boom.

Dear Mayor Lee and Supervisors:

I am a concerned San Francisco resident and I agree with Supervisor Campos. I own multiple properties in San Francisco and have a basic understanding of economics, so I fully support ridiculous efforts by progressive politicians to artificially reduce supply while imposing price controls. As has been proven over and over again, such policies inevitably result in inflation, which progressives would understand if they could do math and studied history. But progressives prefer to smoke unicorn farts, and thank god for that, because it's so easy to make money by betting on their stupidity.

Please support Campos Ordinance #150461 - Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

Subject: Campos Emergency Ordinance

Dear Mayor Lee and Supervisors:

I listened to the KQED Forum discussion on Friday, May 29, between Sup. Weiner and Sup. Campos, and I believe Weiner is not listening to the people of this city. San Francisco needs to implement this moratorium. City government needs to re-examine its affordable housing policies, therefore I am in FULL SUPPORT of Supervisor Campos' proposal. Even though it's temporary, I believe it is an excellent first step to addressing the serious lack of affordable housing in the Mission.

I am a very concerned San Francisco resident and I agree with Supervisor Campos that we need to take emergency actions to stop displacements.

Please support Campos Ordinance #150461 – Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

My hope is that Scott Weiner will change his position and see that his blanket approach of just building, building, building more and more housing does not serve the needs of long-time San Francisco residents. At times, as I listened to the radio broadcast yesterday, it sounded like even he was just touting some party line and didn't half believe what he was saying.

Please, Scott Weiner, vote with Campos on this. You're my supervisor. I'm a renter in Glen Park for 15 years now. Greedy landlords in my neighborhood are charging astronomical prices for newly vacant units. On the 200 block of Chenery (my block) a 3 bdr apartment is currently listed for \$6000 per month, an unheard of amount up until this year. Your oft repeated point on Forum to build more luxury and market-rate housing attracts only rich people to this city, forcing the rest of us out by enticing landlords to abuse the system, bump up rents, not to mention creates a housing market with prices unattainable for regular, middle income people.

The moratorium is not a crazy idea. The out of control housing market in San Francisco is what's crazy. Please, do the right thing for the people of San Francisco, support the Moratorium!

Thank You,
Sarah Smith

Subject: NO on Ordinance #150461 (Campos) - I DO NOT SUPPORT THIS MORATORIUM

Dear Mayor Lee and Supervisors:

As a Mission resident, property owner and small business owner since 1998, I do **NOT** support a moratorium on new development in San Francisco's Mission District.

I do support smarter neighborhood planning and enjoy the changes in my neighborhood (North East Mission). I feel much safer and appreciate being able to walk to various cafes, restaurants and shops without having to drive.

Thank You!
Susette Blackwell
3178 17th Street, Studio 3
SF, CA 94110

"Every time you say no to a new development, you are saying no to new families who want to live in the city. You are making sure that housing is more expensive for everyone else." Ed Glaeser

Subject: I'm the 49th signer: "Save the San Francisco Mission."

Dear Board of Supervisors,

I just signed a petition addressed to you titled Save the San Francisco Mission. So far, 49 people have signed the petition.

You can reach me directly by replying to this email. **Or, post a response for MoveOn.org to pass along to all petition signers by clicking here:** http://petitions.moveon.org/target_talkback.html?tt=tt-93420-custom-58344-20250601-6cOAuR

The petition states:

"As residents and taxpayers of San Francisco we respectfully request that you support David Campos Ordinance #150461 - Declaration of an emergency and a request for a temporary moratorium on market rate housing and PDR conversions in the designated area of District Nine. We support: 1. A temporary moratorium on market rate development 2. A temporary moratorium on PDR demolition and conversions 3. Development of 100% affordable units during the moratorium"

My additional comments are:

Give peace a chance. Try something different and this is it.

To download a PDF file of all of your constituents who have signed the petition, including their addresses, click this link: http://petitions.moveon.org/deliver_pdf.html?job_id=1529086&target_type=custom&target_id=58344

To download a CSV file of all of your constituents who have signed the petition, including their addresses, click this link: http://petitions.moveon.org/deliver_pdf.html?job_id=1529086&target_type=custom&target_id=58344&csv=1

This City's housing is **unaffordable**. Affordable housing doesn't even come close to what I can afford so it is NOT affordable. **Stop taking care of the 1%** of our City & start taking of the majority of the residents of San Francisco.

Also STOP the temporary rental of apartments. Pass a REAL law that will stop this loss of our rental units in San Francisco. One of these companies is Air B&B & it is taking over the city for the Greedy people of which there are too many

Subject: Campos Emergency Ordinance

Dear Mayor Lee and Supervisors:

I am a San Francisco resident, and an artist with a studio in the Workspace building in the Mission. I agree with Supervisor Campos that we need to take emergency action to stop displacements. The vibrant cultural tapestry of the Mission, represented by working class residents and artisans, among others, is rapidly being divided by double-decker buses into alternating streets of remarkable affluence or those with vast homeless encampments.

Please support Campos Ordinance #150461—Declaration of an emergency and a request for a moratorium on market rate housing.

I am also, however, very concerned that there is language in this ordinance that seems to allow PDR conversion to make room for affordable housing. Our artists are essential to our vibrant cultural diversity, giving San Francisco it's unique edge. If we lose that edge, we'll have destroyed what residents, businesses, and tourists love about San Francisco. To ensure that we continue to be a city of neighborhoods, diversity, and community, we must prioritize investment in cultural, community, and artistic spaces.

I strongly urge you to support both this moratorium legislation AND a change to our current zoning laws that will designate, preserve, and develop the vital "cultural and community spaces" that form the soul of our city.

Sincerely,
Sharon Steuer

Subject: Campos Emergency Ordinance

Dear Mayor Lee and Supervisors:

I am a concerned San Francisco resident and I agree with Supervisor Campos that we need to take emergency actions to stop displacements. We need to support our artists so that they can stay in the Mission, and we need to change our current zoning laws to support more affordable housing.

Please support Campos Ordinance #150461 – Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

Thank You,
Sally Northcutt

Subject: Campos Emergency Ordinance

Dear Mayor Lee and Supervisors:

I am a concerned San Francisco resident and agree with Supervisor Campos that we need to take emergency actions to stop displacements. I believe in the community organizations and government officials committed to supporting policy evolution, and that the moratorium will result in useful understanding and more diversely helpful solutions currently out of reach.

Please support Campos Ordinance #150461 - Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

Thank You,

Subject: In Favor of Campos Emergency Ordinance

Dear Mayor Lee and Supervisors:

I am a concerned San Francisco resident in favor of ordinance #150481.

I agree with Supervisor Campos that we need to take emergency actions to stop displacements and take a pause to rethink current city policy and planning.

Increased Density and new construction are inevitable and essential to providing a home for all in San Francisco.

But we have not been able to rely on developers and current incentives or exactions to even come close to meeting the balanced housing goals.

We are allowing the destruction of our neighborhoods, communities and the essential cultural fabric of San Francisco for the sake of local and international speculation. Little more it seems. The new market rate developments have not been helping alleviate our housing shortage, they only further drive up the cost of surrounding land for the potential of its future speculation as a resource for ROI. Southbeach is a sterile excuse for a planned San Francisco and we cannot let that thinking completely demolish such cultural treasures to San Francisco as the Mission District. Build Baby Build with no process is blind and dumb to the goal of driving down bulk housing costs and maintaining opportunities for a diverse economic system. Amanda Burden, the planning director for New York City has shared that even significant amounts of new construction there were not able to increase affordability.

<http://www.citylab.com/housing/2013/10/what-we-havent-figured-out-question-gentrification/7166/>

Peoples lives are being wrecked from having their lives homes community and occupations wiped out.

I have witnessed the whole scale exodus of the artists and creators who have been displaced from their studios homes and theaters and have no options left. Many of the PDR sites that might have served these communities are aligned for destruction, with no plans to ever create replacement space to incubate opportunities for the next generation.

As we are on the brink of demolishing an entire block on Bryant st, losing long time Mission District creative culture center CELLspace in the process, the quote from the developer when asked about the loss of this arts resource was, "The new building is the Art I'm offering the community." There is a significant disconnect if that's allowed to be the answer.

Know that there is a crisis in the arts and creative lifeblood of SF, along with the non profits, social services and almost all the blue collar sector.

Please stop, and think about solutions if we're going to continue our march towards density.

Demand space replacement for arts groups, and required community facilities on large sites or as part of conditional use authorizations in addition to setting the affordable housing goal at 33% as mandated by voters in prop K. If parcels are to be up zoned then there must be new cultural space created and increased requirements for affordable units. And the city MUST hold onto its property and use it's land for the public good. 100% affordable housing would be an example.

I would like these concepts to be considered in the upcoming Central SoMa plan when the Service Arts Light Industrial zoning is replaced.

Please support Campos Ordinance #150461 -- Declaration of an emergency and a request for a moratorium on market rate housing and PDR conversions.

Thank You,

Subject: Moratorium is needed, for discussion and solutions.....

A reminder that in order to plan for the future, you need to think about and create the designs for the future.

One groups solution, (real estate/banks/developers/lobbyists/private interests) does not always equate good government and the real support of communities and the general public.

The consistent growth promoted by SFBARF, GROW SF, SFHAC, SPUR and other private monied interests ignores the premise of sound policy and infrastructure development built prior to or alongside the growth created.

Louise Renne submitted a key opinion piece in the SF Chronicle that highlighted a number of projects in the D10 BVHP and mission bay, mission areas, out to Vistacion Valley.

Those projects don't even discuss or include all of the recent proposed projects, pipeline projects, and soon developer creep in terms of new projects identified along the already problematic traffic and transit issues in the city TODAY!

In order to get ahead of the curve and impacts, and address the needs. We need to buy land as a public entity (government) and look seriously at solutions on transit the link and loop and connect both bi-county and internally.

The infrastructure needs are not just housing, or transit even, but schools, parks, libraries, public pools, and community facilities, supportive services, and green infrastructure.

Please put a hold on the development and follow Supervisor Campos's lead on this issue. There are solutions, but it will take serious effort on all sides to develop a sound solution for all of our futures! It will take an ear, some time, conversation, and planning, lets open the door at the planning department to a more community based urban planning process, or even invite some outside planners/architects to take a stab at the alternative more far-reaching solutions. SPUR could once again help on this note, if they include the design international community, the local neighborhood community organizations and lists of issues communities feel are real concerns needing address. Lets plan the bay area and the city for all of us, and not just the investor groups salivating at the next round of high-end housing....

Sincerely

Subject: Support the Campos temporary market rate moratorium in the Mission

Everyone agrees we have a displacement problem that needs to be fixed. The whole nation is struggling under the same burden. There are many clear indications coming from many sources that indicate overbuilding market rate housing is directly linked to displacement and the dwindling middle class. There are even whispers of a glut of office space now that companies are downsizing.

Not only are we pushing people out of their city and destroying our rich cultural heritage, but we are also tearing apart communities and lifelong friendships that allowed many to age in place.

So far the only solution we have seen come out of SF City Hall is the Campos Ordinance that would set aside a test area by declaring a temporary moratorium on market rate development.

As Campos stated, the Board has allowed other districts to carry out other protections. Why not allow the Mission to try something new? San Francisco could lead the way to discovering the fix for displacement.

Let's give this one a chance. Vote YES of the Campos Ordinance.

Concerned Citizen, long time
San Francisco resident
