

AARON JON HYLAND, AIA

Aaron is passionate about collaborating with creative socially-minded people to build community through design thinking, architecture, preservation and placemaking. For over 25 years, he has been making historic and culturally significant buildings and sites relevant, celebrating what makes these places special while at the same time accommodating change and future possibilities. He thrives on engaging people and communities to create memorable inspiring places to live, work and play - connecting them to each other and to their sense of place. As founder of PlaceMaking San Francisco, Aaron believes San Francisco should be a leader in the International PlaceMaking Movement. Aaron is a mentor in AFSF's flagship program, Build SF, providing high school students exposure to careers in the built environment. Aaron believes we have the responsibility to provide opportunities to the following generations - our future leaders.
