Resolution urging the San Francisco Public Utilities Commission to provide enhanced public access to existing roads and trails in the Peninsula Watershed Lands consistent with the goals of protecting the water supply and the environmental quality of the area.

IUrging the San Francisco Public Utilities Commission to Expand Public Access to the

WHEREAS, The San Francisco Public Utilities Commission's (SFPUC) Peninsula Watershed encompasses approximately 23,000 acres of land in San Mateo County and is a state-designated Fish and Wildlife Refuge; and

WHEREAS, The Peninsula Watershed (Watershed) is a component of the Hetch Hetchy Regional Water System and home to the highest concentration of native, rare, threatened, and endangered species in the nine-county Bay Area region; and

WHEREAS, As one of the region's unique natural habitats, the Peninsula Watershed provides significant and valued recreational and educational opportunities for the community throughout the San Francisco Bay Area and Northern California through the use of its public trail system; and

WHEREAS, The United States Department of Interior has a 19,000 acre Scenic Easement on the western portion of the Watershed and a 4,000 acre Scenic and Recreation easement on the eastern side of the watershed administered by the GGNRA; and

WHEREAS, Access to open space for both San Francisco residents and other residents of the Bay Area has been a longstanding concern of the City; and

WHEREAS, The Peninsula Watershed's two regional trail systems are the Crystal Springs Regional Trail, operated and maintained by San Mateo County Parks, and the Bay Area Ridge Trail, operated and maintained by the San Francisco Public Utilities Commission

and connecting the Sweeney Ridge Trail operated by the Golden Gate National Recreation Area (GGNRA); and

WHEREAS, These regional trails, and related connectors, provide 31 miles of existing trail access to the Peninsula Watershed; and

WHEREAS, In 2001, the SFPUC adopted the Peninsula Watershed Management Plan (PWMP) and the PWMP Final Environmental Impact Report, and this context provides the policy and environmental compliance framework in which future management actions on the Peninsula Watershed are considered; and

WHEREAS, Other Bay Area water districts, including the Marin Municipal Water District and the East Bay Municipal Utility District, allow public access to their lands and that the public regularly shares service roads with maintenance vehicles in these and other public lands; and

WHEREAS, The SFPUC, San Mateo County Parks, and the GGNRA have all declared support for opening the existing Whiting Ridge Trail to public access, but no concrete plans have been developed; and

WHEREAS, In its 2015 General Management Plan, the GGNRA, the administrator of the Scenic and Recreation Easements over the watershed, has encouraged construction of a new multi-use trail on watershed lands from Cañada Rd to Skyline Boulevard North of the Phleger Estate unit of the GGNRA and South of CA-92; and

WHEREAS, As an alternative to constructing a new multi-use trail, the SFPUC is working with the GGNRA and the San Mateo County Parks Department to use existing trails to connect the Crystal Springs Regional Trail to the Bay Area Ridge Trail through the Phleger Estate; and

WHEREAS, The SFPUC recognizes that additional educational opportunities can be increased, consistent with the goals and objectives of the PWMP with the construction of new

recreational trails combined with improvements to existing trails and appropriate staffing and maintenance of the Watershed Trail System; and

WHEREAS, Currently public access to the Fifield-Cahill Ridge Trail is available only through a docent-led program three days a week; and

WHEREAS, The SFPUC's Bay Area Ridge Trail Extension project plans to provide an additional sixteen miles of trail access and to implement a well-controlled and closely monitored annual permit system that would allow public access beyond the current docent program; and

WHEREAS, The SFPUC is working with the Planning Department on an initial study of environmental review of the Bay Area Ridge Trail Extension and of implementing an annual permit system, and any permit system would be developed in full compliance with a certified California Environmental Quality Act document; now, therefore, be it

RESOLVED, That the San Francisco Board of Supervisors strongly supports increased recreational access to the Peninsula Watershed for educational use that is compatible with protecting both drinking water quality and threatened and endangered plant and wildlife, consistent with the PWMP; and, be it

FURTHER RESOLVED, That the Board of Supervisors strongly supports the PUC's current efforts to develop a permit system for public access to the Fifield-Cahill Ridge Trail consistent with the PWMP; and, be it

FURTHER RESOLVED, That the Board of Supervisors urges the SFPUC to expedite implementation of this permit system for the existing portion of the Cahill-Fifield trail by the summer of 2017 instead of waiting for the construction of the extension to the Ridge Trail; and, be it

FURTHER RESOLVED, That the Board of Supervisors urges the SFPUC to continue the docent program alongside of the permit system to provide educational opportunities for the public to learn more about the watershed; and, be it

FURTHER RESOLVED, That the Board of Supervisors urges the SFPUC to work in collaboration with the San Mateo County Parks Department, the GGNRA, and the California State Parks System to focus on closing gaps on the Bay Area Ridge Trail and other regional trails on the Peninsula Watershed, which includes the following:

- the operation of the entire 16 miles of the Bay Area Ridge Trail on SFPUC property, which includes constructing the Bay Area Ridge Trail south of CA-92 to the GGNRA Phleger Estate and taking the trail easement from the Bay Area Ridge Trail Council for the 2 mile section north of Highway 92 through Skylawn Cemetery to Cemetery Gate on Cahill Ridge; and
- the design and construction of the North San Andreas Trail Connector; and, be it FURTHER RESOLVED, That the Board of Supervisors urges the SFPUC to develop a report on the feasibility of providing additional access to the watershed beyond what is included in the current PWMP, subject to necessary environmental review and developed in coordination with all of the interested agencies, organizations, and individuals, including the following:
- working with the GGNRA and San Mateo County Parks to determine what steps are necessary to open the Whiting Ridge Trail to public access, subject to necessary federal and state environmental review and approval requirements;
- considering possible routes for further public access to existing service roads focused connections to the Crystal Springs Regional Trail, the Bay Area Ridge Trail, the trail system in the Corral de Tierra unit of the GGNRA, and other trail alignments in the San Mateo County Trails Plan; and be it

- considering the opening of other such routes north of Highway CA-92 that would permit access to a variety of scenic loop routes for hikers and riders; and
- considering the reopening of Old Cañada Road on the west side of Upper Crystal Springs Reservoir and the construction of a new multi-use trail on watershed lands from this road to the Ridge Trail south of CA-92; and, be it

FURTHER RESOLVED, That the Board of Supervisors requests the SFPUC to report on its progress developing these plans, including the projects already approved as well as the potential revisions to the PWMP listed here, by March 31, 2017.

Subject: I am in support of Resolution 160183

Honorable Supervisors,

Please include this email as part of the public record.

Public access in the SF Watershed, and open space in general is vital to building communities and citizens that respect and want to protect the <u>natural environment</u>. I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites.

Our society is growing ever more focused on the electronic world - looking inward, and often downward into our mobile devices, and experiencing things secondhand through film and the internet. I fear that the lack of usy public access for all (not just those who live nearby city, state, or national parks) will lead to a future generation that does not understand the value of the outdoors, and does not prioritize protection of the <u>natural</u> environment.

At the same time, the manner in which the population experiences and enjoys the outdoors is changing. In Marin County, approximately one out of every three users of the Marin open space is riding a bicycle. These users are predominantly on the younger side. Years of study have shown that bicycles have the same environmental impact as pedestrians, and far below that of equestrian users. And safety concerns are largely overblown by a small, vocal minority of users who prefer not to share the experience of the outdoors with anyone with a different preference for the manner in which they experience it.

It is vital to open the San Francisco watershed to any and all human-powered user groups, so that they may experience the value of these lands. I look forward to bringing my young children to these lands, and traveling freely through them by foot or by bicycle.

Thank you for your consideration.

Subject: Conservation of the SF Watershed

Dear Members of the Board of Supervisors,

I am writing today, to encourage you to oppose opening the San Francisco Peninsula watershed.

As a 40 year neighbor to the watershed and a hiker and mountain biker, I can assure there are already hundreds of miles of great hiking and mountain bike trails nearby on the peninsula that are used well below capacity. Even on weekends and holidays, many of the open trails are rarely

used. (See http://www.openspace.org/preserves) There is simply no human need at all to risk harm by opening yet another pristine ecosystem and home to a rich variety of endangered and threatened species.

Perhaps some of you read recently that 10% of the world's wilderness has been lost to development since the 1990s.(*see below) Naturally all of us expect a world leading environmentally sensitive community like San Francisco will demonstrate great wisdom preserving our wilderness for future generations.

Many thanks, in advance for you wise decision.

Yours Truly,

Michael Liebhold 10 Durham Road Woodside, Ca

A tenth of the world's wilderness lost since the 1990s https://www.sciencedaily.com/releases/2016/09/160908130838.htm

Researchers reporting in the journa. Current Biology show catastrophic decames in wilderness areas around the world over the last 20 years. They demonstrate alarming losses comprising a tenth of global wilderness since the 1990s -- an area twice the size of Alaska and half the size of the Amazon. The Amazon and Central Africa have been hardest hit.

The findings underscore an immediate need for international policies to recognize the value of wilderness areas and to address the unprecedented threats they face, the researchers say.

"Globally important wilderness areas -- despite being strongholds for endangered biodiversity, for buffering and regulating local climates, and for supporting many of the world's most politically and economically marginalized communities -- are completely ignored in environmental policy," says Dr James Watson of the University of Queensland in Australia and the Wildlife Conservation Society in New York. "Without any policies to protect these areas, they are falling victim to widespread development. We probably have one to two decades to turn this around. International policy mechanisms must recognize the actions needed to maintain wilderness areas before it is too late. We probably have one to two decades to turn this around."

Watson says much policy attention has been paid to the loss of species, but comparatively little was known about larger-scale losses of entire ecosystems, especially wilderness areas which tend to be relatively understudied. To fill that gap, the researchers mapped wilderness areas around the globe, with "wilderness" being defined as biologically and ecologically intact landscapes free of any significant human disturbance. The researchers then compared their current map of wilderness to one produced by the same methods in the early 1990s.

This comparison showed that a total of 30.1 million km2 (around 20 percent of the world's land area) now remains as wilderness, with the majority being located in North America, North Asia, North Africa, and the Australian continent. However, comparisons between the two maps show that an estimated 3.3 million km2 (almost 10 percent) of wilderness area has been lost in the intervening years. Those losses have occurred primarily in South America, which has experienced a 30 percent decline in wilderness, and Africa, which has experienced a 14 percent loss.

"The amount of wilderness loss in just two decades is staggering" Dr Oscar Venter of the University of Northern British Colombia. "We need to recognize that wilderness areas, which we've foolishly considered to be de-facto protected due to their remoteness, is actually being dramatically lost around the world. Without proactive global interventions we could lose the last jewels in nature's crown. You cannot restore wilderness, once it is gone, and the ecological process that underpin these ecosystems are gone, and it never comes back to the state it was. The only option is to proactively protect what is left."

Watson says that the United Nations and others have ignored globally significant wilderness areas in key multilateral environmental agreements and this must change.

"If we don't act soon, there will only be tiny remnants of wilderness around the planet, and this is a disaster for conservation, for climate change, and for some of the most vulnerable human communities on the planet," Watson says. "We have a duty to act for our children and their children."

Subject: San Francisco Peninsula Watershed Proposal

To: Board.of.Supervisors@sfgov.org

Members of the Board of Supervisors, I urge you to oppose opening the San Francisco Peninsula watershed. This proposal asks San Francisco to pay for a plan that would harm us all, for the short term benefit of a small number of Peninsula hikers and bikers who already have many, many miles of Open Space to hike and bike on and around the Peninsula. They don't need the watershed. There's already a docent program that allows visiting the watershed without tearing down its protective fences. The watershed already serves its key purpose to us all: as part of our water supply. Because of its special protected condition, it also has the highest concentration of endangered and threatened species in the Bay Area.

he proposal's advocates claim the process should be as simple as taking down a few fences. The true cost is enormous, both monetary and possibly in human life. It would include staff, studies, and planning for habitat, trail, and traffic management on a scale that exists nowhere else in the area. The watershed is a known habitat for the

mountain lion. Tear down the fences and let the people in and you are endanged ing the lives of adults, children and dogs. The mountain lions would have more to prey on than just deer!

The watershed is near a public landfill, and there is constantly trash (furniture, chemicals, home waste, etc.) dumped along the watershed fences. Can you just imagine what it would be like if those people could "hide" and dump their trash actually in the watershed area?! Hikers and bikers inevitably increase fire risk and bring in seeds that harm the local ecosystem and dogs who are let loose to run and play (even if they are required to be "onleash") will disturb nesting birds and other animals. Take down the fences and watershed personnel will be constantly fighting to keep the watershed safe.

This proposal does not require environmental studies and funding, but should. The open the watershed movement claims there will be, but not so. In reality this proposal tries to rush the process. Think about where the funding for this is going to come from. San Francisco tax payers won't be happy if their tax money goes to funding something very few will ever see the benefits of.

Local groups like the Sierra Club, Audubon Society, California Native Plant Society, etc. all oppose this proposal. I ask you to think of the wellbeing of all who need the watershed -- not just in a year, or in ten years, but for generations. As Flint, Michigan reminded us, a water supply is the last thing we should make hasty decisions about.

Please reject this dangerous plan.

Thank you,

Vi Croop

[™]o the Board of Supervisors

Ay name is Michael Weisberg

150 Olive Hill Lane

Woodside, CA 94062

The Cal Water Water Shed is a beautiful, pristine area the is home on many species of wild life and one of the last refuges for in the area. This area is one of the cornerstones of our community and opening it up will destroy it. Take a look at the way people damaged the Mid Peninsula land. I have hiked those trails for 45 years and when they let in bicycles it got even worse. Their rangers have had to go on trail with a radar guns because the speeds were in excess of 35 mph and you add the yelling, squeaky brakes and sliding tires, we will no longer have any wild animals.

There is

really have no good reason to open it up and no right to damage such a beautiful area. Must we destroy and kill every natural thing.

Not to mention an ever increase risk of fire and erosion.

NOIII

Thank you in advance for voting NO on opening up this land.

Michael Weisberg

Subject: SF Watershed

Dear Members of the San Francisco Board of Supervisors.

I am writing you today to hopefully have you oppose the opening of the San Francisco Watershed to unrestricted public use.

I fortunately worked for the City and County of San Francisco since 1981. I recently retired in January of this year. The last 30 years I worked for the SF Water Dept, at the Millbrae Yard. As a equipment mechanic and later as an operating engineer, I had the opportunity to to travel through and work in the Watershed. Needless to say, I was very fortunate to have the privilege. I am also a mountain bike docent for the Watershed.

I feel allowing unsupervised public access to the Watershed would negatively impact the ecosystem and the native wildlife. All it would take is one individual to cause irreparable damage. As I always tell the people I lead on our rides when they ask why there isn't open access, is that they are special. They actually made the effort to make arrangements with the PUC to attend the ride. Which to me shows a certain amount of respect for the Watershed. And it allows the Watershed to maintain it's pristine environment.

Considering how vast the Watershed is, It would also be very difficult and expensive in terms of staffing Watershed Keepers to patrol the large amount of property there is.

Thank you for your time and consideration on this matter.

Respectfully yours, Nick Alafouzos

Subject: Support access to Crystal Springs Peninsula Watershed (YES on SFBOS file # 160183)

Dear Supervisors:

Please include my comments in the public record. Today, I write to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed that is located in San Mateo County.

This issue is very important to me and my family. The public has been unfairly closed off from the Watershed's scenic, historical and recreational experiences for too long.

Public access in the SF Watershed is a social justice, equity issue. I support the resolution (SFBOS file # 60183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -The "trails" in this space are actually existing dirt roads, which are currently used on a daily basis by SFPUC trucks. These roads could easily be designated as a trail system, similar to the Marin County and Santa Clara County Watersheds.
- -Residents of Southern San Francisco and Northern San Mateo County are some of the most socioeconomically and culturally diverse areas of the SF Peninsula. They are as close to the road network in the Watershed as they are to the Presidio. For these residents the SF Watershed is the closest open space.
- -Fostering public sentiment of environmental stewardship through public engagement is the model for environmental protection. The communities that surround the Watershed should be as trusted as environmental stewards as the communities that surround Mid-Pen or Marin. People with resources can travel to find open space in Marin, Southern San Mateo County or other locals in California. These alternative options do not apply for many residents on the SF Peninsula.
- -The docent program is unusable by many people, primarily those on the lower runs of the socioeconomic adder, including those who do not own a motor vehicle and who are unable to fit their lifestyle into the limited times the docent program runs. From a socioeconomic and social justice perspective, the docent program is very far from providing access to economically disadvantaged groups in the peninsula. Indeed, it is contrary to the ethos of enabling those who may not be as economically well off from part taking in the outdoors closest to

their homes. Many who reside in these areas are working class individuals whom planning a foray the SF Watershed with a docent program is not a viable option. In effect, the barriers to exclude residents who are stone's throw away from the SF Watershed places an inequitable and unfair burden on those individuals from equal access to their environment. From that perspective a permit program would be much better than the docent program to accommodate the economically disadvantaged populations of the area. In fact, open dusk till dawn access is even better than a permit program.

- For clarity, the current method of docent-led public access is extremely limited and unfair to the public. The number of spots available to reserve in advance only, for the few docent led tours that are held are extremely limited. Typically, there are only a handful of reserveable hiking spots available once a week, and the hikes are only at 9 or 9:30 the morning. In addition, some special interest groups have access to this space, unsupervised, outside of this docent program.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- Other local public spaces allow reasonable and appropriate public access without the negative impacts opponents of SFPUC Watershed access advocate. I draw your attention to the the watershed agencies listed above, and the Midpeninsula Open Space District as successful examples.

Please pass Resolution 160183 and work cooperatively with other agencies such as the SFPUC, San Mateo County and the Golden Gate National Recreation Area to achieve access reform for this important public land.

Thank you for your public service.

File 160183 FW: Please protect the Peninsula Watershed

From: Lieven [mailto:lievenleroy@yahoo.com] Sent: Tuesday, September 20, 2016 4:32 PM

Subject: Please protect the Peninsula Watershed

Members of the Board of Supervisors, I urge you to oppose opening the San Francisco Peninsula watershed.

I've lived, worked, and hiked in San Francisco and the Bay Area for 25 years. The watershed already serves its key purpose to us all: as part of our water supply. Because of its special protected condition, it also has the highest concentration of endangered and threatened species in the Bay Area. This proposal asks San Francisco to pay for a plan that would harm us all, for the short term benefit of a small number of Peninsula hikers and bikers.

The proposal's advocates have advertised with videos literally claiming the process should be as simple as taking down a few fences. The true cost is enormous, and would include staff, studies, and planning for habitat, trail, and traffic management on a scale that exists nowhere else in the area. (The Marin watershed, for example, has a large staff and a constellation of supporting organizations, even though it sees much less traffic than the Peninsula would.)

The watershed is near a public landfill, and I regularly find trash (furniture, chemicals, home waste, etc.) dumped along the watershed fences. Hikers and bikers inevitably increase fire risk and bring in seeds that harm the local ecosystem. Dogs disturb nesting birds and other animals. Take down the fences, and all those dangers creep closer to our water supply.

The open the watershed movement glibly claims there will be environmental studies and funding. But this proposal offers nothing of the sort, and in reality tries to rush the process. It would destroy exactly what has made the watershed unique.

The local Sierra Club, Audubon Society, California Native Plant Society, etc. chapters all oppose this proposal. I ask you to think of the wellbeing of all who need the watershed - not just in a year, or in ten years, but for generations. As Flint, Michigan reminded us, a water supply is the last thing we should make hasty decisions about.

∂lease reject this dangerous plan.

Thank you,

Lieven Leroy

Subject: Access to SF Watershed

Dear honorable Supervisors,

Please include this email as part of the public record.

Public access in the SF Watershed, and open space in general is a social justice, equity issue. I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Residents of Southern San Francisco and Northern San Mateo County are some of the most socioeconomically and culturally diverse areas of the SF Peninsula. They are as close to the road network in the Watershed as they are to the Presidio. For these residents the SF Watershed is the closest open space.
- -Fostering public sentiment of environmental stewardship through public engagement is the model for environmental protection. The communities that surround the Watershed should be as trusted as environmental stewards as the communities that surround Mid-Pen or Marin. People with resources can travel to find open space in Marin, Southern San Mateo County or other locals in California. These alternative options do not apply for many residents on the SF Peninsula.
- -The docent program is unusable by many people, primarily those on the lower runs of the socioeconomic ladder, including those who do not own a motor vehicle and who are unable to fit their lifestyle into the limited times the docent program runs. From a socioeconomic and social justice perspective, the docent program is very far from providing access to economically disadvantaged groups in the peninsula. Indeed, it is contrary to the ethos of enabling those who may not be as economically well off from part taking in the outdoors closest to their homes. Many who reside in these areas are working class individuals for whom planning a foray the SF Watershed with a docent program is not a viable option. In effect, the barriers to exclude residents who are stone's throw away from the SF Watershed places an inequitable and unfair burden on those individuals from equal access to their environment. From that perspective a permit program would be much better than the docent program to accommodate the economically disadvantaged populations of the area. In fact, open dusk till dawn access is even better than a permit program.

Thank you for your public service.

Subject: Please vote to open the watershed. Yes on Resolution 160183

Dear honorable Supervisors,

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.
- -The Watershed property contains some of the most important historical and cultural heritage sites in the state of California. The public has a right to be able to access these sites.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Subject: Legislation File No. 160426 - Planning Code, Zoning Map - Rezoning Midtown Terrace

Neighborhood

Honorable Supervisors,

I am a 9 year resident of Midtown Terrace, a former member of the Midtown Terrace Homeowner's Association Board, and a member of our neighborhood's Architectural Review Committee.

I know that you have received emails from others in our neighborhood regarding the rezoning of Midtown Terrace, so I will not repeat the history of our neighborhood nor the history of our work over the past two years to bring this legislation forward. Instead I will address our primary motivation for this rezone and what I believe will be the primary issue at hand, the issue of RH-1D and Accessory Dwelling Units or ADU's, also known colloquially as In-law or Granny units.

Our work began two years ago out of a desire to protect one primary and essential aspect of our neighborhood's character, the pattern of detached houses. Detached houses are characteristic of RH-1D districts. Other primary haracteristics of RH-1D districts are outlined in the following excerpt from the San Francisco Planning Code:

"These Districts are characterized by <u>lots of greater width and area than</u> in other parts of the City, and by <u>single-family houses with side yards</u>. The structures are relatively large, but <u>rarely exceed 35 feet in height</u>. Ground level open space and landscaping at the front and rear are usually abundant. Much of the <u>development has been in sizable tracts</u> with <u>similarities of building style and narrow streets following the contours of hills</u>. In some cases <u>private covenants have controlled the nature of development</u> and helped to maintain the street areas."

Our neighborhood has all of the characteristics of an RH-1D District underlined above. Our neighborhood is also virtually identical in character to the Forest Knolls neighborhood across Clarendon Avenue, a neighborhood that is zoned RH-1D. For these reasons we see this proposed rezone not as a change to our zoning, but as a correction of a previously incorrect zoning designation. To date we have not encountered any opposition to this position.

However the issue of ADU's has emerged as an area of concern for some because San Francisco's newly adopted Ordinance 162-16 separates RH-1D districts from all other districts for the purpose of permitting ADU's. The language of the Ordinance may lead some to believe that ADU's are prohibited in RH-1D districts however this is not the case. We have verified both with the San Francisco Planning Department and with the City Attorney (with the assistance of Supervisor Yee's office) that ADU's are definitely permitted in RH-1D districts under the state provisions according to the following excerpt from San Francisco Ordinance 162-16:

"An Accessory Dwelling Unit in an RH-1 (D) zoning district shall be allowed only as mandated by Section 55852.2 of the California Government Code and only in strict compliance with the requirements of subsection (b) of Section 65852.2. as that state law is amended from time to time."

It is likely that there are many residents in Multown Terrace that will want to develop ADU's. It was never been our intent to limit that activity through this proposed re-zone.

Since this proposed legislation would protect the character of Midtown Terrace and would not 'downzone' or reduce the ability to create ADU's, we strongly urge you to support this legislation.

Thank you for your consideration and I would be happy to answer any questions that you may have on this information.

Sincerely,

David Mc Adams 357 Dellbrook Avenue

Subject: The San Francisco Watershed

Dear members of the San Francisco County Board of Supervisors,

I am writing to you concerning the resolution before you to improve public access to the San Francisco Public Utility Commission's Peninsula Watershed.

Fifty years ago, when I was a member of the Mils High School Cross Country team, our coach obtained permission from the San Francisco Water Department that allowed us to run in the restricted area of this watershed, behind Sawyer Camp Road. As often as three times a week, a group of us would run on these roads, ranging from a half-hour to an hour and a half each time. It was a deeply enjoyable experience as we could enjoy this wildlife preserve secluded from the general public, but e were also aware that we were there as visitors, and of its environmental importance.

I support more public access to the watershed, but favor doing this through expanding the current system of docent-led visits, or having small groups obtain permission from the SFPUC for visits on specific days and times.

To allow unrestricted access would disturb the wildlife in this watershed and create possible fire hazards as well as litter and other problems. It is much wiser, in my opinion, to proceed with caution and on a trial basis, than to make such a radical change as opening the Watershed to anyone and everyone without supervision.

I am especially concerned about opening the watershed to bike riders. As Howie Wolke pointed out in High Country News:

Backcountry biking damages the land. Bikers often veer off trail just to keep from crashing. Last year, I sent the district ranger photos of mountain-bike damage to vegetation at Kissinger Lakes in the DuNoir, but the problem persists. Because mountain bikers ride fast, they startle wildlife more than hikers or horseback-riders do. They also make formerly remote areas more accessible, thereby reducing solitude and increasing the disturbance of wilderness-dependent species such as lynx and wolverine. Like trail runners with ear pods, mountain bikers inadvertently "troll for grizzlies," as demonstrated by the 2004 mauling of a DuNoir mountain biker. Speeding mountain bikers also endanger horse-packers and hikers on steep trails. Let's face it: Mountain bikers need all hat protective gear because they're not always in control.

https://www.hcn.org/wotr/mountain-bikes-and-wilderness-dont-mix

Bike riding is forbidden in wilderness areas under legislation passed by Congress in 1964. The San Francisco Watershed as it now exists is essentially a wilderness.

One potentially dangerous area in this regard is the road leading from Sawyer Camp Trail up to the ridge, from my memory almost two miles long. This road is steep and with many turns, often blind turns. A bike rider coming down this road could easily reach high speeds presenting danger both to whomever the rider might encounter, as well as to himself or herself.

Finally, I have read reports of responsible environmental organizations such as the Sierra Club, the Audobon Society and the Committee for Green Foothills who oppose unrestricted access to the watershed. As one of the most progressive, environmentally friendly counties in the nation, I hope you will heed their concerns.

Sincerely,

Stephen Denney

Subject:

Resolution 160183, for the public record

To the San Francisco Board of Supervisors,

I am writing to ask that you support Resolution 160183, opening the San Francisco Peninsula Watershed to the public.

Please make this letter part of the public record.

Thank you,

Janet Creech 39 Helen Drive Millbrae, CA 940630 Honorable Supervisors of the City of San Francisco City Hall 1 Dr. Carlton B. Goodlett Place San Francisco, Ca 94102-4689 Dear Board of Supervisors –

As a professional Ornithologist, Ecologist, and Evolutionary Biologist, I wanted to raise a couple biological concerns relating to opening the Crystal Springs Watershed to unrestricted access.

First, I would like to make sure that the board realizes the full importance and uniqueness of the biological resource that you are currently stewarding. In a landscape that is mostly developed with roads, homes, businesses, and access at many different levels, there are few untouched places in the San Francisco Peninsula. Precisely because of the long-term water management and restricted access, the Crystal Springs lands represent the most pristine and important repository of biological resources in our peninsular counties. There are several endemic species to the peninsula, found nowhere else, of plants, butterflies, and other organisms, and several protected species. Additionally, invasive plants and diseases have degraded many other habitats, and species like French broom and sudden oak death fungus – which are very easily introduced and spread by foot traffic and travelers – still have not taken hold in the watershed as they have elsewhere. Open gates allow pests like feral cats and dogs to move in and decimate ground nesting birds and small mammals. Any plan to open the watershed should seriously address these threats and ensure the long-term safety of the resource.

Second, fire is a serious concern in the watershed. The area has not been burned for many decades, so fuel wood and debris is likely to have accumulated to an unnatural level. Combined with a multi-year drought that is now considered to be the new normal, the question is not if there will be a fire, but when there will be a fire. We have seen uncharacteristic hot fires in many other parts of the state that destroy soil, seed banks, habitat, harm water quality, and erode watersheds and fill reservoirs with silt and runoff. This is not a problem that is going to go away, but it should be managed and controlled and plans in place before the watershed should be opened. Once opened, the probability of fire greatly increases, and the ability to control the burn for constructive purposes greatly declines. Most fires in California are started by irresponsible people – usually in places where they should not be or doing things they should not do. The recent fires in Big Sur are a nearby example. In the last 3 years, there have been two serious human-started fires within a halfmile of my favorite trailhead into the Marin Watershed, and both have required serious and rapid response from local fire companies to extinguish. With numerous adjacent private lands, fire management creates additional planning, coordinating, and buy-in with local stakeholders - all of which needs to be coordinated.

Summary of Avaios Amendments to Watershed Resolution - 9/12/16

- 1. Page 2, line 20: Indicates that the SFPUC plans to use existing trails to connect the Crystal Springs Trail to the Bay Area Ridge Trail instead of constructing a new trail.
- 2. Page 3, lines 3-12: Describes the SFPUC's plans for the Bay Area Ridge Trail Extension and states that any permit-access system will be developed in compliance with a Supplemental EIR.
- 3. Page 3, lines 20-23: Urges the SFPUC to implement the permit system on the existing Cahill-Fifield trail before the construction of the trail extension is complete.
- 4. Page 4, lines 1-3: Urges the SFPUC to continue the current docent program to provide educational opportunities.
- 5. Page 4, lines 8-16: Makes some technical updates based on the SFPUC's plans for closing specific gaps in the Bay Area Ridge Trail.
- 6. Page 4, line 18- page 5, line 12: Clarifies that the Board is urging the SFPUC to work will all interested stakeholders on a feasibility report of providing additional access, and urges the SFPUC to "consider" instead of "propose" several routes.
- 7. Page 5, line 15: Extend the deadline for the SFPUC to report on its progress from September 1, 2015 to March 31, 2017.

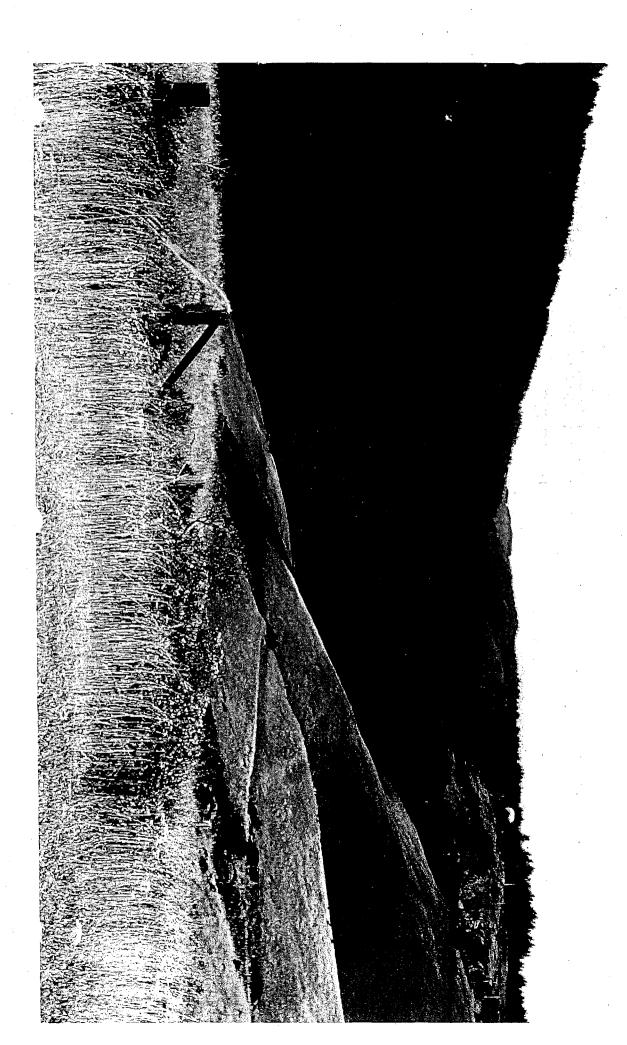

Peninsula Watershed Education and **Recreation Improvements**

September 12, 2016
Tim Ramirez

Peninsula Watershed - Pilarcitos Creek Canyon

Peninsula Watershed Trails

- 31 miles of existing trails, with 2 primary north-south trails
 - Crystal Springs Regional Trail managed by San Mateo County
 - Bay Area Ridge Trail managed by the SFPUC
- As anticipated in the Peninsula Watershed Management Plan, we've been pursuing 3 new significant trail projects (11 additional trail miles)
 - Bay Area Ridge Trail Extension
 - North San Andreas Trail Connector
 - Crystal Springs Regional Trail Improvements

Trail Projects

- Bay Area Ridge Trail Extension, 6 miles between Highway
 92 and GGNRA's Phleger Estate
 - Initial Study and initiate formal public review by December 2016
 - Complete federal and state environmental review 2017
 - Start Construction Spring/Summer 2018
 - Trail Opening December 2018
- North San Andreas Trail Connector
 - Conceptual Design to be complete by December 2016
 - Construction anticipated in Spring/Summer 2019

Trail Projects

- Crystal Springs Regional Trail Improvements (San Mateo County Parks)
 - Lower Crystal Spirngs Dam to Highway 92 SFPUC funded security and watershed fencing components
 - South of Highway 92 permitting issues, project currently on hold
 - East-perimeter trails

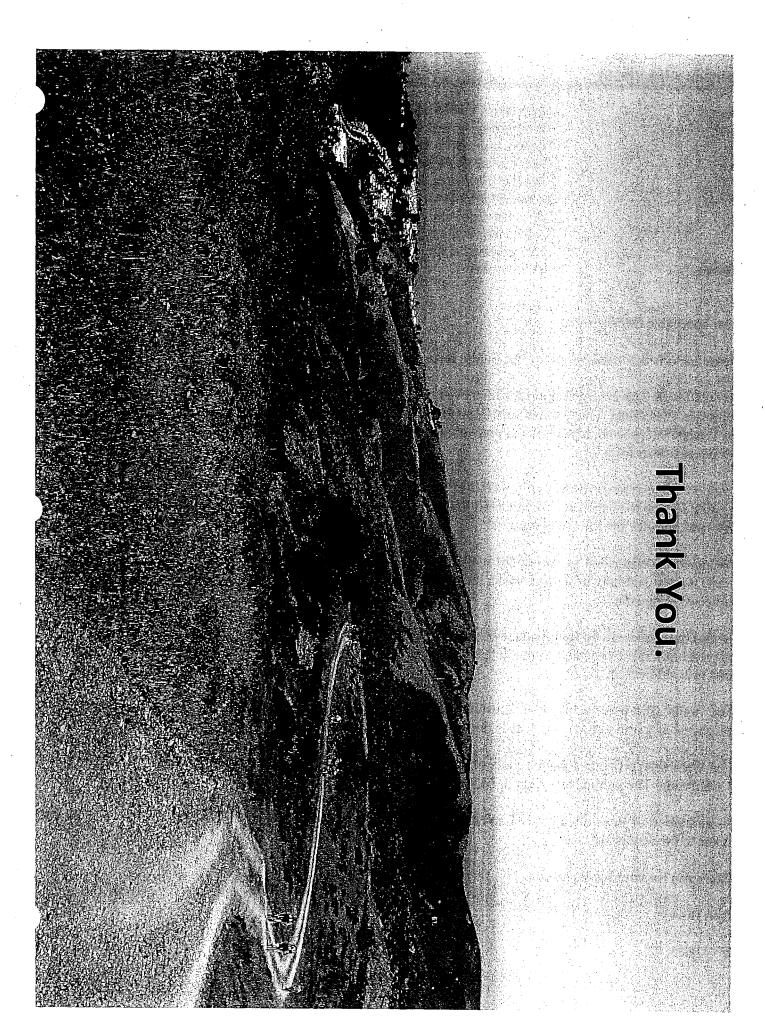

Trail Management

- Current SFPUC Bay Area Ridge Trail (Fifield/Cahill) management is via docent-led groups.
- We propose to move to an annual permit system coupled with the Bay Area Ridge Trail Extension:
 - Access would be provided 7 days per week, dawn to dusk.
 - It would ensure that trail users are aware of their responsibilities when accessing the trail.
 - It would provide a measure of trail use to the SFPUC.

Summary

- Development of an annual permit system for SFPUC Bay Area Ridge Trail use will increase education and recreation opportunities.
- Existing and proposed future operation of the trails need to be constantly balanced with drinking water and ecological protection goals.

Subject: SF Watershed

Dear honorable Supervisors,

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers and cyclists to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.
- -The Watershed property contains some of the most important historical and cultural heritage sites in the state of California. The public has a right to be able to access these sites.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Subject: San Francisco Public Utility Commission's Peninsula Watershed

Dear honorable Supervisors,

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over visting service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to astorical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers and cyclists to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.
- -The Watershed property contains some of the most important historical and cultural heritage sites in the state of California. The public has a right to be able to access these sites.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Increase Public Access to the SF Watershed Subject:

Good evening Supervisors,

Please include this email in the public record.

Our country is too divided. Each issue has extreme fringes on both sides eroding the common ground for a sensible solution. This results in politically-motivated rulings instead of common sense solutions. The overwhelming majority of the public suffers as common sense is abandoned in favor of fear tactics.

I am asking each of your to please find a compromise in providing increased public access to public lands. Although I am the Vice Mayor of San Bruno, I am writing on the behalf of myself and my family. I love sharing nature's beauty and onder with my four year old son. The limited trails are nice however it can be much better if you see through the Increase and do what is best... compromise! Increase access and tighten up security where it is needed. Saying "No" is too easy. Finding a good solution takes effort but that is what you are supposed to do. I urge you all to see through the hyperbole and hysteria. More can be done... Improve and provide something better than what is currently under available... It is in your hands.

Sincerely,

Marty Medina San Bruno Vice Mayor

Subject:

SF Watershed Access Reform

Dear Supervisors Cohen, Peskin and Wiener:

I am one of the many responsible trail users who was looking forward to the permitted access that was being considered. I have been on the docent-led hikes within the watershed, and as much as I have appreciated the opportunity, those type of prescribed outings do not bring the same level of enjoyment as an unscripted walk within other protected lands of the Peninsula. So, I would appreciate your continued efforts toward a reformed level of managed (permitted) access within the watershed lands.

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

-Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.

-At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.

-The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Dear Supervisors Cohen, Peskin and Wiener, and to whom it may concern:

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.

- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

On a personal level, this land has great significance to me as it (or the little bit of it I could get to between the fence and Cañada Rd) played an important role in a major healing process for me. It is the energetic center of the county, landwise, and it would be of benefit to the physical, spiritual, and psychological health of county residents to have access to this land (and vice versa, I believe).

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Comment on Board File No. 160183 (Peninsula Watershed)

Dear members of Land Use and Transportation Committee,

Regarding the goals of protecting the water supply and the environmental quality of the Peninsula Watershed Lands.

Do you happen to know that VERY TOXIC HERBICIDES are used in the watershed?

Do you happen to know that the East Bay Municipal Utility District had acknowledged the presence of pesticides (used in watershed) in the district water?

Do you happen to know that Marin Municipal Water District has been pesticide free for 10 years and last year reaffirmed it commitment to remain pesticide free?

When is San Francisco going to ban the use of ALL toxicity category I & II herbicides?

When would our government start thinking about the safety of our drinking water and stop engaging in playing god and aspiring to return our lands to the state they allegedly were 250 years ago?

Sincerely, Anastasia Glikshtern 150 Chaves Ave. San Francisco, CA 94127

Subject: Resolution on access reform in the Crystal Springs "SF Watershed"

Dear Supervisors Cohen, Peskin and Wiener:

Please include this email as part of the public record.

I am a registered voter living in the Outer Richmond neighborhood of San Francisco. I am writing to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed.

Like so many of us in the Bay Area, I am an avid outdoor enthusiast. I recently relocated to California from the state of Texas and I have been very impressed with the quality and diversity of the many parks and recreation areas in the beautiful state of California. My goal is to improve access closer to home so that we can get more people appreciating the beauty of this place.

- support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:
- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Sincerely, Stephen Chudleigh San Francisco, CA

Subject: Yes to SF Watershed access

Dear honorable Supervisors,

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. It is important to let many people access to the beauty that the nature offer so that they value the importance. Also, I believe that it is important to act based on scientific facts. It is about finding a good balance and searching for how human can I coexist with many species.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.

Subject:

Honorable Supervisors Cohen, Peskin and Wiener:

I'm writing today to express my support for improving public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is important to me as I feel these public lands should be responsibly accessible by the entire community, not just the privileged few that currently have access. The time is long overdue for the watershed's scenic, historical and recreational offerings to be open to the community and I would request you do what you can to help this access reform take place.

The resolution regarding access to the watershed - SFBOS file # 160183 - would allow responsible access to the SFPUC watershed lands over existing service roads such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and would also grant access to historical sites within the watershed. It would offer access using the watershed's existing rt roads, allowing hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space. Further, it would help better integrate National, State and County parklands across the San Francisco Peninsula.

While at this time there are no know significant concerns over water security, fire safety or environmental stewardship, the mandated environmental investigation, to be performed prior to opening the watershed, would surface any potential areas of environmental concern.

Please note that these "roads" while unpaved, are currently used by SFPUC trucks on a daily basis. They could easily be integrated into a trail system, such as has been done in the Marin County and Santa Clara County watersheds.

It is under the above context that I request that you therefore please support resolution 160183, and put the necessary framework in place so that the SFPUC will work cooperatively with San Mateo County to implement this access to the watershed.

Thank you for your service to the community and the public at large

Note: Please include this email as part of the public record.

Kindest regards,

Art Muir

San Mateo - North Shoreview district

Subject: Open the SF Watershed NOW!

I am writing to insist that you all open the SF Watershed NOW! in the words of John Muir Everybody needs beauty as well as bread, places to play in and pray in, where nature may heal and give strength to body and soul alike.

I have been an avid mountain biker for 25 years on the peninsula and living on the coast and in san mateo the lack of trails available is astonishing. It's astonishing because the jewel of the watershed is pristine and has miles and miles of trails that would help us all to decompress in this world where the cost of living is insane.

Trail studies will be done to insure that there will be no damage to the watershed so what is the delay in this? btw Docent led programs are bullshit. I'm 51 years old and I don't need to be supervised nor do any other adults. The very notion of a docent led program pisses me off in that it belies an attitude that our government authority figures know best how to handle us unruly citizens. Forget that!

Please open the watershed NOW!

namaste.

Subject: Peninsula Watershed

Dear Supervisors Cohen, Peskin and Wiener:

Please include this email as part of the public record.

Thank you for this opportunity to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to very dear friends who live in that area. Friends who along would their children would appreciate and benefit from respectful enjoyment of the area. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) for the following reasons:

-Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.

- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.
- -The Watershed property contains some of the most important historical and cultural heritage sites in the state of California. The public has a right to be able to access these sites.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you all for your continued public service. Jean Forsman San Francisco California

Subject: Access to the SFPUC watershed lands

Dear Supervisors Cohen, Peskin and Wiener:

Although I'm a resident of Santa Clara county, I'm writing to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed located in San Mateo County due to my personal interest in hiking.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- Access to the watershed's existing dirt roads would allow hikers to visit the area's largest and most scenic unused, publicly held open space, integrating national, state, and county parklands across the San Francisco Peninsula.
- The trails in this space are actually existing dirt roads, which are currently used on a daily basis by SFPUC trucks. These roads could easily be designated as a trail system, similar to the Marin County and Santa Clara County Watersheds.
- Other local public spaces allow reasonable and appropriate public access without the negative impacts opponents of SFPUC Watershed cess advocate, e.g., the Midpeninsula Open Space District.
- Finally, the current method of public access is extremely limited and unfair to the public. The number of spots available to reserve in advance only, for the few docent led tours that are held are extremely limited. Typically, there are only a handful of reserveable hiking spots available once a week, and the hikes are only at 9 or 9:30 the morning.

Please pass Resolution 160183 and work cooperatively with other agencies such as the SFPUC, San Mateo County and the Golden Gate National Recreation Area to achieve access reform for this important public land.

Thank you,

Jennifer

Subject:

resolution 160183 be placed in public record

Good day

To the San Francisco board of supervisors I ask that the opening of the San Francisco watershed (resolution 160183) be favorably voted on. The continue population growth of the peninsula with it's high density is begging for a place for people to get away. A place to clear their minds, interact with nature, breath clean air and get the benefit of exercise all without cost to the family budget.

Thank you for your consideration

Richard Howse

Protect Our Water Supply Subject:

Dear Supervisors Cohen, Peskin and Wiener,

I urge you to reject the resolution to open the Peninsula Watershed for recreation access in the Land Use and Transportation Committee.

I am a San Francisco resident and PUC rate payer. I have spent the last ten years devoted to the responsible stewardship of our public lands as a conservation professional on public land in the Bay Area. I am an avid hiker, biker and dog walker. I love being on the land but I want Crystal Springs fully protected.

Protect Our Water

The watershed lands provide incredible, irreplaceable services to the Bay Area in terms of water filtration and storage. Fire, erosion, pathogens and invasive species all play a role in land health. Only healthy land can provide high quality drinking water.

- Unrestricted access increases fire risk.
- Unrestricted access increases sources of erosion.
- Unrestricted access increases vectors for pathogens like Sudden Oak Death and Phytophthora cinnamommi.
- Unrestricted access increases vectors for invasive plant species, which threaten habitat and ecosystem services

Inadequate Thought and Funding to Protect Water Supply and Habitat

If you increase the threats above, you owe it to San Francisco to have a plan in place to deal with the consequences.

- What is your plan to deal with increased fire risk? What assurances are you making for our water supply? For neighbors of the watershed?
- What is your plan to deal with increased sedimentation? The PUC's management plans demand erosion prevention. How will you prevent rogue trails and damage by cyclists? These are well understood issues on recreation lands. Denying their existence is no way to secure our water supply.
- What is your plan to limit the spread of forest-destroying pathogens? Will you close these trails when conditions warrant, for example during wet months, to limit the spread of pathogens? Will you install bike and boot cleaning stations at all trail heads, provide education and keep them stocked?
- Will you increase funding for invasive plant surveys and management?

Access Equality: Who Pays? Who Recreates?

he PUC has assured rate payers that they will not bear the financial burden of recreation on its lands.

- Who will pay for the rangers, maintenance staff and conservation professionals needed to manage recreation in such a valuable area? Hikers and bikers?
- All San Franciscans will be risking their water, but who will really have access? How will you ensure that residents without cars will still have the public access trumpeted in this resolution?

The Land Use and Transportation Committee must steward San Francisco's land. You must acknowledge the challenges and costs of land management before passing any resolutions to open the watershed.

Protect our water supply and the biodiversity of the watershed: Reject Supervisor Avalos' resolution on Monday.

Sincerely,

Rachel Kesel 33 Massasoit Street San Francisco, Ca 94110

Subject: Please SUPPORT Resolution 160183 on expanded public access in the SF Watershed -

Please include my voice in the public record

Dear Supervisors Cohen, Peskin and Wiener,

Please include my voice in the public record.

I had my part to play in the resolution being considered today. Before starting the Open the SF Watershed Facebook page in March of 2014. For quite a few years I deeply into the topic of the Crystal Springs "SF" Watershed. I was astounded by the fascinating and important local history and localities that much of a public were, and remain, totally unaware of. The most important historical locations in the state of California are on this SFPUC property. Bours Bourn and William Ralson made sure of that. Alarming to me through my research. It seemed clear that the SF Water Dept has had a for decades of purposely kept the public unaware as possible about this property. And therefore it's significant history and sites. In my mind this seemed to be in egregious crime against our shared cultural heritage. I was also astounded that as an issue, in March of 2014. This was something no one was talking about, or had approached in a public forum for over a decade.

Certainly I do consider myself an environmentalist. And so I was taken aback when voices from organizations I respect raised there ire against the mere thought of access reform. Since then they have a launched quite a few arguments. Arguments that ignore the fact that CA CEQA requires studies to move forward and decide access qualifications for any access reforms within the Watershed on a scientific basis. From that regard the arguments they allay are in fact anti-science fear mongering.

Recently and very telling is a line they have recently started using in their argumentation: "The SF Watershed is not a park, and never should be a park". This is wonderful turn of events because it finally gets to the real heart of the argument. This is for them because of CEQA law not a logical argument, this has become a philosophical argument.

Philosophically I believe the watershed should be integrated into the greater San Francisco Peninsula park system. After all the gravel road network pre-dates any barbwire fences and green signs as it dates back to the 1860s. It is the same network that flows through so much other open space parkland, and connected the once aggression society of our past. Philosophically the voices of decent do not agree. They say this is a special place just for nature. Meaning that open space parkland as an idea, the model for environmental protection and public stewardship, simply does not apply here.

If there is a convergence of differing philosophies. Say cultural heritage and history versus environmental protection versus recreational activities for example. Then it seems to me there is a balance to be struck. Scientific review is the perfect and only real vehicle for that balance. And as I noted before it happens to be mandated by law to occur before any trail reforms can happen. That is why the voices of decent against this resolution are wrong.

But they are also wrong about something else. In decades past there have been other democratic efforts to increase access in our SF Watershed. These efforts have always ebbed and flowed, and each time started again anew. The SFPUC for decades employed bureaucratic efforts to stall and wait. When the voices for access faded away, no real reforms ever occurred. The advent of social media changes this calculus totally. No matter the outcome of the resolution today. Open the SF Watershed as an organization, as a movement and as an idea is not going away and the zenith is very far off. It will only continue to get stronger, the grassroots have taken too strong a hold.

Thank you for your public service,

Subject: Please SUPPORT Resolution 160183 on expanded public access in the SF Watershed -

Please include my voice in the public record (this version)

Dear Supervisors Cohen, Peskin and Wiener,

Please include this email in the public record.

I had my part to play in the resolution being considered today. Before starting the Open the SF Watershed Facebook page in March of 2014. For quite a few years I deeply into the topic of the Crystal Springs "SF" Watershed. I was astounded by the fascinating and important local history and localities that much of a public were, and remain, totally unaware of. The most important historical locations in the state of California are on this SFPUC property. Bours Bourn and William Ralson made sure of that. Alarming to me through my research. It seemed clear that the SF Water Dept has had a for decades of purposely kept the public unaware as possible* about this property. And therefore it's significant history and historical and cultural heritage sites. In my mind this seemed to be in egregious crime against our shared cultural heritage. I was also astounded that as an issue, in March of 2014. This was something no one was talking about, or had approached in a public forum for over a decade.

Certainly I do consider myself an environmentalist. And so I was taken-a-back when voices from organizations I respect raised their ire against the mere thought of access reform. Since then they have a launched quite a few arguments to fight the reform effort. Arguments that essentially ignore the fact that CA CEQA requires scientific studies to move forward and decide access qualifications for any access reforms within the Watershed, and make decisions on a scientific basis. From that regard the arguments they allay are in fact anti-science fear mongering.

Recently and very telling is a line of rhetoric they have started using in their argumentation: "The SF Watershed is not a park, and never should be a park". This is wonderful turn of events because it finally gets to the real heart of the argument. This is for them because of CEQA law not a logical argument, this has become a philosophical argument.

Philosophically I believe the watershed should be integrated into the greater San Francisco Peninsula park system. After all the gravel road network pre-dates any barbwire fences and green signs as it dates back to the 1860s. It is the same network that flows through so much other open space parkland, and connected the once agrarian society of our past. The voices of decent do not agree. They say "this is a special place just for nature". Meaning that open space parkland as an idea, the model for environmental protection and public stewardship, simply does not apply here.

When there is a convergence of differing philosophies. Say cultural heritage and history versus environmental protection versus recreational activities for example. Then it seems to me there is a need for a balance to be

struck. Scientific review is the permet and only real vehicle for that balance. And as I noted before it happens to be mandated by law to occur before any trail reforms can happen. That is why the voices of decent against this resolution are wrong.

But they are also wrong about something else. In decades past there have been other democratic efforts to increase access in our SF Watershed. These efforts have always ebbed and flowed, and each time started again anew. The SFPUC for decades employed bureaucratic efforts to stall and wait. When the voices for access faded away, no real reforms ever occurred. The advent of social media changes this calculus totally. No matter the outcome of the resolution today. Open the SF Watershed as an organization, as a movement and as an idea is not going away and the zenith is very far off. It will only continue to get stronger, the grassroots have taken too strong a hold.

Thank you for your public service,

*..."I contacted them and said, "Hey! I'm this terrific landscape photographer, and I'd like to photograph the land." And they laughed. On the phone they said, "You don't understand: we have people whose job it is to keep this property private and off the public radar. We don't respond to press inquiries. Our whole focus is in keeping people unaware of it, or having them just take it for granted as they drive up 280. So no, we are not going to let a landscape photographer go in there and show people the glory that is this property.""...

Subject: Open the Peninsula Watershed to public access

Dear Supervisors Cohen, Peskin and Wiener:

I write to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed that is located in San Mateo County.

This issue is very important to me and my family. The public has been unfairly closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do everything you can to help achieve public access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails" in this space are actually existing dirt roads, which are currently used on a daily basis by SFPUC trucks. These roads could easily be designated as a trail system, similar to the Marin County and Santa Clara County Watersheds.
- Other local public spaces allow reasonable and appropriate public access without the negative impacts opponents of SFPUC Watershed access advocate. I draw your attention to the the watershed agencies listed above, and the Midpeninsula Open Space District as successful examples.
- Finally, the current method of public access is extremely limited and unfair to the public. The number of spots available to reserve in advance only, for the few docent led tours that are held are extremely limited. Typically, there are only a handful of reserveable hiking spots available once a week, and the hikes are only at 9 or 9:30the morning.

Please pass Resolution 160183 and work cooperatively with other agencies such as the SFPUC, San Mateo County and the Golden Gate National Recreation Area to achieve access reform for this important public land.

Thank you for your public service.

- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails" in this space are actually existing dirt roads, which are currently used on a daily basis by SFPUC trucks. These roads could easily be designated as a trail system, similar to the Marin County and Santa Clara County Watersheds.
- Other local public spaces allow reasonable and appropriate public access without the negative impacts opponents of SFPUC Watershed access advocate. I draw your attention to the the watershed agencies listed above, and the Mid-peninsula Open Space District as successful examples.
- -The trail of the East side of the Crystal Springs reservoir is beautiful and many families utilize it, but the path has become overcrowded. Bikes, strollers, runners, and groups of families walking are competing for the same limited space. Providing and additional outlet can help relieve some of this stress and make both areas more enjoyable for families living here.
- Finally, the current method of public access is extremely limited and unfair to the public. The number of spots available to reserve in advance only, for the few docent led tours that are held are extremely limited. Typically, there are only a handful of reservable hiking spots available once a week, and the hikes are only at 9 or 9:30 the morning.

Please pass Resolution 160183 and work cooperatively with other agencies such as the SFPUC, San Mateo County and the Golden Gate National Recreation Area to achieve access reform for this important public land.

Thank you for your public service.

Subject:

Please protect the Peninsula watershed

Supervisors of the Land Use and Transportation Committee, I urge you to oppose opening the San Francisco Peninsula watershed.

I've lived, worked, and hiked in San Francisco and the Bay Area for 25 years. The watershed already serves its key purpose to us all: as part of our water supply. Because of its special protected condition, it also has the highest concentration of endangered and threatened species in the Bay Area.

Opening the watershed would benefit a relatively small number of Peninsula hikers and bikers - at city expense - while harming the millions who already rely on it. The watershed's isolation is exactly what makes it unique. The true impacts and costs of increased access are huge.

I've personally spoken with workers at the Marin watershed (which has a large staff and constellation of supporting organizations, for trails that see much less traffic than the Peninsula would) and with experts involved with the local Sierra Club and other environmental organizations. All of them warn against this proposal.

The watershed is near a public landfill, and I regularly find trash (furniture, chemicals, home waste, etc.) dumped along the watershed fences. Hikers increase fire risk and bring in seeds that harm the local ecosystem. Dogs disturb nesting birds and other animals. Take down the fences, and all those dangers creep closer to our water supply.

The open the watershed movement has stoked uninformed anger (as I've experienced myself, when they've targeted my page

https://www.facebook.com/savetheSFwatershed/), and glibly claims there will be environmental studies and funding while at the same time pushing to rush that process. I ask you to stand up to this and think of the wellbeing of all who need the watershed -- not just in a year, or in ten years, but for generations. The proposed level of access will destroy exactly the things which make the watershed special. And as we saw in Flint, Michigan, a water supply is the last thing we should make hasty decisions about.

Please reject this proposal.

Thank you, ieven Leroy

Subject: I support the passing of SFBOS #160183 for improved public access to SFPUC's

Peninsula Watershed

(Ms. Somera, Please include my comments below as part of the public record.)

Dear Supervisors Cohen, Peskin, and Wiener, and Mayor Lee:

I would like to enthusiastically express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my friends. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

Please also retire the "mandatory docent system". There are times when we will need to enjoy these lands with out being forced into a large group. This approach works well in other watershed lands across the state, there's no reason it shouldn't work on the Peninsula.

Please pass Resolution 160183 and require SFPUC to work cooperatively with San Mateo County to improve access to the watershed for all.

Thank you for your continued public service.

CGF SF Land Use Comm 9-12-16.pdf

Dear Chair Cohen and Supervisors Wiener and Peskin,

Please see my letter on behalf of Committee for Green Foothills regarding the proposed Resolution File #160183 that is scheduled for hearing at the Land Use and Transportation Committee meeting of September 12, 2016.

Thanks very much for consideration of expanding the docent program in the Peninsula watershed rather than allowing unmanaged access to the sensitive interior areas, including along Fifield-Cahill Ridge service road.

Sincerely,

Lennie Roberts, Legislative Advocate Committee for Green Foothills

September 4, 2016

Supervisor Malia Cohen, Chair, Land Use and Transportation Committee Supervisor Scott Wiener Supervisor Aaron Peskin

Re: September 12, 2016 Meeting of the Land Use and Transportation Committee: Resolution File # 160183 Urging the San Francisco Public Utilities Commission to Expand Public Access to the Peninsula Watershed Lands

Dear Supervisor Cohen and Members of the Committee,

Committee for Green Foothills (CGF), a regional environmental organization in San Mateo and Santa Clara Counties, has a long-standing and abiding interest in the Peninsula watershed lands dating back to the 1969 "Four Party Agreement" that protects the 23,000 acre watershed while allowing limited recreational activities within a 4,000 acre area along the eastern boundary, but not in the area contemplated by the proposed Resolution.

CGF urges your rejection of Resolution #160183 for the following reasons:

Water Quality: San Francisco and its 2.7 million water customers in 26 cities, water districts and private utilities are blessed with some of the finest drinking water in the nation. In every survey taken by the SFPUC, the public overwhelmingly supports its primary mission of **providing the highest quality water for the City and County of San Francisco and its suburban customers**, and does not want it to be compromised in any way.

Fire: The risk of catastrophic wildfire is real. 95% of all California wildland fires are human-caused. Both Big Sur's Soberanes Fire and Yosemite's Rim Fire were caused by illegal campfires in unauthorized areas. The Final Environmental Impact Report (FEIR) for the Peninsula Watershed Management Plan (PWMP) noted that the chief concern of the SF PUC with regard to water quality is catastrophic fire. "Studies in the FEIR document an increased chance of fire once the public is allowed into a formerly closed area. Should a devastating fire occur, the resulting erosion and sedimentation of watershed streams and lakes would make treatment of the water using direct filtration a difficult, if not impossible endeavor". (PWMP FEIR, Spring 2002) "A catastrophic fire...will reduce water quality, increase sediment load in the reservoirs, reduce storage capacity, and create a potential filtration problem." (Guido Ciardi, Forester, SF Water Department and President of Fire Safe San Mateo County: http://firesafesanmateo.org/projects/crystal-springs-watershed)

Trespass: Unrestricted access will foster trespass and other illegal activities including cutting new trails through protected areas for mountain biking, camping, swimming and fishing in the lakes, illegal marijuana grow sites, and hunting, among others. The PWMP's FEIR concluded: *"Although most recreational users consider themselves to be environmentally*

responsible, the experience of public land managers in the Bay Area demonstrates that a percentage of public land users will invariably violate access rules and engage in illegal trespass and the building of unauthorized trails." (PWMP FEIR, Spring 2002).

Protection of Unique Habitats: The watershed supports the highest concentration of special status species in the Bay Area (PWMP FEIR, Spring 2002). It is home to mountain lions, Bald Eagles and threatened Marbled Murrelets. This biodiversity is extraordianry, considering the watershed is adjacent to 10 Peninsula cities. "Resource agencies with statutory authority to regulate SFUC construction and other activities in the watershed (US Fish and Wildlife, CA Fish and Wildlife, and CA Department of Health Services) all expressed concern about permitting unrestricted public access to the interior of the watershed due to the unique assemblage of habitats and species that occupy the watershed and potential public health impacts." (PWMP FEIR Spring 2002).

Cost: Uncontrolled public access will greatly increase annual costs of patrolling the watershed, restoring unauthorized trails and off-limit areas impacted by trespass, and higher levels of water filtration and treatment, particularly in the event of a catastrophic fire. These costs should not be borne by the ratepayers, as expressly directed by the SFPUC in adopting the Peninsula Watershed Management Plan.

The Peninsula Watershed is NOT a Park; it is our Water Supply! San Francisco has wisely protected these lands for over 150 years. There are hundreds of miles of trails accessible to residents of San Francisco and the north Peninsula in nearby county, state, and national parks, as well as Midpeninsula Regional Open Space District preserves. The current docent program that provides managed access along Fifield-Cahill service road should be expanded and improved.

Please reject Resolution 160183 and reaffirm that the primary function of the Peninsula watershed is protection of our water supply and preservation of its natural resources. Please do support instead increased public access through an expanded docent program.

Please Pass Resolution 160183

Dear Supervisors Cohen, Peskin and Wiener:

I write to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed that is located in San Mateo County.

This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do everything you can to help achieve public access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

-Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.

At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.

- -The "trails" in this space are actually existing dirt roads, which are currently used on a daily basis by SFPUC trucks. These roads could easily be designated as a trail system, similar to the Marin County and Santa Clara County Watersheds.
- Other local public spaces allow reasonable and appropriate public access without the negative impacts opponents of SFPUC Watershed access advocate. I draw your attention to the the watershed agencies listed above, and the Midpeninsula Open Space District as successful examples.
- Finally, the current method of public access is extremely limited. The number of spots available to reserve in advance only, for the few docent led tours that are held are extremely limited. Typically, there are only a handful of reserveable hiking spots available once a week, and the hikes are only at 9 or 9:30 the morning.

Please pass Resolution 160183 and work cooperatively with other agencies such as the SFPUC, San Mateo County and the Golden Gate National Recreation Area to achieve access reform for this important public land.

Thank you for your public service.

Subject: Access to the San Francisco watershed

Dear Sirs and Madams,

I'm writing to let you know of my strong opposition to the opening of the SF watershed to the public. As a third generation Californian I would hate to see that pristine area opened to the public. The creating of trails, our further encroachment of wildlife habitat, the trampling of vegetation, and of course the garbage left behind by the "responsible" citizens coming out to enjoy our treasure. That land is our legacy to future generations and should be preserved and protected. I sincerely hope you reconsider the idea of opening the watershed to the public.

Subject: SF Watershed - Qualifications

Dear, Jane Kim, (and other respected public representatives),

Regarding the Golden Gate Audobon's "fear-campain" for the SF watershed, the author Noreen:

"Noreen has a B.A. in International Relations and a M.S. in Telecommunications."

Clearly, she is scientifically qualified with a telecommunications degree to stop 7 million people from accessing their nearby nature. http://goldengateaudubon.org/about-us/about-our-staff/

I am an electrical engineer and activist for open space. Using my mathematical judgement, please consider the ollowing ratios of trails-to-open space in your evaluation:

21,000 acres of publicly owned land is closed to the public.

40 miles of existing trails, 8 feet wide, equals, 36 acres.

So, at most, we are talking about opening up only 1/500th of the SF Watershed, on exiting trails! That is only 1/5th of 1% of the land! This should be a no brainer. Same has been done in Marin and other areas.

The Sierra Club recently stated in their monthly magazine, "we are making it as easy as possible for people to access our public lands". (Director Michael Brune).

PS. I'm the leader of the <u>Alhambra Hills Open Space Committee</u> in Martinez, we are working with the city of Martinez to save 295 ridgeline acres that once belonged exclusively to John Muir, and is now owned by a Texas developer with overseas financing. We are working with the folks who saved Roddy Ranch in Antioch, which sold to East Bay parks for \$15 million dollars for 600 acres. Using this math, the value of the SF Watershed land for public access and preservation is \$25,000 per acre, placing the value of the SF watershed's 21,000 acres at \$525 million dollars, and if you multiply for the cost of living in the peninsula, you are talking about keeping a multi billion dollar resource, owned by the public, out of use.

Anyone stating that hikers and bikers destroy wildlife is out of their minds (in my opinion). If this was true, we would close our National Parks.

It's developers that destroy the land, not hikers! Not a single species has ever gone extinct from hikers and bikers.

How would we fight fires, if they started on a fire road?? :):)

If fire is a concern, then close access in the hot months, follow the science, but don't throw the baby out with the bathwater.

The bottom line is that people grumble with change. The Transamerica building in downtown SF was the most controversial design ever. Now it is loved by all. Please have the forseight to do the right thing.

Please, for a billion dollar asset, you must consider science, not opinions of Telecommunications Masters degrees. Please provide a complete study from an unbiased 3rd party, evaluating the opening of SF watershed existing trails. I for one, only find true appreciation in nature when hiking alone near sunset, and for me, that made all the difference.

Sincerely,

Jamie Fox

Alhambra Hills Open Space Committee - Leader

SFPUC Peninsula Watershed - Resolution 160183

Dear Supervisors, et all,

I'm writing in support of Resolution 160183.

The SFPUC Peninsula watershed lands are a fantastic natural treasure and should not be locked away from responsible public access. Opening the watershed would have a cumulative effect by joining with other public lands, making this a valuable addition for those who enjoy nature. It would be easy to convert the existing dirt roads to a trail system, and cannot find any reason not to do so.

On behalf of my family and neighbors, I respectfully request that you support Resolution 160183 and ask for the SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

fhank you for your service!

Best regards,

Steve Rodrigues Brisbane, CA 94005

Subject: Increased Public Access to the Peninsula Watershed

Dear Supervisors Cohen, Peskin and Wiener:

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites or the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Subject: San Francisco Board of Supervisors file # 160183

Dear Mayor Lee, and Supervisors Avilos, Wiener, and Campos:

I write as deeply concerned citizen, a former long-term guest of the San Francisco Water Department, and widely collected landscape photographer who:

- explored and photographed the Crystal Springs Watershed from 1984 through 1995
- authored the award-winning monograph on the Watershed, The Unseen Peninsula (1995),
- wrote the Chronicle Op-Ed *Who Speaks for the Land* (2000) addressing the future of the Watershed (reproduced below):

http://www.sfgate.com/green/article/Who-Speaks-for-the-Land-2768009.php

- served on Supervisor Ammiano's Watershed Task Force from 1999- 2000
- contributed to multiple land conservation campaigns resulting in the preservation of over 75,000 acres of land on the Peninsula
- worked for Sempervirens Fund, Peninsula Open Space Trust, Bay Area Ridge Trail, San Mateo County Parks Foundation and others
- is a lifetime resident of the Peninsula

I write in opposition to SFBOS file # 160183. Knowing the land there better than most, my opposition recognition of the following facts:

- This land is **NOT** a park it's fundamental purpose is as a Fish and Wildlife Refuge
- Because it is not open to the public, this land is the environmental heart and soul of The Peninsula
- We have more hiking opportunities here on the Peninsula than any urban areas I am aware of
- It is the irreplaceable source of drinking water for 2.6 million people
- It represents a unique natural habitat, and the home of native, rare, threatened and endangered species
- Once approved, the impossibility of controlling access to this vast parcel of land may result in wildfires the like of which has never been seen in the Bay Area

(see Soberanes and Rim Fires, both started by illegal campfires)

- ANY public access to this resource will result in its degradation (see 4,000 years of human history)
- The sense of entitlement of the proponents of this bill is disturbing must we humans treat everything as a possession created solely for our enjoyment? Can we demonstrate the wisdom to leave this tiny slice of what is left of the natural world alone?

While I understand you are in a difficult position given that, for better or worse, all power derives from the people, I implore you to consider the future implications of the choices we make now. After all, there are things that, once lost, can never be recovered. This is from my year 2000 op-ed which can be read below in its entirety:

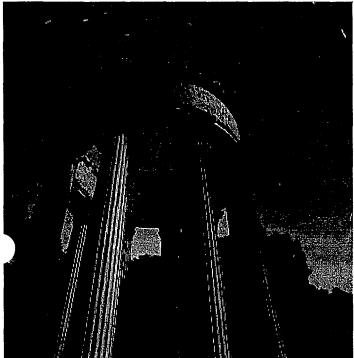

Before we commandeer this land, we need ask ourselves for what good purpose? Can we really afford to allow unrestricted access into the heart of an intact ecosystem? Will your children's grandchildren ever know the beauty, balance and harmony that once reigned there, or will they only

know the limited pleasure of waking with hundreds of others between chain link fences through woods that once sang with wildlife?

obert L. Buelteman, Jr. Robert Buelteman Studio 848 Drake Street Montara, CA 94037

Crystal Fen (1993)

Montara Mountain (1988)

280 Sunrise (1988)

Who Speaks for the Land?
-Robert Buelteman, San Francisco Chronicle, March 19, 2000

I stand as one of the very few who has enjoyed the privilege of exploring the Peninsula Watershed. Growing up in Woodside, I hiked with fellow Boy Scouts to the historic Jepson Laurel on Sawyer Camp Trail before the trail was opened to the public. In recent times I spent 10 years there, making a portfolio of photographs that in 1996 became my second book: "The Unseen Peninsula." As a lifetime resident of the Peninsula, I am torn by conflicting emotions over the possibility of opening this unique land to the public.

One of the key issues is the proposal by the Bay Area Ridge Trail Council to complete a critical section of the Ridge Trail, allowing public access to land now closed to the public. It is a foregone conclusion that the trail will eventually be established down the spine of the watershed on Fifield/Cahill Ridge Road from Skylawn Memorial Park to Sweeney Ridge above Pacifica.

The trail council proposes 365-day-a-year access for an unlimited number of bikers, equestrians and hikers. This is a far cry from allowing three docent-led groups of 25 hikers per day that I supported when I was promoting the Ridge Trail in years past.

I find myself asking: "Who speaks for the land and the natural world it supports?" The answer is not clear. The stewards of this remarkable place, the San Francisco Water Department, speak the language of preservation to benefit their constituency, the Public Utilities Commission and the city and county of San Francisco, and yet they had originally proposed building the most environmentally

destructive of enterprises, a golf course! Fortunately, that plan was dashed by a vote of the San Francisco Board of Supervisors.

On the other hand we have the Bay Area Ridge Trail Council and other land-use organizations, all of whom see this place as a means to their own ends.

Over the last 16 years I have met and worked with individuals on all sides of the argument. Don't make the mistake of believing that this is a debate between the environmental community and the government. It is not.

All parties to this debate share the same context for their arguments in which the land and the life it supports are seen not as they are, but as a commodity for human consumption: fish for catching, water for drinking, deer for hunting and land for hiking or riding or biking.

There are a few undeniable realities: Once this property is opened to the public it will never be closed. Human activity along the 9.5-mile ridge trail will negatively impact the wildlife that lives there. The very experience sought by trail users, i.e. solitude, peace and a sense of relationship with the land, will be elusive at best if the trail is opened on the terms proposed by the trail council. Unlimited access establishes a precedent that will empower other land-use organizations to press for their interests, including boating, fishing, etc.

The upward spiral of pressure on the natural world continues unabated. Since the day the Sawyer Camp Trail was opened to the public, 600 people a day on average has used it. The historic Jepson Laurel I marveled at in childhood is now surrounded by a cyclone fence, as are both sides of the entire trail, to save it from those people who would love the land to death. "Those people" would include you, me, all of us.

Before we commandeer this land, we need ask ourselves for what good purpose? Can we really afford to allow unrestricted access into the heart of an intact ecosystem? Will your children's grandchildren ever know the beauty, balance and harmony that once reigned there, or will they only know the limited pleasure of walking with hundreds of others between chain link fences through woods that once sang with wildlife?

Subject: Open the SF watershed

Dear Supervisors Cohen, Peskin and Wiener:

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

There are many examples all over the country of watersheds being used safely and responsibly by outdoor enthusiasts. It is time that the citizens of the bay area have access to the public land that makes our area so unique and wonderful. Allowing public access will only bring more focus to preserving and protecting this land, as our residents our known to do.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds. The damage done by the trucks used by the employees of the water district is much greater than hikers and bikers will ever cause.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Subject: Open the SF Watershed

Dear Supervisors Cohen, Peskin and Wiener:

Please include this email as part of the public record.

I live right next to the watershed and have for 13 years. Every day I dream about being able to see the spectacular views the watershed affords. I would love to take my children and teach them about nature. We do not have other areas of open space near us where we can go hiking without driving a long way.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service roads. It is a tremendous historical, natural, educational and recreational resource which could be used to safely improve the lives of Bay Area residents from San Francisco and the Peninsula.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Please help open the SFPUC watershed Subject:

Dear SF Supervisors Cohen, Peskin and Wiener, and San Mateo Count Supervisor Dave Pine,

I would like to express my deepest support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed.

I have always loved and respected the outdoors and natural scenic places. I strongly feel that I and others can play an even better role in ensuring such places are protected now and for future generations by opening them responsibly to the general public such that they are enjoyed more and bring further inspiration.

As a local resident this issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

Please help bring expanded access (not just limited docent-led access) to these wonderful spaces so close to our homes. I ask that you all work to achieve through cooperation with the San Francisco Public Utilities Commission, The San Francisco Planning department and the GGNRA.

Thank you on behalf of me, my wife, my children and many respectful nature-loving local citizens for your public service.

Sincerely

Alex Emanuel Burlingame

Resolution 160183

Although I am new to this area, I am not for this Resolution. Simple fact there are so few places left that are natural habits for all kinds of animals, and once you open the watersheds and people get there, within months it will be trashed with trash, body waist, homeless, drugs not to mention the traffic that the area would have to deal with. Keep these watersheds closed to the public, they will get destroyed.

Thank you

Subject: Watershed Resolution 160183 - expanded public access to the San Francisco's Peninsula

Watershed in San Mateo County

Dear Supervisors Cohen, Peskin and Wiener:

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I am a long time trail user (mountain biker and hiker) and have been exploring the trail systems in Santa Cruz, Santa Clara, and San Mateo Counties for more than 20 years. I focused my thesis for my Master of Urban Planning degree on trail development, which included an extensive literature review of trail impacts resulting from hiking, biking, and equestrian use. I consider us all lucky to have access to incredible trails in the area and am passionate about expanding access to the wild areas surrounding the Bay Area metropolitan areas. I have early memories of riding in the car along 280 with my family on our way to San Francisco to visit family. I remember looking out at the Crystal Springs reservoir and surrounding areas with great curiosity and longing to explore. I also remember learning from my father that this area was closed off to the public and feeling disappointed. I am excited about the opportunity to explore this beautiful area.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.

Subject: San Francisco Public Utility Commission's Peninsula Watershed

Dear Supervisors Cohen, Peskin and Wiener:

Please include this email as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

Please support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

Thank you for your public service.

Subject: expanded public access to the San Francisco's Peninsula Watershed in San Mateo

County

Dear Supervisors Cohen, Peskin and Wiener:

As a longtime resident of Millbrae, and a regular hiker along the Sawyer Camp Trail and surrounding areas, I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This issue is very important to me and my family - I have 2 young boys who share my enthusiasm for the outdoors. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.
- -At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship.

 Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.
- -The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

Please ask for support of expanded access and see to it that our County works cooperatively with the San Francisco Public Utilities Commission, The San Francisco Planning department and the GGNRA to achieve access reform.

Thank you for your public service.

Regards, Mike Voytovich Millbrae, CA

Letter of Support Resolution 160183: Expanded public access to a local treasure

Dear Supervisors Cohen, Peskin and Wiener:

As a San Mateo resident and father of three young kids, I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Watershed. This area is a natural local treasure in the heart of what has become the sprawling uban landscape of silicon valley. It has potential to become a major site of recreation and beacon of environmentalism for the area.

This issue is very important to me and my family. The public has been closed off from the Watershed's scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution (SFBOS file # 160183) to allow responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

Access to the watershed's existing dirt roads would allow hikers, cyclists and equestrians to visit the area's largest and most scenic unused, publicly held open space, integrating National, State and County parklands across the San Francisco Peninsula.

-At this time there are no significant, scientific concerns over water security, fire safety or environmental stewardship. Prior to opening a complete environmental investigation will surface any environmental issues that need to be addressed.

-The "trails", dirt roads actually, are currently used by SFPUC trucks on a daily basis. They could easily be designated as a trail system, much as is done in the Marin County and Santa Clara County Watersheds.

For San Franciscans: Please ask for support of Resolution 160183 and for SFPUC to work cooperatively with San Mateo County to improve access to the watershed.

For San Mateo County residents: Please ask for support of expanded access and see to it that our County works cooperatively with the San Francisco Public Utilities Commission, The San Francisco Planning department and the GGNRA to achieve access reform.

Thank you for your public service.

Public Hearing on the Subject of Public Access to the SF Watershed

I've been seeing this continually pushed on the schedule and a public session discussing access to this property seems beyond our reach. I realize somtimes thes matters take longer than anyone would wish. When I see the sort of ignorant and insulting accusations included in the attached comment from the "Committee for Green Foothills". Accusing citizens (and yes, bikers) who want access to their public lands as having a culture of trespassing and dragging misleading an inaccurate quotes from other anti-recreation/anti-bike groups makes me worry that this important subject won't get the level headed and fact based assessment it deserves.

Please ensure that all stakeholders get to have their voices heard on this important matter. Please public discussion about Watershed recreation access.

Regards,

Jason W. Strnad voter

Re: Proposal to allow unlimited public access to Fifield/Cahill Ridge through a permit system

Thank you and SFPUC staff for the April 23, 2015 meeting with environmental groups, and for providing us with the March 31, 2015 Environmental Review Note to File - SFPUC Bay Area Ridge Trail Improvements Project.

On behalf of Committee for Green Roothills (CGF), I am providing comments which are focused on environmental issues regarding the proposed changes to the existing access along Fifield/Cahill Ridge, which currently allows three guided docent groups per day, three days per week, and includes hiking, running, mountain bikes, and equestrian uses. As you know, CGF is in strong support of the docent program, and recommends that it be expanded, unter than instituting uncontrolled, unlimited public access to this sensitive area in the most sensitive heart of the Peninsula Watershed.

The proposed changes would effectively allow unlimited public access seven days per week, dawn to dusk, year-round on the Hiffeld/Cahill Ridge service road/trail and certain other connecting imits. An annual permit would be issued to each trail user, who would be required to carry this permit when using any section of the Bay Area Ridge Trail in the watershed, including the Filhel/Cahill Ridge section. It is unclear at this time as to what useoclated physical changes are proposed, i.e., installation of new fencing, gates, and/or security cameras along the Filhel/Cahill Ridge service road. Also it is unclear as to what would be the increased costs for security personnel, and who would be the three costs. would bear these costs.

The "Open the Watershed" group appears to be comprised primarily of mountain bikers, who are also proposing additional connecting trails within the Peninsula Watershed, see: https://www.youtube.com/watch?v=ae/UmANEAIU. As the Peninsula Watershed Management Plan's FEIR concludes: "mountain biking is a difficult sport to control". Trespass appears to be part of the mountain biking culture as evidenced by YouTube videos and blogs, as well as news stories and reports by agencles tusked with protection of watershed lands elsewhere. The Marln Municipal Water District has had major costs and challenges in removing illegal trails in their watershed. In an article, "Crews Battle Mount Tam's rogue trails", in the Marln Independent Journal, April 11, 2011, the MMWD's watershed manager, Mike Swezy, statech "Since the Conformmental impact report for this plan was certified in 2005, we have documented a growth of almost two miles per year from illegal trail building by likers and bikers..."

Subject: Open the watershed!

Please cease your opposition to access reforms in the SF Watershed. The local chapter of the Sierra Club (and others) have signaled that they are going to file lawsuit to stop the permit access reforms on the Cahill-Field Trail (Bay Area Ridge Trail).

Given the environmental crisis we have around the SF Bay Area, hiring attorneys and lobbying against pedestrian access on gravel service roads really is a waste of their time and their donor's money. The Sierra Club nationally promotes providing access to natural environments for people due to the mental and physical benefits that both experience and research confirm. However, the Sierra Club Regional Chapter puts forth positions that ignore all of these points. These facts also go against Sierra Club's National's goals of supporting access policies that help encourage diverse ethnic groups to participate in recreation activities in natural environments. Thank you,

Christine Hoppel

I don't get to live in Woodside or Portola Valley. I live north of Hwy 92 and we have much more limited access to open space, to trails up the mountains, to beautiful views. I am surrounded by "open space" that I can't enter. The language is almost Orwellian.

I am very disappointed the hearing to discuss this keeps getting postponed. I work for a living and its hard to keep scheduling and rescheduling time to attend this.

am disheartened by the claims from wealthy citizens who live in areas with great recreational access would seem to carry such weight against open access for everyone who doesn't live where they do.

Other watersheds in the Bay Area have open access and there is no harm that comes from it. If anything it gives

a greater opportunity for a larger number of citizens to have a stake in the preservation and care of these beautiful, sensitive and public lands.

Subject: Please support opening the Watershed to hiking

Dear Supervisor Wiener:

Please include my comments below as part of the public record.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Peninsula Springs Watershed. This issue is very important to me and my family. The public has been closed off from the Watersheds scenic, historical and recreational experiences for too long. Please do what you can to help hieve access reform

I support the resolution to grant responsible access to the SFPUC watershed lands over existing service road such as connecting Sawyer Camp Road to the top of Montara Mountain, as well as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, Old Cañada, and to historical sites for the following reasons:

- -There are no valid, scientific concerns over water security, fire safety or environmental stewardship to not allow public access.
- -The trails in question are currently used by SFPUC trucks as well as private parties such as cell phone antenna owners. They could easily become a trail system too.

For San Franciscans: Please support Resolution 160183 and work with San Mateo County to improve access to the watershed.

For San Mateo County residents: Please support expanded access and see to it that our County works cooperatively with the San Francisco Public Utilities Commission, The San Francisco Planning department and the GGNRA to achieve access reform.

Thank you for your public service, Gregg Seiler 252 States St., San Francisco, CA 94114

Subject: Peninsula watershed access, resolution 160183

Supervisor Peskin:

I just re-listened to your KQED Forum interview from last December. I'd remembered it in particular because at the beginning of the discussion you spoke of having just returned from Nepal, hiking in the Sierras, your having grown up in the East Bay Hills and more importantly the revitalization you feel when you can connect to nature.

Over the past couple years our organization, <u>OpenTheWatershed.org</u> has been advocating for the creation of similar opportunities closer to home. I recently worked with Supervisors Avalos (<u>Facebook version</u>, <u>Youtube ersion</u>) and Wiener (<u>Facebook version</u>, <u>Youtube version</u>) to create public service announcements about the opportunities increased public access to San Francisco's watershed land on the peninsula would create for residents of San Francisco and San Mateo County.

As was evident in the rest of your broadcast, you have many more pressing issues you are working on, but I'm hoping you'll support the Watershed access resolution, file number 160183, recently introduced by Supervisors Avalos, Wiener and Campos. It should be coming up before the Land Use and Transportation Committee in the next month or so.

Here's our organization's just released 4 minute video on the resolution and why it should move forward: (Facebook version, Youtube version)

Thank you for the consideration. If you or your staff have any questions please feel free to get in touch.

Charlie Krenz Legislative Advocate OpenTheWatershed.org cell 650 291 4100

Comments regarding SFBOS Resolution 160183. Request to be added to the public record.

Dear Government Representative,

Please allow me state my support for SFBOS Resolution 160183 and the Open The San Francisco Watershed movement. This is public land that the public should be allowed to access without guides or permits. There is no risk to the watershed and countless similar governments in the Bay Area (Marin WD, East Bay MUD) have allowed access. There is currently heavy truck that is much more of a concern from an environmental perspective.

This issue is very important to me and my family. The public has been closed off from the Watersheds scenic, istorical and recreational experiences for too long. Please do what you can to help achieve access reform.

Public discussion of this Resolution has now been delayed twice for reasons that are unclear and suggest backroom negotiations.

Please do everything you can to accelerate discussion of this issue and drive the necessary and fair reforms to provide access to the amazing natural area.

Thank-you,

Mark Prior 543 Grove St, #2 San Francisco, CA, 94102 District #5

# To the SF Board of Supervisors,

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Crystal Springs Watershed. This issue is very important to me. The public has been closed off from the Watersheds scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform.

I support the resolution to grant responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, and to

historical sites for the following reasons:

- -There is no science-based reasons behind not granting access to the SFPUC lands from a water supply perspective nor a public safety perspective.
- -The trails in question are currently heavily used by SFPUC trucks as well as private parties such as cell phone operators, antenna owners as well as other private owners. Why not grant the public access to their lands?
- -Local elected official such as SF Supervisors John Avalos, Scott Wiener & David Campos and San Mateo Supervisors David Pine and Don Horsley support access reform
- -Docent programs like the one in place fail when one looks at the social justice issues around how they are being implemented. For example, working people can't use the lands due to the hours that the docent programs operate.
- Residents of San Francisco and surrounding communities cherish this area because of the great recreational opportunities at our doorstep, and this reputation attracts tourism as well. A publicly accessible trail network in the watershed will put Bay Area scenic outdoor recreation into the world-class category.

Thank you for your public service and consideration of this issue,

Neal Schlatter Montara, CA

Honorable Board of Supervisors

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Crystal Springs Watershed. This issue is very important to me. I live in San Carlos, I have been an avid local trail runner for over ten years, and I look at this beautiful stretch of land everyday on my commute on the 280 wondering vhy it is kept closed off, especially considering how well public access appears to be managed by the Marin Municipal Water District and the Easy Bay Municipal Water District lands where I often run. I have participated in one of the docent-lead hikes in the Crystal Springs watershed, which was nice, but too restrictive in terms of timing and activity to consider this as an alternative to opening the land to the public. As an active member of the local trail

running community, I love to run in beautiful, unspoiled places, and I feel strongly that opening up this area to the public will not result in a negative impact. Please do what you can to help achieve access reform.

I support the resolution to grant responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, and to historical sites for the following reasons:

- -There is no science-based reasons behind not granting access to the SFPUC lands from a water supply perspective nor a public safety perspective.
- -The trails in question are currently heavily used by SFPUC trucks as well as private parties such as cell phone operators, antenna owners as well as other private owners. Why not grant the public access to their lands.

-Local elected official such as SF Supervisors John Avalos, Scott Wiener &

David Campos and San Mateo Supervisors David Pine and Don Horsley support access reform

-Docent programs like the one in place fail when one looks at the social justice issues around how they are being implemented. for example working people can't use the lands due to the hours that the docent programs operate.

Thank you for your public service.

Agenda Item 32, 5/2/16 File No. 160320. Ordinance designating tree at 46A Cook Street as a Subject:

landmark tree; May 2, 2016 hearing.

Importance:

High

URGENT REQUEST TO POSTPONE TODAY'S AGENDA ITEM 32 AND TO LEAVE OPEN THE OPPORTUNTY FOR PUBLIC COMMENT AT A SUBSEQUENT HEARING DATE.

Agenda Item 32, 5/2/16 File No. 160320. Ordinance designating tree at 46A Cook Street as a landmark tree; May 2. 2016 hearing.

Dear Board of Supervisors, Office of the Clerk of the Board, and City Attorney:

I represent the owner of the above referenced address who strenuously opposes the landmark designation of the tree located on his property. I write with respect to Agenda Item 32 set for Full Board consideration today, 5/3/2016. Please see the end of this e-mail for the full description of Agenda Item No. 32.

I respectfully request that the Board postpone and reschedule consideration of Agenda Item 32. If the Board will not reschedule the consideration of Agenda Item 32, then I respectfully request that the Ordinance shall not be passed on the first reading and the opportunity for public comment to the Full Board be left open for a future date. To deny these requests would be an improper violation of required procedure.

Yesterday, 5/2/2016, we appeared before the Land use and Transportation Committee to provide public comment. Today for the first time, we learned that the proposed ordinance is set for consideration by the Full Board today, 5/3/ 2016, as Agenda Item 32. We note that the Full Board Agenda was revised on 4/29/2016 to add Agenda Item 32, before the Land use and Transportation Committee hearing on the matter, yesterday, 5/2/2016.

The property owner and his representatives are unavailable to appear for public comment today on such short notice. We have grave concerns that it was procedurally improper to forward the matter to the Full Board before the Land Use and Transportation Committee had fully considered the matter and considered public comment at the hearing.

Further, we have grave concerns that the property owner and his supporters will be denied their right to public comment at the Full Board Meeting because of the premature consideration of the proposed ordinance by the Full Board.

Further, I specifically requested a continuance of the Land Use and Transportation Committee hearing in order to address Supervisor Wiener's questions about the extent to which the landmark would interfere with the development of additional housing. That request should not have been denied. At a minimum, the owner should be afforded an opportunity, in advance of Full Board consideration of the proposed ordinance, to supplement the record with information on this topic and to otherwise have an opportunity for present comment before the Full Board.

Further, it appears that my statements to the Committee on 5/2/2016 were prematurely excised from the video recording of my comments. Nor was I afforded the full 2 minutes of comment time due to Supervisor Wiener's and Supervisor Peskin's questions at the beginning of my presentation. We have serious concerns that this improperly terfered with the owners' ability to adequately contribute to the official record.

In closing, I reiterate the request the Board must postpone and reschedule consideration of today's Agenda Item 32. If the Board will not reschedule the consideration of Agenda Item 32, it would be improper for the Board to pass the proposed ordinance on the first reading or to close the public comment period to the Full Board without the opportunity for further public comment at a future hearing date.

Thank you for your consideration. Kind Regards, Steven Hammond

*"2016.***32.160320**

This Agenda was revised on 04/29/16 by adding Item 32

[Landmark Tree Designation - Norfolk Island/Cook Pine Hybrid Located at 46ACook Street]Sponsor: FarrellOrdinance designating the Norfolk Island/Cook Pine hybrid (Araucaria heterophylla x A. columnaris) tree at 46A Cook Street (Assessor's Parcel Block No. 1067, Lot No. 032) as a landmark tree pursuant to Public Works Code, Section 810, making findings supporting the designation, and requesting official acts in furtherance of the landmark tree designation. Question: Shall this Ordinance be PASSED ON FIRST READING?"

Scott <scott.wiener@sfgov.org>; Campos, David (BOS) <david.campos@sfgov.org>; Cohen, Malia (BOS) <malia.cohen@sfgov.org>; Avalos, John (BOS) <john.avalos@sfgov.org>

Subject: Opening the San Francisco Watershed to the public

### Honorable Board of Supervisors

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Crystal Springs Watershed. This issue is very important to me. The public has been closed off from the Watersheds scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform

I support the resolution to grant responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, and to historical sites for the following reasons:

-There is no science-based reasons behind not granting access to the SFPUC lands from a water supply perspective nor a public safety perspective.

-The trails in question are currently heavily used by SFPUC trucks as well as private parties such as cell phone operators, antenna owners as well as other private owners. Why not grant the public access to their lands.

ocal elected official such as SF Supervisors John Avalos, Scott Wiener & David Campos and San Mateo Supervisors David Pine and Don Horsley support access reform

-Docent programs like the one in place fail when one looks at the social justice issues around how they are being implemented. for example working people can't use the lands due to the hours that the docent programs operate.

Thank you for your public service.

Honorable Board of Supervisors,

I have been an avid mountain biker on the coast for 25 years. I like you am also a public servant teaching in Pacifica for the last 19 years. That said I have some definite informed opinions about the opening of the SF Watershed.

The idea that nature should be protected but not touched, is not sustainable. I believe we are nature and the more we learn to interact with nature in responsible ways, the deeper our connection grows. Our connection is desperately needed, especially for the young ones who don't even go outside anymore.

Opening the SF watershed responsibly, is a way for a desperately needed natural connection that will foster appreciation and conservation in San Mateo County.

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Crystal Springs Watershed. This issue is very important to me. The public has been closed off from the Watersheds scenic, historical and recreational experiences for too long. Please do what you can to help achieve access reform

I support the resolution to grant responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, and to historical sites for the following reasons:

- -There is no science-based reasons behind not granting access to the SFPUC lands from a water supply perspective nor a public safety perspective.
- -The trails in question are currently heavily used by SFPUC trucks as well as private parties such as cell phone operators, antenna owners as well as other private owners. Why not grant the public access to their lands.
- -Local elected official such as SF Supervisors John Avalos, Scott Wiener & David Campos and San Mateo Supervisors David Pine and Don Horsley support access reform
- -Docent programs like the one in place fail when one looks at the social justice issues around how they are being implemented, for example working people can't use the lands due to the hours that the docent programs operate. The docent program also reflects a paternal attitude toward our citizenry which breeds disrespect and contempt for those who deem it necessary for us to be supervised.

I would end at the beginning again. The idea that nature should be protected but not touched, is not sustainable. I believe we are nature and the more we learn to interact with nature in responsible ways, the deeper our connection grows. Our connection is desperately needed, especially for the young ones who don't even go outside anymore, pening the SF watershed responsibly, is a way for a desperately needed natural connection that will foster appreciation and conservation in San Mateo County. Thank you for your public service.

File 160183 FW: In Support of Expanding Public Access to the Crystal Springs Watershed

From: Sean Matthews [mailto:seanmatthews@live.com]

Sent: Monday, May 02, 2016 2:05 PM

Subject: In Support of Expanding Public Access to the Crystal Springs Watershed

Dear Honorable Supervisors,

I would like to express my support for improved public access to the San Francisco Public Utility Commission's Crystal Springs Watershed. The public has been closed off from the Watersheds scenic, historical and recreational experiences for too long. If recreational access can be achieved while preserving water quality as well as ecologically important plants and animals in the management of Marin Municipal Water District, East Bay Municiapl Utility District, and the Tuolumne River Watershed then it can be achieved for the Crystal Springs Watershed as well.

I support the resolution to grant responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge, Pilarcitos Road, Whiting Ridge, and to historical sites for the following reasons:

There are no evidence based reasons to support expanding recreational access would increase risk to the water supply and public safety.

- The trails in question are currently frequently used by SFPUC vehicles as well as private parties such as cell phone operators, antenna owners, and others.
- Numerous elected officials support expanding public access such as SF Supervisors John Avalos, Scott Wiener & David Campos and San Mateo Supervisors David Pine and Don Horsley.
- The docent program even if expanded will not result in increased accessibility. The general public will not be aware of such a program or make the additional effort required to reserve space in advance on a restrictive time table.

Thank you for your time, consideration, and service,

Sean Matthews 840 Van Ness Ave #106 94109

Protect the Watershed Statement re SF Watershed.docx; ATT00001.htm

Dear Chair Cohen and Members of the LUC,

There is an error in the Statement on behalf of major environmental organizations that I sent to you on Monday. The name of our group of organizations should be: "Protect the Watershed <u>Campaign</u>" (not Coalition).

Please discard the previous Statement and use this instead.

I apologize for any confusion.

Best,

Lennie Roberts

#### PROTECT THE WATERSHED CAMPAIGN

The San Francisco Peninsula

Watershed Lands -

Our Irreplaceable Natural Resource

The 23,000 acres of the Peninsula Watershed lands are protected and managed by the San Francisco Public Utilities Commission (PUC) with the primary purpose of production, collection, and storage of the highest quality water for the City and County of San Francisco and its suburban customers. Our water supplies are precious resources that need to be protected, particularly in light of increased drought periods that we face in the future. The Peninsula watershed has the highest concentration of rare, threatened, and endangered species in the nine-county Bay Area, which is truly remarkable considering its proximity to the highly developed urban areas in the ten adjacent cities.

In 2002, the San Francisco PUC considered allowing unrestricted access to Fifield-Cahill Ridge in the western, remote area of the watershed. U.S. Fish and Wildlife Service, California Fish and Wildlife, and the California Department of Health Services and many environmental groups were concerned about potential public health impacts including increased fire risk and degraded water quality, as well as potential impacts to the unique assemblage of habitats and wildlife that are found in the watershed. Due to these concerns, the PUC selected "Alternative E" which allows access on Fifield-Cahill Ridge for hikers, cyclists, and equestrians under the auspices of a docent program.

For the past 12 years, the docent program has increased public awareness and support for the watershed's diverse natural habitats and wildlife while at the same time protecting public health and safety. Access with docents has also helped prevent unauthorized off trail use and trespass, thereby reducing the potential for catastrophic wildfires and degradation of water quality in the four reservoirs.

Mountain bicycle and other advocates are urging the PUC to open remote areas of the Peninsula Watershed lands to unrestricted access, not only along the unpaved and unfenced service road on Fifield-Cahill Ridge, but also on numerous other interconnecting service roads and trails.

Allowing uncontrolled access to these remote areas will tremendously increase costs to taxpayers, as people will inevitably trespass into protected, sensitive areas. Fencing to prevent access would interrupt established wildlife migration corridors and would not deter trespassers – as has been well documented in other watersheds and public lands.

There is already a popular 16-mile long trail, operated by San Mateo County Parks, called the Crystal Springs Trail, which is open every day to unrestricted access. Over 300,000 people per year enjoy this paved trail east of the reservoirs near Highway 280.

Environmental organizations believe that the existing docent program, which currently is limited to three days per week, should be upgraded and expanded. An excellent model for a well-managed and effective docent program is at Jasper Ridge Biological Preserve on Stanford Lands south of Crystal Springs. A similar program could be instituted for the Watershed.

The San Francisco Board of Supervisors should pass a Resolution affirming that the primary function of the watershed is protection of our water supply and preservation of natural resources, while allowing increased public access through an expanded docent program rather than uncontrolled access.

Organizations supporting expanded Docent Program (partial list):

Bay Chapter, Sierra Club
Loma Prieta Chapter, Sierra Club
Golden Gate Audubon
Sequoia Audubon
Santa Clara Valley Audubon
Yerba Buena Chapter, California Native Plant Society
Santa Clara Valley Chapter, California Native Plant Society

Subject: Open the Watershed Please

Dear Board of Supervisors and Mayor Lee:

I am a longtime Sierra Club member and support quickly and broadly opening the Watershed to all forms of public access, to the limits allowed by the EIR.

First, the withholding of open public access to the Watershed is an issue of race and income. Folks with money can always take the time to drive the hour to open space in Marin, the East Bay, or along the southernmost areas of the San Mateo coast. They can even afford to live in those green places. But for folks in South City, Daly City, and southward, ho don't have the luxury of time to drive an hour to go for a walk in nature, who don't have the money to live in a green place but rather live in the ultra-urbanized Peninsula east of 280, the Watershed presents an amazing opportunity.

There's a lack of easily accessible hiking and biking opportunities in the urban Peninsula – parking lots at most if not all open space preserves and beaches on the Peninsula are overfull literally every weekend. The urban areas around the Watershed in particular have a critical lack of open space. I recommend visiting one of the few "parks" in the area, such as Candlestick Point or Crystal Springs trail, to see the crumbs of "open space" that folks in that area get to enjoy (and do, to overflow).

Second, standard urban planning would open the Watershed to robust public access. I've had the good fortune to have the time to backpack into multiple wilderness areas, and the joy of introducing others to these quiet, untrammeled spaces untouched by development. The Watershed, in contrast, is not wilderness by any definition — it is public open space and has been operated as such by the PUD. Such open spaces are generally appropriate for nonmotorized public use, and every other PUD in the Bay Area that has a watershed has opened it to such public use — hiking, biking, and even boating. Again, the Watershed is an urban public property that is crisscrossed with actively used roads and trails that have existed for over a century. The centerpiece is an artificial reservoir that is actively managed, using water imported from hundreds of miles away. The land, far from being pristine, was logged, farmed, and then finally operated by a public utility.

Finally, opening the Watershed will reap public health benefits and help us to protect areas that are truly wilderness and need greater protection. How do we get folks to appreciate nature, so that they will not just vote to protect open naces from development, but also vote to protect wilderness areas and other tracts of nature that they will never ee? We make it easier, not harder, to get them outside (and my public health friends agree on the urgency of this, for other reasons!). Easy access to public open space is the key to this.

Please vote NO on "Open the Watershed"

Dear San Francisco Board of Supervisors,

I am a native Californian, a lifelong resident of the Peninsula, a nature lover and avid hiker, and I am opposed to the ideas the group "Open the Watershed" is advocating for.

Not every bit of wilderness should be open to the public, and I strongly advocate NOT supporting unrestricted access ("Open the Watershed") to the watershed at Crystal Springs. Environmental groups like the Committee for Green Foothills supports an expansion of the docent system, but not unrestricted access, and there are compelling reasons for this position including:

- protection of our drinking water supply
- avoidance of fire hazards
- concerns regarding erosion of these lands
- protection of habitat for large mammals and other native wildlife
- continued uninterrupted wildlife corridors, and
- protection of large swaths of native plant species and native pollinators without the introduction of invasive species.

hese concerns are all compromised with uncontrolled public access.

It is essential in this discussion to realize what is behind the benign sounding "Open the Watershed" slogan, both because the ideas are harmful and unsustainable in the watershed, and because the watershed already is open, in appropriate ways.

Open the Watershed's ultimate plans include crisscrossing the entire watershed from Hwy 280 to the coast with trails for mountain bikes. The watershed protects our water supply, forests, and wildlife, and these are all precious resources that deserve continued oversight akin to the 2002 PUC decision allowing current access.

Any discussion about remaining open spaces on the Peninsula must take into consideration the fact that we live in a unique biodiversity hotspot. In fact, the California Floristic Province is one of only 33 other areas in the world with such rich (and threatened) endemic species. To be named a biodiversity hotspot, an area has to contain species and plant life that cannot be found anywhere else in the world. In California, our Province is home to over 3,500 different species of plants, 61% of which are endemic.

Issues that are causing the most threats to our open spaces include population pressures, loss of habitat, unsustainable resource use, and introduced non-native species. The greatest risk to our exclusive species are from the impact of humans. That is why these risks need to be weighed heavily at any discussion of protecting remaining open space.

#### CURRENT ACCESS ALREADY EXISTS:

Current access includes a 16-mile long trail (the Crystal Springs Trail) operated by San Mateo County Parks. This trail is unrestricted and open every day. Over 300,000 people on foot, horseback, or on road bikes enjoy this paved trail every year.

There is also a docent-led program and any expansion or upgrade of this pram should be based on the successful Jasper Ridge Biologica. reserve model.

But increasing access like this, that already exists, is not what the backers of "Open the Watershed" want. They want access for mountain biking.

#### WHY MOUNTAIN BIKING WILL HURT THE WATERSHED:

Mountain bike advocates are pushing hard to open the watershed for access to paved and unpaved areas, but MOUNTAIN BIKERS are NOT LIKE HIKERS. Visit the Montara trail on the west (ocean) side of the watershed to observe the kamikaze behavior of mountain bikers, and to see the destruction of the trails and surrounding habitat. Hiking on the trails where mountain bikes are unrestricted is impossible, terrifying, and dangerous.

Here are 2 videos of trail use and destruction by mountain bikers: This first video is courtesy of Arthur Feinstein of Sierra Club Bay Chapter. If you skip the first minute and 15 seconds, you are then in the woods/on the trail:

# http://vimeo.com/48784297

This next video from the mudnerud website makes abundantly clear that what mountain bikers want is to find the most steep and challenging trails possible. This group - and many others - will <u>absolutely not stay</u> on <u>the boring Service Road on Fifleld Cahill Ridge.</u>

http://www.mudncrud.com/forums/index.php?topic=1976.0

### WILDLIFE:

The disturbance to established wildlife corridors has been well document in other watersheds and public lands. Trespassers are not deterred by fences or concerns for native wildlife.

### LARGE MAMMALS & PREDATORS:

National Geographic research finds that although predators and large mammals can live in a human-dominated landscape, there are substantial costs. And there is a top-down effect that extends to other carnivores, herbivores, and even humans. The Puma Project in the Santa Cruz mountains studies pumas in areas with where pumas face challenges due to human population density and development:

http://voices.nationalgeographic.com/2015/11/30/pumas-on-the-edge-the-effects-of-human-activity-and-development/

Why top predators are essential:

Crystal Springs/SF watershed

Dear Land Use and Transportation Committee

Greetings. Although, I am unable to attend the hearing today regarding SF watershed/ Crystal Springs reservoir, I want to share the opinion of our household with you. We are opposed to opening the watershed for recreational activity at this time. It is unfortunate that we as a collective have not learned how to steward and respect pristine areas. We live off of skyline blvd. (hwy 35) and are frequently noticing illegal dumping of just about everything from mattresses to TVs to construction debris to refrigerators... and OX mountain landfill is within 10 miles. We also notice lots of trash along side the road, mostly beverage containers and take out food containers and such.

Please consider rejecting opening up of the watershed for recreational activities.

Thank you

Statement re SF Watershed.docx

Dear Chair Cohen and members of the Land Use Committee,

Attached is a statement by a coalition of major environmental organizations in support of expanded docent access rather than uncontrolled access in currently protected areas of the Peninsula Watershed.

Collectively, these organizations cover the entire area served by the San Francisco PUC's water department.

Thank you for consideration of our coalition's request that the docent program be expanded and improved, rather than opening up new areas to uncontrolled access.

Opening the Watershed

Hi Alisa,

Lennie Roberts gave me your email address. I wanted to be at the Supervisors meeting today but could not get a ride.

I am totally opposed to opening the watershed, particularly to mountain bikers. I have driven the 280 freeway since it opened, and every time I do I marvel that such a beautiful, untouched place exists in the Bay Area of 7 million people. Since most of our land here has been co-opted by people, can't we leave just one place unscathed for posterity? What will our grandchildren say about us?

Thank you for reading this.

Please reject opening Watershed lands to recreational use

Importance:

High

Dear Supervisors Cohen, Peskin and Weiner

I am an avid outdoors enthusiast and I do NOT want you to open this watershed land to recreational uses at this point in time. As the Land Use Committee I hope you will reject this proposal before you today that would open our protected pristine water supply to environmental degradation and contamination and the costs associated with patrolling the areas. Leave these spaces for the animals and plants and our water!

The City can't even take care of existing parks and open space to the level that it should because of lack of funds and personnel.

There are many existing places for people to go, outside of City limits, and within City limits, where they can enjoy the outdoors. We do not need to open this land at this time. Let's spend our resources making existing outdoor spaces better now.

A program of escorted walks and hikes is the way to go with this land. I went on one of those hikes a couple of years ago at Crystal Springs and really enjoyed it. I did not feel that I could have a better time if the land is made even more ccessible to recreational use.

Opposed to proposal to open up the watershed to unrestricted recreational use

Dear Supervisors Aaron Peskin, Malia Cohen, Scott Wiener,

We urge you to vote against the proposal to increase public access to the watershed.

- 1. This would potentially affect water quality. We live in Pacifica, where water from the watershed is used.
- 2. With more use of the watershed, the natural resources would be affected. With more people in the watershed, it would be difficult to control illegal behavior such as trespassing and starting fires.
- 3. There are many other areas already available for recreation, and for the watershed, an expanded docent program could be used instead of uncontrolled access.

Thank you,

Adrian and Ludmila Stroganoff 1 Alviso Court Pacifica, CA 94044

Peninsula Watershed Lands

#### Dear Members of the Committee:

It has now been 20 years since the publication of my book on the Peninsula Watershed Lands, *The Unseen Peninsula*.

http://www.lightlanguagepublications.com/theunseenpeninsula.html

While 2 decades have passed, the dangers of opening the environmental heart and soul of the Peninsula to the public have not abated. I served on Tom Amman's panel dealing with the future of the Watershed for several years, and urge you to reject the proposal in the interest of water quality (the #1 job), habitat protection and fire safety, not to mention the extraordinary costs associated with opening the land to the public. Also, as the result of Mr. Amman;'s panel, the public already enjoys access!

In 2000, I wrote an op-ed for the Chronicle <a href="http://www.sfgate.com/green/article/Who-Speaks-for-the-Land-2768009.php">http://www.sfgate.com/green/article/Who-Speaks-for-the-Land-2768009.php</a> and the question remains, who speaks for the land and the balanced ecosystems that live there? From my essay:

Before we commandeer this land, we need ask ourselves for what good purpose? Can we really afford to allow unrestricted access into the heart of an intact ecosystem? Will your children's grandchildren wer know the beauty, balance and harmony that once reigned there, or will they only know the mited pleasure of walking with hundreds of others between chain link fences through woods that once sang with wildlife?

In the name of respect for the life that depends on this unique piece of land, I ask you to reject the proposal to allow more public access to the Watershed.

Thank you.

Supervisor Peskin,

There has been a "rush" put on a proposal to open up the San Francisco watershed to unrestricted recreational use. This would be foolhardy, not to be decided without serious consideration.

I am a city resident and also enjoy recreation that does not impact upon our watershed. When I walk at the Crystal Springs area open to the public, the speeding bicyclists are an obvious problem. It feels close to a zip line operating in a place meant for non-intrusive activities.

I cannot imagine any loosening the restrictions that currently protect the wildlife and environment. In fact, there needs to be better enforcement in open areas, and no advancement of public use west of the watershed.

Thank you for holding the line on this proposal until careful consideration.

Re: Item 160183 [Urging the San Francisco Public Utilities Commission to Expand Public Access to the Peninsula Watershed Lands] Sponsors: Avalos; Wiener and Campos

Resolution urging the San Francisco Public Utilities Commission to provide enhanced public access to existing roads and trails in the Peninsula Watershed Lands consistent with the goals of protecting the water supply and the environmental quality of the area.

I am writing on behalf of the Golden Gate Audubon Society urging you to vote no on this resolution; or at a minimum, postpone any decision until the San Francisco Public Utilities Commission (SFPUC) has completed their study on the impacts and costs to opening the watershed. We believe the wording of the resolution itself is contradictory. How exactly does opening the watershed lands to public access protect the water supply and the environmental quality? It will not. Opening public access to our watershed will have environmental impacts – especially impacts to our drinking water, native plants, birds and other wildlife – which must be considered.

The public sees the watershed as a protected place for our water. It is also critical habitat for a variety of native plants, birds and other wildlife, many of which have been extirpated from other parts of the Bay Area. This watershed has the highest concentration of special status species in the Bay Area. <sup>1</sup> The Peninsula Watershed is within the Pacific Flyway, a major migratory route birds use each spring and fall. Many species of birds come to the watershed to spend the winter while other species use this as an important migratory stopover site where they can rest and feed. Other birds, including the Bald Eagle, breed within the protected areas of the watershed.<sup>2</sup> The Marbled Murrelet, a federally listed as threatened bird<sup>3</sup>, relies on this watershed as habitat.<sup>4</sup> The official bird of San Francisco, the

#### **GOLDEN GATE AUDUBON SOCIETY**

<sup>1</sup> http://www.sfwater.org/modules/showdocument.aspx?documentid=756

http://www.mercurynews.com/san-mateo-county-times/ci\_28567169/crystal-springs-bald-eagles-raise-two-more-chicks

<sup>&</sup>lt;sup>3</sup> http://www.fws.gov/arcata/es/birds/MM/m murrelet.html

California Quail no longer breeds within the City limits but currently this species lives and breeds within this watershed.

If the watershed is opened, our water, these habitats and the species that depend upon them will be threatened by the public and their recreational activities. Humans negatively impact wildlife by leaving food, trash, human waste, and by unwittingly transmitting weed seed and potentially spreading damaging disease to these habitats (ex: sudden oak death and more). Funding to address the impacts to water quality and wildlife have not been budgeted or identified.

Today the Crystal Springs Reservoir is truly a wilderness – one of few remaining on the peninsula. This past summer Fish and Wildlife relocated a mountain lion that had been in a residential area in San Mateo. The mountain lion was sedated, transported and released into the enclosed Crystal Springs Reservoir. <sup>5</sup> Fish and Wildlife and the SFPUC are responsible for protecting these habitats. Guidelines for safety in mountain lion territory include not hiking, biking or jogging alone. <sup>6</sup> These recreational activities pose a potentially dangerous situation and liability. The proposed resolution conflicts the mission of maintaining habitat for wildlife with recreation.

The additional 16 miles of proposed trailside fencing would negatively fragment habitats, interfering with wildlife movement. Fences cut wildlife corridors which are essential to maintain diversity of the wildlife species.

This year San Francisco is currently at normal rainfall levels due to El Nino. However as you well know, the past four years San Francisco experienced a severe drought. Last year the Peninsula Watershed was closed due to the fire danger in order to protect the watershed. Severe storms and future periods of drought are anticipated in the future. Wildfires impact sediment delivery by increasing both erosion and the potential for debris flow. Erosion from off trail use and potential for human caused fires would negatively impact water quality. The chief concern of the SFPUC in their 2002 Peninsula Watershed Plan was fire. "Studies in the FEIR demonstrate an increased chance of fire ignition once the public is allowed into a formerly closed area. Should a devastating fire occur, the resulting erosion and sedimentation would make treatment of the water using direct filtration a difficult (if not impossible) endeavor. In addition, there would be financial burden to San Francisco residents.

This watershed already has public access with a surrounding trail used for hiking, biking, horseback riding, and birdwatching. This fenced 16 mile trail, operated by San Mateo

<sup>&</sup>lt;sup>4</sup> See Fifield-Cahill Ridge Trail brochure by City and County of San Francisco and SFPUC

http://www.almanacnews.com/news/2015/08/06/red-flag-warning-fire-risk-in-county

<sup>8</sup> http://www.hcd.ca.gov/nationaldisaster/docs/sfpuc- 933356v.pdf

County Parks, and open every day of the year is more than sufficient to support the approximately 300,00 annual visits. This trail is just not that busy.

The SFPUC reviewed opening the watershed in 2002 and they, along with US Fish and Wildlife Service, CA Dept. of Fish and Game (now Wildlife) the CA Dept. of Health Services all "expressed concern with permitting unrestricted public access to the interior of the watershed due to the unique assemblage of habitats and species that occupy the watershed and potential for public health impacts." These agencies recommended the use of the docent program which "minimizes or eliminates the impacts related to unrestricted public access, such as unauthorized off trail use and ignition of fire." <sup>9</sup>

The SFPUC's successful docent program has been providing protection of the watershed through public education about our water and this resource with guided access to Fifield-Cahill Ridge. This docent program has been working for a dozen years and we support expanding this program with more training and resources.

Please protect San Francisco's water while also protecting this unique habitat for rare, threatened and endangered species and other wildlife. Vote no on this resolution.

Thank you for your consideration of these comments. If you would like to discuss this matter further, please do not hesitate to contact me at <a href="mailto:nweeden@goldengateaudubon.org">nweeden@goldengateaudubon.org</a> or 510-843-2222.

Please vote to continue protection of the San Francisco Watershed!

#### Dear Supervisors:

I am writing as a concerned citizen to strongly urge you to vote NO on a resolution to open the currently protected San Francisco watershed to unlimited public access.

The area, as it is currently managed, insures that the water supply in the Crystal Springs Reservoirs retains its pristine character. Fire hazard may be the furthest thing from our minds as we experience the current "atmospheric river", but think back to this past summer when even usually fog shrouded slopes were tinder dry. These conditions will prevail again, and unregulated human use will greatly increase the risk that a wild fire will destroy areas of the watershed with consequent degradation of the reservoirs.

I know one small area where the Mountain Bike community has developed a culture of responsible use and sharing with other users. Unfortunately, this culture doesn't extend even a few blocks to an adjacent parcel where erosion from unskilled, amateur expansion of a 'social' trail has made the adjacent downhill yards of neighbors all but unusable. Even without wildfire, if this more usual Mountain Bike culture is allowed access to the watershed lands, trail building without regard to erosion will happen, with the resultant degradation of the watershed.

In longer term considerations, the wildlife that calls this area home must also be considered. Right now this is a rare arcel of refuge for birds, mammals, and other wild creatures, and high plant diversity. All of the user impact that affect our water supply, would be even more disastrous for the plant and animal life currently survives there.

I only recently learned of the docent program that provides escorted access to this area. I believe that a large expansion of this program could provide access to many more people without degrading the resource. Furthermore any tax dollars spent on significant expansion would be minimal compared to the price of trying to enforce regulated open use—and this attempt at enforcement would certainly fail in the face of persistent attempts at illegal use by individuals who do not respect the value of the protected watershed,

Respectfully yours,
Pat Greene

(BOS)

Subject: Open the Watershed Please

Dear Board of Supervisors and Mayor Lee:

I am a longtime Sierra Club member and support quickly and broadly opening the Watershed to all forms of public access, to the limits allowed by the EIR.

First, the withholding of open public access to the Watershed is an issue of race and income. Folks with money can always take the time to drive the hour to open space in Marin, the East Bay, or along the southernmost areas of the San Mateo coast. They can even afford to live in those green places. But for folks in South City, Daly City, and southward, who don't have the luxury of time to drive an hour to go for a walk in nature, who don't have the money to live in a green place but rather live in the ultra-urbanized Peninsula east of 280, the Watershed presents an amazing opportunity.

There's a lack of easily accessible hiking and biking opportunities in the urban Peninsula – parking lots at most if not all open space preserves and beaches on the Peninsula are overfull literally every weekend. The urban areas around the Watershed in particular have a critical lack of open space. I recommend visiting one of the few "parks" in the area, such as Candlestick Point or Crystal Springs trail, to see the crumbs of "open space" that folks in that area get to enjoy (and do, to overflow).

Second, standard urban planning would open the Watershed to robust public access. I've had the good fortune to have the time to backpack into multiple wilderness areas, and the joy of introducing others to these quiet, untrammeled spaces untouched by development. The Watershed, in contrast, is not wilderness by any definition — it is public open space and has been operated as such by the PUD. Such open spaces are generally appropriate for nonmotorized public use, and every other PUD in the Bay Area that has a watershed has opened it to such public use — hiking, biking, and even boating. Again, the Watershed is an urban public property that is crisscrossed with actively used roads and trails that have existed for over a century. The centerpiece is an artificial reservoir that is actively managed, using water imported from hundreds of miles away. The land, far from being pristine, was logged, farmed, and then finally operated by a public utility.

Finally, opening the Watershed will reap public health benefits and help us to protect areas that are truly wilderness and need greater protection. How do we get folks to appreciate nature, so that they will not just vote to protect open spaces from development, but also vote to protect wilderness areas and other tracts of nature that they will never see? We make it easier, not harder, to get them outside (and my public health friends agree on the urgency of this, for other reasons!). Easy access to public open space is the key to this.

Thank you for your consideration.

-Nate McKitterick

Re: Nature News from Jake Sigg ADDENDUM TO SPECIAL EDITION

Please do not accept the proposed resolution to "open up" the Peninsula Watershed lands including Crystal Springs Watershed to unrestricted recreational use.

This is a horrible idea and will not doubt result in irreversible harm to and degradation of these vital and beautiful areas.

These are pristine lands and need to be protected. That is your responsibility. I know it is difficult to say "NO" again and again but these lands must be protected for the good of us all and for future generations.

I am sorry that I can not attend the meeting tomorrow because of work. Please vote NO.

Thank you.

Attachments:

CGF SFPC watershed access 3-13-16.pdf

Dear Chair Cohen and Supervisors Wiener and Peskin,

Please see my attached letter on behalf of Committee for Green Foothills regarding the proposed Resolution that you will be considering at your March 14 meeting.

Thanks very much for consideration of our views.

Sincerely,

Lennie Roberts, Legislative Advocate Committee for Green Foothills

March 13, 2016

Supervisor Malia Cohen, Chair, Land Use and Transportation Committee Supervisor Scott Wiener Supervisor Aaron Peskin

Re: March 14, 2016 Meeting of the Land Use and Transportation Committee Item 2: Resolution Urging the San Francisco Public Utilities Commission to Expand Public Access to the Peninsula Watershed Lands

Dear Supervisor Cohen and Members of the Committee,

I write on behalf of the Committee for Green Foothills (CGF), a regional environmental organization in San Mateo and Santa Clara Counties. CGF was founded by Pulitzer Prize winning author Wallace Stegner in 1962, and has a long-standing interest in the Peninsula Watershed lands.

CGF urges your rejection of the proposed Resolution for the following reasons:

Water Quality:. As documented in numerous public opinion surveys over the years, the public overwhelmingly supports the SF PUC's primary mission of providing the highest quality water for the City and County of San Francisco and its suburban customers, and does not want it to be compromised in any way. A survey by the SF PUC in 1993 concluded that: "the overwhelming response of the people interviewed was that the water quality should be protected and public access should not be increased" (Country Almanac, 11/17/93). Recent failure of agencies in other areas of the country to adequately protect drinking water quality heightens and magnifies these concerns.

Fire: As outlined in the Final Environmental Impact Report (FEIR) Findings for the Peninsula Watershed Management Plan (PWMP), the chief concern of the SF PUC with regard to water quality is <u>catastrophic fire</u>. "Studies in the FEIR document an increased chance of fire once the public is allowed into a formerly closed area. Should a devastating fire occur, the resulting erosion and sedimentation of watershed streams and lakes would make treatment of the water using direct filtration a difficult, if not impossible endeavor". (PWMP FEIR, Spring 2002) "A catastrophic fire...will reduce water quality, increase sediment load in the reservoirs, reduce storage capacity, and create a potential filtration problem." (Guido Ciardi, Forester, SF Water Department and President of Fire Safe San Mateo County: http://firesafesanmateo.org/projects/crystal-springs-watershed)

**Trespass:** Unrestricted access will foster trespass and other illegal activities including cutting new trails through protected areas for mountain biking, camping, swimming and fishing in the lakes, illegal marijuana grow sites, and hunting, among others. "Although most recreational users consider themselves to be environmentally responsible, the experience of public land managers in the Bay Area demonstrates that a percentage of public land users will invariably

violate access rules and engage in illegal trespass and the building of unauthorized trails." (PWMP FEIR, Spring 2002).

**Protection of Unique Habitats:** The watershed supports the highest concentration of special status species in the Bay Area (PWMP FEIR, Spring 2002). "Resource agencies with statutory authority to regulate SFUC construction and other activities in the watershed (US Fish and Wildlife, CA Fish and Wildlife, and CA Department of Health Services) all expressed concern about permitting unrestricted public access to the interior of the watershed due to the unique assemblage of habitats and species that occupy the watershed and potential public health impacts." (PWMP FEIR Spring 2002).

**Cost:** Uncontrolled public access will greatly increase annual costs of patrolling the watershed, restoring unauthorized trails and other areas impacted by trespass, and higher levels of water filtration and treatment, particularly in the event of a catastrophic fire. These costs should not be borne by the ratepayers, as expressly directed by the SF PUC in adopting the Peninsula Watershed Management Plan.

**Public Access Aleady Exists:** Over 300,000 people per year use the 16-mile long Crystal Springs Trail near Highway 280, operated by San Mateo County Parks, and open every day to unrestricted access. Access to Fifield-Cahill Ridge is provided by docents three days a week; this program should be expanded and improved.

<u>Please reject the proposed Resolution and instead pass a Resolution affirming that the primary function of the watershed is protection of our water supply and preservation of its natural resources while allowing increased public access through an expanded docent program.</u>

Sincerely,

Lennie Roberts, Legislative Advocate

Subject:

Support of Resolution for Opening the SFPUC lands: BOS Land Use and Transportation

Committee meeting on Monday, March 14 agenda item (File 160183)

Honorable Board of Supervisors:

My name is Gary Kremen.

I am the founder of Clean Power Finance, located at 201 Mission that employs over 300 people.

I was also the founder of Match.Com which was based in San Francisco.

I am also the elected board member of the Santa Clara Valley Water District ("SCVWD") representing the 240,000 people in Northern Santa Clara County closest to SFPUC watershed. The SCVWD is similar to the SFPUC but for Santa Clara County. We provided wholesale water to the nearly 2,000,000 people in Santa Clara County as well as primary responsibility for all the watersheds in Santa Clara County.

I am writing you as a private citizen with knowledge of sustainability, especially water issues.

<u>I support the resolution</u> to grant responsible access to the SFPUC watershed lands over existing service road such as Fifield-Cahill Ridge.

here is no reason for denying granting access to the SFPUC lands from a water supply or a public safety perspective. At Santa Clara Valley Water District, there has been no material issues involved in giving the public responsible access to similar land.

Recreation land is San Francisco is degraded because it is overused. By spreading some of this usage to the SFPUC lands, in the matter proposed, environmental degradation is minimized.

The trails in question are currently heavily used by the SFPUC as well as private parties such as cell phone operators, antenna owners as well as other private owners. Why not grant the public access to their lands on existing trails?

Local elected officials such as San Mateo Supervisor David Pine and Don Horsley support this.

Online permitting systems could with cameras and electronic locks such as those used by the US Forest service offer the public responsible access.

Docent programs like the one in place fail when one looks at the social justice issues around how they are being implemented. For example working people can't use the lands due to the hours that the docent programs operate.

Thank you for your public service

Gary Kremen

NO increased access to destruction of our lands and ecosystems.

#### Land Use Committee:

This rushed-through proposal for "recreation" on vital parts of our watershed needs to be immediately denied and terminated. This is nothing but allowing destructive dirt bikes and their usually ignorant and disrespectful owners to desecrate our lands and watersheds.

California has already given over hundreds, probably thousands, of acres to these disrespectful and dirty fools. They DO NOT need any more lands for their private destruction.

We should NOT have to pay for more monitoring and protection just so these thugs can destroy. We already know if they are allowed more lands and ecosystems to destroy, they will just destroy more via trespassing and creating illegal vandal trails. Keep these ignorant, disrespectful criminals out.

We already allow public access on the Crystal Springs Trail which is 15 miles long. And even though this trail is fenced, the ignorants routinely trespass. Keep these ignorant, disrespectful criminals out of our ecosystems. Let them go to the Cow Palace and pay for their dirty, violent games as seen on TV. Tell them NO we are not giving them license to destroy.

Please vote NO on increasing access to our SF watershed lands

#### Supervisor Wiener:

Please vote against more access to our watershed lands. The watershed needs to continue to be protected. Those acres of watershed provide wildlife habitat and also guarantee that we have clean water.

Mountain bikers have made outlaw trails on many public lands despite the fact that there are numerous wonderful dedicated trails for their rides. They can respect wildlife habitat by riding elsewhere.

More fencing to keep people on the trail will only cage wildlife and prevent their foraging for food. The risk of fire will also be increased. It is raining now, but drought will return.

NPR recently had a story highlighting the thrill for some people of getting past the security guards on Yerba Buena Island to party in the historical buildings. Clearly that is problematic. I can just imagine the parties down by the Crystal Springs Reservoir.

Please do not support more access to the watershed. I have walked the Fifield Cahill trail with the docent program and that is a fine way to see the area and be more educated about the wildlife and the habitat at the same time.

Thanks,

Re: LUH item Crystal Springs access

Here is the text of my letter to the LUH Committee, for your information.

Dear Supervisors,

This proposal would overturn decades of responsible management of Crystal Springs' unique, unspoiled habitat which is the source of San Francisco's clean, delicious and inexpensive water. The proposal would open access to new areas and remove all supervision for walkers, horses, and bicycles in this gorgeous unspoiled area.

Recreation access is already available through the docent program. The system is functioning well but possibilities of expanding the amount of that access could be explored but it should remain docent-led.

I have hiked in this area on a docent-led hike. It was more instructive and more fun than if I had just gone in on my own. We learned about the extensive presence of native plants, some of them rare, and we were discouraged from stepping off the trail but we knew what a privilege it was just to be there. But without supervision, it is inevitable that people and animals would stray off the trails, disturb soils and wildlife and leave litter and other waste. Why risk this pristine ecosystem, let alone our water supply?

<u>Please do not open up Crystal Springs to uncontrolled access.</u> Please do not recommend this proposal.

Thank you very much!

Somera, Alisa (BOS); Cohen, Malia (BOS); Wiener, Scott; Peskin, Aaron (BOS) REJECT the Proposal to open up the San Francisco Peninsula Watershed Lands

# Greetings,

Allowing uncontrolled access to these remote areas will tremendously increase costs to taxpayers, as people will inevitably trespass into protected, sensitive areas. Fencing to prevent access would interrupt established wildlife migration corridors and would not deter trespassers — as has been well documented in other watersheds and public lands. People will inevitably bring their dogs, just as they do to other parks and open space areas, even if there are signs prohibiting them.

No to Fouling our Watersheds -- Crystal Springs is NOT an Amusement Park

#### Dear Supervisor Wiener,

I just heard about this and I'm shocked it isn't being broadcast everywhere in the Bay Area. I can't believe that anyone except a mentally or hormonally challenged and/or unconscionably selfish individual would want to risk polluting everyone's water, possibly the best urban water in the world — and in a drought-ridden area to boot — simply for their own amusement. We residents have fought for our water quality. Anyone who thinks their recreational sorties into an area the rest of us have protected for decades are more important than decent drinking water should drink out of their toilets, or move to Flint, Michigan — that's all they deserve. We don't. Nor can the wildlife afford any more encroachment.

Nature belongs to all of us, including the local wildlife, and decent drinking water is our right. Our watershed is not an amusement park conveniently placed for the pleasure of some self-entitled and immature fools because, hey, it's cool to have fun. If they love the environment, there are plenty of opportunities for volunteering as stewards in one capacity or another. They can give to it, instead of despoiling it. It's not as if there isn't already plenty of public access to Crystal Springs.

Thank you, Alice Polesky an Francisco, CA

DO NOT OPEN CRYSTAL SPRINGS WATERSHED TO UNRESTRICTED RECREATION

## Dear Supervisors:

San Francisco has the best quality of water of any urban center in the world. That is because Crystal Springs Watershed has always been treated as a drinking water supply, not as a recreation area.

It is also the reason why the water is inexpensive. Why is there no mention of the hugely increased costs that this Resolution will entail? I find it difficult to believe the Board of Supervisors would embark on such a venture without answering that question first. You're going to have an angry public after you if you approve this.

Subject:

Please, please, please, keep protections around Crystal Springs watershed!!!

Please do not allow our Crystal Springs Watershed to be opened to unlimited access.

Unfortunately this would open up the area to much higher risk of fires which alone would jeopardize the quality and quantity of our water in an already desperate drought situation. This is without considering other environmental impacts to fauna/flora.

Opening up the use to bikers, horseback riders, hikers, etc. would inevitably introduce unplanned social trails and forbidden activities in an area that provides water for 2M+ in SF and Bay Area, and needs to be preserved with the highest of priorities. The proposal would overturn decades of successful management of this unspoiled habitat and reliable source of clean and inexpensive water.

I love to be immersed in nature, but in Northern California we cannot say we are without alternative gorgeous opportunities for this type of activity. Opening the watershed to unlimited access would be foolish at best. Let's please protect this precious watershed so close to urban areas. Why has this been rushed through with such low profile? Why haven't we heard about this more in the news and newsletters from the City? Please, keep access the way it is now or we will all regret it.

Unfortunately I cannot be present on Monday at 1:30PM due to work and home commitments. I am rure this time isn't convenient for most, so please accept this letter in lieu of my physical presence and opposition.

Land Use Committee - Peninsula Watershed

Dear Supervisors Malia Cohen, Scott Wiener and Aaron Peskin,
Please reject the proposal to open Peninsula Watershed around Crystal Springs Reservoir to
unrestricted public use. We've been over this in prior years. Nothing has changed regarding very
solid reasons to reject the current proposal to provide unrestricted public access. The current
restricted access inside the fence lines and the unrestricted access outside the fence lines have
provided access to the public, which no doubt has grown in number But the problem is just that—too
many people. Don't let the problem of too many people become a problem of too many people inside
the fence causing irreversible harms to Crystal Springs Reservoir or the Peninsula Watershed. We
can and must continue to protect our drinking water and the land around it. JUST SAY NO!

Thank you, Denise Louie

Keep San Francisco's Watershed Closed

We have enough hiking trails in the Bay Area. We do not need to open the San Francisco Watershed. It will damage our water quality and bring about extinction of the Marbled Murrelet, as well as other species. Please preserve this precious area.

Increased trail use will open up the area to littered garbage including food scraps, illegal activities, improper behavior to wildlife. Some people will not wait to get to a bathroom; a seemingly harmless activity that can be a disease/pollution vector for a watershed. An additional hazard will be the open door to a segment of the cycling culture that believes in building their own bike trails through the woods, showing no respect for laws against this or any concern effects on ecosystems or others.

And, let's be honest here, unsupervised access will bring all that, and people with their pets as well. Dogs in particular are a stressor for wildlife, sometimes causing physical mayhem and death by their activities, but often just by leaving their scent as they run in areas wildlife lives. The added stress, in a time of great stress and decreasing habitat is nore than wildlife can survive.

SF Watershed is one of the last places on the peninsula where wildlife is safe: a very reduced area from before the peninsula began to gain population some 150+ years ago.

## RARE SPECIES WILL LOSE, AGAIN.

Wildlife is under added pressure from the drought, which lessens the amount and location of food and shelter, from global warming, which causes loss of habitat, increased human activities.

Marbled Murrelets, when exposed to humans, begin an unstoppable population decline accelerated by ravens, crows, and jays.

Added trail use at SF Watershed will destroy this and other rare species, adding to yet another local spot where they are extinct.

MANY BEAUTIFUL AREAS ARE OPEN TO HIKING, BIKING, RIDING NOW There is tremendous amount of public access to so much very beautiful open space now – for hiking, biking and riding – do we really need to take the last spaces that wildlife so lesperately needs?

Once the pathway for these predators is opened, it is only a matter of time before the Marbled Murrelet and other species in the ecosystem become less numerous, damaged and locally extinct. This is not an opinion, it's affect.

The types of loss this repre that to residents and visitors is a fed pollution to the watershed, and loss of healthy ecosystems including some rare species.

In the case of the Marbled Murrelet, the damage will be done: Should ravens, crows, jays get added ingress to their heretofore enclosed in the forest habitat, no law or action after will save the local population.

They will be gone.

We've seen what happened to a still declining Golden Gate Park, we're watching the degradation of other public open spaces including Fitzgerald Marine Reserve, Big Wave hiking area, some of the public beaches, etc.

Save the San Francisco Watershed

I just posted to the Save the San Francisco Watershed Facebook page. I cannot attend the meeting, but please enter my well-considered opinion.

#### Rebecca Holland

## Today at 5:46pm

I have been in the watershed on horseback and have always been amazed by the wild beauty that has been protected for so long even though it is in the middle of a crush of urbanization. Access to this property has been an issue for a long time. Well-connected residents of San Francisco used to get access for picnics—and NOT well-connected people went up in arms. I was there with a ranger escort whose job it was to monitor our activity and even keep us well from the water's edge. Many people would block even this careful access to anyone unless it was busted wide open to all. I would rather never be allowed to go there again if it meant access without total vigilance. Unfortunately, we all know that there are not enough funds or volunteers to monitor the property 24-7, and we know how the land is treated by some people. Why is not important. Maybe economic necessity, ignorance, or whatever, but the truth is, we can't trust what would happen if we opened this pristine land. We have so much Open Space that is patrolled, let's be grateful for that and support Mid-Pen, and leave the watershed alone.

My old friends and I had a stupid joke I am going to share. We were water skiers at the time. We all agreed that 'f we saw a mushroom cloud, we would all meet at Crystal Springs with our boats.

Until then, let's keep it clean.

Cohen, Malia (BOS)

Subject:

I've personally seen people dump pesticides on streets around the watershed

I do not support to the plan to allow access to the watershed. I've personally seen a man cover his face with a bee-keeper mask (probably an exterminator?) and dump liquids on Skyline at the intersection with 92 (the area immediately surrounding the watershed). If he could have walked up to the water's edge he would have simply dumped whatever liquid that was directly into the water. He'd be less likely to get busted because the evidence would be instantly dissolved into the drinking water. He clearly knew he was dumping illegally because he chose to cover his face and the plate numbers on his truck.

Getting rid of toxic substances (like gasoline, flares) in San Mateo often requires making an appointment a week away, then showing up on time, giving your name and telling them what you plan to dispose of. They don't even take all kinds of hazardous substances. Why wouldn't an out of town contractor, a exterminator with leftover or banned pesticide see the watershed as a place to just easily dump toxic substances? They already dump them on the side of the road in the areas surrounding the watershed!

People dump random appliances and truckloads of trash up here on a regular basis. If we open the watershed then people will simply dump trash and chemicals there too.

I drive through and around this watershed every day and routinely see dumped gas and propane containers, random boxes of loose unidentified white powder, trash bags full of goo and other gross items.

I honestly don't know why people drive their trash up here and dump it on the side of the road instead of just taking it to the dump.

The plan to open the watershed is literally to just open the gates and let people in. They don't even plan to install or maintain trash cans.

Subject:

Please help keep the SF Peninsula watershed safe

Dear Supervisors Cohen and Peskin:

I'm writing to ask you to oppose the resolution to further open the San Francisco Peninsula watershed.

I've lived and hiked in San Francisco and the Peninsula for 25 years. The watershed is more beautiful and more untouched than the rest of the Peninsula for the simple reason that it has been carefully protected. Statements from Open the SF Watershed are dangerously oversimplifying the issue. (Just "take down a few signs," Scott Wiener declares in their promotional video!)

The trails at the Marin watershed demonstrate how expensive and risky it is to open such an area. The Marin Municipal Water District has not only its own staff but several affiliated nonprofit organizations who work to keep trails safe and to protect water quality, plants and wildlife. They are still only partly successful: that area is not as well preserved as the SF watershed, even though it is in a lower traffic area than the Peninsula. I've hiked there and watched dogs chase off birds and swim in the water. The workers I spoke with talked about the constant fire risks.

Further, most of the Peninsula watershed is 20 miles from downtown and already surrounded by excellent existing parks and trails. If San Francisco opens the watershed, it is basically paying to provide San Mateo County with another recreation area.

ve found the Open the SF Watershed movement is curating their Facebook page to present only positive commentary. So I've started https://www.facebook.com/savetheSFwatershed/ as a way to help share more information.

I urge you to look past their broad claims and entitled views about how the land should be used. Its best use is to preserve it for future generations. Personally, in order to keep the watershed and its endangered species safe, I'm happy to keep admiring it from the other side of a fence.

Thank you, Lieven Leroy

Request for the SF BoS to vote NO on opening the Crystal Springs watershed to the public

Please include this request in the record to urge the SF BoS <u>NOT</u> to open the Crystal Springs reservoir and watershed to the general public.

This is an urgent and most necessary request to deny consideration of an ill conceived 'proposed plan' that the Crystal Springs Reservoir and Open Space watershed be opened for public access; specifically bikers and hikers but, as importantly, to any form of human encounter. We are firmly against any suggestion(s) or actions that public access be approved in or to the pristine

Crystal Springs watershed area as devastation and destruction to all living within the greenbelt will result and its future irretrievably lost. This 'experiment' was tried many years back and FAILED miserably ... and the idea was subsequently rejected/abandoned.

The Crystal Springs watershed is a precious asset belonging to ALL ... but to be enjoyed from a distance. Human interaction will produce NO positive effect; on the contrary, it will de-enhance any benefit to the retention of this last piece of unspoiled open space in the SF Bay Area.

Most sincerely,

Susan and Gene Chaput 1(415) 613-0014

Dear Supervisors Cohen and Peskin,

I urge you to vote against the resolution to open the Peninsula Watershed for unrestricted recreation in the Land Use and Transportation Committee.

I am a San Francisco resident and PUC rate payer. I have spent the last ten years devoted to the responsible stewardship of our public lands as a natural resource manager. I am an avid hiker, bicyclist and dog walker. I would rather have my water supply protected over having access to the Peninsula Watershed.

The watershed lands provide incredible and irreplaceable services to the Bay Area in terms of water filtration and storage. I would have hoped that four years of drought and the Rim Fire would have taught our leaders and the public to appreciate those services more fully. Make no mistake, vital ecosystem services are placed in harm's way with the opening of the watershed for unrestricted access.

Scott Wiener briefly mentions environmental review in his advertisement for opening the watershed before asserting that it's as easy as removing a few signs and opening a few gates. This is short-sighted and very narrow thinking. Supervisor Wiener fails to address funding for rangers and staff to maintain the roads and trails with increased use. In an area rife with Sudden Oak Death, who will cover all the roads and trails after a storm like yesterday's to ensure that trail users are safe from failing tanoaks? Who will ensure parking areas are safe and clean? This thinking also fails to account for dealing with impacts to the biological resources, including the sixteen threatened and endangered species on the watershed.

If we are going to open the Watershed, the City must provide sufficient rangers and maintenance staff to cover the 23,000 acres every day of the year. As a tax payer in San Francisco, I do not want to fund that in San Mateo County. How will tax payers without cars be afforded access to their watershed? Will the city begin shuttle service to ensure equitable access? There are many residents who will *never* visit the watershed if it is opened. The PUC has assured rate payers that they will not bear the financial burden of recreation on its lands. So who will pay? Hikers and bikers? Or will we open the watershed and provide inadequate services to protect our water supply and the rich biodiversity of the lands?

These are difficult questions at a t' when there is great pressure to provid nore recreation opportunities. I believe that the Land Use and Transportation Committee wants to steward Sun Francisco's land, and I hope you will acknowledge the challenges and investigate the costs of land management before passing any resolutions to open the watershed. I recognize your situation but urge you to do what is best for the public, which is to protect our water supply and the biodiversity of the watershed.

Best Wishes,

Rachel Kesel 33 Massasoit Street San Francisco, Ca 94110

# MEMORANDUM

TO:

Harlan Kelly, Jr., General Manager, Public Utilities Commission Phil Ginsburg, General Manager, Recreation and Park Department

FROM:

Alisa Somera, Assistant Clerk, Board of Supervisors

DATE:

March 4, 2016

SUBJECT: LEGISLATION REFERRED TO COMMITTEE

On February 23, 2016, Supervisor Avalos introduced the following proposed legislation, and on March 1, 2016, it was referred to the Land Use and Transportation Committee:

#### File No. 160183

Resolution urging the San Francisco Public Utilities Commission to provide enhanced public access to existing roads and trails in the Peninsula Watershed Lands consistent with the goals of protecting the water supply and the environmental quality of the area.

This matter is being referred to you since it may affect your department.

If you have any comments or reports to be considered with the proposed legislation, please forward them to me at the Board of Supervisors, City Hall, Room 244, 1 Dr. Carlton B. Goodlett Place, San Francisco, CA 94102 or by email: <a href="mailto:alisa.somera@sfgov.org">alisa.somera@sfgov.org</a>.
